## Overview from an Independent Perspective

New Brunswick is one of Canada's three Maritime provinces, and is the only constitutionally bilingual province ( French and English ) in the federation. The provincial capital is Fredericton. The population of New Brunswick is almost 750,000; a majority are English-speaking, but there is also a large Francophone minority ( 32% ), chiefly of Acadian origin.

As of fall 2009, the Province of New Brunswick prohibited the sale and use of more than 240 over-the-counter lawn care pest control products, specifically 2,4-D, despite the fact that these products are **FEDERALLY LEGAL** and **SCIENTIFICALLY SAFE**. This prohibition was imposed on the pretext of improving the environment and quality of life.

Despite prohibition, it is still permitted to spot-treat weeds using pre-mixed, over-the-counter products. Additionally, Professional Lawn Care Companies are permitted to use pest control products if they have proper training in Integrated Pest Management, and do not perform pest control applications on more than fifty per cent of a lawn in one season. Evidently, **NOT A SINGLE** Government Official who designed or supported this ridiculous prohibition has ANY recognized expertise, training or background in matters concerning pest control products or turf management !

Pest control products are still allowed on parks, sports fields, school yards and hospital grounds. As usual, the Golf Industry has been provided with an **EXCEPTION** to the prohibition. Forestry and agriculture are not affected at all.

There are three principal Environmental-Terror-Organizations operating in New Brunswick : Canadian Association of Physicians for the Environment ( C.A.P.E. ), Canadian Cancer Society, and New Brunswick Lung Association.

On February 18<sup>th</sup>, 2009, Gideon Forman, enviro-maniac-leader and fund-raiser for C.A.P.E., said golf courses do not qualify as an « *essential* » sector for herbicides or pesticides. While acknowledging the economic importance of golf courses, he said that it possible to maintain courses through so-called alternative non-toxic methods. « *I think we recognize that golf courses have some special challenges, so they may need some extra time perhaps, but we would like to see them included in the ban* » he said. This position is also supported by other Environmental-Terror-Organizations, like the Contemptible and Radical Canadian Cancer Society.

Environmental-Terrorism is being stopped elsewhere in Canada. In January 2010, the Green Space Industry outlined the list of charges against the Government of Ontario and Enviro-Maniac-Government-Officials working in the Ministry of the Environment. Additionally, individual Enviro-Maniac-Members of known Environmental-Terror-Organizations are also facing charges of **FRAUD** under the Criminal Code.

Additionally, Dow AgroSciences has gone ahead with a threatened suit against the federal government under the North American Free Trade Agreement ( N.A.F.T.A. ), seeking a repeal of Quebec's prohibition of **FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE** conventional pest control products containing 2,4-D, and demanding at least **TWO MILLION DOLLARS IN DAMAGES**.

## Atlantic Canada Conspiracy to Prohibit Pest Control Products

### PESTICIDE BAN ' A GOOD FIRST STEP ' ACCORDING TO ENVIRO-TERRORISTS

---

May 6<sup>th</sup>, 2010

Enviro-Maniac Editorial

Telegraph-Journal

This is the season when many property owners resume the dandelion wars in pursuit of pristine lawns. But the rules in New Brunswick have just changed. It's no longer OK to douse the grass with 2,4-D-based pesticides.

Environment Minister [ and Enviro-Maniac ] Rick Miles recently issued a seasonal reminder that our province is the first in Atlantic Canada and the third in the entire nation « *to adopt a comprehensive product ban on lawn care pesticides* ». [ Big Deal ! ] Ontario and Quebec already have similar bans.

It's a response to growing concerns by [ Environmental-Terror-Organization, including ] Canadian Cancer Society that chemicals used in cosmetic spraying of lawns [ allegedly ] pose a serious potential health risk. The new rules outlaw the sale and use of more than 240 over-the-counter lawn care pesticides.

It sounds good, but is it good enough ? [ Not for Enviro-Maniacs ! ]

# New Brunswick

## Atlantic Canada Conspiracy to Prohibit Pest Control Products

*NO prohibition is EVER good enough  
for Environmental-Terrorists !*

According to Ellen Snider, [ Enviro-Maniac and ] senior manager of public issues for the Canadian Cancer Society, [ an Environmental-Terror-Organization operating ] in New Brunswick —

*<< In a word — NO. You could call it a good first step, but the message is we still have a long way to go in New Brunswick. It's a policy, not legislation, and it's hard to enforce a policy. Policies can be changed with no publicity. We'll be closely following what happens from now on. >>*

[ Enviro-Maniac ] Snider is pleased that the province has committed to reviewing its pesticide legislation, regulations and policy before the end of this year.

Ontario, [ Enviro-Maniac ] Snider adds, has adopted formal legislation not only restricted to 2,4-D products, but covering 87 other chemical ingredients as well. In New Brunswick, there are EXCEPTIONS for golf courses, parks — and curiously — schoolyards and hospital grounds.

## Atlantic Canada Conspiracy to Prohibit Pest Control Products

[ Enviro–Maniac ] Snider points out that GOLF COURSES are the only exception in Ontario. FORESTRY and AGRICULTURE operations are also NOT covered by the New Brunswick regulations.

The Canadian Cancer Society's [ Enviro–Terror ] position, says Snider, « *is that the use of these pesticides for the cosmetic appearance of lawns is of no benefit to anyone and there's growing concern and evidence of its risk to health* ». [ Wrong ! ]

The government says there's an ACCREDITATION PROGRAM for lawn care companies permitting them a limited use of pesticides « *if they have proper training in integrated pest management* ».

There's also leeway for property owners to SPOT–TREAT WEEDS using pre–mixed over–the–counter products.

For the last nine years, I've been a green–grass [ Enviro–Maniac ] advocate — one of those people who believe that green lawns should really be green projects — without the use of chemicals which have a potential for [ allegedly ] harming us and our environment.

I attribute my conversion from cosmetic use of chemicals to my daughter, who lives in Ottawa, [ a haven for Enviro–Maniac activity ]. She was the person who convinced me there was something [ allegedly ] wrong about dousing our lawns with pesticides which could be potentially harmful to the environment and to people, [ despite the fact that they are federally legal and scientifically safe ].

The author of this editorial is Fred Hazel, a retired editor–in–chief of this newspaper [ as well as an Enviro–Maniac ].

# Background Information from an Independent Perspective

*Cancer–Maniac conspiracies have not saved a single life,  
nor have they prevented a single case of cancer*

The Contemptible and Radical Canadian Cancer Society MISUSES the money that it collects for cancer research by SQUANDERING **tens of thousands of dollars** on CONSPIRACIES leading to the NEEDLESS, SENSELESS, and MALICIOUS prohibition of FEDERALLY LEGAL, SCIENTIFICALLY SAFE, and TOTALLY IRREPLACEABLE pest control products.

*Despicable–Cancer–Maniacs could not  
care less about the health of the public*

Instead of increasing the public's awareness of the largest known preventable causes of cancer, such as smoking and diet, these Despicable–Cancer–Maniacs prefer SCAMMING, DECEIVING, and ALARMING the public into believing there is some NON–EXISTENT DANGER with conventional pest control products.

Rather than providing information for improving the lifestyle choices of the population that could, without a doubt, actually SAVE LIVES, these Despicable–Cancer–Maniacs prefer concocting MYTHS, DECEPTIONS, FEAR–MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, TERROR, and PARANOID CONSPIRACIES about conventional pest control products.

# Background Information from an Independent Perspective

*Cancer–Maniacs are greedy,  
avaricious hideous hypocrites*

The Contemptible and Radical Canadian Cancer Society is a vast PROFIT–MAKING Environmental–Terror–Organization operated by a few dozen Cancer–Maniac–Vixens who are PAID–FOR–PROFIT as SUB–VERSIVE LOBBYISTS with a mandate to COERCE, INTIMIDATE, and ALARM the public. Most Cancer–Vixens are UNEDUCATED HOUSEWIVES !

NOT A SINGLE Cancer–Maniac has ANY recognized expertise, training or background in matters concerning pest control products !

However, Cancer–Maniacs have VAST EXPERTISE in accumulating 135,000,000 dollars per year by CONCOCTING FRAUDULENT LIES concerning conventional pest control products.

A major source of donations collected by Cancer–Maniacs originates from the sale of Daffodil flowers.

*Pesticide–treated–toxic–cancer–daffodils  
are sold–for–profit by Cancer–Maniacs  
for their annual spring awareness campaign*

# Background Information from an Independent Perspective

Cancer–Maniacs LIE, CHEAT, and DECEIVE the public about PESTICIDE–TREATED–CANCER–DAFFODILS.

Since Daffodils are an IMMENSE source of income for Cancer–Maniacs, of course they have ABSOLUTELY NO SCRUPLES regarding the use of pest control products ... when it suits THEM !

Contract–Daffodil–Growers working for Cancer–Maniacs use conventional pest control products on a regular and continuous basis, and have done so for decades.

IRONICALLY ... PESTICIDE–TREATED–CANCER–DAFFODILS sold by Cancer–Maniacs are NOT TOXIC.

IRONICALLY ... conventional pest control products used to produce PESTICIDE–TREATED–CANCER–DAFFODILS are SCIENTIFICALLY SAFE since they have been scrutinized and approved by the HUNDREDS of expert scientists at Health Canada !

IRONICALLY ... Cancer–Maniacs consider the hundreds of qualified scientists of Health Canada's respected Pest Management Regulatory Agency to be incompetent and/or incapable of arriving at correct scientific conclusions regarding pest control products.

IRONICALLY ... Cancer–Maniacs constantly discredit the work of Health Canada, and yet, this federal agency has determined that the pest control products used for producing the DAFFODILS sold by Cancer–Maniacs are SCIENTIFICALLY SAFE.

IRONICALLY ... Both Daffodil Production for Canadian–Cancer–Society and the Professional Lawn Care Industry use the SAME ingredients that are needed to control insect and weed pests.

IRONICALLY ... Professional Lawn Care maintenance requires LESS PESTICIDE–INPUTS than Daffodil Production.

# Background Information from an Independent Perspective

*If it is safe touch and hold a pesticide-treated daffodil,  
it is also safe to walk on a pesticide-treated lawn*

*Cancer-Maniacs are  
LYING, CHEATING, and DECEIVING  
BASTERDS !*

*THEY CANNOT BE TRUSTED !*

WARNING — Everybody must STOP MAKING DONATIONS to the Contemptible and Radical Canadian-Cancer-Society !

WARNING — Everybody must STOP buying PESTICIDE-TREATED-TOXIC-CANCER-DAFFODILS from Cancer-Maniacs !

WARNING — The Golf Industry must terminate all relationships with Canadian-Cancer-Society, and suspend all related charitable tournaments.

Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE ! It is a series of e-newsletters developed for the education and entertainment of the turf manager. Force Of Nature is a report from National Organization Responding Against Huje that seek to harm the Green Space Industry (NORAHG).

# O

Huje is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing that families are in some NON-EXISTENT danger with conventional pest control products. Huje also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS prohibition of FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE conventional pest control products.

# R

All information, excerpts, and pictures contained in this document were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release. The events, characters, companies, and organizations, depicted in this document are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. Don't thank us. It's a public service. And we are glad to do it.

# A

Force Of Nature is the brainchild of William H. Gathercole and his entourage. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in public affairs, workplace safety, and environmental compliance. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority. Mr. Gathercole is now retired from Force Of Nature, although his name continues to appear as the founder. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status, that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully ! For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of Environmental Terror for the entire Modern Green Space Industry across Canada. Mr. Gathercole's involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec. Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair.

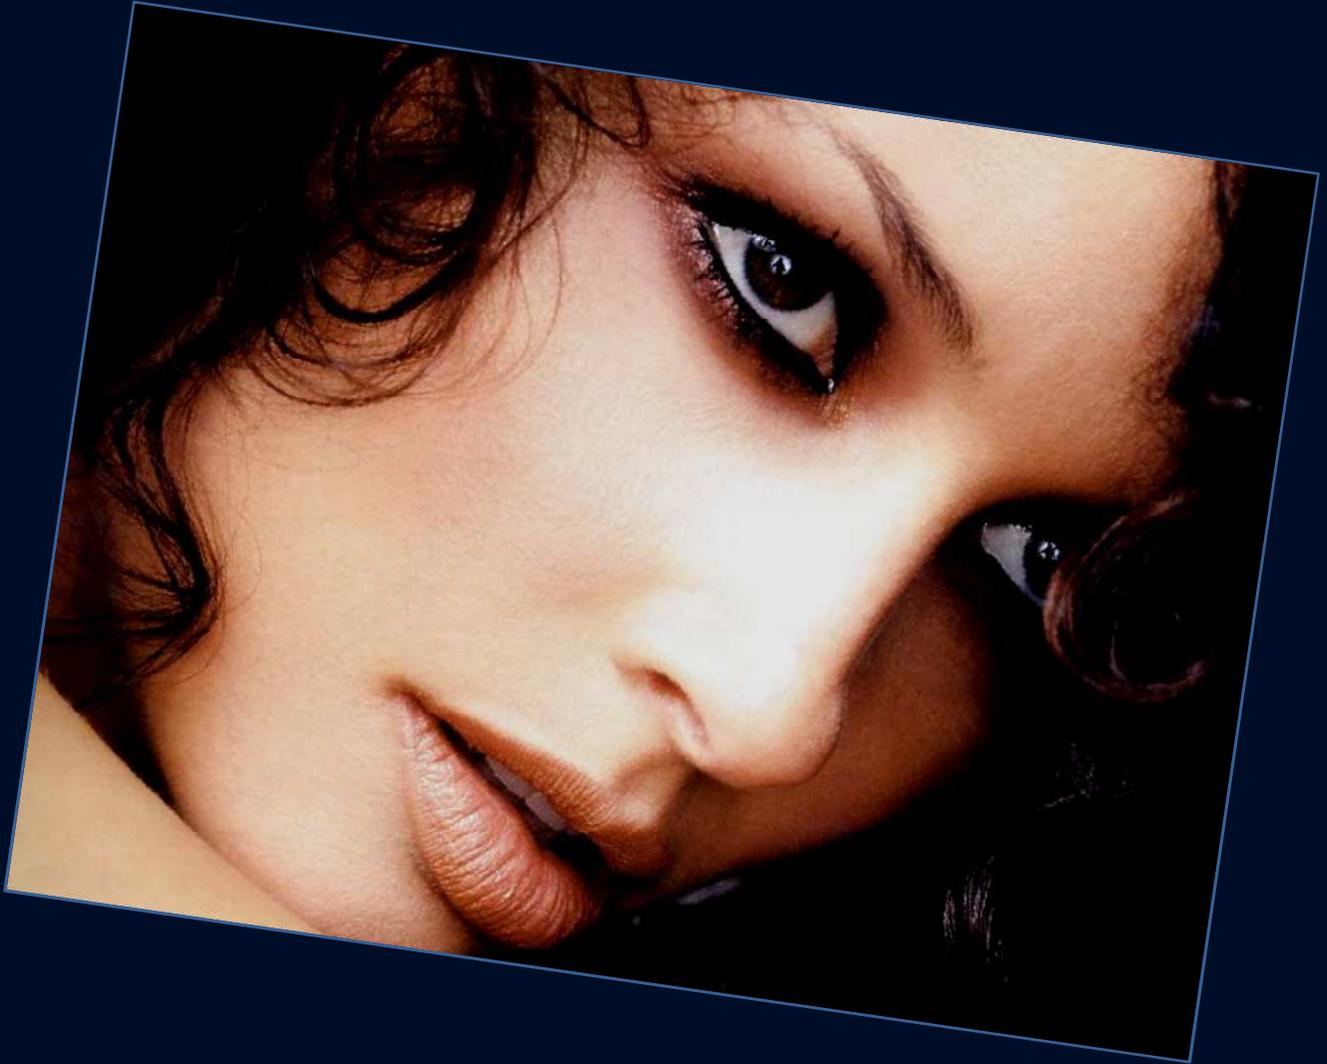

# H

Mr. Gathercole and his entourage have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. Through Force Of Nature, Enviro Maniac Activist Huje are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Maniac Culprit is a misguided adversary, each still deserves our respect. The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry. Their pretentious prohibitionist rants have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd Huje is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.
