Overview from an Independent Perspective

INTRODUCTION — OUR WORLD OF POLITICIZED SCIENCE

The discussion of « *politicized science* » is ANATHEMA to the Environmental-Terror-Activists, who do not like it when certain issues are examined that may not be generally known, but need to be explained.

Many deeply held beliefs need to be re-examined.

Many of these beliefs have been entrenched in our minds for decades by our trust in social policies that has become « *politicized* » with the perpetuation of « *junk science* », and the use of coercion through « *environmental terrorism* ».

In our world, the « *politicization* » of science occurs when Environmental-Terror-Activists use economic or legal pressures to influence public policy.

In many cases, Environmental-Terror-Activists Policies spread to certain portions of the population, such as the Green Space Industry.

Environmental-Terror Policies often lead to business failures, bankruptcies, unemployment, despair, and destitution.

The depraved indifference of Environmental-Terror has even led to DEATH — on a MASSIVE scale.

« *Politicized science* » has triumphed whenever politics have outweighed scientific fact.

« *Politicized science* » has prevailed when measures were taken that often had little basis in fact or « sound science ».

It is now common knowledge that the world of « *politicized science* » DEMONIZED one of the most impressive chemicals of the Twentieth Century — DDT.

We are told that the current array of modern and conventional pest control products used by the Green Space Industry MAY create the problems once encountered with the likes of DDT.

This is false !

The Green Space Industry needs to remind the public of the many MISCONCEPTIONS concerning DDT.

The public needs to be given a reality check on this matter.

REMOVING DDT — AN EXAMPLE OF DEPRAVED INDIFFERENCE

The removal of DDT from the world market is a good example where social politics were implemented based upon « *junk science* ».

Our World of Politicized Science

PESTICIDE BAN BOON TO BEDBUGS

Bronwyn Eyre

August 18th, 2010

The StarPhoenix (Saskatchewan)

Selected and adapted excerpts

If you follow the news even lightly, you'll know that bedbugs — flat-bodied blood-suckers that can hide in all kinds of small crevices and live up to a year without eating — are making a horror-movie-like RESURGENCE everywhere, Saskatchewan included.

Pest control experts say the infestation already comprises a GLOBAL PANDEMIC.

Nice. So are we going back to the BAD OLD DAYS when, to fight this resilient vermin, people regularly Poured oil or boiling water into floor crevices, and Traced kerosene around bed mattresses ?

The French writer Simone de Beauvoir attributed no small part of the Parisian CAFE CULTURE to the bedbug. Such was its infestation of hotels and dwellings that, to converse and write, everybody sought refuge in cafes.

In 1939, after four years of work, Swiss chemist **Paul Müller** developed a synthetic insecticide — DDT — which was basically SAFE FOR HUMANS, but deadly against malaria-causing mosquitoes, typhus-causing lice, plague-spreading fleas ... and bedbugs.

For preventing the deaths of tens of millions of people, Müller was awarded the 1948 Nobel Prize for Medicine.

DDT

Our World of Politicized Science

In 1970, according to U.S. National Academy of Sciences report —

<< To only a few chemicals does man owe as great a debt as to DDT. >>

But in the wake of Rachel Carson's 1962 anti-chemical blockbuster *Silent Spring*, in which she DISTORTED SCIENTIFIC DATA TO SUIT HER PURPOSE, chemophobic zealots began lobbying for a ban on the wonder insecticide.

In June 1972, the U.S. Environmental Protection Agency (EPA), DESPITE CONSIDERABLE EVIDENCE OF ITS SAFETY, outlawed DDT.

After seven months of testimony, the EPA's own administrative law expert declared that the insecticide ...

<< [...] is not a carcinogenic, mutagenic or teratogenic hazard to man, and its proper use does not have a deleterious effect on freshwater fish, estuarine organisms, wild birds or other wildlife. >>

But those who apparently find NO problem in the CONSEQUENT DEATHS OF MILLIONS WHO DIE FROM MALARIA AND OTHER INSECT-CAUSED ILLNESSES — or who would rather put up with the bedbug affliction than acknowledge the wonderful efficacy of DDT — still celebrate that 1972 ban as a great victory.

Why do these enviro-fanatics want to take us back to medieval times ?

How do they always manage to triumph on such matters ?

And why does one instinctively know that, despite the building chorus of « *Bring Back DDT* », these people will prevail ?

Instead of returning to a procedure that has proven its worth, we're left with prescriptions for fighting bedbugs that are LAME AND LAUGHABLE — the planting of mosquito-repelling trees such as neem or oak, for example.

DDT

Our World of Politicized Science

Paul Driessen, author of *Eco-Imperialism: Green Power, Black Death* (2003), writes contemptuously of how New York City's Bedbug Advisory Board recommends that people dealing with the problem —

<< Use blow-dryers to flush out (maybe five per cent of) the bugs, then throw away (thousands of dollars worth of) infested clothing, bedding, carpeting, and furniture. Hire (expensive) professionals who have insecticides that (may) eradicate the pests — and hope you don't get scammed. >>

(Obviously, the parentheses are Driessen's, not the board's.)

So-called volumetric heating, the super-heating of bedbug-infested spaces to 60°C — recently conducted in a University of Saskatchewan residence, for example — apparently works, but it's expensive, time-consuming, short-term and localized.

So if DDT is the all-around best prevention against malaria and other tropical diseases, and is also effective against bedbugs, let's bring it back — if only to test claims that some bedbug resistance to it now exists, or remains.

As Driessen also says —

<< If not for the economy and mental health of Americans afflicted by bedbugs, then do it for Africa's sick, brain-damaged and dying parents and children. >>

In 2006, the World Health Organization finally acknowledged that DDT is an unrivaled insecticide that ought not be banned.

But in 2009, the United Nations Environmental Program nevertheless announced its intention to rid the world of DDT by 2020.

If only the millions who are vulnerable to the ravages of malaria — and now the trauma of experiencing bedbugs — could have a say on the matter.

DIT... FOR CONTROL OF HOUSEHOLD PESTS

Bureau of Entomology and Plant Quarantine
Agricultural Research Administration
United States Department of Agriculture, and
the United States Public Health Service
Federal Security Agency

Washington, D. C. • Issued March 1947

N O R A H G

Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against Huje that seek to harm the Green Space Industry (NORAHG). It is a series of Reports destined for the Green Space Industry, the Environmental Terror Movement, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY. The neutrality of these Reports might be disputed.

Huje is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing there is some NON-EXISTENT danger with conventional pest control products. Huje also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS CONSPIRACY to PROHIBIT conventional pest control products that are FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE.

All information, excerpts, and pictures contained in this Report were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release. The events, characters, companies, and organizations, depicted in this Report are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. Don't thank us. It's a public service. And we are glad to do it.

Force Of Nature, and its various incarnations, is the brainchild of William H. Gathercole and his entourage. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in public affairs, workplace safety, and environmental compliance. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority. Mr. Gathercole is now retired from Force Of Nature, although his name continues to appear as the FOUNDER. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status, that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully! For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of Environmental Terror for the entire Modern Green Space Industry across Canada. Mr. Gathercole's involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec. Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair.

Mr. Gathercole and his entourage have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. Through Force Of Nature, Enviro Maniac Activist Huje are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Maniac Culprit is a misguided adversary, each still deserves our respect. The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry. Their pretentious prohibitionist rants have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd Huje is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.
