ILLEGAL

FORCE OF NATURE

THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)
Overview from an Independent Perspective

Adequate broad-leaved weed control with Fiesta Herbicide is only achieved with an EXHORBITANT 6 TO 8 REPEAT APPLICATIONS PER SEASON, or more.

Even with REPEAT APPLICATIONS, the weeds are NEVER ENTIRELY KILLED, and EXCESSIVE USE of iron will lead to a DETERIORATION IN TURF QUALITY AND DENSITY, which will lead to further problems with weed invasion.

Fiesta Herbicide was registered and approved for use in the Province of Ontario in April 2010, and was quickly incorporated into weed control programs — NOT BECAUSE OF ITS EFFICACY, but because of the 2009 legislation that IMPOSED AN UNNECESSARY AND UNREALISTIC ANTI-PESTICIDE PROHIBITION which PREVENTED Professional Lawn Care companies from using conventional herbicides that WERE TRULY EFFECTIVE AS WELL AS SAFE.

The CATASTROPHIC CARNAGE of the Professional Lawn Care Industry in Provinces like Ontario was EXTENSIVE because there were NO valid economical alternatives to replace the prohibited conventional products.

Because of PROHIBITION in Ontario, the Professional Lawn Care Industry LOST OVER 500,000,000 DOLLARS, with UP TO 12,500 UNEMPLOYED, and ONE-COMPANY-PER-WEEK DISAPPEARS INTO TOTAL OBLIVION.

The vast majority of users OVERWHELMINGLY CONDEMN Fiesta, hence, the MAJOR REASON for the DOOMING of the Professional Lawn Care Industry that ENTIRELY DEPENDED upon its success.

In fact, conventional herbicides, such as 2,4-D, are deemed SAFER than Fiesta.

Fiesta, and any of its iron-based derivatives, are considered to be DISMAL FAILURES as weed control products, especially because of the EXHORBITANT NUMBER OF REPEAT APPLICATIONS REQUIRED EVERY SEASON.

In fact, ALL so-called Green Alternative Pesticides and Green Alternative Methods are DISMAL FAILURES — they DO NOT WORK!

By the year 2011, in jurisdictions like Ontario, the EXHORBITANT REPEAT APPLICATIONS AND STUNNINGLY HIGH COST of Fiesta prompted Professional Lawn Care companies to CONCOCT their own iron-based mixtures through the ILLEGAL USE of LOW-COST AGRICULTURAL FERTILIZER IRON.
Overview from an Independent Perspective (continued)

On March 12th, 2012, the Government of Canada warned the Professional Lawn Care Industry that any person found using/promoting an unregistered iron fertilizer for weed control will be subject to compliance and enforcement measures.

According to a Government Official at Health Canada...

It has recently come to our attention that a number of LANDSCAPE ONTARIO MEMBERS are promoting the use of UNREGISTERED IRON-BASED FERTILIZERS for the selective control of broadleaf weeds in turf.

At the present time, there are ONLY TWO COMMERCIAL IRON-BASED PRODUCTS REGISTERED under the Pest Control Products Act (PCPA) for the selective control of broadleaf weeds in turf, including Fiesta Lawn Weed Killer Ready To Spray (PCP No. 29534) and Fiesta Lawn Weed Killer (PCP No. 29535).

The use of unregistered pest control products in Canada is prohibited as per Section 6 (1) of the PCPA; «No person shall manufacture, store, transport, import, distribute or use a pest control product that is not registered under this Act ...».

Accordingly, any person found using/promoting an unregistered iron fertilizer for weed control will be SUBJECT TO COMPLIANCE AND ENFORCEMENT MEASURES, as set forth by the authority of the PCPA and Regulations.

I am sending you this information for your consideration.

I would be most interested in obtaining any ideas or suggestions you may have to help effect compliance with our Federal Legislation.

I look forward to your comments or suggestions and thank you for your attention in this matter.
Some businesses are telling their customers they’re getting Fiesta, even putting up lawn signs that say Fiesta, but they’re substituting the ILLLEGAL product in their sprayers...

... and risking FRAUD CHARGES ...

... and a LETHAL BLOW to their reputation.

Violating Federal Law

Fiesta Herbicide Knock-Offs Are FRAUDULENT and ILLEGAL

April 4th, 2012

Neudorff North America

Media Release and Video Transcript
According to the Neudorff Media Release on April 4th, 2012 —

Fiesta is the ONLY registered chelated iron pesticide product trademarked and registered for legal use.

There’s a growing trend towards KNOCK-OFF PRODUCTS. These are not only ILLEGAL but also contain a lower quality chelated iron.

If you’re going the chelated iron route, DON’T ROLL THE DICE.

Tell your customers you’re offering the industry standard low risk weed control agent …

… and call it by name, Fiesta.
According to the Neudorff video released on April 4th, 2012 —

Running a lawn care business or managing public green spaces is tricky, to say the least.

Capital costs.
Labour costs.
Increases in the price of fuel and supplies.
Me and you have got to be part juggler, part magician, and all genius.
You’ve worked hard to build a reputation.
And you know that a solid reputation is always a fragile thing.
As time has gone by, you’ve learned that there are lots of creative ways to maximize profit in this tough industry.
But you’ve also learned that CUTTING CORNERS and BREAKING THE LAW just doesn’t make sense.
We want to talk to you about the trend to use chelated iron in the natural lawn care pesticide choices you offer your clients.

Chelated iron for weed control was developed by and is patented by Neudorff.

And, you’d know the product as Fiesta.

By the way, we’re not here to sell you Fiesta.

The brand is out there.

The customers are starting to ask for it.

And the results are a matter of record.

Nope.

The issue is this ...

**KNOCK-OFFS**, lower-quality chelated iron added to a number of different mixes are now being seen in the market-place.
Video Transcript

**Fiesta Herbicide – It just makes sense**

(continued)

Businesses who buy those products and re-sell them to their customers are **BREAKING THE LAW** ...

... giving customers **SUB-STANDARD ILLEGAL PRODUCT**, and **RISKING THEIR REPUTATION** if they get caught.

Some businesses are telling their customers they’re getting Fiesta, even putting up lawn signs that say Fiesta, but they’re substituting the **ILLEGAL product in their sprayers** ...

... and risking **FRAUD CHARGES** ...

... and a **LETHAL BLOW** to their reputation.

*If you’re going the chelated iron route, DON’T ROLL THE DICE.*

Tell your customers you’re offering **THE industry standard low-risk weed control agent**.

And call it by name. **Fiesta**.

Which just makes sense. **For more information, visit our site.**
FiESTA

FiESTA is the ONLY registered chelated iron pesticide product trademarked and registered for legal use. There's a growing trend towards knock-off products, which are not only illegal but also contain a lower quality chelated iron.

If you're going the chelated iron route don't roll the dice. Tell your customers you're offering the industry standard low risk weed control agent, and call it by name, FiESTA.
Background Information
About Neudorff

Founded by Wilhelm Neudorff in 1854, W. Neudorff GmbH KG originally developed a range of bath salts, tinctures, ointments and cosmetics before becoming one of the first German companies to produce pesticides and animal care products.

In 1959, the company was purchased by Rudolf Lohmann, and a whole new range of products was developed and manufactured as demand for environmentally-friendly products rapidly increased.

Since then, Neudorff’s corporate focus has been on low environmental impact pesticides, fertilizers, composting products, products to enhance plants and improve the soil, and beneficial insects and mites.

In addition to products for professional applicators, Neudorff offers a comprehensive line for home gardeners.

Neudorff has its administration and production headquarters in Emmerthal, Germany, with further production facilities in Luneburg.

These facilities, together with field trial areas, greenhouses and a modern experimental gardening center in Aerzen, manufacture plant protection products for the international market.

The company has a holistic approach to protecting the environment and its resources, which is evident in its power management.

An on-site, efficient, state-of-the-art, hydroelectric turbine is responsible for producing enough electricity to keep all the machines operating, with enough to sell as surplus.
According to Neudorff ...

Fiesta® Lawn Weed Killer is a selective, broadleaf weed killer that leaves turf healthy and weed-free using a specially formulated iron chelate solution.

Fiesta® works quickly, delivering visible same-day results, even in cool weather.

And since Fiesta® is made from iron, it has no unpleasant odor during or after application, and people and pets can re-enter the treated area once the spray is dry.

Suitable for broadcast application or spot treatment, Fiesta® is a versatile, patented product that will help grass look its best, even in many pesticide restricted areas such as parks, golf courses, cemeteries, sports fields, and playgrounds.

This product is ideal for lawn care where pesticide bans exist.
We are living in the 9/11 Era of Anti Pesticide Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding against HUJE that seek to harm the Green space industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces under the RIDICULOUS PRETEXT of somehow "saving" the environment.

NORAHG is a NATIONAL NON PROFIT NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HUJE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are Hateful Underhanded Jokes as Environmentalists who have been WRONG FOR OVER 50 YEARS.

There is NO RECOURSE but LITIGATION against Anti Pesticide HUJE.

Another RECOURSE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOCATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HUJE should Get OFF Our grass, and they should Roast In Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on Anti Pesticide Terrorist Acts of Subversion.

The purpose of this ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti–Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION.

NORAHG also produces FORCE OF NATURE, reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports destined for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE, as well as ground breaking original reporting that informs, entertains, and creates real change.

The Force Of Nature Series of Reports — Agriculture • ALBERTA Conspiracy • Bee Colony Collapse Disorder • Benefits of the Turfgrass Industry • Beyond Peticides Books That Screwed Up the World • BRITISH COLUMBIA Conspiracy • Canadian Cancer Society • Canadian Association of Physicians for the Environment • CARCAGE and Consequences of Locust Terrorist Prohibition • Controversial Prohibitors • Culprits of the Prohibition Conspiracy • Date Fruits, Toxic Pesticide Treated • David Suzuki Foundation • Death of Politics and Science • Death and Illness (Alleged) • Department Letters to the Editor • Environmental Terrorist Organizations • Environmental Terrorists • Enviromental Terrorist Unmasked • Environ PROFIT • Environmental Defence • Environment of Control • Environmentalism and Politics • Environmentor Terrorist Organizations • Environmentor Terrorists • Environmentor Terrorists® • Eradicating TERROR • Food and Farming • Get Off Our grass • Global Warming • The Scam of Our Lifetime • Glyphosate Herdbicide • Golf Industry • Green Alternatives • Green Party • Hallowe’en Terror • Happy Holidays • Health Canada • Health Concerns Pest Control Products • Heroes Speaking Out Against Environmental Terror • History of Environmental Terror in Canada • History of the Turfgrass Industry • Letters to the Editor • LIARS and Lying-Gods (Environ Terrorist) Code • Media Advertising • Media Speeches • Myth BUSTING • NATIONAL Prohibition • NEW BRUNSWICK Conspiracy • NO Prohibition Exception for AGRICULTURE Industry • NO Prohibition Exception for GOLF Industry • NOVA SCOTIA Conspiracy • North American Free Trade Agreement (NAFTA) • ONTARIO Conspiracy • Safe For Environmental Terrorist • Ontario College of Family Physicians • Organic Golf Courses • Organic Maintenance • Organizations of the Prohibition Conspiracy • Pesticide Q & A (Questions and Answers) • Positive Waves (Interesting and Innovative Thinking) • PRINCE EDWARD ISLAND (PEI) Conspiracy • QUEBEC Prohibition • Quotations About Enviro Lunatics
Here is a brief summary of Mr. Gathercole’s career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf maintenance industries

Experience in — environmental issues and anti pesticide terrorism • turf and ornamental maintenance and troubleshooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing and distribution

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, negotiations, public affairs, and workplace safety • supervisor, consultant, and program manager for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for the industry • pest control inspector and trainer for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insect in both the Montreal region and the Vancouver / Fraser Valley region • with Dr. Peter Dernoeden, confirmed the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr. David Shear, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South Western Ontario, and later, in the Montreal and Vancouver regions

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to anti pesticide prohibitions • creator of the signs that are now used for posting after application • co-founder of annual winter convention for Quebec golf course superintendents • the major influence in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness of the events of anti pesticide prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT reports

Notable awards — the very first man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beach-head against anti pesticide activists in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues • designed and implemented strategies that helped anti pesticide activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against anti pesticide activists in the town of Hudson, Quebec • launched the largest founding professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada.

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.
Why bother with legal and registered products when you can LIE and CHEAT with iron-based fertilizer?
