LETTER TO THE EDITOR

RESPONSE TO ARZEENA HAMIR, MICHELLE LI, & KATHRYN SEELY

RICHMOND REVIEW

RICHMOND, BRITISH COLUMBIA

BOGUS Green Alternatives

Arzeena Hamir is **TOTALLY INCORRECT !**

So-called « *organic pesticides* », or Green Alternatives, are almost **TOTALLY INEFFECTIVE**.

Green Alternatives are a **DISMAL FAILURE**.

There are **NO** valid economical alternatives to replace the **PROHIBITED** products, and there will be **NONE** within our collective lifetime.

So-called Green Alternatives, such as Corn Gluten Meal, Fiesta, Nematodes, and Sarritor, have been **DISMAL FAILURES**.

Virtually **ALL** Green Alternatives are **BOGUS**.

Despite claims to the contrary, overall, there are **NO** viable, efficacious, or economical Green Alternatives to replace conventional pest control products.

Furthermore, within the Green Space Industry, it is common knowledge that Arzeena Hamir has a **VESTED INTEREST** in **PROMOTING PROHIBITION** to **SELL-FOR-PROFIT** her own lines of **BOGUS Green Alternative** products.

The Fraser Institute

According to The Fraser Institute, the highly-rated Think-Tank of **TRUE EXPERTS**, **PROHIBITIONS** on the use of pest control product are **ILL-CONCEIVED** and **DO NOT** accurately reflect the current state of scientific knowledge.

Also according to The Fraser Institute, HASTY PROHIBITIONS of pest control products SHOULD NOT BE IMPLEMENTED until the underlying science is conclusive and until a comprehensive analysis of the potential side-effects resulting from the PROHIBITION has been undertaken.

NO Growing Body of Evidence

Kathryn Seely, with Canadian-Cancer-Society, ALLEGES that there is somehow « *a growing body of evidence* » that MAY link pest control products with certain types of cancer.

This is FALSE ! — there is NO such evidence.

Seely is NEEDLESSLY ALARMIST with her ALLEGATIONS.

Her FEAR-MONGERING is merely designed to INCREASE DONATIONS to her organization.

If Seely has some form of « *secret evidence* » to back up her ALLEGATIONS, she has yet to present substantiated findings to Health Canada.

Seely and Canadian-Cancer-Society are IRRESPONSIBLY SQUANDERING their efforts on CONSPIRACIES to PROHIBIT pest control products.

Instead of increasing the public's awareness of the largest known preventable causes of cancer, such as smoking and diet, Seely and her buddies prefer SCAMMING, DECEIVING, and ALARMING the public into believing there is some IMAGINARY DANGER with conventional pest control products.

In fact, NO cause-and-effect relationship between pest control products and cancer has been established scientifically.

Moreover, NOT A SINGLE PERSON within Canadian-Cancer-Society, including Seely, has ANY recognized expertise, training or background in matters concerning pest control products

Cancer Rate Is NOT Increasing

According to Non-Expert Michelle Li, « *cancer rates will continue grow* » without a PROHIBITION of pest control products.

This is TOTALLY FALSE and ABSOLUTE NONSENSE !

In fact, pest control products DO NOT CAUSE CANCER.

Pest control products cause NO HARM, including chronic effects such as CANCER.

Moreover, in 2010, AMERICAN CANCER SOCIETY reported that cancer incidence rates and deaths CONTINUE TO DECLINE.

The incidence of cancer ... • decreased by 1.3 per cent per year from 2000 to 2006 in men • decreased by 0.5 per cent per year from 1998 to 2006 in women.

Cancer death rates ... • dropped 21 per cent since 1991 among men • dropped 12 per cent since 1992 among women.

Conventional pest control products are SCIENTIFICALLY SAFE !

Overall, when they are used properly, there are NO harmful irreversible effects to health and the environment !
