FORCE OF NATURE  |  THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)
Anti-Pesticide PROHIBITION has made it IMPOSSIBLE TO NURSE DAMAGED NATURAL GRASS SPORTS FIELDS BACK TO HEALTH.

It’s worth pointing out that every pesticide PROHIBITED by the Ontario Provincial Government was previously approved by scientists at the Federal Government’s Pest Management Regulatory Agency.

With NO WAY TO SAVE NATURAL GRASS SPORTS FIELDS THAT BECOME INFESTED WITH WEEDS, the sensible solution has been to SWITCH TO PLASTIC TURF.

NATURAL GRASS SPORTS FIELDS are on the PATH TO EXTINCTION.

ARTIFICIAL/SYNTHETIC GRASS costs more to install, but delivers substantially more playing time.

The risk of picking up a STAPH INFECTION while playing on ARTIFICIAL/SYNTHETIC GRASS is quite REMOTE ... about as REMOTE, in fact, as the risk posed by REGULATED PESTICIDES when properly and responsibly used.

Nonetheless, observers expect many more fields to go FROM REAL GRASS TO FAKE in the years to come.
Natural Grass Sports Fields Are On The Path To Extinction

August 2nd, 2012

Peter Shawn Taylor

Selected and Adapted Excerpts

Peter Shawn Taylor is Editor-At-Large of Maclean’s Magazine. He lives in Waterloo, Ontario. Peter Shawn Taylor has effectively and consistently spoken out against activists and Anti-Pesticide PROHIBITIONS since 2008. Peter Shawn Taylor speaks the truth --- and deserves CONGRATULATION.
Dalton McGuinty Killed My Shrub.

OK, so maybe the premier didn’t have a direct hand in the death of the euonymus bush on my front yard.

An infestation of dreaded EUONYMUS SCALE took care of that.

But Dalton McGuinty did PREVENT ME FROM TAKING ACTION to save that shrub, which I had lovingly trimmed over the years into something resembling a piano.

His was a crime of omission.

According to my local nursery expert (who spoke on condition of anonymity), SEVERAL FEDERALLY APPROVED REMEDIES COULD HAVE SAVED MY SHRUB.

Background Information

The present McGuinty Government, first elected in 2003, was re-elected on October 10th, 2007. On October 6th, 2011, Dalton McGuinty led a successful campaign for his third term re-election, but this time with a MINORITY government.

McGuinty LOST his majority because of DISSATISFACTION with his environmental policies, especially wind turbines.

The McGuinty Government is affectionately called the McGUINTY-ONTARIO-ANTI-PESTICIDE-REGIME.

This regime is the POLITICAL SHIELD for Anti-Pesticide and Enviro-Lunatic Terrorists like David Suzuki Foundation and Canadian Association of Physicians for the Environment.
But while folks elsewhere can make use of them, not me — thanks to McGuinty’s 2009 PROHIBITION against cosmetic pesticides.

It’s worth pointing out that every pesticide prohibited by the Ontario Provincial Government was previously approved by scientists at the Federal Government’s Pest Management Regulatory Agency.

The PROHIBITION was motivated by the « precautionary principle » that stirs up fear of minuscule or unknown risks in the absence of scientific evidence.

In defending his PROHIBITION, McGuinty frequently mentioned the need to PROTECT CHILDREN from such risks.

But what of the unintended consequences?

Judging from the shape of every other euonymus bush in my neighbourhood, the shrub may be on its way to complete extinction.

EUONYMUS SCALE has arrived and there’s now no way to cure it.

(As an aside, the nursery recommended I burn the infected bush to stop the infestation from spreading, but of course I’m not allowed to do that either.)

Background Information (continued)

The actions of the McGuinty Government are viewed as a form of TERROR against Ontario society, and specifically against the Professional Lawn Care Industry.

On April 22nd, 2009 — a date which will live in the period of ENVIRONMENTAL INFAMY — the full force of the Ontario Cosmetic Pesticides Ban Act came into effect, and DESTROYED the Professional Lawn Care Industry.

The DEVASTATION of the Professional Lawn Care Industry was EXTENSIVE because there were NO valid economical alternatives to replace the prohibited products.

VIRTUALLY ALL Green Alternative Pesticides were almost TOTALLY INEFFECTIVE, except under very specific circumstances.

The Green Alternative Pesticides were BOGUS and DISMAL FAILURES.

Consequently, Professional Lawn Care Companies were UNABLE to provide adequate weed and insect control, and were UNABLE to keep their customers satisfied.
Unfortunately, euonymus bushes are probably NOT THE ONLY THING LIKELY TO DISAPPEAR in the wake of McGuinty’s Anti-Pesticide PROHIBITION.

What else is on the PATH TO EXTINCTION?

How about NATURAL GRASS SPORTS FIELDS.

As little as a decade ago, you could count the number of ARTIFICIAL/SYNTHETIC SPORTS FIELDS owned by Ontario municipalities or school boards on one hand.

This year, according to industry sources, there will be OVER 100 in operation.

Such a phenomenon is highly visible in our region.

In 2011, Waterloo replaced NATURAL GRASS SOCCER PITCHES at RIM Park with ARTIFICIAL/SYNTHETIC FIELDS.

The University of Guelph recently installed an ARTIFICIAL/SYNTHETIC FOOTBALL FIELD on campus.

And in spring 2012 at Woodside Park, Kitchener unveiled the first two in a series of planned soccer field conversions.

WE CAN EXPECT MANY MORE FIELDS TO GO FROM REAL GRASS TO FAKE IN THE YEARS TO COME.
There are lots of good economic reasons to favour ARTIFICIAL/SYNTHETIC GRASS over the real thing.

As Greg Hummel, Manager of Park Planning, Development and Operations at City of Kitchener explains a NATURAL GRASS FIELD tops out at about 450 HOURS OF SPORTS ACTIVITIES PER YEAR. « After that, you are basically destroying the turf » he says.

On the other hand, SYNTHETIC GRASS can be programmed for as many as 3,000 HOURS PER YEAR — with a big benefit coming from use during the shoulder seasons of spring and fall, when grass must be left dormant.

Crunching the numbers, SYNTHETIC GRASS COSTS MORE TO INSTALL, BUT DELIVERS SUBSTANTIALLY MORE PLAYING TIME.

But what explains the recent swing to artificial ?

One reason that cannot be overlooked is that Anti-Pesticide PROHIBITION has made it IMPOSSIBLE TO NURSE DAMAGED NATURAL GRASS FIELDS BACK TO HEALTH.

According to Greg Hummel at City of Kitchener —

*Being able to spray a field was an easy and affordable quick step.*

With NO WAY TO SAVE FIELDS THAT BECOME INFESTED WITH WEEDS, the sensible solution has been to SWITCH TO PLASTIC TURF.
And yet we shouldn’t necessarily celebrate the disappearance of grass sports fields as part of the inevitable march of progress.

As Hummel acknowledges, almost everyone PREFERENCES TO PLAY ON THE REAL THING.

Furthermore, NATURAL GRASS offers some IMPORTANT BENEFITS that have been overlooked in the rush to ersatz grass.

REAL TURF is unsurpassed at COLLECTING AND FILTERING RAIN WATER.

It also acts as A NATURAL DIGESTER, consuming any nasty BACTERIA that may be spat, bled or vomited on it.

BACTERIA on ARTIFICIAL FIELDS stay there until washed away.

The presence of BACTERIA has become a major issue in Texas, which boasts a large number of ARTIFICIAL/SYNTHETIC FOOTBALL FIELDS due to its hot, dry climate.

In 2007, for example, Austin, Texas, high school footballer Boone Baker caught the feared methicillin-resistant STAPH INFECTION, Staphylococcus aureus, after scrapping his knee on his school’s ARTIFICIAL/SYNTHETIC TURF and was left temporarily paralyzed.

For this reason, all ARTIFICIAL/SYNTHETIC FIELDS now need to be regularly sprayed with a POWERFUL DISINFECTANT.

It’s certainly not my intention to create panic about ARTIFICIAL FIELDS.
Natural Grass Sports Fields Are On The Path To Extinction

The risk of picking up a STAPH INFECTION while playing on ARTIFICIAL/SYNTHETIC GRASS is quite REMOTE ...

... about as REMOTE, in fact, as the risk posed by REGULATED PESTICIDES when properly and responsibly used.

Rather, the point to make here is entirely ironic.

Environmentalists who tirelessly advocated for Anti-Pesticide PROHIBITION in order to create a more « natural » environment have instead ushered in a world filled with ARTIFICIAL/SYNTHETIC GRASS THAT MUST BE CLEANED WITH INDUSTRIAL-STRENGTH CLEANSERS.

And in attempting to protect kids from minuscule risks posed by regulated pesticides, we have as a consequence exposed them to different and equally minuscule risks.

Oh, and how do you throw out a football field-sized piece of carpet?

Perhaps the environmental movement should be looking for ways to preserve REAL GRASS FIELDS instead of replacing them all with PLASTIC.

PESTICIDES DO HAVE A USE.

Peter Shawn Taylor is Editor-At-Large of Maclean’s Magazine.

He lives in Waterloo, Ontario.

His house is the one without a shrub in front.
Precautionary Principle INVALIDATED

The Precautionary Principle was intended for use where science DOES NOT EXIST.

Such is NOT the case with pest control products — Health Canada requires each new pest control product to go through a COMPREHENSIVE ASSESSMENT of over TWO-HUNDRED SEPARATE TESTS and a REVIEW of all scientifically credible studies that exist to ensure that the product will NOT CAUSE HARM TO PEOPLE, ANIMALS OR THE ENVIRONMENT.

Nonetheless, the Precautionary Principle is CO-OPTED by Anti-Pesticide Activists to justify their position where SCIENCE-BASED ASSESSMENT does not support their JUNK-SCIENCE PHILOSOPHY.

Anti-Pesticide Activists have MIS-USED the Precautionary Principle TO SERVE THEIR AMBITIONS for convincing governments to enact Anti-Pesticide PROHIBITION.

The Precautionary Principle is essentially VACUOUS, since « full scientific certainty » is IMPOSSIBLE.

With the Precautionary Principle, activists DO NOT HAVE TO PRESENT ANY EVIDENCE ... they just have to say « harmful to the environment ».

The ABSOLUTIST INTERPRETATION of the Precautionary Principle is used by activists TO JUSTIFY ANY KIND OF REGULATORY INTERVENTION OR BAN.

Pest control products used in the Urban Landscape DO NOT qualify for consideration under the Precautionary Principle.

It is IMPOSSIBLE to prove scientifically that pest control products — or any substance, including water — could NEVER harm anything or anyone under ANY circumstances.

Pest control products used in the Urban Landscape are NOT SERIOUS, they are SELECTIVE to pests, have LOW TOXICITY to non-target organisms, and are WELL UNDERSTOOD.

Their use is NOT widespread — it is less than 2 per cent of all active ingredients used in Canada.

The effects of these pest control products are NOT IRREVERSIBLE.
Precautionary Principle — The Wisdom of Solomon

The CO-OPTED ANTI-PESTICIDE VERSION of the Precautionary Principle has been INVALIDATED by TRUE EXPERTS like Professor Keith R. Solomon.

Professor Keith R. Solomon is an INTERNATIONALLY-RESPECTED TOXICOLOGIST.

Professor Solomon has received awards for his work in North America, South America, Europe, and at the United Nations.

He teaches toxicology at both the under-graduate and graduate level at the University of Guelph.

Professor Solomon has authored or co-authored hundreds of research articles and books.

Professor Solomon serves on several advisory committees on matters related to environmental toxicology and risk assessment of pest control products and other substances in Canada, the U.S.A., Europe, and for the United Nations Environmental Program.

He is also the chair of the board of directors for the Canadian Network of Toxicology Centres.

According to Professor Keith R. Solomon, Question and Answers about Landscape and Garden Pest Control Products, March 27th, 2007 —

« Landscape and garden use of pest control products DOES NOT qualify for consideration under the Precautionary Principle.

They are NOT SERIOUS, they are SELECTIVE to pests, have LOW TOXICITY to non-target organisms, and are WELL UNDERSTOOD.

Their use is NOT widespread, less than 2 per cent of all active pesticide ingredients used in Canada are for landscape uses and the land area to which they are applied is small.

The effects of these pest control products are NOT IRREVERSIBLE.

There is RAPID RECOVERY through re-invasion and weed seeds and most need to be used at least once per season. »
As a result of Anti-Pesticide PROHIBITION, weeds, primarily DANDELIONS, have become the DOMINANT GROUND COVER for lawns, parks, school yards, and sports fields across the Province of Ontario.

Heaven help the politician who gets the blame for all of the ugly lawns.

PROHIBITION dictates aesthetics to the public.

PROHIBITION imposed under the pretext of protecting children’s health is actually harmful to children.

PROHIBITION ignores the federal regulatory system.

PROHIBITION was entirely political.

There is NO reliable scientific evidence indicating that regulated pest control products pose any threat to human health when used correctly.
DANDELIONS HAVE BECOME THE DOMINANT GROUND COVER for lawns, parks, school yards and sports fields across the province.

Provincial politicians often promise that their province won’t look the same once they’re done. Usually, they’re talking about taxes, jobs, education, or the laws of the land.

While these are all important issues, they frankly don’t have much physical presence in everyday life.

Your street generally looks the same regardless of who’s in power.

Not so in Ontario.

Since 2009, PREMIER DALTON McGUINITY HAS MANAGED TO ALTER THE PHYSICAL APPEARANCE OF HIS PROVINCE. EVERY FRONT YARD IS NOW UGLIER.

By 2010, it was a year and a month since the McGuinty government introduced legislation PROHIBITING the use of pesticides everywhere except golf courses and farms.

As a result, WEEDS, PRIMARILY DANDELIONS, HAVE BECOME THE DOMINANT GROUND COVER for lawns, parks, school yards, and sports fields across the province.

It took a while for the FULL IMPACT of the PROHIBITION to become apparent.

Last year, many lawns seemed to retain vestigial protection against weeds due to previous pesticide treatments.

Now, however, THE WEEDS ARE HERE TO STAY. AND THEY LOOK WHITE AND FLUFFY.

Residential streetscapes have switched from green to yellow.

To white and fluffy.

And back to yellow again.

IT’S IMPORTANT TO REMEMBER THIS EFFORT WAS ENTIRELY POLITICAL.

THERE IS NO RELIABLE SCIENTIFIC EVIDENCE THAT REGULATED PESTICIDES, WHEN USED CORRECTLY, POSE ANY THREAT TO HUMAN HEALTH.

Ignoring the work of the federal government’s Pest Management Regulatory Agency, McGuinty blithely declared a sweeping PROHIBITION was necessary for “our children’s health.”
NO OTHER jurisdiction in North America went so far in forbidding chemical weed control.

Yet a weed-free lush grass lawn or field has MANY PRACTICAL BENEFITS.

For one, grass acts as a NATURAL CUSHION.

It is also an EFFECTIVE SPONGE for rainwater.

A sports field entirely OVER-RUN BY DANDELIONS provides NONE of these benefits.

When it rains, [ the sports field ] becomes a SLIPPERY NUD BOG.

In hot months: [ the sports field becomes ] a concrete-like surface.

Not only does this make it difficult to play sports, but it's DANGEROUS as well.

Falling on hard-baked playground mud is, speaking from parental experience, the DIRECT CAUSE OF NUMEROUS SKINNED KNEES AND TWISTED ANKLES.

McGuinty's crusade on behalf of children's health is ACTUALLY HURTING KIDS ON A DAILY BASIS.

It's also the case that many, most likely a majority, of people consider a uniform green lawn to be a thing of beauty and an object of desire.

From this perspective, PROHIBITION represents an effort to DICTATE AESTHETICS.

Various propaganda claims there's nothing wrong with a weedy, yellow-dotted lawn — everyone should simply learn to appreciate the wondrous joys of dandelions.

Or put in a rock garden.

But that's a matter of opinion.

ON WHAT BASIS SHOULD THE STATE GIVE ITSELF A MANDATE OVER BEAUTY?

Of course, even the McGuinty government seems to recognize these efforts haven't really convinced home-owners TO LOVE UGLY LAWNS.

A provincial web-site also offers tips for a weed-free yard without pesticides —

« PLUCK WEEDS BY HAND » it cheerily declares.

« Get a weeding tool and the job will be faster and easier. »
With more practical options outlawed, this advice appears to have stuck.

In my neighbourhood, it seems every second home-owner is now outside on Saturday afternoons diligently PLUCKING AND PULLING AT AN ENDLESS SUPPLY OF WEEDS.

NO ONE looks very happy; probably because it’s an entirely SISYPHEAN TASK.

[ The word SISYPHEAN means endless and unavailing as labour or a task. ]

Curiously, McGuinty has ANOTHER major preoccupation besides PROHIBITING THINGS AND FRETTING ABOUT CHILDREN.

In early 2010, his government released a substantial report on the long-term prospects for the economy.

Chief among its issues was a commitment to improving productivity.

« Encouraging faster productivity growth » was presented as a crucial step to defending the provincial standard of living.

And yet it is difficult to imagine anything more UNPRODUCTIVE than forcing every home-owner in the province to ABANDON A PERFECTLY SAFE, MODERN, AND EFFICIENT MEANS OF WEED CONTROL in favour of a method that can only be described as MEDIEVAL.

PROHIBITION thus represents an ENORMOUS DEADWEIGHT LOSS for the province.

Even if we assume time spent hand-weeding on weekends would otherwise be allocated to yard maintenance, the provincial net worth could be vastly enhanced if everyone was spending those hours painting fences, repairing decks and trimming hedges.

For ELDERLY RESIDENTS, many of whom take great pride in their gardens and yards, hand pulling may not only be unproductive, but PHYSICALLY IMPOSSIBLE.

Denied the use of better, labour-saving methods of weed control, many retirees have simply lost the ability to tend to their own yard.

All of which suggests we haven’t heard the last on this issue.

And Heaven help the politician who ends up taking the blame for everyone’s UGLY LAWN.
Because of Anti-Pesticide PROHIBITION, Ontario now has a MORE DANGEROUS OUTDOOR ENVIRONMENT, a BLACK MARKET IN PESTICIDES, and a TRAIL OF ECONOMIC DESTRUCTION WITH HUNDREDS OF SMALL BUSINESSES DESTROYED and THOUSANDS OF PEOPLE OUT OF WORK.

The Ontario PESTICIDE BAN has TAKEN AWAY THE ABILITY of people to SAFEGUARD THEMSELVES AGAINST NOXIOUS WEEDS AND DISEASE-CARRYING INSECTS.

On May 31st, 2012, Bill 88 was introduced to AMEND THE BAN ON PESTICIDES, and ALLOW LICENSED PROFESSIONALS TO APPLY THESE PRODUCTS under strict conditions and in concentrations well within established safety limits.

Bill 88 had the added effect of STRENGTHENING the Professional Lawn Care Industry that has been DEVASTATED by the McGuinty Liberals’ ARBITRARY PESTICIDE BAN.

There are LEGITIMATE CONCERNS about NOXIOUS WEEDS, which in extreme cases can contribute to DEATH, and which FORCE MILLIONS TO MEDICATE THEMSELVES or LIVE WITH SEVERE ALLERGIC EFFECTS.

Surely the entirely UNPROVEN CONCERNS of a few POLITICALLY-CONNECTED FEAR-MONGERERS should be balanced against the STRICTLY-TESTED, LENGTHY AND SCIENTIFICALLY-DOCUMENTED USE OF PESTICIDES applied under controlled conditions to deal with human health problems caused by noxious plants and disease-carrying insects.
PESTICIDE BANS result in CATASTROPHIC CARNAGE caused by BAN FAILURES, BUSINESS FAILURES, GARBAGE DUMP GREEN SPACES, STUNNINGLY EXORBITANT COSTS, HORRIFIC FINES, and even ILLNESS and DEATH.

PESTICIDE BANS have created a TRAIL OF ECONOMIC DESTRUCTION with THOUSANDS OF PEOPLE OUT OF WORK.

Summary of CATASTROPHIC CARNAGE Caused by BUSINESS FAILURES in Ontario and Elsewhere —

- Anti-Pesticide PROHIBITIONS DESTROYED the businesses operating in the Professional Lawn Care Industry in several jurisdictions across Canada.

- ONTARIO — Because of the 2009 PROVINCIAL PROHIBITION in Ontario, businesses operating in the Professional Lawn Care Industry LOST OVER 500,000,000 DOLLARS, with up to 12,500 UNEMPLOYED.

- ONTARIO — In Ontario, ONE-BUSINESS-PER-WEEK DISAPPEARS INTO TOTAL OBLIVION, and, by 2012, HALF THE BUSINESSES CLOSED THEIR DOORS.

- BRITISH COLUMBIA — Because of the IMMINENT 2012-2013 PROVINCIAL PROHIBITION in British Columbia, ALL businesses operating in the Professional Lawn Care Industry have STAGNATED, and, because of LOCAL MUNICIPAL PROHIBITIONS, many businesses have LOST OVER 40 PER CENT OF THEIR CUSTOMERS.

- QUEBEC — Because of the 2004-2006 PROVINCIAL PROHIBITION in Quebec, OVER 60 PER CENT of the businesses operating in the Professional Lawn Care Industry were ANNIHILATED, and HUNDREDS OF BUSINESSES DISAPPEARED INTO TOTAL OBLIVION.
● QUEBEC — In Quebec, those businesses that survived PROHIBITION, by 2012, LOST OVER 70 PER CENT OF THEIR BUSINESS.

● HALIFAX — Because of the 2000 MUNICIPAL PROHIBITION in Halifax Regional Municipality, businesses operating in the Professional Lawn Care Industry LOST OVER 50 PER CENT OF THEIR CUSTOMERS. The DEVASTATION of the Professional Lawn Care Industry was EXTENSIVE because there were NO valid economical alternatives to replace the prohibited products.

Consequently, Professional Lawn Care Companies were INCAPABLE of providing adequate weed and insect control, and were UNABLE to keep their customers satisfied.

In provinces like Ontario, the PESTICIDE BAN DESTROYED INFLICTED TERROR, DESPAIR, and DESTITUTION on THOUSANDS of hapless victims throughout the Professional Lawn Care Industry.

In provinces like Ontario, the PESTICIDE BAN DESTROYED the Modern Professional Lawn Care Industry.

In provinces like Ontario, the PESTICIDE BAN ALSO DESTROYED ALL GREEN SPACES, which became WEED-INFESTED and INSECT-DESTROYED GARBAGE DUMPS.

PESTICIDE BANS are NEEDLESS, SENSELESS, and MALICIOUS.

PESTICIDE BANS are NOT NECESSARY since pest control products are HEALTH-CANADA-APPROVED, FEDERALLY-LEGAL, SCIENTIFICALLY-SAFE, PRACTICALLY-NON-TOXIC, and CAUSE NO HARM.
The Professional Lawn Care Industry Must STOP Being IN DANGER From Anti-Pesticide Lunatics

It Must Become THE DANGER Against the Lunatics

SUE THEIR BRAINS OUT!
Everyone in the Green Space Industry — no matter where they live — must meet with their Member of Provincial Parliament (MPP), regardless of party affiliation.

In order to meet and inform the MPP, you must donate the maximum amount to the party, which is 1,240 dollars in Ontario.

The cost of this donation is insignificant when compared to the catastrophic business losses inflicted by anti-pesticide prohibition.

Any business owner in the Green Space Industry who does not bother to meet with the local MPP is a pitiful fool and an idiot, and does not deserve a career, or a business, or any success.

Anti-Pesticide Terrorists are NOT CREDIBLE SOURCES OF INFORMATION upon which political decisions are made — they LIE and LIE and LIE.

There is NO RECOUSE but OFFICIAL COMPLAINTS as well as LITIGATION against Anti-Pesticide Terrorists.

They DO NOT DESERVE ANY DONATIONS OR SUPPORT.
They **DO NOT DESERVE ANY GOVERNMENT GRANTS**.

Nor do they deserve **TAX-EXEMPT STATUSES**.

They **DO deserve to FACE THE SPOTLIGHT OF SCRUTINY and THE TERROR OF THE COURTS**!

Anti-Pesticide Terrorists in organizations like Canadian Cancer Society are presently **UNDER INVESTIGATION FOR CHARITY FRAUD AND CONSPIRACY**.

The Government of Canada **DOES NOT** want its society to continue living in the 9|11 Era of Anti-Pesticide Enviro-Lunatic Profit-Hungry Terrorism!

And neither should anyone in the Green Space Industry.

All names, statements, activities, and affiliations have been **ARCHIVED** for anyone wishing to lodge an OFFICIAL COMPLAINT or lay CRIMINAL CHARGES against Anti-Pesticide Terrorists.

On The Pesticide Truths Web-Site, NORAHG manages a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti-Pesticide Terrorists.
We know who they are, and where they are hiding, and what they have said and done.

When CRIMINAL CHARGES FOR FRAUD AND CONSPIRACY ARE LAID, legal experts say that the NORAHG ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION against Anti-Pesticide Terrorists!

Business owners in the Green Space Industry should talk to their lawyers, members of the legislative assembly, and local media outlets.

Thanks to The Pesticide Truths Web-Site, they have all the DOCUMENTED EVIDENCE that they need.

LET THESE TERRORISTS FACE THE SPOTLIGHT OF SCRUTINY and THE TERROR OF THE COURTS!

Anti-Pesticide Terrorists are GOVERNMENT-FINANCED with TAX-FREE MONEY — they must not be allowed this money to defend themselves in court.

Demand a REVOCATION of their organizations’ REGISTERED CHARITY TAX-EXEMPT STATUS!

SUE THE BASTERDS’ BRAINS OUT!
STOP sitting around doing NOTHING against Anti Pesticide Terrorists
We are living in the 9|11 Era of Anti Pesticide Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is Perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding Against HIJUE that seek to harm the Green space industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces. Under the RIDICULOUS PRETEXT of somehow "saving" the environment.

NORAHG is a NATIONAL NON-PROFIT NON-PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HIJUE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are Hateful Underhand Jokes as Environmentalists who have been WROTTEN FOR OVER 50 YEARS.

There is NO RECOUENCE but LITIGATION against Anti Pesticide HIJUE.

Another RECOUENCE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOICATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HIJUE should Get Off Our grass, and they should Roast in Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti Pesticide Terrorists Acts of Subversion.

The purpose of the ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti-Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION.

NORAHG also produces FORCE OF NATURE reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports directed for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE as well as ground breaking original reporting that informs, entertains, and creates real change.

The Force Of Nature Series of Reports — Agriculture • ALBERTA Conspiracy • Bee Colony Collapse Disorder • Bee Colony Collapse Disorder • Benefits of the Turfgrass Industry • Beyond Pesticides • Books That Screwed Up The World • BRITISH COLUMBIA Conspiracy • Canadian Cancer Society • Canadian Association of Physicians for the Environment • CANAGA and Consequences of Lunar Terrorist Prohibition • Controversial Prohibitions • Culture of the Prohibition Conspiracy • DDT and Our World of Politicized Science • Death and Illness (Alleged) • Departure Letters • Ecojustice Canada • Energy Sector • Environmental Terrorists UNMASKED • Environmental Terrorist Organizations • Enviro PROFIT • Environmental Defense • FAILURE of IPM • Pesticide Manufacturers, Prohibition, Trade Associations • Famous Quotations About Enviro Lunatics • Fertilizer TERROR • Food and Farming • Get Off Our grass • Global Warming, The Scam of Our Lifetime • Glyphosate Herbicide • Golf Industry • Green Alternatives • Green Party • Halloween Terror • Happy Holidays • Health Canada • Health Concerns with Pest Control Products • Heroes Steaking Out Against Environmental Terror • History of Environmental Terror in Canada • History of the Turfgrass Industry • Letters to the Editor • LIARS and Lying Sacks of (Enviro Maniac) Crap • Mock Advertisements • Mock Speeches • Myth BUSTING • NATIONAL Prohibition • NEW BRUNSWICK Conspiracy • NO Prohibition Exception for AGRICULTURE Industry • NO Prohibition Exception for Golf Industry • NOVA SCOTIA Conspiracy • North America Free Trade Agreement (NAFTA) • ONTARIO Conspiracy, Haven for Environmental Terrorists • Ontario College of Family Physicians • Organic Golf Courses • Organic Maintenance • Organizations of the Prohibition Conspiracy • Pesticide Q & A (Questions and An-
The information presented in FORCE OF NATURE has been developed for the education and entertainment of the reader by providing a sequence of events WITH COMMENTARY, striving for accuracy in history, politics, and science.

FORCE OF NATURE is TOTALY INDEPENDENT and provides NO guarantee regarding accuracy or completeness. In no event shall FORCE OF NATURE be liable for any incidental or consequential damages, lost profits, or any indirect damages.

NORAHG also produces A LOOK AT, a series of reports providing TECHNICAL INFORMATION on issues such as Career Management, Golf Course Maintenance, Green Alternatives, Summer Stress, Turfgrass Pests, and Turfgrass Species.

Final, NORAHG frequently responds to articles and pesticide activists in LETTERS TO THE EDITOR in newspapers across Canada and around the world.

All information, excerpts, and pictures contained in FORCE OF NATURE, A LOOK AT, and LETTERS TO THE EDITOR were retrieved from the Internet and may be considered in the public domain.

FORCE OF NATURE, A LOOK AT, and their various incarnations, was the brainchild of William H. Gathercole and his colleagues in 1993. Mr. Gathercole is now retired, although his name continues to appear as founder.

Here’s a brief summary of Mr. Gathercole’s career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf management industries.

Experience in — environmental issues and anti pesticide terrorism • turf and ornamental maintenance and trouble shooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing and distribution

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, government negotiations, public affairs, and workplace safety • supervisor, consultant, and programmer for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insects in both the Montreal region and the Vancouver Fraser Valley region • with Dr. Roger Demorens, confirmed the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr. David Sheard, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South Western Ontario, and later, in the Montreal and Vancouver regions.

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to anti pesticide prohibition • creator of the system that are now used for boosting and application • co-founder of annual winter convention for Quebec golf course superintendents • the major influencer in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness of the events of anti pesticide prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT reports

Notable award — the very first man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beacon head against anti pesticide activists in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues designed and implemented strategies that reined anti pesticide activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against anti pesticide activists in the town of Hudson, Quebec • launched the largest founding professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.
