MacLean’s Magazine Report on the 9/11 Era of Anti-Pesticide Terrorism...

- On March 6th, 2012, MacLean’s Magazine issued a report on the CARNAGE caused by the UNSCIENTIFIC PANIC against pest control products.

- MacLean’s, the RESPECTED Canadian national weekly news magazine, stated, in one form or another, that pest control products are SCIENTIFICALLY-SAFE.

- MacLean’s Magazine has also stated that, essentially, any PROHIBITION against pest control products is NOT JUSTIFIED because STRICT REGULATIONS based on scientific research already PROTECT our health and our environment.

- Every PROHIBITED pest control product has been CERTIFIED AS SAFE FOR RESIDENTIAL USE by the federal Pest Management Regulatory Agency of Health Canada.

- Anti-Pesticide PROHIBITIONS represent a TRIUMPH OF SENTIMENT OVER SCIENCE.
MacLean’s Magazine Report
on the 9/11 Era of Anti-Pesticide Terrorism ...

- Anti-Pesticide PROHIBITIONS are VALIDATED not on the basis of scientific evidence, but rather a VAGUE MOCK UN-EASE about chemicals in general.

- NOT ALL PROHIBITIONS make for a healthier environment.

- Do PROHIBITIONS provide a net benefit to society?

- There are NUMEROUS UNINTENDED CONSEQUENCES [ i.e. CATASTROPHIC CARNAGE ] to Anti-Pesticide PROHIBITION.

- There is little debate about the fact that ONTARIO LOOKS SHABBIER AND WEEDIER because of Anti-Pesticide PROHIBITION [ i.e. Ontario looks like a GARBAGE DUMP ].

- In ONTARIO, parks, sports fields, and home lawns have become WHOLLY INFESTED WITH DANDELIONS and a variety of other weeds, and there is NO practical way to remove them, other than hand-pulling.
MacLean’s Magazine Report on the 9/11 Era of Anti-Pesticide Terrorism ...

- In Highland Park, Illinois, Anti-Pesticide PROHIBITION was a DISASTER — WEEDS ACCOUNTED FOR OVER 60 PER CENT OF THE GROUND COVER, and sports fields were UN-USABLE — Highland Park RESCINDED PROHIBITION.

- When it comes to pest control products, provinces like Manitoba can learn a lot from the experience of those who have gone before — if the goal is to reduce verifiable risks, promote a more natural environment, and encourage healthy activities, PROHIBITING pest control products SEEMS A STRANGE WAY TO GO ABOUT IT.
Manitoba Should Think Twice Before Banning Pesticides

March 6th, 2012

Maclean’s Magazine

Selected and adapted excerpts

Maclean’s is a RESPECTED Canadian national weekly news magazine, reporting on Canadian issues such as politics, pop culture, and current events.
According to MacLean’s Magazine, the UNINTENDED CONSEQUENCES [ i.e. CATASTROPHIC CARNAGE ] of Anti–Pesticide PROHIBITION don’t necessarily make for a healthier environment.

Maclean’s Magazine

Province of Manitoba

Manitoba’s Anti–Pesticide Conservation Minister, Gord Mackintosh, recently announced he is making plans for a PROHIBITION against pest control products used in the Urban Landscape.

In particular, Mackintosh said he is keen to bring Manitoba’s laws in line with those Anti–Pesticide PROHIBITIONS that are IMPOSED in other provinces.

According to Macintosh —

Manitobans are entitled to the same protections most other Canadians enjoy. [ ?!?! ]

Yet, Manitobans might want to learn from the experience [ i.e. CATASTROPHIC CARNAGE ] of those other provinces, rather than simply parrot them.
Evidence from other jurisdictions suggests there are NUMEROUS UNINTENDED CONSEQUENCES [i.e. CATASTROPHIC CARNAGE] to Anti-Pesticide PROHIBITION. And NOT ALL OF THEM MAKE FOR A HEALTHIER ENVIRONMENT. Currently, every Canadian province located east of the Manitoba-Ontario border PROHIBITS the use of cosmetic pesticides in some way.
Manitoba’s Anti–Pesticide Lunatic–Minister Mackintosh says he ADMIRES THE STRICT BANS ENFORCED IN ONTARIO AND NOVA SCOTIA.

These rules PROHIBIT against use of a long list of pest control products used on all lawns and sports fields.

Golf courses and farms have been provided EXCEPTION STATUS.
Every one of the PROHIBITED products has been CERTIFIED AS SAFE FOR RESIDENTIAL USE by Health Canada.

Of course, every one of the PROHIBITED products has been CERTIFIED AS SAFE FOR RESIDENTIAL USE by the federal Pest Management Regulatory Agency (PMRA) of Health Canada.

Scientific research shows that, as reported through Health Canada’s VAST TOXICOLOGY DATABASE, NO HARM WILL OCCUR when pest control products are used according to label directions.
Anti-Pesticide PROHIBITIONS are VALIDATED not on the basis of scientific evidence, but rather a VAGUE UNEASE about chemicals.
Provincial Anti-Pesticide PROHIBITIONS represent a TRIUMPH OF SENTIMENT OVER SCIENCE

Anti-Pesticide PROHIBITIONS are promoted by lobby groups ranging from family physicians to environmentalists.

As such, provincial Anti-Pesticide PROHIBITIONS represent a TRIUMPH OF SENTIMENT OVER SCIENCE.

But does this sort of regulation provide a net benefit to society?

The experience of OTHER PROVINCES can be revealing.
There is little debate about the fact that Ontario looks SHABBIER and WEEDIER.

After two years without pest control products in Ontario, the CARNAGE is STARKLY VISIBLE — MOSTLY BROWNS AND YELLOWS.

There is little debate about the fact that ONTARIO LOOKS SHABBIER AND WEEDIER because of PROHIBITION [i.e. Ontario looks like a GARBAGE DUMP].

The Province of ONTARIO is known as « The Dandelion Province » since it is OVER–RUN with Dandelions because the SAFEST and MOST EFFECTIVE herbicides for controlling this broad-leaved weed were ARBITRARILY PROHIBITED.
Ontario parks, sports fields, and home lawns have become WHOLLY INFESTED WITH DANDELIONS

Whether this is a good or bad thing may depend on your definition of beauty — not to mention the condition of your back and knees.
MORE THAN HALF of home-owners feel the Ontario government DID NOT DO THE RIGHT THING by IMPOSING Anti-Pesticide PROHIBITION

A recent poll found a majority of Ontario home-owners WANT TO END THE BAN.

According to a 2011 poll regarding PROHIBITION, MORE THAN HALF of Ontario home-owners feel the provincial government DID NOT DO THE RIGHT THING by IMPOSING Anti-Pesticide PROHIBITION. Ontario home-owners WOULD RATHER HAVE THE BAN SCRAPPED OR MODIFIED.
Anti-Pesticide PROHIBITION in Highland Park was a DISASTER

Maclean's Magazine
Highland Park, Illinois, U.S.A.

But what of other impacts arising from Anti-Pesticide PROHIBITION?

In Chicago, the suburban municipality of Highland Park had regularly won awards for the quality of its sports fields ... until PROHIBITION.

Then four years ago, Highland Park dropped conventional pest control products for trendy organic pest control.

The result was a DISASTER.
In some parks, WEEDS ACCOUNTED FOR OVER 60 PER CENT OF THE GROUND COVER, and sports fields were UNUSABLE.

According to the Parks Commissioner ...

_The fields are GETTING WORSE EVERY YEAR. Something needs to be done to reverse the trend._

Consequently, Highland Park RESCINDED PROHIBITION, and approved the return of pest control products.
And while Anti–Pesticide PROHIBITIONS are frequently defended by advocates as a way to reduce unknown risks and promote a more natural environment, in fact THE OPPOSITE MAY BE TRUE.

The number of artificial sports fields in Ontario has recently exploded — from a mere handful a decade ago to over a hundred this year.

Without pest control products, it has become IMPOSSIBLE to maintain a natural turf sports field.

Artificial sports fields boast plenty of advantages, despite their average 1–MILLION–DOLLAR UP–FRONT COST.

It seems ironic that an Anti–Pesticide PROHIBITION meant to encourage a greener environment will result in a GREATER PREVALENCE OF PLASTIC SPORTS FIELDS.

( Not to mention the issue of how to dispose of an artificial field once its life–span ends. )

Other real risks have also been overlooked in the UNSCIENTIFIC PANIC about pest control products.
Experts have reported that grass is not only a natural filter, but also a microbiological system that consumes any bodily fluids leaked, spat, or vomited onto it.

Not so with an artificial field — in the absence of a cleansing downpour, what’s on the field stays on the field.

In the State of Texas, a higher rate of STAPH INFECTIONS among high school students — many times the national average — BECAUSE OF ARTIFICIAL SPORTS FIELDS.

In 2007, footballer Boone Baker of Austin, Texas, almost died from a deadly methicillin-resistant Staphylococcus aureus (MRSA) infection he picked up from his high school’s artificial turf.

Regular DISINFECTION OF ARTIFICIAL FIELDS using industrial-strength chemical products is now a recommended maintenance procedure in all climates.

When it comes to pest control products, Manitoba can learn a lot from the experience of those who have gone before — if the goal is to reduce verifiable risks, promote a more natural environment, and encourage healthy activities, PROHIBITING pest control products SEEMS A STRANGE WAY TO GO ABOUT IT.
For anti-pesticide lunatics, the vastness of their terror is clearly seen through their subversive prohibitions.
We are living in the 9/11 Era of Anti Pesticide Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space Industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces under the RIDICULOUS PRETEXT of somehow « saving » the environment.

NORAHG is a NATIONAL, NON PROFIT, NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HUJE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are hateful Undemanded Jokes as Environmentalists who have been WRONG FOR OVER 50 YEARS.

There is NO RE COURSE but LITIGATION against Anti Pesticide HUJE.

Another RE COURSE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOCATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HUJE should Get OFF Our grASS, and they should Roast In Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti Pesticide Terrorist Acts of Subversion.

The purpose of this ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti–Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION !

NORAHG also produces FORCE OF NATURE, reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports destined for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE, as well as ground breaking original reporting that informs, entertains, and creates real change.

The Force Of Nature Series of Reports — Agriculture • ALBERTA Conspiracy • Bee Colony Collapse Disorder • Bee Colony Collapse Disorder • Benefits of the Turfgrass Industry • Beyond Pesticides • Books That Screwed Up the World • BRITISH COLUMBIA Conspiracy • Canadian Cancer Society • Canadian Association of Physicians for the Environment • CARNAGE and Consequences of Pesticide Prohibition • Controversial Prohibitions • Court of the Prohibition Conspiracy • Daffodils, Poison Pesticide Treated Flowers Soaked Formaldehyde • Dating Services for Enviro Maniacs • David Suzuki Foundation • DDT and Our World of Politicized Science • Death and Illness (Alleged) • Departure Letters • Ecoculture Canada • Energy Sector • Environmental Terrorists UNMASKED • Environmental Terrorist Organizations • Environmental Defence • FAILURE of IPM • Pesticide Manufacturers • Pesticide Prohibition, Trade Associations • Famous Quotations About Enviro Lunatics • Fertilizer TERROR • Food and Farming • Get Off Our grASS • Global Warming, The Scam of Our Lifetime • Glyphosate Herbicide • Golf Industry • Green Alternatives • Green Party • Halloween Terror • Happy Holidays • Health Canada • Health Concerns with Pest Control Products • Heroes Speaking Out Against Environmental Terror • History of Environmental Terror in Canada • History of the Turfgrass Industry • Letters to the Editor • LIARS and Lying Slackers (Enviro Maniac) Grasp • Mock Advertisements • Mock Speeches • Myth BUSTING • NATIONALLY Prohibited • NEW BRUNSWICK Conspiracy • NEW BRUNSWICK Conspiracy • NO Prohibition Exception for AGRICULTURE Industry • NO Prohibition Exception for GOLF Industry • NOVA SCOTIA Conspiracy • North America Free Trade Agreement (NAFTA) • ONTARIO Conspiracy • Ontario College of Family Physicians • Organic Golf Courses • Organic Mainte-
Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.

The information presented in FORCE OF NATURE has been developed for the education and entertainment of the reader by providing a sequence of events WITH COMMENTARY, striving for accuracy in history, politics, and science.

FORCE OF NATURE is TOTALLY INDEPENDENT and provides NO guarantee regarding accuracy or completeness. In no event shall FORCE OF NATURE be liable for any incidental or consequential damages, lost profits, or any indirect damages.

Finally, NORAHG frequently responds to anti pesticide activists in LETTERS TO THE EDITOR in newspapers across Canada and around the world.

All information, excerpts, and pictures contained in FORCE OF NATURE, A LOOK AT, and LETTERS TO THE EDITOR were retrieved from the Internet, and may be considered in the public domain.

Here is a brief summary of Mr. Gathercole's career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf maintenance industries

Expertise — environmental issues and anti pesticide terrorism • turf and ornamental maintenance and troubleshooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing and distribution

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, government negotiations, public affairs, and workplace safety • supervisor, consultant, and programmer for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insect in both the Montreal region and the Vancouver/Fraser Valley region • with Dr. Peter Dernoeden, confirmed the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr. David Shetlar, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South Western Ontario, and later, in the Montreal and Vancouver regions

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to anti pesticide prohibition • creator of the signs that are now used for posting after application • co-founder of annual winter convention for Quebec golf course superintendents • the major influence in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness of the events of anti pesticide prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT reports

Notable award — the very first man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beachhead against anti pesticide activists in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues designed and implemented strategies that thwarted anti pesticide activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against anti pesticide activists in the town of Hudson, Quebec • launched the largest founding professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.
