Coordinator, Public Issues

Work with us in this role to intimidate, coerce, and alarm the public and government officials by concocting fraudulent lies and non-existent dangers. You can ignore the fact that the health of the public may be better served by advocating towards improving the lifestyle choices of the population, such as diet and exercise. You will provide political advice and analysis on the banning of pesticides even though they are federally legal and scientifically safe. You will recommend strategies by giving the false and fraudulent impression that children and adults are being exposed to cancer-causing agents whenever a pesticide is used. You will give advice and recommend strategies about pesticides even though you have no idea what you are talking about, just like the rest of Canadian Cancer Society.

Any understanding of pesticides and related issues is not an asset. Your education background is not important since you do not need any expertise, training, or background in matters concerning pesticides. You can compensate for your lack of expertise by resorting to fear-mongering, fraudulent lies, misconceptions, coercion, threats, deceptions, terror, and paranoid conspiracies about pesticides. You must fit in with the rest of us.

You have an excellent opportunity with a career that provides a safe, secure, guaranteed, and well-paying enviro-terror-job as long as you coerce, intimidate, and alarm the public and government officials.

In return for your contributions, we offer a very attractive compensation package, which encompasses a salary starting in the high 40K range, excellent benefits, including a pension plan, 3 weeks of vacation, flex-time, and the chance to work as an environmental terrorist. We also offer an incentive of 2K for every anti-pesticide forum that you organize, and a bonus of 1K for every presentation made to each municipal town council. You must make certain that all forums and presentations intimidate, coerce, and alarm the public and government officials. A bounty of 5K will be paid to you for every successful legislation that prohibits cosmetic pesticides.

We thank all applicants for their interest and advise that only those selected for an interview will be contacted. Only unattractive and stupid housewives with dish-pan hands need to apply. You must fit in with the rest of Canadian Cancer Society. No phone calls, please.

The Canadian Cancer Society is an equal opportunity environmental terror organization.
