Cancer incidence rates and the number of deaths due to cancer continue to DECLINE in the United States, according to the Cancer Statistics 2010 report issued by the American Cancer Society (ACS).

The incidence of cancer has ...

- decreased by 1.3 per cent per year from 2000 to 2006 in men
- decreased by 0.5 per cent per year from 1998 to 2006 in women

Cancer death rates have ...

- dropped 21 per cent since 1991 among men
- dropped 12 per cent since 1992 among women

American Council on Science and Health’s Dr. Gilbert Ross and Dr. Ahmedin Jemal, strategic director for cancer occurrence at American Cancer Society, attribute the continual DECLINE in cancer death rate to improved treatment, prevention, and early detection.
The downward trend of cancer incidence, and the number of deaths due to cancer, goes against the rationale that environmental activists who oppose pesticides use to promote legislation against chemicals.

According to Dr. Gilbert Ross of American Council on Science and Health —

"A decrease in death rates is due to better treatment options, such as radiation, surgery and anti-cancer drugs. However, the fact that we’re doing more screening and detecting more cancer should make the incidence rate go up, but this is going against that trend."

Though smoking is a known cause of lung cancer, the etiology of cancer remains largely unknown, and has led to the accusation that environmental chemicals are among the causes.

According to Jeff Stier of American Council on Science and Health —

"This downward trend goes against the rationale that environmental activists — like those who oppose BPA and pesticides — use to promote legislation that would tighten regulations against environmental chemicals."

According to Dr. Elizabeth Whelan of American Council on Science and Health —

"Let’s just say we won’t be hearing CNN’s Dr. Sanjay Gupta’s thoughts on this report anytime soon — good news doesn’t seem to appeal to him and other reporters."
Elizabeth M. Whelan, Sc.D., M.P.H.
whelane@acsh.org

Dr. Elizabeth M. Whelan is President of the American Council on Science and Health (ACSH) and a member of its Board of Trustees. She founded ACSH in 1978.

Whelan is a graduate of Connecticut College. She has a Masters in Public Health from the Yale School of Medicine, a Master of Science from the Harvard School of Public Health, and a Doctor of Science from the Harvard School of Public Health.

Whelan is the author or co-author of twenty-three books on nutrition, smoking, and environmental issues. She has authored or co-authored over 300 articles for popular and professional publications such as Across the Board, Health Confidential, Journal of the American Medical Association, and newspapers such as the Wall Street Journal and New York Post.

Whelan has many professional affiliations and honorary positions in associations such as Men and Women in Science, the American Institute of Nutrition, and the American Medical Writers Association. Whelan has received many awards, including ones from the American Public Health Association and the American Institute of Chemists.

The American Council on Science and Health (ACSH) is a non-profit organization founded in 1978 by Dr. Whelan that produces peer-reviewed reports on issues related to food, nutrition, chemicals, pharmaceuticals, lifestyle, the environment and health. Its core membership is a board of 350 physicians, scientists and policy advisors who review the Council's reports and participate in ACSH seminars, press conferences, media communications and other educational activities.

American Council on Science and Health (ACSH) describes itself as a consumer education consortium. The group describes its mission as to add reason and balance to debates about public health issues and bring common sense scientific views to the public.

ACSH frequently defends science against claims that industry products create risks of injury, ill-health or death. ACSH criticizes some industries for making unscientific and overstated health claims, promoting dangerous natural supplements, or otherwise failing to tell the truth about scientific issues. Scientific and professional journals routinely publish ACSH's work, including Medscape, CRC Critical Reviews in Clinical Laboratory Sciences, Ecotoxicology and Environmental Safety, Journal of Health Communications, Clinical Therapeutics, and Technology. ACSH focuses its studies in several areas.

ACSH frequently warns against regulating chemicals without scientific proof of harms. A 2009 editorial by board member Henry Miller in Investor's Business Daily criticized the United States Environmental Protection Agency (EPA), saying «An EPA hit list of important and demonstrably safe chemicals is about to be put through the regulatory wringer, and many are likely to be banned or severely restricted. These include bisphenol-A, phthalates, life-saving flame retardants, the herbicide atrazine, and fluorinated chemicals used to make Teflon. »

While ACSH does not currently disclose their funding, Whelan described ACSH's contributors to John Tierney of the New York Times in 2007 — ACSH has a diverse funding base — we receive donations from private foundations and individuals and unrestricted (usually very small) grants from corporations. The fastest-growing segment of our funding base is individual consumers who are sick and tired of the almost daily baseless scares — and they write us checks to help support our work.

Source regarding ACSH & Wikipedia.
Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against Huje that seek to harm the Green Space Industry (NORAH). It is a series of Reports destined for the Green Space Industry, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY. The neutrality of these Reports might be disputed.

Huje is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing that families are in some NON-EXISTENT danger with conventional pest control products. Huje also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALIGNANT prohibition of FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE conventional pest control products.

All information, excerpts, and pictures contained in this Report were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release. The events, characters, companies, and organizations, depicted in this Report are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. Don’t thank us. It’s a public service. And we are glad to do it.

Force Of Nature, and its various incarnations, is the brainchild of William H. Gathercole and his entourage. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in public affairs, workplace safety, and environmental compliance. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada’s Turf and Grounds Maintenance Authority. Mr. Gathercole is now retired from Force Of Nature, although his name continues to appear as the FOUNDER. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status, that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully! For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of Environmental Terror for the entire Modern Green Space Industry across Canada. Mr. Gathercole’s involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec. Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair.

Mr. Gathercole and his entourage have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. Through Force Of Nature, Enviro Maniac Activist Huje are identified on the basis of their sham environmental activities, affiliations, and whereabouts. Even though Mr. Gathercole has been a mis-guided adversary, each still deserves our respect. The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry. Their pretentious prohibitionist rants have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd Huje is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.

Knowledge is of no value unless you put it into practice
