

SEPTEMBER 28th, 2011  
LETTER TO THE EDITOR  
RESPONSE TO MICHELLE KRAMER  
HIGHLAND PARK PATCH NEWSPAPER  
HIGHLAND PARK ( CHICAGO ), ILLINOIS

## **Pest Control Products CAUSE NO HARM**

According to Anti-Pesticide Activist and Realtor Kramer —

« *Scientific studies have already linked lawn chemicals with childhood cancer ...* »

Kramer is WRONG, and it is apparent that NON-EXPERT Anti-Pesticide Activists, like Kramer, who use TERROR-TALK about cancer, have NO recognized expertise, training or background in matters concerning pest control products.

NO HARM WILL OCCUR when pest control products are used according to label directions.

Overall, when they are used properly, there are NO harmful irreversible effects to health and the environment !

Anti-Pesticide Activists, like Kramer, use the public's FEAR OF CANCER in order to CONCOCT ALLEGATIONS about the IMAGINARY DANGER of pest control products.

It is a MYTH to believe that pest control products somehow cause cancer.

Pest control products DO NOT CAUSE CANCER.

Moreover, overall DEATHS DUE TO CANCER continue to DECLINE.

## **GARBAGE DUMPS and DANGEROUS SURFACES**

According to Anti-Pesticide Activist Kramer —

« *Weeds do not cause injuries.* »

Again, Kramer is WRONG !

Pesticide-Free Maintenance creates GARBAGE DUMPS and DANGEROUS PLAYING SURFACES — ESPECIALLY FOR CHILDREN !

PROHIBITING pest control products under the PRETEXT of somehow protecting children's health is actually HARMFUL TO CHILDREN.

Furthermore, Anti-Pesticide Activists like Kramer are willing to COMPROMISE ON THE SAFETY OF CHILDREN who need a CUSHION OF HIGH-QUALITY TURFGRASS when playing and running and falling.

Without conventional pest control products, playing surfaces become thin, and yellow, and OVER-RUN WITH WEEDS, INFESTED WITH INSECTS, and DISMALLY DESTROYED.

Without pest control products, playing surfaces become GARBAGE DUMPS, and are a DANGER for children to play on.

WELL-MAINTAINED, THICKER, GREENER, PEST-FREE outdoor playing surfaces, like home lawns, public green spaces, and sports fields, have MANY PRACTICAL BENEFITS.

Turfgrass playing surfaces act as a NATURAL CUSHION.

Turfgrass is an EFFECTIVE SPONGE for rain water.

A playing surface OVER-RUN WITH WEEDS and INFESTED WITH INSECTS provides NONE of these benefits.

Pesticide-Free Maintenance represents a HAZARD TO ANYONE USING PLAYING SURFACES, ESPECIALLY CHILDREN.

When it rains, pest-infested playing surfaces become SLIPPERY MUD BOGS.

When dry, pest-infested playing surfaces become AS HARD AS CONCRETE.

Pesticide-Free Maintenance actually HURTS kids.

Falling on SLIPPERY MUD or BAKED SOIL is the direct cause of BROKEN BONES, TWISTED ANKLES, and SKINNED KNEES.

Any trend favouring Pesticide-Free Maintenance will lead to GARBAGE DUMPS, DANGEROUS PLAYING SURFACES, and HURT CHILDREN.

## **Children Are NOT At Risk**

According to Anti-Pesticide Activist Kramer —

*« The decision to apply herbicides precisely where children play is one of great magnitude and may negatively impact the children's health for decades to come. »*

Kramer is UTTERLY WRONG !

Pest control products are applied at VERY LOW DOSES, and DO NOT PRESENT A CONCERN to humans, even to CHILDREN.

Pest control products used in the Urban Landscape DO NOT HARM CHILDREN !

## **Hollow and Despicably Alarmist Expressions**

According to Anti-Pesticide Activist Kramer —

*« Are we going to forget how Thalidomide, DES (diethylstilbestrol), asbestos, DDT, and cigarettes were once thought to be safe, but were later found to cause cancer, birth defects, or death ? »*

Again, Kramer is SCAMMING and DECEIVING the public by blurting out HOLLOW and DESPICABLY-ALARMIST expressions like « *birth defects* » and « *cancer* » and « *death* » !

These expressions are TOTALLY VALUELESS and UTTERLY WORTHLESS TERROR-TALK.

These expressions have NOTHING IN COMMON with conventional pest control products.

It is apparent that NON-EXPERT Anti-Pesticide Activists, like Kramer, who BLURT OUT these TERROR-TALK EXPRESSIONS, have NO recognized expertise, training or background in matters concerning pest control products.

It is also apparent that Anti-Pesticide Activists, like Kramer, know NOTHING about pest control products, but know lots about MINDLESS, SENSELESS, and FRAUDULENT FEAR-MONGERING .

## **Using Cigarettes is RIDICULOUS and STUPID**

Kramer's comparison of CIGARETTES to pest control products is PITIFULLY RIDICULOUS, as well as LAUGHABLY STUPID !

Cigarettes have NOTHING IN COMMON with conventional pest control products.

Anti-Pesticide Activists use this NONSENSICAL COMPARISON purely as a means of COERCING and INFLUENCING the public into believing that it is necessary to PROHIBIT pest control products, despite the fact that they are GOVERNMENT-APPROVED, FEDERALLY-REGULATED, SCIENTIFICALLY-SAFE, and PRACTICALLY-NON-TOXIC.

There is NO FEDERAL REGISTRATION of tobacco products.

By comparison, there IS a FEDERAL REGISTRATION of pest control products.

There is NO agency that regulates tobacco, except perhaps for restricting access to young people.

By comparison, there ARE agencies that REGULATE pest control products — Environmental Protection Agency in America and Health Canada.

Moreover, cigarettes are ABOVE THE LAW because our governments have chosen to shield them from the regulatory process.

This is NOT the case with pest control products.

Our governments have chosen to HEAVILY REGULATE pest control products.

In both America and Canada, pest control products are STRINGENTLY TESTED and REGULATED in order to ensure that they are SCIENTIFICALLY SAFE and CAUSE NO HARM.

## **Using Thalidomide is CHEAP FEAR-MONGERING**

Kramer's comparison of Thalidomide to pest control products is a CHEAP form of FEAR-MONGERING.

Thalidomide has NOTHING IN COMMON with pest control products.

Anti-Pesticide Activists like Kramer use the Thalidomide tragedy in order to CONCOCT ALLEGATIONS about the IMAGINARY DANGER of pest control products.

Comparing Thalidomide to pest control products leads to TOTALLY FALSE and UNTRUE MIS-REPRESENTATIONS designed to alarm and enrage the public into PROHIBITING pest control products.

Thalidomide was a sedative used by pregnant women to combat many of the effects of morning sickness.

Thalidomide was WITHDRAWN in 1961, but continues to be used as an immune-modulatory agent used primarily in combination with dexamethasone to treat multiple myeloma.

Thalidomide was supposed to be a harmless sedative for expectant mothers, but instead it caused BIRTH DEFECTS in thousands of babies around the world.

The Thalidomide tragedy led to STRICTER ASSESSMENTS of drugs and even pest control products before they can be registered.

Today, pest control products are among the MOST STRINGENTLY REGULATED PRODUCTS.

Virtually no other consumer product has been subject to the same level of scientific scrutiny and regulatory oversight as pest control products.

## **Prohibition NOT Necessary**

NON-EXPERT Anti-Pesticide Activists like Michelle Kramer are THE LEAST QUALIFIED to provide ANY advice concerning pest control products.

Any PROHIBITION of pest control products is NOT JUSTIFIED because STRICT REGULATIONS BASED ON SCIENTIFIC RESEARCH ALREADY PROTECT OUR HEALTH and OUR ENVIRONMENT.

Incredibly, some jurisdictions ARBITRARILY PROHIBIT pest control products that are, in fact, ...

- Government-Approved,
- Federally-Legal,

- Safe For Children \*
- Scientifically-Safe, and
- Practically-Non-Toxic.

\* Except when stored improperly in the home.

Because of NEEDLESS, SENSELESS, and MALICIOUS PROHIBITION, green spaces are now OVER-RUN WITH WEEDS, INFESTED WITH INSECTS, and DISMALLY DESTROYED — they look like GARBAGE DUMPS.

Overall, when pest control products are used properly, there are NO harmful irreversible effects to health and the environment !

For more information about pest control products, please go to THE LIBRARY OF REPORTS ...

THE LIBRARY OF REPORTS contains Library, History, Links, News, Audios, and Videos with ALL Force Of Nature and Pesticide Truths reports, and information right-off-the-press, in Black & White Documents
