Environmental Doctors and Advocacy Groups Misperceptions

---

## NEW – OCFP 2012 Literature Review – 112 pages – 1 reference to 2,4-D Lawn Pesticide – Costa Rican Coffee Farmer

By [admin](#) | [June 1, 2012](#) | [Doctors who promote public Misperceptions](#)

The Ontario College of Family Physicians is at it again. More Bull CWAP, who funds this group. Please stop.

This review has once again nothing to do with lawn pesticides or the use of Cosmetic Pesticides. Many recent studies and reviews supporting 2,4-D are not even referenced.

Where is the reference to Quebec agreeing that 2,4-d is safe to use?

Where is the BC Legislature findings on Cosmetic Pesticides?

This report will once again be discredited.

Growing body of evidence, My AZZ.
