

FORCE OF NATURE

THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from
National Organization Responding Against HUIE that seek to harm the Green Space Industry (NORAHG)

We Are Living in the 9|11 Era of Anti-Pesticide Terrorism ...

- Anti-Pesticide Activists will continue to harass Government Officials until they hear the answers they want.
- As spring approaches, Anti-Pesticide Activists trot out their NONSENSE.
- Canada has Anti-Pesticide PROHIBITIONS in existence based on JUNK SCIENCE SCARES PERPETRATED BY ENVIRONMENTAL ACTIVISTS.
- Conventional pest control products are SCIENTIFICALLY SAFE.
- Decisions regarding pest control products are to be left with Health Canada.
- Health Canada, and NOT Anti-Pesticide Activists, have THE ESSENTIAL EXPERTISE on the subject of pest control products.
- Health Canada has assessed that products containing 2,4-D DO NOT POSE UNACCEPTABLE RISKS to human health or the environment.
- Laws against lawn products therefore remain, but NOT BECAUSE THEY POSE ANY REAL HEALTH, LAND, OR ENVIRONMENTAL RISK.
- Non-Expert Anti-Pesticide Activists are THE LEAST QUALIFIED to provide ANY advice concerning pest control products.
- The Government of Quebec has agreed that products containing 2,4-D DO NOT POSE AN UNACCEPTABLE RISK to human health or the environment.

Anti-Pesticide BANS Remain In Place, but NOT Because of Any REAL Risks

February 16th, 2011

Simon E. Taylor

Responding to Anti-Pesticide
Activist Allan S. Taylor

Selected and adapted excerpts

Simon E. Taylor is President and Owner of Regina Weed Man, a Professional Lawn Care company located in Regina, Saskatchewan.

Overview from an Independent Perspective

Allan S. Taylor (no relation to Simon E. Taylor) is an Anti-Pesticide Lunatic who CONSPIRES to PROHIBIT pest control products used in the Urban Landscape.

On April 18th, 2005, Taylor WASTED the resources of Health Canada by submitting a petition with the following types of RIDICULOUS questions ...

Why did PMRA appoint Dr. Len Ritter to this committee ? Ritter is known throughout Canada as an employee and mouth-piece for the pesticide industry. Surely there are many unbiased toxicologists in Canada, not connected to the pesticide industry that could have been chosen. Why weren't they ? [Dr. Ritter is the NATION'S LEADING TOXICOLOGIST]

How does PMRA justify allowing this massive, uncontrolled pesticide experiment on Canadians and their environment, without prior consent or knowledge ? [!?!]

Why has PMRA, given their mandate to protect the environment and human health, allowed this massive, uncontrolled, pesticide experiment to continue, still without our prior consent and knowledge ? [!?!]

On February 16th, 2012, Anti-Pesticide Activist Allan S. Taylor wrote a Letter to the Editor. Here are some excerpts —

While acknowledging the importance of life-style choices we all make as individuals, life-style changes won't prevent exposure to any of the serious contaminants in our environment that we have no control over.

Many of these contaminants, especially PESTICIDES, are carcinogenic and hormone disrupters that have been shown to cause, or have links to, cancers, diabetes, asthma, Parkinson's, Alzheimer's, etc. [WRONG !]

Living a healthy life-style won't prevent any of us from eating, breathing or drinking these environmental contaminants !

Overview from an Independent Perspective (continued)

I and others, for years, have strongly recommended Diener use her authority, under the Public Health Act, to BAN ALL PESTICIDES USED FOR COSMETIC PURPOSES IN ALL URBAN CENTRES, AND ALL RURAL AREAS, where children gather.

All to no avail ! [Poor Lil' Frustrated Anti-Pesticide Terrorist !]

Many, if not all, non-government health organizations [?!?!], most credible environmental [terrorist] organizations, five Canadian provinces, and 140-plus Canadian municipalities all ban the use of pesticides for cosmetic purposes.

Why ?

Because they are a threat to human health. [WRONG !]

So Diener and the Regina Qu'Appelle Health Region shouldn't lecture me about « lifestyle » while refusing to use their authority to control the many serious chemical contaminants that pollute our environment.

I, for one, do want to live longer and healthier.

Several Anti-Pesticide and Environmental-Terrorist Organizations operate in the Province of Saskatchewan, and they include the following —

- Canadian Cancer Society — Saskatchewan Division
- Green Party of Saskatchewan
- Lung Association of Saskatchewan
- Saskatchewan Eco Network
- Saskatchewan Environmental Society
- Saskatchewan Network for Alternatives to Pesticides (SNAP)
- Saskatchewan Pesticide Working Group
- Saskatchewan Registered Nurses' Association (SRNA)
- Saskatoon Health Region — Saskatoon

Response to Anti-Pesticide Activist
Allan S. Taylor, February 16th, 2012

Response 1 — Shortest Version

Spring approaches, and, again, Allan Taylor trots out his NONSENSE.

In 2008, Health Canada assessed what's used on lawns and concluded ...

Products containing 2,4-D DO NOT POSE UNACCEPTABLE RISKS to human health or the environment.

Quebec was the first province to assert products containing 2,4-D might be carcinogenic.

On that basis, municipalities banned its use on lawns.

Others followed, but stopped short of declaring it a carcinogen.

Activists INVENTED other reasons, but the JUNK SCIENCE CANCER SCARE always lurked in the background.

Laws against lawn products therefore remain, but NOT BECAUSE THEY POSE REAL RISK.

Under a recent North America Free Trade Agreement (NAFTA) with Dow (manufacturer of 2,4-D) ...

The Government of Quebec agrees that products containing 2,4-D DO NOT POSE AN UNACCEPTABLE RISK to human health or the environment.

This is consistent with Health Canada and regulators in the U.S. and Europe.

Response to Anti-Pesticide Activist
Allan S. Taylor, February 16th, 2012

Response 1 — Shortest Version (continued)

What this means in Canada is that WE HAVE BANS IN EXISTENCE BASED ON JUNK SCIENCE SCARES PERPETRATED BY ENVIRONMENTAL ACTIVISTS.

No pest control product can be sold or used until Health Canada's scientists have determined whether the product meets health and safety requirements.

Non-Expert Anti-Pesticide Activists [like Allan S. Taylor] are the LEAST QUALIFIED TO PROVIDE ADVICE concerning pest-control products.

Allan Taylor has NO expertise or recognized training in matters concerning turfgrass management and pest control products.

Health Canada has that essential expertise.

Conventional pest control products are SCIENTIFICALLY SAFE.

I leave these decisions to Health Canada.

Allan Taylor WILL CONTINUE TO HARASS OFFICIALS UNTIL HE HEARS THE ANSWER HE WANTS.

Anti-Pesticide TERRORISM Hero Speaking Out Against

Response to Anti-Pesticide Activist
Allan S. Taylor, February 16th, 2012

Response 2 — Short Version

Another spring approaches and yet again, Mr. Allan S. Taylor trots out his nonsense.

In May of 2008, Health Canada concluded that what we use on lawns is as follows —

Products containing 2,4-D DO NOT POSE UNACCEPTABLE RISKS to human health or the environment.

Quebec was the first province to assert that products containing 2,4-D were maybe carcinogenic.

On that basis, municipalities introduced bans on its use on lawns.

Others followed but stopped short of declaring the chemical a carcinogen.

Instead, they INVENTED other reasons, but the JUNK SCIENCE CANCER SCARE always lurked in the background as a motivation.

Laws against lawn products therefore remain, but NOT BECAUSE THEY POSE ANY REAL HEALTH OR ENVIRONMENTAL RISK.

Under a recent North America Free Trade Agreement (NAFTA) with Dow (the manufacturer of 2,4-D) ...

The Government of Quebec agrees that products containing 2,4-D DO NOT POSE AN UNACCEPTABLE RISK to human health or the environment.

Anti-Pesticide

Hero Speaking Out Against TERRORISM

Response to Anti-Pesticide Activist
Allan S. Taylor, February 16th, 2012

Response 2 — Short Version (continued)

This is consistent with Health Canada and regulators in the U.S. and Europe.

What this means in Canada is that WE NOW HAVE BANS IN EXISTENCE THAT ARE BASED ON JUNK SCIENCE SCARES PERPETRATED BY ENVIRONMENTAL ACTIVISTS.

NO pest control product can be sold or used until Health Canada's scientists have evaluated ALL the existing evidence to determine whether the product meets health and safety requirements.

Non-Expert Anti-Pesticide Activists like Allan S. Taylor are THE LEAST QUALIFIED to provide ANY advice concerning pest control products.

Allan S. Taylor has NO expertise, recognized training, or successful background, in matters concerning turfgrass management and pest control products.

Health Canada, and NOT Allan S. Taylor, has THE ESSENTIAL EXPERTISE on the subject of pest control products.

Conventional pest control products are SCIENTIFICALLY SAFE !

I'm willing to leave these decisions to the experts at Health Canada.

Allan S. Taylor will continue to harass public officials until he hears the answer he wants to hear.

That doesn't make it true !

Simon E. Taylor

Response to Anti-Pesticide Activist
Allan S. Taylor, February 16th, 2012

Response 3 — Long Version

Ah, as another spring approaches and yet again, Mr. Allan S. Taylor trots out his NONSENSE.

As recently as May of 2008, Health Canada's Pest Management Regulatory Agency (PMRA), have concluded that what we use on lawns (we being professionals and home-owners alike) is as follows —

After a thorough re-evaluation of the herbicide (2,4-dichlorophenoxy acetic acid, 2,4-D), Health Canada's Pest Management Regulatory Agency (PMRA), under the authority of the Pest Control Products Act and Regulations, has decided to ALLOW CONTINUED REGISTRATION for the sale and use in Canada of certain products containing 2,4-D.

Products containing 2,4-D DO NOT POSE UNACCEPTABLE RISKS to human health or the environment.

They also have value for lawn and turf, agriculture, forestry and industrial uses when used according to the label directions proposed in previous consultation documents.

Simon E. Taylor

Response to Anti-Pesticide Activist
Allan S. Taylor, February 16th, 2012

Response 3 — Long Version (continued)

As far as the history of this movement, I couldn't say this any better than Terence Corcoran said in May of 2011 —

Quebec was the first province to declare weed-killers containing 2,4-D as possibly carcinogenic.

On that basis, municipalities in Quebec INSTITUTED BANS of its use as a lawn weed killer.

Other jurisdictions also banned 2,4-D, but often stopped short of declaring the chemical a carcinogen.

Instead, they INVENTED OTHER REASONS FOR ELIMINATING THE CHEMICAL, but the JUNK SCIENCE CANCER SCARE always lurked in the background as a motivation.

Laws against lawn herbicides containing 2,4-D therefore remain in place, but NOT BECAUSE THEY POSE ANY REAL HEALTH, LAND, OR ENVIRONMENTAL RISK.

Simon E. Taylor

Response to Anti-Pesticide Activist
Allan S. Taylor, February 16th, 2012

Response 3 — Long Version (continued)

Under the North America Free Trade Agreement (NAFTA) with Dow (the manufacturer of 2,4-D) ...

The Government of Quebec agrees that products containing 2,4-D DO NOT POSE AN UNACCEPTABLE RISK to human health or the environment, provided that the instructions on their label are followed.

This is consistent with Health Canada's Pest Management Regulatory Agency and regulators in the U.S. and Europe.

What this means in Canada is that we now have chemical bans in existence in all regions that are BASED ON JUNK SCIENCE SCARES perpetrated by environmental activists.

When Quebec set a precedent on the basis of a CANCER SCARE, other regions followed.

Meanwhile, Canadian farmers, who use almost 99 per cent of all 2,4-D, can continue to spray.

Farmers know that there is now little chance that any ban will ever be extended to their industry.

Within Canadian cities, however, DANDELIONS AND WEEDS CANNOT BE REMOVED USING PERFECTLY SAFE CHEMICALS.

Simon E. Taylor

Response to Anti-Pesticide Activist
Allan S. Taylor, February 16th, 2012

Response 3 — Long Version (continued)

NO pest control product can be sold or used until Health Canada's scientists have evaluated ALL the existing evidence to determine whether the product meets stringent health and safety requirements.

Non-Expert Anti-Pesticide Activists like Allan S. Taylor are THE LEAST QUALIFIED to provide ANY advice concerning pest control products.

Allan S. Taylor has NO competent expertise, recognized training, or successful background, in matters concerning turfgrass management and pest control products.

Health Canada, and NOT Allan S. Taylor, has THE ESSENTIAL EXPERTISE on the subject of pest control products.

Conventional pest control products are SCIENTIFICALLY SAFE !

Overall, when they are used properly, there are NO harmful irreversible effects to health and the environment !

I'm willing to leave these decisions to the experts at Health Canada, but Allan S. Taylor is not, and will continue to harass any public official he can think of until he hears the answer he wants to hear.

That doesn't make it true !

**STOP standing
on your head
doing NOTHING against
Lunatic Terrorist
PROHIBITION**

What YOU can do in the war against Lunatic Anti-Pesticide Terrorism ?!?!?!?

What can YOU do against Anti-Pesticide Lunatics ?

WRITE AGAINST THE LUNATICS !

**FIGHT AGAINST the
CONSPIRACY to PROHIBIT
pest control products
in the Urban Landscape**

**RAT-OUT the Anti-Pesticide Lunatics
with COMPLAINTS through
LETTERS TO THE EDITOR
and with SUBMISSIONS
to the government**

**Anti-Pesticide Lunatics are GOVERNMENT-
FINANCED with TAX-FREE MONEY**

**Demand a REVOCATION of their organizations'
REGISTERED CHARITY TAX-EXEMPT STATUS !**

FORCE OF NATURE

We are living in the 9|11 Era of Anti Pesticide Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is Perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces under the RIDICULOUS PRETEXT of somehow « saving » the environment.

NORAHG is a NATIONAL NON PROFIT NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HUJE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are Hateful Underhanded Jokes as Environmentalists who have been WRONG FOR OVER 50 YEARS.

There is NO RECOURSE but LITIGATION against Anti Pesticide HUJE.

Another RECOURSE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOCATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HUJE should Get OFF Our grASS, and they should Roast In Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti Pesticide Terrorist Acts of Subversion.

The purpose of this ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti-Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION !

NORAHG also produces FORCE OF NATURE, reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports destined for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE, as well as ground breaking original reporting that informs, entertains, and creates real change.
