## Fertilizer Ban

Posted 13 hours ago

Are our city councillors for real. They propose to be the first in the province to ban commercially produced fertilizer containing phosphorous. What's gonna be next any kind of fertilizer. I for one take a great amount of pride in how my lawn looks. As it stands I have a problem already with the watering on odd or even days bylaw. I'm the guy who has to pay for the use of and disposal of the water and then I'm told when I can use it. Sorry people I think your overstepping your boundaries creating a bylaw on banning the use of fertilizer when your own powers that be admit that it would have very limited or no effect on decreasing the growth of blue-green algae in our lakes. What kind of idiotic thinking is that when we pay civic directors to come up with answers such as that. Why don't you create a bylaw banning septic beds near any water source I'll bet that will go over big! Seems to me that would be your number one pollution source. The comment about people fertilizing before a rainfall and spreading it on driveways is a little lame don't you think? For one thing that would be the appropriate time to fertilize and who in god's name fertilizes his driveway. I can't believe anyone would try and convince co-council of the validity of their way of thinking with stupidity like that.

And you wonder why these morons spend so much time discussing issues in council meetings.

P.S.

I wouldn't be so proud about being the first in the province introducing this new by-law I think the rest of the province will be laughing at...you!

Welcome to my Sudbury
