19/08/2009

Dating Websites Match.com and eHarmony are what lonely Enviro-Maniacs typically think of when online dating is mentioned. Yet, these sites don't cater to the more bizarre or niche category of people who don't fit this bland kind of dating. Whether it's Singlesnet, PlentyofFish and the like it's pretty much the same routine : Take 1,000 pictures of yourself, choose two or three that stand out, write up a blurb on how awesome you are and you have at it !

But what of the atypical Enviro-Maniac markets ?

Is it possible for them to find love and happiness ?

The following is a pretty good indication that there is room for all Enviro-Maniacs.

It is hoped that if Enviro-Maniacs can find love and happiness, perhaps they will be less inclined to conspire in prohibiting legal, safe, and irreplaceable pest control products.

Don't thank the people at Force of Nature.

This is a public service.

And we are glad to do it.

Dating Services For Enviro-Maniacs.

Scientific Match

At a measly \$2000 for a lifetime membership, this site boasts that it will find Enviro-Maniacs a match based on PHYSICAL chemistry. Their CLIA/ASH-accredited lab analyzes your supplied DNA sample (immune system genes) to find that perfect Enviro-Maniac, and then destroy it after they're done with it. What are the benefits of DNA comparison ?

- Chances are increased that you'll love the natural body fragrance of your matches.
- You have a greater chance of a more satisfying sex life.
- Women tend to enjoy a higher rate of orgasms with their partners.
- Women have a much lower chance of cheating in their exclusive relationships.
- Couples tend to have higher rates of fertility.
- All other things being equal, couples have a greater chance of having healthier children with enviro-maniac tendencies.

Force of Nature was launched for continuous transmission on the Internet on January 1st, 2009. It is a series of e-newsletters destined for the *Green Space Industry*, the *environmental movement*, politicians, municipalities, and the media, nation-wide across Canada, and parts of the United States. *Force of Nature* is produced in two parts. First. The *Media Report* itself that reports on the current events affecting the future of the *Green Space Industry*. Second. *Independent Perspective.*, which is a running commentary, sometimes also of a more technical in nature.

Force of Nature is the brainchild of William H. Gathercole and his entourage. The opinions expressed in these e-newsletters, even though from an **independent perspective**, may not reflect those of everyone in the *Green Space Industry*, or Mr. Gathercole's many associates. Be warned ! Mr. Gathercole and his team may sometimes be very irreverent and fearless with these e-newsletters.

William H. Gathercole holds a degree in Horticulture from the *University of Guelph*, and another pure and applied science degree from *McGill University*. He has worked in virtually all aspects of the *Green Space Industry*, including public affairs, personal safety, and environmental issues. Mr. Gathercole has been a consultant and instructor for decades. Mr. Gathercole has been following the evolution of *environmental terrorism* for over a quarter-century. His involvement in environmental issues reached a fevered pitch in the 1990s, when he orchestrated, with others, legal action against unethical and excessive municipal regulations restricting the use of pest control products. (i.e. the Town of Hudson.) Although he can be accused of being *anti-environment-movement*, he is, in fact, simply a strong advocate for the *Green Space Industry*. However, this position has not precluded him from criticizing the industry itself. Nonetheless, his vast knowledge of our long journey with environmental issues is *undeniable*. (Hopefully !) For many years, Mr. Gathercole has been a contributing columnist for *TURF & Recreation Magazine*, Canada's Turf and Grounds Maintenance Authority.

All pictures contained in *Force of Nature* were found somewhere on the Internet. We believe that they are in the public domain, as either educational tools, industry archives, promotional stills, publicity photos, or press media stock.

Information presented in *Force of Nature* has been developed for the education and entertainment of the reader. The events, characters, companies, and organizations, depicted in this document are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental.
