

NORAHG RESPONDS TO FRAUDULENT USE OF NON-EXPERT IUCN REPORT

IUCN is deceiving the public about neonicotinoid insecticides. The IUCN assessment is merely an amateurish attempt to perform pesticide research. The IUCN assessment has been discredited since its finding could not even be published in any peer-reviewed and legitimate scientific journal. On June 24th, 2014, a non-expert assessment by International Union for the Conservation of Nature (IUCN, a.k.a. Task Force On Systemic Pesticides), an anti-pesticide lobby-organization, alleged that neonicotinoid insecticides MAY be harming a range of species and MAY be responsible for so-called bee colony collapse disorder. This assessment by IUCN has been DISCREDITED, but, unfortunately has been FRAUDULENTLY USED by anti-pesticide activists in their conspiracy to recklessly and arbitrarily impose prohibition against neonicotinoid insecticides ! IUCN's reckless and arbitrary demands to prohibit against neonicotinoid insecticides will not resolve so-called bee colony collapse disorder, and will not help bee-keepers with their pest problems. The fraudulent mis-use of the non-expert IUCN report is designed to alarm and enrage the public into arriving at inappropriate conclusions about neonicotinoid insecticides. The non-expert IUCN report concocts the story that there is some kind of bee crisis. There is no bee crisis. Clearly, the principal mandate of IUCN has been to attract more members, more donations, and more profit by scamming the public with the concoction of fraudulent lies and imaginary danger about neonicotinoid insecticides. There is a growing and conclusive body of evidence about IUCN squandering and misappropriating its public donations on subversive and partisan anti-pesticide conspiracies. There is also conclusive evidence that IUCN is interfering with partisan politics, and is in violation of taxation laws in several jurisdictions. Consequently, IUCN does not deserve any donations or support. Nor does it deserve a charity tax-exempt status. Scientific research shows, as reported through EPA's and Health Canada's vast scientific database, that no harm will occur to bees when neonicotinoid insecticides are used properly. There is no bee crisis. Science and statistics do not support IUCN's reckless and arbitrary demands to prohibit against neonicotinoid insecticides. There are no IUCN activists who have any background, training, or education in matters concerning neonicotinoid insecticides. Any IUCN opinion is valueless and worthless. If we had less conventional neonicotinoid use in the environment, we would still have bee colony collapse disorder, because many bee-keepers are not competent to manage their hives. The whole truth about neonicotinoid insecticides can be found at ... <http://wp.me/P1jq40-2BA> <http://wp.me/p1jq40-6WJ> <http://wp.me/p1jq40-6H8> The whole truth about IUCN can be found in the following report ... <http://wp.me/p1jq40-85q> NORAHG is the National Organization Responding Against HUJE that seek to destroy the Green space industry.
