

Ontario Grain Farmers Boycott Conference On Bees

Posted on [January 3, 2015](#) by [gijhad](#)

Sun News out of Canada reports the backlash over Ontario's regulations on neonic pesticides has heated up with grain farmers [boycotting a provincial conference](#) on the pesticide's use. The grain farmers have obviously been hurt by the province's restrictions which requires farmers to reduce neonicotinoid pesticide use by 80%. One thing that is most striking is that Ontario bee keepers oppose the restriction of neonic pesticides. The Ontario grain farmers trade association is accusing the province's government of catering to lobbyists and ignoring their interests.

During the latter part of November, Beekeepers in Alberta publicly [came out against](#) Ontario's proposed rules on neonics stating that there was no evidence that the pesticides were affecting their bee populations. Also, [a scandal erupted in Europe](#) when it was revealed that a group of scientists had plotted to churn out a study to be used to push the European Union to ban neonicotinoid pesticides.

The entire controversy surrounding neonicotinoid pesticides is the result of a Harvard researcher named Chensheng Lu who [was able to get a study published](#) in a little known Italian peer review journal. Consequently, Lu's paper has been the basis for attempts to restrict neonic pesticides both here and abroad. The manuscript's research was criticized upon publication for its findings. But since the study got published, environmentalists have used it as the basis to strike up a campaign to *save the bees* when, in fact, a variety of different factors have lead to bee populations declining. Again we see environmentalists politicizing science in order to achieve their perverse ends of restricting or reducing the human food supply. Neonicotinoids are used by farmers to ward off insects that destroy crops. Australia has used neonics for years and their bee populations are quite healthy. Because environmentalists are anti-human they

pitch pesticides of any kind as being bad for the ecosystem despite the science not backing up their claims. The reason for that is that they are anti-human and a way to start killing humans off is to attack mankind's food supply. It is best done by banning pesticides that assist farmers in warding off insects that consume their crop yields.

NORAHG RESPONDS IN FAVOUR OF GRAIN FARMERS' BOYCOTT OF FANATIC-INFESTED PROVINCIAL FORUMS — THERE IS NO OTHER RECOURSE THAN SUING THE SOBs' BRAINS OUT !

The boycott is a GOOD MOVE by Grain Farmers of Ontario !
<http://tinyurl.com/k5rpnfj> There is absolutely NO POINT in publicly debating with non-expert bee conspiracy fanatic-terrorists. Their cacophony of illegitimate mock-outrage during these provincial forums will be designed to coerce, intimidate, and terrorize Grain Farmers of Ontario. Furthermore, their lies and mis-information are designed to alarm and enrage the public and government officials into believing that their reckless proposal for prohibition against neonicotinoid insecticides is somehow necessary. Consequently, these forums will become USELESS to explain that many bee-keepers are simply NOT competent to manage their own hives. THEY are the cause of bee colony collapse disorder, and NOT neonicotinoid insecticides. Bee conspiracy fanatic-terrorists are WRONG ! Overall, there is NO bee crisis in Ontario because of insecticides, and ANY prohibition is NOT necessary ! Furthermore, there will be NO other recourse but litigation and complaints ! CropLife Canada, Grain Farmers of Ontario, and all agricultural businesses, must sue the anti-neonicotinoid SOBs' brains out ! They must stop the proposed prohibition in Ontario, whatever the cost may be ! They must demand that the proposed prohibition be stopped, forever. For more information about SUING THE SOBs' BRAINS OUT, go to The Pesticide Truths Web-Site ... <http://wp.me/p1jq40-8FZ> We are the National Organization Responding Against HUJE that seek to destroy the Green space and other industries (NORAH G).
