

## Delivers Above and Beyond

5★ = Outstanding, 4 = Very Good, 3 = Good, 2 = Moderate, 1 = Poor

- ✓ Delivers turf performance *above-and-beyond* many popular varieties
- ✓ Outstanding resistance against a broad spectrum of diseases
- ✓ Proven quality performance through years of US and Canadian university trials
- ✓ Dark green, lush turf that's tough and virtually pest free

★★★★★	<b>Poa annua</b>	★★★★★	<b>Summer Patch</b>
★★★★★	<b>Shade Tolerance</b>	★★★★★	<b>Dollar Spot</b>
★★★★★	<b>Turf Density</b>	★★★★★	<b>Leaf Rust</b>
★★★★★	<b>Heat Tolerance</b>	★★★★★	<b>Leaf Spot</b>

**Poa annua Fighter:** **Beyond's** aggressive nature crowds out invading annual bluegrass (*Poa annua*). In university trials in New York, New Jersey, and Massachusetts, **Beyond** ranked among the top Kentucky bluegrasses against *Poa annua*.

**Resists Important Disease and Pests:** **Beyond** fights the browning caused by many common lawn diseases with its built-in pest resistance. In North American university trials, **Beyond** ranked highly against necrotic ring spot, red thread, Microdochium pink snow mold, brown patch, spring melting out, leaf rust, stem rust, dollar spot, stripe smut, anthracnose, and summer patch. Better resistance means fewer chemicals and a greener turf all season.

**Optimized for Sports Turf Mowing:** **Beyond** tops the charts at mowing heights from 0.5-2 in. (1.2-5 cm). It tolerates a range of mowing heights, even above 3 in. (7.6 cm).

**Tough to Wear Out:** In vigorous slapping-action wear trials in New Jersey, **Beyond** scored among the toughest, most resilient varieties. For athletic fields, this means more green turf, less bare ground.

**Tight Sod Knitting for Faster Lifting:** In rigorous sod-stretching treatments at the University of Nebraska (2002) **Beyond** withstood 126.3 lbs. of tear tension (ranked in top 4 varieties). Some older bluegrasses ripped with as little as 5 to 7 lbs. of applied force. For the sod producer, this means faster turn-around.

**Elite Sun-and-Shade:** **Beyond** is one of the few premium bluegrasses that excels in sun or shade. In a shade study at the University of Kentucky, **Beyond** scored among the top 10 varieties in shade performance.

**Quick start in the Spring:** **Beyond** starts out greener in the spring by resisting winter diseases. Then, it's one of the best Jacklin varieties for spring density and ground cover. **Beyond** stays green by avoiding spring melting out and other cool-weather diseases.

**Seeding Rate:** 2-3 lbs./1000 ft<sup>2</sup> (10-15 g/m<sup>2</sup>) by itself or blended with other bluegrasses. Mix **Beyond** with 20% ryegrass or 80% tall fescue.

**Beyond with CSI-Rye, Rush and Rugby II on athletic field in Illinois**
