Background Information from an Independent Perspective

Nova Scotia (pronounced /ˌnoʊvəˈskɒʃjə/; Latin for New Scotland; Scottish Gaelic: Alba Nuadh; French: Nouvelle-Écosse) is a Canadian province located on Canada's southeastern coast. It is the most-populous province in Atlantic Canada. Its capital, Halifax, is a major economic centre of the region. Nova Scotia is the second-smallest province in Canada with an area of 55,284 square kilometres (21,300 square miles).

Its population of 939,531 makes it the fourth-least-populous province of the country, though second-most-densely populated.

Nova Scotia's economy is traditionally largely resource-based, but has diversified since the middle of the 20th Century.

Industries such as fishing, mining, forestry and agriculture remain very important and have been joined by tourism, technology, film, music, and finance.

According to the 2001 Canadian census, the largest ethnic group in Nova Scotia is Scottish (29.3%), followed by English (28.1%), Irish (19.9%), French (16.7%), German (10.0%), Dutch (3.9%), First Nations (3.2%), Welsh (1.4%), Italian (1.3%), and Acadian (1.2%). Peoples of European descent thus make up approximately 96.8% of the total population. Almost half of all respondents (47.4%) identified their ethnicity as « *Canadian* ».

PROPOSED NON-ESSENTIAL PESTICIDES BAN OPEN TO COMMENT

January 7th, 2010

Government of Nova Scotia

Media Release

Nova Scotians will have an opportunity to comment on a PROPOSED BAN on the use and sale of non-essential lawn care pesticides.

A public consultation will help government better understand opinions, concerns and issues arising from the non-essential use of pesticides for residential, public and commercial lawn maintenance. Comments will be considered before decisions are made on changes to laws or regulations.

« *The province is committed to fostering a healthier, more sustainable environment and is looking for ways to reduce non-essential pesticide use* », said Environment Minister **Sterling Belliveau**.

« This proposal is consistent with the municipalities' request, and we look forward to hearing Nova Scotians' comments on it ».

Health Canada has said it is good practice to reduce or eliminate unnecessary exposure to pesticides, and Canadians should minimize exposure to pesticides.

Health Canada's Pest Management Regulatory Agency approves which pesticides may be sold or used in Canada. The provincial Department of Environment currently regulates how commercial and restricted pesticides may be sold, used, stored, disposed of, and transported.

The provincial consultation will address the use and sale of pesticides for non-essential lawn care, not uses such as pest control to protect public health, maintain commercial golf courses, or agricultural and forestry application.

Comments will also be accepted by phone at 1-888-320-0555.

The deadline for comment is March 7, 2010.

Fight back against cancer in Nova Scotia

Fight Back by Supporting a Cosmetic Pesticide Ban in Nova Scotia!

The Nova Scotia government is proposing a province-wide cosmetic pesticide ban, similar to laws already in place in Ontario and Quebec. The Canadian Cancer Society supports the Nova Scotia government's proposal. So do our coalition partners in Pesticide Free Nova Scotia, including the IWK Health Centre and the Ecology Action Centre.

Please take a moment to tell the Government of Nova Scotia that you support a strong cosmetic pesticide ban. Sending a comment will help counter chemical industry lobbying against the proposed ban. Your message does not need to be long. A good short message would be:

Cosmetic pesticides are an unnecessary risk to our health and our environment. I support a strong ban the sale and use of cosmetic pesticides.

You can email a message to policy@gov.ns.ca or submit comments using [the government's online feedback form](#).

Why it is important to ban cosmetic pesticides

Exposure to chemical pesticides is associated with an increased risk of cancer, particularly in children. Purely cosmetic use of pesticides, such as for lawn care, puts health at risk for no good reason. That is why cosmetic pesticides are banned in Ontario and Quebec. There are many effective [non-toxic alternatives](#) to cosmetic pesticides.

For More Information

If you are on Facebook, please join [the Pesticide Free Nova Scotia Facebook group](#).

To read the Nova Scotia government's discussion paper, "[Limiting our risk – a discussion paper about a proposed provincial ban on non-essential lawn care pesticides](#)".

[For more information about pesticides and cancer.](#)

[For information about non-toxic alternatives to cosmetic pesticides.](#)

Join the Fight!

You can join the fight by signing up for our public issues email updates. We will send you regular updates about the issues we are working on, including how you can get involved in fighting back against cancer.

Atlantic Canada Conspiracy to Prohibit Pest Control Products

NOVA SCOTIA
LAGGING
ON REDUCING
PESTICIDES

*The Basterds
speak !*

July 27th, 2009

Chris Benjamin (Enviro-Maniac-Activist)

The Chronicle Herald

[Chris Benjamin is an Enviro-Maniac-Activist who writes on behalf of Pesticide Free Nova Scotia, which is a club with a mere four dozen individuals that conspire to ANNIHILATE the entire Modern Green Space Industry with the NEEDLESS, SENSELESS, and MALICIOUS prohibitionist policies leading to LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting TERROR, DESPAIR, and DESTITUTION on THOUSANDS of hapless victims throughout the Green Space Industry. Benjamin has absolutely NO recognized expertise, training or background in matters concerning pest control products ! Consequently, his opinions on this subject are VALUELESS and WORTHLESS.]

On the issue of cosmetic (lawn and garden) pesticides, Nova Scotia has officially gone from leader to last.

Nova Scotia

Part 1

Atlantic Canada Conspiracy to Prohibit Pest Control Products

Ontario and Quebec have banned the sale and use of these products. New Brunswick has announced legislation that it hopes will reduce pesticide use significantly. Prince Edward Island has promised a pesticide ban by next year. At one time, Halifax was the largest city in Canada to ban pesticides. Now we are the laggards of our region.

The new government [of Nova Scotia] has promised to change the rules, allowing any municipality the right to ban the use of pesticides. This is welcome news for towns like Wolfville and Stellarton, where residents harmed by pesticides have convinced their town councils that a pesticide bylaw is needed.

What many Nova Scotians may not know is that pesticide bans are a great way to create the green jobs our politicians keep promising. The lawn care industry is booming wherever cosmetic pesticides have been banned. [Wrong !]

In Halifax, since the enactment of the cosmetic pesticide bylaw, the number of landscaping companies has increased by **more than 50 per cent**, [Wrong !] as has the number of employees per firm. Most of this growth is sparked by organic landscapers filling the niche for pesticide-free yard work created by the ban. [Wrong !]

Banning landscape pesticides is an easy way to create green jobs, save on health care costs, save lives and protect the environment. [Wrong !] We can only hope that our new government decides to keep up with the rest of the Maritimes, and ban the sale and use of lawn pesticides outright.

Nova Scotia

Atlantic Canada Conspiracy to Prohibit Pest Control Products

WHY NOVA SCOTIA SHOULD BAN LAWN AND GARDEN PESTICIDES

*The Basterds
speak !*

June 20th, 2009

Lisa Gue (Enviro-Maniac-Activist)

The Chronicle Herald

[Lisa Gue is Enviro-Maniac-Stooge of David Suzuki Foundation, an Environmental-Terror-Organization that seeks donations by concocting FEAR-MON-GERING, FRAUDULENT LIES, MIS-CONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES about conventional pest control products. Gue has absolutely NO recognized expertise, training or background in matters concerning pest control products ! Consequently, her opinions on this subject are VALUELESS and WORTHLESS.]

David
Suzuki
Foundation

Quebec adopted regulations in 2003 to ban the use and sale of many lawn pesticides.

Nova Scotia

Part 1

Atlantic Canada Conspiracy to Prohibit Pest Control Products

A few months ago, a new ban came into effect in Ontario [in 2009]. Prince Edward Island has promised to follow suit, and New Brunswick is considering it [This province eventually legislated a prohibition].

Halifax was ahead of the curve when the city adopted a bylaw prohibiting pesticide use on lawns and gardens and in parks back in 2001.

But provincial parties were curiously silent on the issue during the recent election campaign.

What's stopping Nova Scotia politicians from weeding out toxic lawn chemicals province-wide ?

The chemical industry will repeat the mantra that pesticides are safe, but not even the federal agency in charge of licensing their products uses that language.

Background Information from an Independent Perspective — Overall, the idea that pest control products are causing irreversible health and environmental problems is little more than NONSENSE. Conventional pest control products are SCIENTIFICALLY SAFE ! Overall, when they are used properly, there are NO harmful irreversible effects to health and the environment !

It's worth noting, as well, that at least 50 active ingredients registered for use in pesticides in Canada have been banned in other Western countries due to health or environmental concerns.

[Big Deal !]

Nova Scotia

Part 1

Atlantic Canada Conspiracy to Prohibit Pest Control Products

For instance, the popular lawn herbicide 2,4-D is banned in Denmark and Norway, and was voluntarily withdrawn from the market in Sweden. [See later segment for background information.]

What do the Scandinavians know that we don't ?

In fact, we know a lot.

A scientific literature review published by the Ontario College of Family Physicians points to « *consistent links to serious illnesses, such as cancer, reproductive problems and neurological diseases* » associated with chronic pesticide exposure. [Wrong !]

The study also shows that children are particularly vulnerable — and they're the ones rolling around on the grass on hot summer days. [Alarmist fear-mongering using children as weapons of mass destruction !]

Background Information from an Independent Perspective —

Enviro-Maniac-Health-Care-Workers have made « *cosmetic pesticides* » a « *public health issue* » for their own twisted and nefarious reasons.

✓ FACT : Enviro-Maniac-Health-Care-Workers routinely SCAM the public with the CONCOCTION of FRAUDULENT LIES and NON-EXISTENT DANGERS. They deceive the public blurting out HOLLOW and DESPICABLY-ALARMIST expressions like « *cancer* » and « *serious illness* » and « *reproductive problems* » and « *neurological diseases* » !

This is clearly evident in a literature review that is a DISGRACEFULLY FALSE and MISLEADING report concocted by ONTARIO COLLEGE OF FAMILY PHYSICIANS (O.C.F.P.) and financed by LAIDLAW FOUNDATION, an organization that supports Environmental-Terror against the Green Space Industry.

Nova Scotia

Part 1

Atlantic Canada Conspiracy to Prohibit Pest Control Products

▶ ENVIRO-DECEPTION : One doctor, who was listed as having peer-reviewed the report, was not aware that her name was on the report until it was published, and then denied she had reviewed the report.

✓ FACT : The O.C.F.P. report has absolutely NO CREDIBILITY in the legitimate scientific community.

✓ FACT : The O.C.F.P. report has been INTERNATIONALLY DISCREDITED.

▶ WARNING : The O.C.F.P. report is merely a deceptive ENVIRO-MANIAC-JUNK-SCIENCE document that consisted of simply a CHERRY-PICKING of some of the most recklessly negative reports regarding pest control products.

▶ WARNING : The BOGUS-OCFP-JUNK SCIENCE document consists mostly of research that DOES NOT EVEN COMPLY with the same research standards as the Pest Control Product Industry. This industry must comply with VERY PRECISE and DEMANDING STANDARDS when it comes to undertaking the scientific research required by government regulatory agencies. Scientific data submitted to HEALTH CANADA and other federal regulators must be done by GOOD LABORATORY PRACTICE (GLP) qualified laboratories.

✓ FACT : ONTARIO COLLEGE OF FAMILY PHYSICIANS (O.C.F.P.) DOES NOT have ANY qualified laboratories for testing pest control products. In fact, it has NO laboratories whatsoever.

✓ FACT : NOT A SINGLE PERSON at ONTARIO COLLEGE OF FAMILY PHYSICIANS (O.C.F.P.) has ANY recognized expertise, training or background in matters concerning pest control products ! Most of these people are mere Enviro-Maniac-Health-Care-Workers, and NOT scientists or researchers !

✓ FACT : There are NO Enviro-Maniac-Health-Care-Workers at O.C.F.P. who are scientists or researchers with credentials in the field of pest control products.

Moreover, David Suzuki Foundation research found more than 6,000 cases of acute pesticide poisoning in Canada in one year, nearly half involving children under the age of six.

[A non-scientific report concocted by a known Environmental-Terror-Organization.]

Nova Scotia

Part 1

Atlantic Canada Conspiracy to Prohibit Pest Control Products

Background Information from an Independent Perspective

2,4-D PROHIBITED BY OTHER NATIONS

2,4-D is not approved for lawns and gardens in Denmark, Kuwait, Norway, and Sweden. 2,4-D use is severely restricted in Belize, but it is approved in the European Union (E.U.), of which both Sweden and Denmark are members.

Of course, the Environmental-Terror-Movement wishes to give the false impression that things are so much better in Belize, Denmark, Kuwait, Norway, and Sweden. Indeed, 2,4-D is used extensively on golf courses and other immaculately-maintained green spaces that are resplendent throughout the war-torn Kuwait region. © (See photo.)

Enviro-Maniac-Activists avoid to mention the fact that the issue of 2,4-D being prohibited by other nations has already been sufficiently addressed by the Canadian federal government. As usual, these UN-PRINCIPLED and UNEDUCATED maniacs prefer to resort to FEAR-MONGERING,

Nova Scotia

Part 1

Atlantic Canada Conspiracy to Prohibit Pest Control Products

FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES about pest control products.

NOT ONE Enviro–Maniac–Activist has ANY recognized expertise, training, or background in matters concerning pest control products. Overall, maniac opinions on pest control products are VALUELESS and WORTHLESS.

In 2005, the respected Pest Management Regulatory Agency of Health Canada (P.M.R.A.) responded to the issue of nation prohibition with following statement —

<< 2,4-D is no longer used in Sweden or Norway and its use is severely restricted in Denmark. Environmental effects are cited as the primary reason for these actions as 2,4-D has the potential to enter groundwater, the primary source of drinking water in these countries. However, subsequent to these actions, the European Commission, upon completion of their re-evaluation of 2,4-D on October 1, 2001, concluded that it was acceptable for continued use the European Union, of which both Sweden and Denmark are members.

As part of the re-evaluation of 2,4-D, the PMRA has compiled all available drinking water data from various regions and sources across Canada. These data indicate that the levels in drinking water do not pose unacceptable risks for the Canadian population.

Nova Scotia

Part 1

Atlantic Canada Conspiracy to Prohibit Pest Control Products

It is important to recognize that of the many studies published, some report associations between adverse health effects and 2,4-D exposure, while many others report a lack of association. As most of these papers acknowledge, epidemiology studies on their own are difficult to interpret because biases and confounding factors often preclude any convincing link between specific pesticide exposures and effects. For example, influences from other chemicals and the physical environment encountered at the same time as pesticide exposures and recall bias from the individuals examined are two factors that can strongly influence the study result. Without an actual exposure calculation, it is difficult to assess whether pesticides could have been responsible for an adverse health outcome. This is why the PMRA also relies on the more scientifically exact method of quantitatively estimating risk by comparing exposures to the results of toxicity studies in laboratory animals. The proprietary studies used are conducted to internationally accepted standards and include toxicity studies done on a number of laboratory animal species for comparative purposes, as well as studies of exposure from all routes and methods of exposure. Safety factors (typically 100 to 1000 fold) are built into the assessment to account for different sensitivities between humans and experimental animals and among humans (age, gender and individual sensitivities to pesticides). In general, this is the same approach that is currently utilized by the various international pesticide regulatory authorities including the US EPA and other OECD countries. >>

(PMRA, February 2005.)

Fight the Enviro-Basterds NOW !

They are lying sacks of crap !

**Stop prohibition in
Nova Scotia,
to stop it NATIONALLY !**

**And ... Enviro-Maniacs want
NATIONAL PROHIBITION NEXT !**

**The Enviro-Maniacs want
GOLF INDUSTRY PROHIBITION
in the next 2 to 4 years !**

**Stop prohibition in
Nova Scotia,
to stop it NATIONALLY !**

Fight the Enviro-Basterds NOW !

It doesn't matter if you don't live in Nova Scotia.

**If we're going to stop the spread of terror,
the Members of the Legislative Assembly
of Nova Scotia need to hear
from citizens like you from across Canada.**

<http://www.nsfa-fane.ca/proposed-pesticide-ban-nova-scotia>

N

FORCE OF NATURE was launched for continuous transmission on the Internet on January 1st, 2009. It is a series of e-newsletters destined for the Green Space Industry, the Environmental-Terror-Movement, Government Officials, and the Media, nation-wide across Canada, the United States, and overseas.

O

Force Of Nature is the brainchild of William H. Gathercole and his entourage. Norah G is actually an acronym for the stable of anonymous producers and writers that contribute to this e-newsletter and have now replaced Mr. Gathercole. They consist of people from the following industries : Distribution, Fertilizer, Golf, Lawn Care, Manufacturing, Municipal, Nursery, and Orchard. Many of these people are leaders in their own industries. The opinions expressed in Force Of Nature, even though from an INDEPENDENT PERSPECTIVE, may not reflect those of everyone in the GREEN SPACE INDUSTRY, or Mr. Gathercole's many associates. Be warned ! Force Of Nature may sometimes be very irreverent and fearless with these e-newsletters. Mr. Gathercole is now retired from Force Of Nature, although his name continues to appear as the founder.

R

William H. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the GREEN SPACE INDUSTRY, including GOLF and PROFESSIONAL LAWN CARE, and has served in public affairs, workplace safety, and environmental compliance. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority.

A

Mr. Gathercole has followed the evolution of ENVIRONMENTAL-TERRORISM for over a quarter-century. His involvement in Environmental issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the prohibition of pest control products in the Town of Hudson, Quebec. For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of Enviro-Terror for the entire Modern Green Space Industry across Canada. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status, that endures to this day. He is also the creator of the signs that are now used for posting after application. Although he can be accused of being Anti-Environment-Movement, he is, in fact, simply a strong advocate FOR the Modern Green Space Industry. However, this position has not precluded him from criticizing the Green Space Industry itself. Nonetheless, his vast knowledge of our long journey with Environmental issues is UNDENIABLE. (Hopefully !)

H

Force Of Nature is the instrument of National Organization Responding Against Huje that harm the Green Space Industry (NORAHG) by concocting statements and activities seeking to prohibit FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE conventional pest control products. Enviro-Maniacs are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro-Maniac-Culprit is a mis-guided adversary, each still deserves our respect. The terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong-doing. Force Of Nature is simply holding Alleged culprits accountable for conspiring to change public policies that TERRORIZE and THREATEN the Green Space Industry. Their pretentious prohibitionist rants has created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac-Culprit-Terrorist-Basterds is viewed as a form of TERROR against the GREEN SPACE INDUSTRY. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events with commentary. Additionally, Force Of Nature inspires people to believe that ENVIRONMENTAL-TERRORISM can be STOPPED ! The events, characters, companies, and organizations, depicted in this document are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. All document excerpts and pictures contained in Force Of Nature were found somewhere on the Internet. These documents and pictures are in the public domain, serving one of the following purposes : archive, education, promotion, publicity, or press release.

G

The following Force Of Nature documents are currently available — • A Look At • Alberta Conspiracy • British Columbia Conspiracy • Canadian Association of Physicians for the Environment • Millionaire-Cancer-Society • Canadian Environmental Law Association • Consequences • David Suzuki Foundation • DDT and Politicized Science • Death and the Environmental-Terror-Movement • Enviro-Money • Environmental-Terrorists Unmasked • Fertilizer-Terror Is Next • June Irwin, the Clown of Junk Science • Kazimiera Jean Cottam • Landscape Trades Capitulate • New Brunswick Conspiracy • Nova Scotia Conspiracy • Ontario Conspiracy • Organic Fertilizers • Pesticide Free BC • Pets and Lawn Care Chemicals • Prince Edward Island Conspiracy • Quebec Conspiracy • Rachel Carson, the Queen of Junk Science • Salmon Arm BC Conspiracy • The 9/11 Era of the Green Space Industry • The Failure of Integrated Pest Management • The Looming Golf Industry Shipwreck • The Industry Strikes Back • The Misconceptions About Cancer • The National Annihilation of the Modern Green Space Industry • The Wisdom of Bill Bell • The Wisdom of Drysdale • The Wisdom of Health Canada • The Wisdom of Holland • The Wisdom of Lowes • The Wisdom of Mains • The Wisdom of the Solomons • Ask For a Copy of Any Back Issue of Force Of Nature Today. Read All About Enviro-Maniac-Activists and Their Environmental-Terror-Organizations in Force Of Nature ! The Whole Truth From An Independent Perspective ! Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. DON'T THANK US. IT'S A PUBLIC SERVICE. AND WE ARE GLAD TO DO IT.

The Whole Truth from an Independent Perspective

We must defend the industry,
whatever the cost may be !
