

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from
National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)

The Planet's Great Conservationists

People deserve THICKER, GREENER, PEST-FREE TURF AND ORNAMENTAL PLANTS.

The use of pest control products to enhance the Urban Landscape is GOOD FOR THE ENVIRONMENT.

The Modern Professional Lawn Care and Golf Industries can be described as the PLANET'S GREAT CONSERVATIONISTS that provide the public with what it wants — THICKER, GREENER, PEST-FREE TURF AND ORNAMENTAL PLANTS.

Lawns consist of turfgrass. We walk on it, play games on it, picnic on it, receive our diplomas on it, sometimes get married on it, bury our loved ones under it, and some of us let our dogs poop on it.

And, they can be maintained with products that are GOVERNMENT-APPROVED, FEDERALLY-LEGAL, SCIENTIFICALLY-SAFE, PRACTICALLY-NON-TOXIC, and CAUSE NO HARM.

For generations, the Modern Professional Lawn Care and Golf Industries have been MAINTAINING AND CONSERVING THE WORLD'S LARGEST GROUND COVER VEGETATION — TURF AND ORNAMENTAL PLANTS.

They have CONTRIBUTED EXTENSIVELY TO THE BEAUTIFICATION OF OUR URBAN LANDSCAPES, and THE PRESERVATION OF OUR ENVIRONMENT.

The Modern Professional Lawn Care and Golf Industries have adopted many OUTSTANDING, INNOVATIVE and INTERESTING IDEAS in order to provide THICKER, GREENER, PEST-FREE TURF AND ORNAMENTAL PLANTS.

These industries create POSITIVE WAVES.

Turf Painting Spreads As Drought Ravages Lawns

June 27th, 2012

The Associated Press

Selected and Adapted Excerpts

Positive Waves

When this summer's drought turned her prized lawn brown, Terri LoPrimo fought back, but not with sprinklers.

She HAD HER LAWN PAINTED GREEN, making her suddenly lush-appearing yard the envy of her neighbourhood.

The Staten Island, New York, resident and her husband, Ronnie, hired a local entrepreneur to spruce up their yard by SPRAYING IT WITH A DEEP-GREEN ORGANIC DYE.

The couple's property was aglow with NEWLY GREEN BLADES OF GRASS and no watering needed to sustain it.

According to Terri LoPrimo, a 62-year-old retiree —

*It looks just like a spring lawn, the way it looks after a rain.
It's really gorgeous.*

In the summer of 2012, with two-thirds of the nation covered by a DROUGHT that stretches from coast to coast, residents and businesses in normally well-watered areas are catching on to the lawn-painting practice employed for years in the West and Southwest to give luster to faded turf.

LoPrimo paid 125 dollars to green up her roughly 830-square-foot lawn.

She said it was worth every penny to keep her home of 33 years graced by an attractive yard.

According to Joe Perazzo, lawn painter —

| *People are amazed by how natural it looks.*

Neighbours and friends have complimented the LoPrimos on their lawn's appearance, and she said one envious friend asked for the number of their contractor, Joe Perazzo.

Perazzo, who teaches physical education at Brooklyn's High School of Sports Management, began painting lawns during his summer break three years ago.

His Staten Island company, GRASS IS GREENER LAWN PAINTING, has touched up close to 20 lawns this summer, making it his best year to date.

He charges 15 cents per square foot to spray on a non-toxic, environmentally friendly turf dye that he said is commonly used on golf courses and athletic fields to give them a lush appearance.

Perazzo said the dyed lawns will hold their verdant look for a few months, in some cases up to five months.

In the frequently parched Phoenix area, Brian Howland has been painting lawns for about five years as a side business to his full-time job with a sign- and banner-making company.

Howland said he started ARIZONA LAWN PAINTING after the foreclosure crisis left scores of Phoenix-area homes empty and their lawns neglected.

He charges 200 dollars for up to 3,000 square feet, and more if there are numerous lawn features to paint around.

Some of his customers have been residents fearful that their homeowners' associations will penalize them for letting their lawns fade.

A newer entrant into the lawn-painting business is Tim Birdwell, whose IMPERIAL PAINTING normally paints Indianapolis-area homes and commercial properties.

His first paying customer was a Meineke muffler shop on the south side of Indianapolis, which, like most of Indiana, is in the midst of an extreme drought.

Professional
Lawn Care and
Golf Industries
Can Be Described
As The Planet's
GREAT CONSERVATIONISTS
With Their Outstanding
and Innovative Ideas*

The Planet's Great Conservationists

The Modern Professional Lawn Care and Golf Industries can be described as the PLANET'S GREAT CONSERVATIONISTS with their OUTSTANDING AND INNOVATIVE IDEAS.

Day after day after day — written in the newspapers, heard on the radio, seen on the television, and displayed throughout cyberspace ...

... the Anti-Pesticide Movement (a.k.a. the ecology or natural lawn care movement) is urging for measures to TERRORIZE and DESTROY the Professional Lawn Care and Golf Industries, with ideas that have little basis in fact or science.

In fact, the use of pest control products to enhance the Urban Landscape is GOOD for the environment.

Turf and ornamental plants BENEFIT from the use of pest control products.

Nonetheless, the Anti-Pesticide Movement has gained some powerful allies, such as law-makers and policy-makers who are spineless and naïve co-conspirators.

Many versions of the following phrase have been heard ...

... the world would be a better place if lawns and golf courses were maintained more ecologically or more naturally.

If each of us received five cents every time we heard this phrase, we would be literally spitting gold ingots.

Let's think for a minute !

Here is another phrase ... the public wants THICKER, GREENER, PEST-FREE TURF AND ORNAMENTAL PLANTS.

The Planet's Great Conservationists

(continued)

The public wants THICKER, GREENER, PEST-FREE turf and ornamentals

How does this phrase really apply to the Modern Professional Lawn Care and Golf Industries ?

It's not complicated.

The Modern Professional Lawn Care and Golf Industries CAN BE DESCRIBED AS THE PLANET'S GREAT CONSERVATIONIST that supply the public with what it wants —

THICKER, GREENER, PEST-FREE turf and ornamental plants.

THICKER, GREENER, PEST-FREE turf and ornamental plants are the HIGH STANDARD of a MODERN LIFE-STYLE CHOICE.

The use of pest control products to enhance the Urban Landscape is GOOD for the environment.

Overall, turf and ornamental plants can be maintained with products that are GOVERNMENT-APPROVED, FEDERALLY-LEGAL, SCIENTIFICALLY-SAFE, and PRACTICALLY-NON-TOXIC, and CAUSE NO HARM.

For generations, the Modern Professional Lawn Care and Golf Industries have been MAINTAINING AND CONSERVING THE WORLD'S LARGEST GROUND COVER VEGETATION — TURF AND ORNAMENTAL PLANTS.

The Planet's Great Conservationists

(continued)

Anti-Pesticide Lunatics prefer JUNK LAWNS and JUNK LANDSCAPES

The Modern Professional Lawn Care and Golf Industries have CONTRIBUTED EXTENSIVELY TO THE BEAUTIFICATION OF OUR URBAN LANDSCAPES, and THE PRESERVATION OF OUR ENVIRONMENT

By contrast, Anti-Pesticide Activists, and their Environmental Terrorist Organizations, can be more precisely identified as RADICAL PRESERVATIONISTS that could not care less about the beautification of our Urban Landscape.

Anti-Pesticide Activists PRETEND that the use of pest control products is not compatible with natural settings.

Nonetheless, Anti-Pesticide Activists have pretentiously proclaimed that the natural environment needs their stewardship.

The Planet's Great Conservationists

(continued)

*Why don't you knock it off
with them **NEGATIVE WAVES** ?*

Anti-Pesticide Activists are obsessed with preserving our world with ANTI-MODERNIST and ANTI-TECHNOLOGY thinking.

They thrive on JUNK SCIENCE, and resort to LIES rather than the truth.

It is a fact that Anti-Pesticide Activists are inherently OPPOSED to the modern maintenance of turfgrasses and the beautification of the Urban Landscape.

(One notable exception is Audubon International, but not Audubon state organizations.)

Anti-Pesticide Activists PREFER JUNK LAWNS and JUNK LANDSCAPES that are unaltered by human activity, and are INFESTED with damaging weeds, insects, and disease ... just as the Activists INFEST our society.

Anti-Pesticide Activists particularly DESPISE the cosmetic standards used for the maintenance of GOLF FACILITIES, which are arbitrarily considered too lofty.

Anti-Pesticide Activists are re-enacting the need-less conspiracy against DDT.

They are proceeding to TERRORIZE and ANNIHILATE the Modern Professional Lawn Care and Golf Industries, just like they did with the makers of DDT !

A woman with long, wavy brown hair is standing in a lush green forest. She is looking upwards and to the right. Her body is covered in green body paint, including her face, arms, and legs. She has large, translucent green wings on her back. She is holding a wooden staff or branch. The background is filled with dense green foliage and tree branches.

*People
deserve
thicker,
greener,
pest-free
turf and
ornamental
plants*

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from
National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)

We are living in the 9|11 Era of Anti Pesticide and Environmental Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is Perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces under the RIDICULOUS PRETEXT of somehow « saving » the environment.

NORAHG is a NATIONAL NON PROFIT NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HUJE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are Hateful Underhanded Jokes as Environmentalists who have been WRONG FOR OVER 50 YEARS.

There is NO RECOURSE but LITIGATION against Anti Pesticide HUJE.

Another RECOURSE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOCATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HUJE should Get OFF Our grASS, and they should Roast In Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti Pesticide Terrorist Acts of Subversion.

The purpose of this ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti-Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION !

NORAHG also produces FORCE OF NATURE, reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports destined for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE, as well as ground breaking original reporting that informs, entertains, and creates real change.

FORCE OF NATURE was launched for CONTINUOUS transmission on the Internet on January 1st, 2009 — however, the VERY FIRST Stand-Alone FORCE OF NATURE Report was issued on September 19th, 2008.

By early 2009, the reports were released no more than five times per week, but by August 25th, 2009, FORCE OF NATURE was produced on a DAILY basis.

On March 15th, 2010, Uncle Adolph independently launched the Blog-Site called The Pesticide Truths, for the posting of information right-off-the-press.

By May 27th, 2010, Uncle Adolph expanded Pesticide Truths to a SECOND Blog-Site, and independently acquired the rights to archive the ENTIRE FORCE OF NATURE Library of Reports.

By mid-December 2010, ENTIRE FORCE OF NATURE Library of Reports was FULLY SUMMARIZED and CROSS-REFERENCED, and by early 2012, the library was archived on The Pesticide Truths Web-Site, in the form of Web-Pages.

The information presented in FORCE OF NATURE has been developed for the education and entertainment of the reader by providing a sequence of events WITH COMMENTARY, striving for accuracy in history, politics, and science.

FORCE OF NATURE is TOTALLY INDEPENDENT and provides NO guarantee regarding accuracy or completeness. In no event shall FORCE OF NATURE be liable for any incidental or consequential damages, lost profits, or any indirect damages.

NORAHG also produces A LOOK AT, a series of reports providing TECHNICAL INFORMATION on issues such as Career Management, Golf Course Maintenance, Green Alternatives, Summer Stress, Turfgrass Pests, and Turfgrass Species.

Finally, NORAHG frequently responds to anti pesticide activists in LETTERS TO THE EDITOR in newspapers across Canada and around the world.

All information, excerpts, and pictures contained in FORCE OF NATURE, A LOOK AT, and LETTERS TO THE EDITOR were retrieved from the Internet, and may be considered in the public domain.

FORCE OF NATURE, A LOOK AT, and their various incarnations, was the brainchild of William H. Gathercole and his colleagues in 1991. Mr. Gathercole is now retired, although his name continues to appear as founder.

Here is a brief summary of Mr. Gathercole's career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf maintenance industries

Expertise in — environmental issues and anti pesticide terrorism • turf and ornamental maintenance and troubleshooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing and distribution

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, government negotiations, public affairs, and workplace safety • supervisor, consultant, and, programmer for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insect in both the Montreal region and the Vancouver / Fraser Valley region • with Dr. Peter Dernoeden, confirmed the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr. David Shetlar, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South Western Ontario, and later, in the Montreal and Vancouver regions

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to anti pesticide prohibition • creator of the signs that are now used for posting after application • co-founder of annual winter convention for Quebec golf course superintendents • the major influence in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness of the events of anti pesticide prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT reports

Notable award — the very first man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beach-head against anti pesticide activists in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues ... designed and implemented strategies that reined anti pesticide activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against anti pesticide activists in the town of Hudson, Quebec • launched the largest founding professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.
