GREENS LIE,
AFRICANS DIE

January 14th, 2011

Paul Driessen and Robert Novak

Right Side News

Selected and adapted excerpts

Fina Nantume's little body shook for hours with teeth-chattering chills.

The next day her torment worsened, as nausea and vomiting continued even after there was nothing left in her stomach.

DDT

Our World of Politicized Science

Finally, her vomiting ebbed, and chills turned to fever, drenching her body in sweat.

Then, more chills, fevers, nausea, convulsions, and constant, unbearable pain in every muscle, bone and joint.

She cried out, and tears mixed with sweat.

But no one could help her.

She had NO MONEY for doctors, medicines or a hospital room.

She didn't even have a mother or father to comfort her.

All the orphanage school staff could do was caress her, pray and hope she'd get better — and wait for her to die.

And in agony that never stopped from the time the Malaria first struck her down, Fina Nantume did DIE.

So did 49 of her classmates, out of 500 students in the APEA Primary School for orphans in Kampala, Uganda, in 2005.

Most of the survivors were also afflicted with Malaria at least once that year.

Some became PERMANENTLY BRAIN DAMAGED.

Others DIED in subsequent years.

Fina didn't have to die.

DDT

Our World of Politicized Science

*Malaria is a disease of callous
ENVIRONMENTAL EXTREMISM and
wanton disregard for human life*

*Malaria is a disease
whose prevention is hampered,
and actively thwarted
by pervasive opposition to DDT*

None of these spirited, beautiful young students had to die.

None of them had to get MALARIA.

The disease is preventable, treatable, and curable.

Then why did they DIE ?

Why does half the world's population remain at risk of getting Malaria ?

Why are some 250 million people infected annually — with 90 per cent of the agonizing chills, fevers, nausea, brain damage and death occurring in Sub-Saharan Africa ?

DDT

Our World of Politicized Science

It's said Malaria is a disease of poverty, and poor countries don't have enough funds, doctors or medicines to treat the disease — or prevent it in the first place.

True enough.

But Malaria is also, and much more so, a disease of callous, intransigent ENVIRONMENTAL EXTREMISM and wanton disregard for human life.

A disease whose prevention is HAMPERED, and ACTIVELY THWARTED, by pervasive opposition to mosquito-killing insecticides, and mosquito-repelling DDT.

Anti-pesticide activists say they support other interventions — education, « *capacity building* », modern drugs, and bed-nets.

Indeed, international funding for Malaria prevention and treatment has risen from perhaps 40 MILLION DOLLARS in 1998 to almost 2 BILLION DOLLARS in 2010.

Millions of women and children now sleep under Insecticide-Treated Bed-Nets.

Millions now get diagnosed quickly and receive decent care and medicines.

The World Health Organization enthusiastically asserts these Anti-Malaria Programs « *saved nearly 750,000 lives over the past ten years* ».

« *That represents an 18 per cent reduction in child mortality, compared with 2000.* »

That's wonderful news.

BUT IT'S NOT GOOD ENOUGH.

DDT

Our World of Politicized Science

We would NEVER tolerate 18 per cent as « *good enough* » if American or European kids' lives were at stake, or if a 70–90 per cent reduction in disease, misery and death rates were possible.

And it would be possible, if we could end the lies and obstructionism that restrict access to mosquito killers and repellents that can dramatically reduce infection rates and the need to treat a quarter-billion cases of Malaria every year.

BUT THE LIES AND OBSTRUCTION ARE PREVALENT, AND EFFECTIVE.

Here are just a few of the most egregious —

NETS ARE JUST AS GOOD AS INSECTICIDES [?!?!]

Prevention should always be the first line of defence — that's why we chlorinate drinking water and vaccinate people against measles, mumps, polio, and flu.

Insecticide-Treated Bed-Nets (ITNs) certainly help and should be used.

But they are a supplement to, NOT a substitute for, larvacides, insecticides and DDT that kill mosquitoes and keep them away from people.

Bed-nets help if they're used regularly and properly. They don't help if they're torn, people are working., or it's too hot to sleep under one. There are only enough nets for a family's small children and pregnant women.

Indoor-Residual-Spraying (IRS) eliminates behaviour as a consideration; it protects everyone in the house, 24 hours a day.

DDT

Our World of Politicized Science

*DDT-alternatives are far MORE EXPENSIVE
and must be applied MORE OFTEN*

BED-NETS ARE MORE COST-EFFECTIVE THAN INDOOR SPRAYING [?!?!]

This assertion is backed by several studies that Anti-Pesticide-Groups and Insecticide-Treated Bed-Net Manufacturers allegedly financed.

However, the studies compare bed-nets with Indoor-Residual-Spraying using pyrethroids like ICON, instead of DDT.

Pyrethroids are far more expensive and must be applied MORE OFTEN than DDT, which raises Indoor-Residual-Spraying costs significantly.

The studies also FAIL to include all the costs associated with manufacturing and distributing the nets.

Independent analyses found that nets are actually FOUR TIMES MORE EXPENSIVE than spraying the inside walls of homes with DDT.

Much more important, spraying DDT once or twice a year keeps 80 per cent of mosquitoes from entering the home, irritates those that do enter, so they leave without biting, and kills any that land.

DDT

Our World of Politicized Science

No other chemical, AT ANY PRICE, has these repellency and irritation features.

DDT helps doctors treat more patients with often scarce ACT drugs and dramatically slash disease and death rates — often by 90 per cent or more.

There is NO EVIDENCE that mosquitoes have EVER become resistant to DDT's effects

MOSQUITOES WILL BECOME RESISTANT TO DDT [?!?!]

THIS IS HIGHLY UNLIKELY.

DDT use today is RESTRICTED TO DISEASE PREVENTION, whereas pyrethroids are used extensively in agriculture and Insecticide-Treated Bed-Nets, greatly increasing the risk of resistance to these DDT « *alternatives* ».

Once that happens, both non-DDT indoor spraying and bed-nets will become far less effective, and Malaria rates could skyrocket.

In addition, there is NO EVIDENCE that mosquitoes have ever become resistant to DDT's repellency and irritation effects.

DDT

Our World of Politicized Science

Moreover, reliance on nets and pyrethroid sprays SIGNIFICANTLY REDUCES PREVENTION and INCREASES THE NEED FOR TREATMENT.

This can stretch scarce hospital, medical staff and drug resources to the breaking point.

It increases the likelihood that Malaria parasites will become resistant to Artemisia-based drugs, especially mono-therapies.

And it magnifies the pervasive and growing problem of substandard and counterfeit drugs replacing scarce supplies of reputable ACT combination therapies.

DDT HAS DANGEROUS SIDE EFFECTS [?!?!]

Greenpeace, Pesticide Action Network, Environmental Defense, International POPs Elimination Network and affiliated RADICAL GROUPS love to say ...

« *some researchers think* » DDT and its break-down by-product DDE « *could* » inhibit lactation, « *may* » weaken immune systems and are « *associated with* » low birth weights in babies.

Not only is this RANK SPECULATION, but Malaria definitely has all these side effects; it also causes severe brain damage, an inability to work for weeks on end, and agonizing death.

Opposing DDT use on the basis of BOGUS side effects is infinitely worse than opposing cancer-curing chemotherapy because of the nasty and very real side effects of vincristine, asperaginase, methotrexate and other chemo drugs.

DDT

Our World of Politicized Science

DDT WILL POISON THE GLOBAL BIOSPHERE [?!?!]

Anti-Pesticide-Zealots claim even indoor spraying with DDT will « *contaminate* » soils and waters for decades and « *damage entire regional environmental systems* ».

BALONEY.

Indoor-Residual-Spraying involves SMALL AMOUNTS of DDT on walls.

The chemical and its derivatives BREAK DOWN.

Detection DOES NOT equal destruction.

Our ability to detect chemicals, at the equivalent of one second in 32 years, DOES NOT EQUATE with damage to any organism, and certainly NOT to entire ecosystems.

There is no magic bullet.

We need every weapon in our arsenal to control and eradicate this vicious disease.

DDT and other insecticides are not necessary or appropriate in every case — but, when needed, health officials must be able to employ them, without recrimination or retribution.

The « *net* » effect of these Bald-Faced Lies is that Anti-Pesticide-Zealots are PERPETUATING POVERTY, MISERY, DISEASE, and DEATH in Malaria-Endemic Regions all over the world.

DDT

Our World of Politicized Science

Anti-Pesticide-Zealots are

BABY KILLERS

*who violate the most basic
human rights of people
in poor nations*

Safe in offices made Malaria-Free by the very chemicals, technologies, and prosperity they deny to others, these **BABY KILLERS** and their financial benefactors are **VIOLATING THE MOST BASIC HUMAN RIGHTS OF PEOPLE IN POOR NATIONS** —

**THE RIGHT OF ACCESS TO TECHNOLOGIES
THAT ENHANCE AND SAFEGUARD LIFE**

THEIR REIGN OF TERROR MUST END, before they usher in a disaster of truly epidemic proportions.

Paul Driessen is Senior Policy Advisor for the Committee for a Constructive Tomorrow and Congress of Racial Equality, and author of *Eco-Imperialism: Green Power — Black Death*.

Robert Novak is Professor of Medicine at the University of Alabama at Birmingham and has devoted much of his life to combating **MALARIA**.

Background Information from an Independent Perspective

LET'S PAUSE ... AND LOOK AT SOME ALARMING STATISTICS

It has been predicted that so-called GLOBAL WARMING will affect the Arctic, as well as the African and Asian countries, North America, and Europe.

Consequently, it is expected that dozens of millions of refugees will be created, and that famine will affect 80 to 200 million people.

We should all be reminded that many experts view GLOBAL WARMING as purely SPECULATIVE.

We are also advised to get a grasp on factual existing problems that plague our entire planet.

As we speak, we have real problems, with poverty, AIDS, polluted drinking water, and Malaria, which are afflicting and killing many times more people than global warming ever will.

Hunger is the most extreme form of poverty.

Presently, 854 million people across the world are hungry.

Every day, almost 16,000 children DIE from hunger-related causes — almost 6 MILLION CHILDREN DIE ANNUALLY due to hunger.

The latest statistics on the world epidemic of AIDS and HIV indicate that 39½ million people are living with it.

AIDS deaths for 2006 were 2.9 million, despite recent improvements to access to anti-retroviral treatment.

Equally serious is the fact that a world-wide shortage of fresh drinking water affects forty per cent of the planet's population.

Each year, 11 MILLION PEOPLE DIE of diseases related to water that is not clean enough for consumption.

Finally, some observers believe that Malaria acutely afflicts MORE THAN 515 MILLION PEOPLE PER YEAR.

Background Information from an Independent Perspective

It had been known since 1914 that Malaria could be controlled by fluctuating water levels.

Nonetheless, DDT contributed to the final eradication of Malaria in the developed world.

In 1955, the World Health Organization (WHO) began a program to eradicate Malaria throughout the ENTIRE world.

The program RELIED GREATLY upon the application of DDT to control mosquitoes, with a practice called DDT Residual House Spraying.

As a result of this program, by 1967, Malaria was eradicated from all developed countries where Malaria was endemic.

Large areas of tropical Asia and Latin America were freed from the risk of infection.

In Sub-Saharan Africa, the campaign was only launched in three countries since it was not considered feasible in the others.

Swaziland and Mozambique are examples of countries that have very successfully REDUCED Malaria infestations with DDT.

Throughout the years, spectacular DECREASES in Malaria infections and deaths were seen after implementing an extensive anti-mosquito program with DDT.

Here are five examples. —

- India ■ 1945
 - Almost 1 million Malaria deaths reported
- India ■ 1960
 - Only a few thousand cases were reported
- Republic of China (Taiwan) ■ 1945
 - 1 million cases of MALARIA. DDT was soon adopted
- Republic of China ■ 1969

- Only 9 cases were reported, and shortly thereafter, Malaria was eradicated from the island

- Sri Lanka (Ceylon) ■ 1946
 - 28 million cases of Malaria

- Sri Lanka ■ 1961
 - Only 110 cases were reported

- Sri Lanka ■ 1969
 - The DDT program was halted, and Malaria rebounded with 2½ million cases

DDT was safe to use
even on the beach

NORAHG

Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG). It is a series of Reports destined for the Green Space Industry, the Environmental Terror Movement, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY. The neutrality of these Reports might be disputed. Don't thank us. It's a public service. And we are glad to do it.

HUJE are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Maniac Culprit is a misguided adversary, each still deserves our respect. The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry.

HUJE is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing there is some IMAGINARY DANGER with conventional pest control products. HUJE also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS CONSPIRACY to PROHIBIT conventional pest control products that are FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE.

HUJE have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd HUJE is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.

This Report provides NO guarantee regarding accuracy or completeness. In no event shall Force Of Nature be liable for any incidental or consequential damages, lost profits, or any indirect damages. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. The events, characters, companies, and organizations, depicted in this Report are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. All information, excerpts, and pictures contained in this Report were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release.

Force Of Nature, and its various incarnations, is the brainchild of William H. Gathercole and his colleagues. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in environmental compliance, government negotiations, public affairs, and workplace safety. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority.

Mr. Gathercole and his colleagues have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of the VERMIN OF ENVIRONMENTAL TERROR for the entire Modern Green Space Industry across Canada. Their involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec.

Today, Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully! Mr. Gathercole is now retired, although his name continues to appear as FOUNDER of Force Of Nature.
