[Calgary, Alberta]

Selected and adapted excerpts

It's not just municipalities and provinces discussing pesticide bans — the debate has found its way [nationally] to Ottawa —

[Non-Expert Enviro-Lunatics] New Democrat MPs Peter Julian (Burnaby-New Westminster) and Pat Martin (Winnipeg Centre) CALLED ON THE FEDERAL GOVERNMENT THIS WEEK TO BAN THE NON-ESSENTIAL USE OF PESTICIDES.

Hero

Speaking Out Against

[New Democratic Party of Canada (NDP) is one of three opposition parties in Canada, and functions as the POLITICAL SHIELD for PROHIBITION-TERRORIST-ORGANIZATIONS like Canadian-Cancer-Society.]

[Non-Expert NDP-Enviro-Lunatics Julian and Martin] introduced a bill in Parliament to amend the Pest Control Products Act to PLACE A MORATORIUM ON THE COSMETIC USE OF CHEMICAL PESTICIDES IN HOMES, GARDENS AND ON RECREATIONAL FACILITIES.

The moratorium [i.e. PROHIBITION] would be in place until scientific evidence can prove pesticide use is safe.

The bill requires approval by a parliamentary committee, and if accepted, the moratorium would take effect on Earth Day, 2010. [Ha ! This never occurred !]

By the way, [Non-Expert NDP-Enviro-Lunatic] Julian told me in our interview that these pesticides « *very clearly* » cause cancer. [!?!]

I'm not sure where he gets that.

Not even Canadian-Cancer-Society goes that far —

<< *Studies show that pesticide exposure may be associated with cancer risk for adults and children.* [!?!]

Although the evidence is not yet conclusive, it is growing and suggestive. [!?!] >>

Rob Breakenridge

NO pesticide ban is needed !

Products containing 2,4-D do not pose unacceptable risks to human health or the environment

The broader question, though — is such a ban needed ?

I would argue NO.

In fact, I did, last year —

<< [...] the SWEEPING REVIEW OF 2,4-D by Health Canada's Pest Management Regulatory Agency (PMRA) went largely unnoticed.

Quite strange, really, considering that pesticide bans are in place or being debated right across the country.

Or maybe not so strange, when you consider the PMRA's conclusions, and their most inconvenient bearing on the pesticide ban crusade —

Hero

Speaking Out Against

« PRODUCTS CONTAINING 2,4-D DO NOT POSE UNACCEPTABLE RISKS TO HUMAN HEALTH OR THE ENVIRONMENT. »

And –

« An independent science advisory panel comprised of government and university experts-researchers in toxicology, epidemiology and biology [...] agreed with Health Canada's assessment that 2,4-D CAN BE USED SAFELY WHEN USED ACCORDING TO LABEL DIRECTIONS. »

As for GLYPHOSATE, even the Pesticide Action Network [another Prohibition-Terrorist-Organization] concedes that GLYPHOSATE is « RELATIVELY LESS HARMFUL THAN MANY OF THE PRODUCTS WHICH COMPETE WITH IT IN THE MARKET PLACE ».

That's from a declared anti-pesticide organization.

From the science, it's even more conclusive.

A review of the relevant literature was published in 2000 in the peer-reviewed journal *Regulatory Toxicology and Pharmacology*.

Rob Breakenridge

NO pesticide ban is needed !

It found that « GLYPHOSATE IS NON-CARCINOGENIC », that « THERE WERE NO EFFECTS ON FERTILITY OR REPRODUCTIVE PARAMETERS IN TWO MULTI-GENERATION REPRODUCTION STUDIES WITH GLYPHOSATE », and concluded that « UNDER PRESENT AND EXPECTED CONDITIONS OF USE, ROUNDUP HERBICIDE DOES NOT POSE A HEALTH RISK TO HUMANS ». >>

What about the cancer claims ?

Liberal Member of Parliament Keith Martin raised some excellent points a few years ago during debate on this matter —

<< When we go through some of the studies, they show that A LOT OF THE ANTI-PESTICIDE COMMENTS ARE ROOTED IN FEAR AND FLY IN THE FACE OF COMMON SCIENCE.

Let us take a look at some of the premises.

The first one is cancer rates. >>

Hero

Speaking Out Against

*The reality is we are living longer
regardless of pest control products*

<< *Have cancer rates gone up or have they gone down ?*

We all know people who have had cancer, and we know many more people have it.

THE REALITY IS WE ARE LIVING LONGER.

Males living in my province of British Columbia have the greatest longevity of any place in the entire world.

Canadians ought to be proud of that.

Indeed, Canadian women and men are some of the longest living people.

Cancer, perhaps above all others factors, is a function of age. >>

Rob Breakenridge

NO pesticide ban is needed !

Has the incidence of cancer increased ?

NO !

Again, according to Liberal Member of Parliament Keith Martin —

<< As we get older, the incidence of cancer rises.

Our ability to contract cancer increases with age.

It is a function of our genetics, what we have done to our bodies such inaction, poor dietary habits and smoking.

HAS THE INCIDENCE OF CANCER INCREASED ?

NO. >>

Hero

Speaking Out Against

According to Liberal Member of Parliament Keith Martin —

<< The number of people, per population, who get cancer has REMAINED RELATIVELY STATIC OVER THE LAST 10 YEARS.

In some areas it has gone up.

For example, the incidence of lung cancer in women has gone up because more and more women are smoking.

The incidence of lung cancer in men has GONE DOWN.

The incidence of cervical cancer has GONE DOWN because women have been more adept in having pap smears to monitor cervical cancer.

This has saved thousands and thousands of women's lives.

Thankfully, we have those tools.

Do pesticides cause cancer? >>

Rob Breakenridge

NO pesticide ban is needed !

*The anti-pesticide groups will not tell us this,
but 99 per cent of the pesticides we consume are natural*

Again, according to Liberal Member of Parliament Keith Martin —

<< The anti-pesticide groups will not tell us this, but 99 per cent of the pesticides we consume are natural.

I will be splitting my time, Mr. Speaker, with the member for Malpeque.

Over the decades, AMPLE STUDIES have been done on pesticides.

They have shown NO INCREASE IN THE INCIDENCE OF CANCER IN POPULATIONS THAT HAVE BEEN SUBJECTED TO PESTICIDES.

Most of the pesticides we spray are natural. >>

Hero

Speaking Out Against

*Over the decades, AMPLE STUDIES
have been done on pesticides*

*They have shown NO INCREASE IN
THE INCIDENCE OF CANCER IN POPULATIONS
THAT HAVE BEEN SUBJECTED TO PESTICIDES*

According to Liberal Member of Parliament Keith Martin —

*<< If we compare synthetic pesticides to natural pesticides,
there will be NO DIFFERENCE IN THE STATISTICS OF THE MORTALITY
AND MORBIDITY.*

*These chemicals, natural and synthetic, have been EXHAUSTIVE-
LY STUDIED FOR DECADES.*

Large populations have been looked at. >>

**What have YOU done in the war against
Lunatic-Environmental-Terrorism ?!?!?**

At least ONE MALICIOUS ACT
of Lunatic–Environmental–Terror
Is Perpetrated EVERY SINGLE DAY

NORAHG

Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG). It is a series of Reports destined for the Green Space Industry, the Environmental Terror Movement, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY. The neutrality of these Reports might be disputed. This is what we do. Don't thank us. It's a public service. And we are glad to do it.

HUJE are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Lunatic Culprit is a misguided adversary, each still deserves our respect. The use of the terms Lunatic, Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Lunatic Activists accountable for conspiring to change public polidies that TERRORIZE, HARM, and THREATEN the Green Space Industry.

HUJE is a term used to describe Enviro Lunatic Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing there is some IMAGINARY DANGER with conventional pest control products. HUJE also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS CONSPIRACY to PROHIBIT conventional pest control products that are HEALTH CANADA APPROVED, FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE.

HUJE have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Lunatic Culprit Terrorist Basterd HUJE is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.

This Report provides NO guarantee regarding accuracy or completeness. In no event shall Force Of Nature be liable for any incidental or consequential damages, lost profits, or any indirect damages. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. The events, characters, companies, and organizations, depicted in this Report are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. All information, excerpts, and pictures contained in this Report were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release.

Force Of Nature, and its various incarnations, is the brainchild of William H. Gathercole and his colleagues. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. Mr. Gathercole was the FIRST PERSON EVER to obtain University degrees and contribute to BOTH the Professional Lawn Care and Golf Maintenance Industries. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in environmental compliance, government negotiations, public affairs, and workplace safety. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has advised, certified, instructed, and trained thousands of turf and ornamental managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority.

Mr. Gathercole and his colleagues have followed the evolution of LUNATIC ENVIRONMENTAL TERRORISM for over a quarter century. For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of the VERMIN OF ENVIRONMENTAL TERROR for the entire Modern Green Space Industry across Canada. His involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec.

Today, Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status that endures to this day. He is also the creator of the signs that are now used for posting after application. He and his colleagues are recognized as THE MAJOR INFLUENCE for the decision by Canadian Cancer Society to STOP selling for profit PESTICIDE TREATED DAF-FODILS. Mr. Gathercole's vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully ! Mr. Gathercole is now retired, although his name continues to appear as FOUNDER of Force Of Nature.
