Speaking Out Against

Pest control products continue to be some of THE MOST TESTED AND REVIEWED PRODUCTS by agencies around the world.

Pest control products have been around for 60-plus years.

NOT ONE CASE OF CANCER has been proven to be caused by the occasional use by home-owners.

Health Canada continues to monitor and evaluate all pest control products used in Canada.

There are NO pest control products that are known or probable carcinogens registered for use in Canada.

Groups such as Canadian Association of Physicians for the Environment, Canadian-Cancer-Society, Wildsight, David Suzuki Foundation and Sierra Club continue to press the government to implement a ban on « *cosmetic* » pest control products based on WEAK studies and reports.

When pushed for any detail, they claim the « *precautionary principle* » should be used which allows them TO EVADE ANSWERING THE QUESTION of which products they want banned.

The average tax-payer in British Columbia is not going to take the time to read any studies or polls.

They will usually follow along with the latest headline which is usually sensational and makes good conversation.

Pest control products continue to be some of **THE MOST TESTED AND REVIEWED PRODUCTS** by agencies around the world

Individuals like Jean Cottam add **NO POSITIVE, CREDIBLE, or CONSTRUCTIVE** value to the pest control product debate.

The British Columbia government needs to ignore the sensational lobbyists.

The government needs to focus on **CREDIBLE DOCUMENTED SCIENCE** to make responsible decisions on the future of pest control products in British Columbia.

**Tell the Canadian-Cancer-Society
to GET OFF MY LAWN**

The Wisdom of a REAL Expert

In Letters To The Editor, Paul Visentin has personally spoken out against activists and against the prohibition of pest control products in the Urban Landscape.

Here are examples of some of Visentin's wisdom —

<< For the Canadian-Cancer-Society to continue on its misinformed mission only lessens the possibility of discovering the real causes of cancer. >>

<< I'm confident that if you spoke to scientific experts such as Dr. Len Ritter, Dr. Keith Solomon, Dr. Frank Dost, and Dr. Bruce Ames — all of whom are WORLD-RENOWNED SCIENTISTS who have spent their professional careers studying the effects of pesticides on health and the environment — your organization would be much better informed. >>

<< In British Columbia, there are over 5000 deaths per year from KNOWN CANCER-CAUSING SUBSTANCES such as cigarette smoke and alcohol. There is NOT ONE KNOWN CANCER DEATH from the proper use of a « cosmetic » pesticide. >>

<< In Canada, 97 per cent of the pesticide use is in the agricultural area while less than 1 per cent is used in the domestic (lawn care) area. >>

<< In one of the largest studies of its kind, the American Health Study, which followed over 85,000 people associated to the application of pesticides — it found NO EVIDENCE OR LINKAGE to cancers that would stand up to any scrutiny. >>

<< Such a statement [by Canadian-Cancer-Society] would make one believe that all the products used in lawn care are linked to cancer, while the use of the same products in agriculture and forestry sector are not. >>

The Wisdom of a REAL Expert

(continued)

Here are more examples of some of Visentin's wisdom —

<< *Tell the Canadian-Cancer-Society to GET OFF MY LAWN.* >>

<< *The advertising campaign and all its Facebook and Twittering are costing the Canadian-Cancer-Society HUNDREDS OF THOUSANDS OF DONATED DOLLARS.* >>

<< *The Canadian-Cancer-Society continues to push the FALSE and MIS-LEADING INFORMATION on cosmetic pesticides.* >>

<< *The ill-conceived and fear-based pesticide campaign [by Canadian-Cancer-Society] is dipping into funds that could be much better spent elsewhere.* >>

<< *The International Agency for Research on Cancer, World Health Organization, Health Canada, the EPA, the European Union, and others, DO NOT LIST any of the « cosmetic » pesticides as carcinogenic.* >>

<< *The same weed killer that you use on your lawn is the same weed killer that farmers and foresters use.* >>

<< *Valuable donated dollars are being wasted on a campaign [by Canadian-Cancer-Society] to prevent non-existent cancers from « cosmetic » pesticides while the legitimate goal of decreasing preventable cancers is under-funded.* >>

<< *Why do national organizations such as [Canadian-Cancer-Society] so casually ignore the findings of another national organization, the Health Canada's Pest Management Regulatory Agency ?* >>

FORCE OF NATURE, and its various incarnations, is the brainchild of William H. Gathercole and his colleagues.

Here is a brief summary of Mr. Gathercole's career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf maintenance industries

Expertise in — environmental issues and environmental terrorism • turf and ornamental maintenance and troubleshooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, government negotiations, public affairs, and workplace safety • supervisor, consultant, and, programmer for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insect in both the Montreal region and the Vancouver/Fraser Valley region • with Dr. Peter Dermoeden, confirmed the presence of Take-All Patch as a disease of turf in Eastern Canada • with Dr. David Shetlar, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South-Western Ontario, and later, in the Montreal and Vancouver regions

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to the prohibition of pest control products • creator of the signs that are now used for posting after application • co-founder of annual winter convention for Quebec golf course superintendents • the major influence in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness who intervened in the development of prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT e-newsletters

Notable award — man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beach-head against activism in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues ... designed and implemented strategies that reined environmental activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against activists in the town of Hudson, Quebec • launched the largest early professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT e-newsletters.
