The Modern Green Space Industry can be Described as the Planet's Great Conservationist with its Outstanding and Innovative Ideas

Day after day after day — written in the newspapers, heard on the radio, seen on the television, and displayed throughout cyberspace — the Environmental-Terror-Movement (a.k.a. the ecology or natural lawn care movement) is urging for measures to TERRORIZE and DESTROY the Modern Green Space Industry, with ideas that have little basis in fact or science.

Nonetheless, the Environmental-Terror-Movement has gained some powerful allies, such as law-makers and policy-makers who are spineless and naïve co-conspirators.

Many versions of the following phrase have been heard — the world would be a better place if lawns and golf courses were maintained more ecologically or more naturally.

If each of us received five cents every time we heard this phrase, we would be literally spitting gold ingots.

Let's think for a minute ! How does this phrase really apply to the Modern Green Space Industry ? It's not complicated.

The MODERN GREEN SPACE INDUSTRY CAN BE DESCRIBED AS THE PLANET'S GREAT CONSERVATIONIST.

For generations, the Modern Green Space Industry has been maintaining and conserving the world's largest ground cover vegetation, and has CONTRIBUTED EXTENSIVELY TO THE BEAUTIFICATION OF OUR URBAN LANDSCAPES, and THE PRESERVATION OF OUR ENVIRONMENT.

By contrast, Enviro-Maniac-Activists, and their Environmental-Terror-Organizations, can be more precisely identified as RADICAL PRESERVATIONISTS that could not care less about the beautification of our Urban Landscape.

Enviro-Maniac-Activists pretend that the use of cosmetic pesticides is not compatible with natural settings.

Enviro-Maniacs prefer JUNK LAWNS and JUNK LANDSCAPES

Nonetheless, Environmental-Maniac-Activists have pretentiously proclaimed that the natural environment needs their stewardship.

Enviro-Maniac-Activists are obsessed with preserving our world with ANTI-MODERNIST and ANTI-TECHNOLOGY thinking. They thrive on junk science, and resort to LIES rather than the truth.

It is a fact that Enviro-Maniac-Activists are inherently OPPOSED to the modern maintenance of turfgrasses and the beautification of the Urban Landscape. (One notable exception is Audubon International, but not Audubon state organizations.)

Enviro-Maniac-Activists PREFER JUNK LAWNS and JUNK LANDSCAPES that are unaltered by human activity, and are INFESTED with damaging weeds, insects, and disease ... just as the Enviro-Maniacs INFEST our society.

These ENVIRO-TERRORISTS particularly dislike the cosmetic standards used for the maintenance of golf courses, which are arbitrarily considered too lofty.

Enviro-Maniac-Activists are re-enacting the needless conspiracy against DDT. They are proceeding to terrorize and annihilate the Modern Green Space Industry, just like they did with the makers of DDT !

Boulton Vegetation Management Web Site

Boulton Vegetation Management d.b.a. Boulton Pest Control Ltd. is a third-generation company that has provided vegetation management services to industrial, commercial, and residential customers.

We are a leader in the development of innovative vegetation control equipment and techniques.

We employ integrated vegetation management principles, and prepare Vegetation Management Plans (VMP).

All service employees are CERTIFIED Integrated Pest Management Technicians.

Boulton Vegetation Management offers a wide array of pest control services, focusing on commercial weed control.

We service railroads, pulp mills, saw mills, oil refineries, and utility companies.

Sites which we treat include — electrical substations, sales lots, airport runway edges, building perimeters, propane tanks, parking areas, sidewalks, storage facilities, gravel pits and fence lines.

The most common type of weed control that we perform is ZERO-GROWTH VEGETATION CONTROL, previously known as SOIL STERILENT.

Positive Waves

Outstanding and Innovative Ideas for the Green Space Industry

This application delivers BARE GROUND WEED CONTROL for approximately one year at a time.

The chemical is BIODEGRADABLE and APPROVED by the Ministry of Environment.

Other specialized services include aquatic weed control of effluent lagoons, fire-fighting ponds, and coolant lagoons for power generation facilities.

What Are Weeds ?

A pest (weed) is any undesirable organism (plant) that should be controlled to ensure the safety and integrity of operating systems for man and his environment.

Weeds are plants growing where they are not wanted.

NOXIOUS WEEDS such as Canada Thistle and Knapweed growing on a commercial property must be controlled to reduce their NUISANCE and PREVENT THEIR SPREAD.

Once weeds infest an area and produce seeds, they are DIFFICULT AND COSTLY TO CONTROL.

PREVENTION IS THE BEST CURE.

A single plant has THE POTENTIAL TO CAUSE A WIDESPREAD INFESTATION.

The ENORMOUS PRODUCTION OF SEEDS per plant is typical of many weed species.

WEEDS NEED TO BE CONTROLLED FOR REASONS OF SAFETY.

Positive Waves

Outstanding and Innovative Ideas for the Green Space Industry

Weeds :

- Include trees if growing into overhead electrical equipment
- Can become FIRE HAZARDS
- Can cover and hides fences, increasing the risk of unauthorized entry and theft
- Lead to CORROSION of steel equipment
- Increase RISK OF TRIPPING AND SLIPPING
- REDUCE WATER DRAINAGE from sites
- Interfere with equipment access and safety inspections
- Provide food and shelter to rodents, ants, termites and other pests
- Degrade the APPEARANCE of sites

What Are Herbicides ?

Herbicide is the term for a pesticide used to control plants.

A pesticide is a substance used to control pests, such as weeds.

How Do Herbicides Work ?

The products which Boulbee Vegetation Management uses in vegetation control are known as PHOTOSYNTHETIC INHIBITORS. The chemical in these products impedes or stops the production of chlorophyll within the plant.

Positive Waves

Outstanding and Innovative Ideas for the Green Space Industry

Whom Do Herbicides Affect ?

Herbicides used by Boulabee Vegetation Management react only to organisms that have chlorophyll, and are PRACTICALLY NON-TOXIC to non-chlorophyll organisms.

The chemical is very effective against plants, but DOES NOT ADVERSELY AFFECT OTHER LIVING THINGS such as fungi, insects, reptiles, birds, other animals or humans.

Almost all of the products we employ are used for AGRICULTURAL PURPOSES such as apple orchards, asparagus farms and wheat farms.

Toxicity of our Herbicides

All products are rated to an « LD₅₀ » rating system relative to their toxicity.

The LD₅₀ scale starts at 001 and runs to 10,000 —

The lower the number, the more toxic the product.

The herbicides our company uses start at 1000 and go as high as 7500.

To give a point of reference —

Aspirin has an LD₅₀ of 1,000; table salt an LD₅₀ of 3,320.

N

Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against Huje that seek to harm the Green Space Industry (NORAHG). It is a series of Reports destined for the Green Space Industry, the Environmental Terror Movement, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY. The neutrality of these Reports might be disputed.

O

Huje is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing there is some NON-EXISTENT danger with conventional pest control products. Huje also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS PROHIBITION of conventional pest control products that are FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE.

All information, excerpts, and pictures contained in this Report were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release. The events, characters, companies, and organizations, depicted in this Report are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. Don't thank us. It's a public service. And we are glad to do it.

R

Force Of Nature, and its various incarnations, is the brainchild of William H. Gathercole and his entourage. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in public affairs, workplace safety, and environmental compliance. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority. Mr. Gathercole is now retired from Force Of Nature, although his name continues to appear as the FOUNDER. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status, that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully! For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of Environmental Terror for the entire Modern Green Space Industry across Canada. Mr. Gathercole's involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec. Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair.

A

Mr. Gathercole and his entourage have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. Through Force Of Nature, Enviro Maniac Activist Huje are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Maniac Culprit is a misguided adversary, each still deserves our respect. The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry. Their pretentious prohibitionist rants have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd Huje is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.
