

# Sod Quality. With 'Rush'!

## Select II

½-inch mowing

'Rush' resists annual bluegrass invasion better than all other Kentucky bluegrasses, and it ranks among the best varieties that are drought tolerant. This blend of improved varieties of Kentucky bluegrass will also provide a dark green to very dark green colour, a medium to very fine leaf texture, and a high density turf. Select II can be used for the following locations :

- Areas with no irrigation.
- Cemeteries.
- Golf course fairways and tees.
- Golf course primary rough.
- Golf course secondary deep rough.
- High-use parks.
- Leisure green spaces.
- Residential home lawns.
- Sod farms.
- Sports fields.

- |      |                         |      |  |
|------|-------------------------|------|--|
| ★½   | Very dark green.        | ★    | Quick germination.                             |
| ★★½  | Dark green colour.      | ★★   | Quick establishment and/or vigorous seedlings. |
| ★    | Very fine texture.      | ★★½  | Heat and/or drought.                           |
| ★    | Fine texture.           | ★★   | Moderate shade tolerance.                      |
| ★★   | Medium texture.         | —    | Powdery Mildew.                                |
| ★★★★ | High density turf.      | ★★★★ | Resistance to Leaf Spot.                       |
| —    | Medium density.         | ★★★★ | Resistance to Rust.                            |
| ★★½  | Less fertilizer needed. | ★★★★ | Resistance to Annual Blue.                     |
| ★½   | Wear tolerance.         | ★★   | Sod strength.                                  |
| ★★★  | ½-in mowing height.     |      |  |
