

# Sod Quality. With 'Award'!

'Award' is the component with the darkest green colour of all Kentucky bluegrass varieties. This blend of improved varieties of Kentucky bluegrass will provide a very dark green to dark green colour, a very fine to medium leaf texture, and a high density turf. Super Select I can be used for the following locations : • Areas with no irrigation. • Cemeteries. • Golf course fairways and tees. • Golf course primary rough. • Golf course secondary deep rough. • High-use parks. • Leisure green spaces. • Moderately-shaded areas. • Residential home lawns. • Sod farms. • Sports fields.

- |                              |   |
|------------------------------|---|
| ★½ Very dark green.          | ★ Quick germination.                              |
| ★★½ Dark green colour.       | ★★ Quick establishment and/or vigorous seedlings. |
| ★★ Very fine texture.        | ★★★★½ Heat and/or drought.                        |
| ★ Fine texture.              | ★★★★ Moderate shade tolerance.                    |
| ★ Medium texture.            | ★★ Powdery Mildew.                                |
| ★★★★ High density turf.      | ★★★ Resistance to Leaf Spot.                      |
| — Medium density.            | ★★★ Resistance to Rust.                           |
| ★★★★ Less fertilizer needed. | ★★★★ Resistance to Annual Blue.                   |
| ★★★★½ Wear tolerance.        | ★★★ Sod strength.                                 |
| ★★★★ ½-inch mowing height.   |   |
