# Controversial Prohibition

Incandescent Light Bulbs  
are LESS hazardous

Because of pressure exerted by Environmental-Terror-Activists, many countries have enacted laws to PROHIBIT incandescent light bulbs.

The Green Alternatives are **compact fluorescent lamps ( CFL )** that last five years longer, and use about 75 per cent less energy. But, are they safer ?

COMPACT FLUORESCENT LAMPS, like all fluorescent lamps, CONTAIN SMALL AMOUNTS OF MERCURY as vapour inside the glass tubing, averaging 4.0 mg per bulb. A BROKEN compact fluorescent lamp will release its mercury content. This means that disposal and clean-up of BROKEN compact fluorescent lamps is **MORE HAZARDOUS** than incandescent bulbs.

## Incandescent Light Bulbs are LESS hazardous

Compact fluorescent lamps are also HAZARDOUS in the home —

<< I turned it on the other day, and then **smelled smoke** after a few minutes. **Four-inch flames** were spewing out of the side of the ballast, like a **blow torch** !

If I had not been there ... if I was not right there ... imagine if the kids had left the lights on as usual when they were not in the room.

I took the bulb to the Fire Department today to report the incident. The Fireman wasn't at all surprised, and said that it was not an uncommon occurrence. Apparently, sometimes when the bulb burns out, there is a chance that the ballast can start a fire. He told me that the Fire Marshall had issued reports about the **dangers of these bulbs**.

Upon doing some Internet research, it seems that bulbs made by « Globe » in China seem to have the lion's share of problems.

Lots of fires have been blamed on misuse of CFL bulbs, like using them in recessed lighting, pot lights, dimmers, or in track lighting. Mine was not in any of those. It was a normal light socket.

I bought these at Wal-Mart. I will be removing all the Globe bulbs from my house. What happens when all the incandescent bulbs are withdrawn from the market ? >>

## BOGUS Green Alternatives

Environmental-Terror-Activists who seek the prohibition of conventional pest control products have attempted to reassure everyone by alleging that safe, effective, and affordable Green Alternatives are already available.

Despite claims to the contrary, there are **NO** viable, efficacious, or economical products to replace conventional pest control products.

Enviro-Terror-Activists are **LYING SACS OF ENVIRO-MANIAC CRAP !**

Since there are **NO** viable, efficacious, or economical Green Alternative Products, a large number of Professional Lawn Care Companies are **UNABLE** to satisfy their customers with adequate weed and insect control.

Virtually all Green Alternatives are **BOGUS**, displaying negative characteristics such as the following —

- Green Alternatives may be **ALMOST TOTALLY INEFFECTIVE** except under very specific circumstances.
- Green Alternatives may be **PROHIBITED** in some jurisdictions.
- Green Alternatives may be questionably **HIGHER IN TOXICITY**.
- Green Alternatives may be **STUNNINGLY MORE EXPENSIVE** to use when compared to conventional pest control products.
- Green Alternatives may be supplied by the same malicious Environmental-Terror-Organizations that have sought the prohibition of conventional pest control products.

## BOGUS Green Alternatives

- Green Alternatives may have **NEGATIVE SIDE-EFFECTS** like phyto-toxicity ( an effect that adversely affects plant growth ), or corrosion, or rodent-attractant.
- Green Alternatives may require **EXTREMELY-HIGH-INPUTS OF ACTIVE INGREDIENT** since they will otherwise be less effective.
- Green Alternatives may require more personal protection for the user.
- Green Alternatives are **NOT SAFER, NOT BETTER, NOT MORE EFFECTIVE** when compared to conventional pest control products.

### SAFETY AND TOXICITY OF GREEN ALTERNATIVES

---

The following is a brief description of the level of toxicity associated with various Green Alternative and conventional pest control products, as well as household items. All information was obtained from material safety data sheets.

### MEASURING THE LEVEL OF TOXICITY

---

In toxicology, the Median Lethal Dose,  $LD_{50}$  ( abbreviation for « *Lethal Dose, 50 per cent* » ), is a value that represents the dose that is fatal for 50 per cent of an experimental group of laboratory animals, in most cases rats.

The lower the  $LD_{50}$  value, the more toxic the product.

Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against Huje that seek to harm the Green Space Industry (NORAHG). It is a series of Reports destined for the Green Space Industry, the Environmental Terror Movement, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY. The neutrality of these Reports might be disputed.

Huje is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing that families are in some NON-EXISTENT danger with conventional pest control products. Huje also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS prohibition of FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE conventional pest control products.

All information, excerpts, and pictures contained in this Report were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release. The events, characters, companies, and organizations, depicted in this Report are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. Don't thank us. It's a public service. And we are glad to do it.

Force Of Nature, and its various incarnations, is the brainchild of William H. Gathercole and his entourage. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in public affairs, workplace safety, and environmental compliance. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority. Mr. Gathercole is now retired from Force Of Nature, although his name continues to appear as the FOUNDER. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status, that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully ! For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of Environmental Terror for the entire Modern Green Space Industry across Canada. Mr. Gathercole's involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec. Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair.

Mr. Gathercole and his entourage have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. Through Force Of Nature, Enviro Maniac Activist Huje are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Maniac Culprit is a misguided adversary, each still deserves our respect. The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry. Their pretentious prohibitionist rants have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd Huje is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.
