Controversial Prohibition

Single-Use Plastic Bags are LESS hazardous

Somewhere between 500 billion and 1 trillion plastic bags are consumed world-wide each year. They do not degrade quickly enough in landfills, and may pose a danger to many marine mammals. Some super-markets now charge their customer 5 cents per bag, and rake in millions of dollars in EXTRA revenues.

The Green Alternative to single-use plastic bags may be paper. Is this less hazardous for the environment ?

Choosing either paper or plastic may be **JUST AS HAZARDOUS** for the environment. According to the U.S. Natural Resources Defense Council, the plastic bags used annually in the United States require about 12 million barrels of oil to produce. In comparison, paper bags require about 14 million trees.

Controversial Prohibition

Single-Use Plastic Bags are LESS hazardous

PAPER, PLASTIC, OR A DIRTY REUSABLE BAG ?

June 3rd, 2010

Cal Watchdog

Your Eyes on California Government

Selected and adapted excerpts

When compared to reusable bags, single-use plastic or paper bags **ARE LESS HAZARDOUS** to the health of people.

According to Environmental-Maniac-Activists, the PROHIBITION of BOTH single-use plastic and paper bags is necessary to « *save* » the environment.

The Green Alternative to single-use plastic or paper bags is reusable bags, hundreds of dollars.

Reusable bags are SOLD-FOR-PROFIT, and may cost upwards of three-dollars per bag. Reusable bags may have been « *très chic* » in recent years, but they come with **ENVIRONMENTAL HAZARDS** as well.

A study conducted by the Environment and Plastics Industry Council in Canada found that the reusable bags are PETRI DISHES OF DISGUSTING BACTERIA.

In a November 2008 study in Toronto, using swab testing of reusable bags, researchers found that there was CONSIDERABLE BACTERIAL BUILD-UP, MOLD, and YEAST on the reusable bags, as well as significant levels of FECAL BACTERIA.

Why are reusable bags a **HAZARD** ? They are used to carry GYM CLOTHES, and even DIRTY DIAPERS.

The millions of reported cases each year of FOOD POISONING could be from CONTAMINATED « *eco-friendly* » reusable bags.

Environmental Terrorists UNMASKED

BOGUS Green Alternatives

EVEN IN THE CASE OF PEST CONTROL PRODUCTS ...
... THE GREEN ALTERNATIVES MAY BE TOO GOOD TO BE TRUE

Environmental-Terror-Activists who seek the prohibition of conventional pest control products have attempted to reassure everyone by alleging that safe, effective, and affordable Green Alternatives are already available.

Despite claims to the contrary, there are **NO** viable, efficacious, or economical products to replace conventional pest control products.

Enviro-Terror-Activists are **LYING SACS OF ENVIRO-MANIAC CRAP !**

Since there are **NO** viable, efficacious, or economical Green Alternative Products, a large number of Professional Lawn Care Companies are **UNABLE** to satisfy their customers with adequate weed and insect control.

Virtually all Green Alternatives are **BOGUS**, displaying negative characteristics such as the following —

- Green Alternatives may be **ALMOST TOTALLY INEFFECTIVE** except under very specific circumstances.
- Green Alternatives may be **PROHIBITED** in some jurisdictions.
- Green Alternatives may be questionably **HIGHER IN TOXICITY**.
- Green Alternatives may be **STUNNINGLY MORE EXPENSIVE** to use when compared to conventional pest control products.
- Green Alternatives may be supplied by the same malicious Environmental-Terror-Organizations that have sought the prohibition of conventional pest control products.
- Green Alternatives may have **NEGATIVE SIDE-EFFECTS** like phyto-toxicity (an effect that adversely affects plant growth), or corrosion, or rodent-attractant.

Environmental Terrorists UNMASKED

BOGUS Green Alternatives

- Green Alternatives may require EXTREMELY-HIGH-INPUTS OF ACTIVE INGREDIENT since they will otherwise be less effective.
- Green Alternatives may require more personal protection for the user.
- Green Alternatives are NOT SAFER, NOT BETTER, NOT MORE EFFECTIVE when compared to conventional pest control products.

SAFETY AND TOXICITY OF GREEN ALTERNATIVES

The following is a brief description of the level of toxicity associated with various Green Alternative and conventional pest control products, as well as household items. All information concerning pest control products was obtained from material safety data sheets.

MEASURING THE LEVEL OF TOXICITY

In toxicology, the Median Lethal Dose, LD_{50} (abbreviation for the « *Lethal Dose, 50 per cent* »), is a value that represents the dose that is fatal for 50 per cent of an experimental group of laboratory animals, in most cases rats.

The lower the LD_{50} value, the more toxic the product.

COMPARATIVE EXAMPLES

In the next segment, with product acute oral toxicity (LD_{50}), rat.

The lower the LD_{50} value, the more toxic the product.

Environmental Terrorists UNMASKED

BOGUS Green Alternatives

RELATIVELY HARMLESS (LD_{50} 15000 +)

29700	sucrose	Table Sugar	edible food additive
15000 +	deltamethrin	Deltagard SC	conventional insecticide

PRACTICALLY NON-TOXIC (LD_{50} 5000–15000)

11900	ascorbic acid	Vitamin C	edible nutrient
7060	ethyl alcohol	Ethanol	edible beverage constituent
5000 +	chlorothalonil	Daconil Ultrex	conventional fungicide
5000 +	fatty acids	Safer's TopGun	green alternative herbicide
5000 +	ferric phosphate	Snail and Slug Bait	green alternative molluscicide
5000 +	FeHEDTA iron	Fiesta	green alternative herbicide
5000 +	potassium salts of fatty acids & pyrethrins	Safer's Trounce	green alternative insecticide
5000 +	quintozone	Terraclor Flowable	conventional herbicide
5000 +	2,4-D, mecoprop, dicamba	Killex	conventional herbicide

Environmental Terrorists UNMASKED

BOGUS Green Alternatives

SLIGHTLY TOXIC (LD₅₀ 500–5000)

5000	mineral oil	Horticultural Oil	green alternative insecticide
5000	sulphur	Microscopic Sulphur	green alternative fungicide
4340	propiconazole	Banner MAXX	conventional fungicide
4220	sodium bicarbonate	Baking Soda	household product
4200	chlorothalonil	Daconil 2787	conventional fungicide
4000 +	<i>Bacillus thuringiensis</i>	Dipel	green alternative insecticide
3000	sodium chloride	Table Salt	edible food additive
2660	boric acid	Boric Acid	green alternative insecticide
2591–4820	imidacloprid	Merit	conventional insecticide
2084	metalaxyl-M	Subdue MAXX	conventional fungicide
2000 +	<i>Sclerotinia minor</i>	Sarritor	green alternative herbicide
1994	acetaminophen	Tylenol	analgesic
1714	azoxystrobin	Heritage MAXX	conventional fungicide
1270	cannabis — males		recreational drug
730	cannabis — females		

Environmental Terrorists UNMASKED

BOGUS Green Alternatives

MODERATELY TOXIC (LD_{50} 50–500)

330	hydrogen peroxide	ZeroTol	green alternative fungicide
200	acetylsalicylic acid	Aspirin	analgesic
192	caffeine	Coffee	edible beverage constituent

HIGHLY TOXIC (LD_{50} 1–50)

50	nicotine		tobacco constituent
16	strychnine		rodenticide

***Conventional pest control products
used for turf maintenance are
federally legal, scientifically safe,
and totally irreplaceable !***

N O R A H G

Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against Huje that seek to harm the Green Space Industry (NORAHG). It is a series of Reports destined for the Green Space Industry, the Environmental Terror Movement, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY. The neutrality of these Reports might be disputed.

Huje is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing there is some NON-EXISTENT danger with conventional pest control products. Huje also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS PROHIBITION of conventional pest control products that are FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE.

All information, excerpts, and pictures contained in this Report were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release. The events, characters, companies, and organizations, depicted in this Report are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. Don't thank us. It's a public service. And we are glad to do it.

Force Of Nature, and its various incarnations, is the brainchild of William H. Gathercole and his entourage. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in public affairs, workplace safety, and environmental compliance. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority. Mr. Gathercole is now retired from Force Of Nature, although his name continues to appear as the FOUNDER. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status, that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully ! For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of Environmental Terror for the entire Modern Green Space Industry across Canada. Mr. Gathercole's involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec. Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair.

Mr. Gathercole and his entourage have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. Through Force Of Nature, Enviro Maniac Activist Huje are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Maniac Culprit is a misguided adversary, each still deserves our respect. The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry. Their pretentious prohibitionist rants have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd Huje is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.
