FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from
National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)

Bans Lead To EXORBITANT COSTS

Overview Of Organic Lawn Care Maintenance

When it comes to PESTICIDE AND SYNTHETIC FERTILIZER BANS, Municipal Officials can learn a lot from the experience of those jurisdictions that have SUFFERED THE HARDSHIP AND EXORBITANT COST OF THIS #@!!% NONSENSE !

PESTICIDE AND SYNTHETIC FERTILIZER BANS lead to a CATATROPHIC RELIANCE on Organic Lawn Care Products And Practices that DO NOT WORK and are DISMAL FAILURES.

Organic Lawn Care Maintenance Products And Practices are EXORBITANTLY EXPENSIVE and TOTALLY UNRELIABLE and NOT ECONOMICALLY VIABLE.

Municipalities are NOT ABLE TO AFFORD Organic Practices because of the EXORBITANT COST OF LABOUR needed to MANUALLY REMOVE MILLIONS OF PESTS and to SPREAD UNNECESSARY ORGANIC FERTILIZERS.

Furthermore, municipalities are NOT ABLE TO AFFORD the EXORBITANTLY EXPENSIVE AND INEFFECTIVE Green Alternative Pesticides and Organic Fertilizers.

Government Officials ARE THINKING TWICE BEFORE BANNING PESTICIDES AND SYNTHETIC FERTILIZERS, and DO NOT WANT TO CATASTROPHIC RELY on Organic Lawn Care Maintenance Products And Practices.

Across North America, Government Officials ARE THINKING TWICE about being MIS-INFORMED AND COERCED into agreeing with ARBITRARILY PROHIBITING CONVENTIONAL AND RELIABLE products and practices.

Officials ARE ALSO THINKING TWICE about spending STUNNINGLY EXORBITANT AMOUNTS OF TAX-PAYER MONEY AND RESOURCES on Organic Lawn Care Maintenance Products And Practices.

WHO CAN AFFORD THIS #@!!% NONSENSE with Organic Lawn Care Maintenance Products And Practices that are EXORBITANTLY EXPENSIVE and TOTALLY UNRELIABLE and NOT ECONOMICALLY VIABLE.

For example, the CARNAGE inflicted by STUNNINGLY EXORBITANT COSTS of Organic Lawn Care Maintenance Products And Practices across Canada led to ...

THE SQUANDERING AND MISAPPROPRIATION OF HUNDREDS OF MILLIONS OF DOLLARS

WHO CAN AFFORD THIS #@!!% BAN NONSENSE !?!?

Overview About City Of Durango

The City of Durango is located in the State of Colorado, with a population of almost 17,000.

Durango's resident Lunatic-Activists CONSPIRE to IMPOSE Anti-Pesticide PROHIBITION against conventional pest control products used on Public Green Spaces.

Durango's Government Officials, Professional Lawn Care Businesses, Golf Facility, and several local residents, are actually OPPOSED to any SELF-IMPOSED PESTICIDE BAN that will lead to a CATATROPHIC RELIANCE

on Organic Lawn Care Maintenance Products And Practices that are DO NOT WORK and are DISMAL FAILURES.

Nonetheless, Anti-Pesticide Lunatic-Activists COERCED, INTIMIDATE, and TERRORIZED Durango's Government Officials.

Durango is now FORCED by Lunatic-Activists to use Lawn Care Maintenance Products And Practices that are ORGANIC AND PESTICIDE FREE whenever possible.

The ULTIMATE GOAL of the Lunatic-Activists is TOTAL PROHIBITION.

Not surprisingly, Anti-Pesticide PROHIBITION inflicted on Durango STUNNINGLY EXORBITANT MAINTENANCE COSTS as well as GARBAGE DUMP Green Spaces.

According to the Director of Durango's Parks and Recreation Department —

- The costs for maintaining Durango's PARKS will INCREASE from \$34,550 to \$237,450 annually.
- The costs for maintaining Durango's NATURAL LANDS will INCREASE from \$8,000 to \$76,700 annually.

The COST INCREASES are based on the city having to rely on MANUAL OR MECHANICAL REMOVAL OF WEEDS and having to apply organic fertilizer monthly.

A PESTICIDE BAN will create a situation where Municipal Employees are forced to resort to the BACK-BREAKING and AGONIZING JOB of WEED-PULLING BY HAND, just like COTTON-PICKING NIGGARS.

Moreover, Durango's Government Officials attempted to APPEASE local Anti-Pesticide Lunatics with so-called CHEMICAL FREE PARKS.

Two city-owned parks, Brookside and Pioneer, were designated as so-called CHEMICAL FREE PARKS (a.k.a. ORGANIC PESTICIDE FREE).

The condition of these parks relied upon so-called ORGANIC PESTICIDE-FREE MAINTENANCE AND NON-SYNTHETIC FERTILIZER.

The so-called CHEMICAL FREE PARKS were ABYSMAL FAILURES.

They were examples of why ORGANIC MAINTENANCE CANNOT WORK ON A LARGER SCALE without turning the entire city into a GIGANTIC GARBAGE DUMP. (See mock-photos.)

The so-called CHEMICAL-FREE PARKS were unsightly due to the BROAD-LEAVED PLANTAIN WEEDS THAT INFESTED OVER 50 PER CENT OF THE PARKS.

And now, in early 2013, Durango NEEDS EVEN MORE MONEY FOR ITS BOGUS ORGANIC PESTICIDE-FREE PARKS.

WHO CAN AFFORD THIS #@!!% BAN NONSENSE !?!?

PESTICIDE- FREE Means WEEDS

Durango's parks, designated as so-called Chemical-Free Parks, became infested with at least 50 per cent plantain weeds

The Durango Herald

Selected And Adapted Excerpts

WHO CAN AFFORD THIS #@!!% BAN NONSENSE ?!?!

The City of Durango needs a mere 100,000 DOLLARS for its parks that are now under a SELF-IMPOSED Anti-Pesticide and Anti-Synthetic-Fertilizer PROHIBITION.

Consequently, Durango was FORCED TO RESORT to using Organic Lawn Care Maintenance Products And Practices that are STUNNINGLY EXPENSIVE, NOT ECONOMICALLY VIABLE, and TOTALLY INEFFECTIVE.

Synthetic Fertilizers were also PROHIBITED, and LOW OR NO NITROGEN Organic Fertilizers were ARBITRARILY FAVOURED.

A NON-EXPERT PAID-FOR-PROFIT CONSULTANT, Chip-Charles Osborne, prescribed to Durango several RIDICULOUS Organic Lawn Care Maintenance Products And Practices.

Osborne was/is PAID 36,000 DOLLARS PER YEAR AS A CONSULTANT for Organic Lawn Care Maintenance.

Chip Osborne is an organic lawn care operator with a MARGINAL AND FAILING BUSINESS in Organic Lawn Care Industry is DISINTEGRATING into BANKRUPTCIES and BUSINESS FAILURES.

Osborne has NO recognized background, training, or expertise in matters concerning pest control products and fertilizers.

His advice was/is TOTALLY WORTHLESS and UTTERLY VALUELESS.

Osborne presents himself to HELPLESS PEST-INFESTED ANTI-PESTICIDE COMMUNITIES, and PROMOTES BOGUS AND EXORBITANTLY EXPENSIVE Organic Lawn Care Maintenance Products And Practices that DO NOT WORK !

What Osborne CONVENIENTLY NEGLECTED TO MENTION TO HIS HAPLESS VICTIMS in Durango is that it is IMPOSSIBLE for him to keep their

WHO CAN AFFORD THIS #@!!% BAN NONSENSE ?!?!

properties beautiful by using his RIDICULOUS Organic Lawn Care Maintenance Products And Practices.

According to Osborne, Durango's parks need to be sprayed with SOY and KELP POWDER, a liquid form of MOLASSES, and HUMIC ACID at nine city parks as part of a PILOT [a.k.a. UNPROVEN AND BOGUS] Organic Lawn Care Maintenance Products And Practices.

Unfortunately, the use of these products were recommended by Osborne with UNVERIFIABLE SUCCESS STORIES !

The program could begin as early as spring 2013, provided the city can find 100,000 DOLLARS.

That's right ... 100,000 DOLLARS.

The Organic Lawn Care Maintenance Products And Practices were originally intended to be COST-NEUTRAL.

COST-NEUTRAL ? ... Yeah, right.

WHO CAN AFFORD THIS #@!!% NONSENSE ?!?!

But, according to Osborne, in order to be able to spread the MOLASSES AND KELP POWDER, the city would have to make a one-time expenditure of 100,000 DOLLARS for the equipment, such as a motorized SPRAYER with an attached 300-gallon tank.

MOLASSES AND KELP POWDER are mere sources of secondary and micro-nutrients sulfur, potash, iron, and micronutrients, and contain NO nitrogen.

Nitrogen is often UNDER-USED in Organic Lawn Maintenance, and turf is often NOT provided with adequate nitrogen fertilization.

Nitrogen is the most vital plant nutrient.

WHO CAN AFFORD THIS #@!!% BAN NONSENSE ?!?!

In fact, it is known officially as a macro-nutrient, which means it is a nutrient of primary importance.

It is the first to be needed by mature plants, and must be frequently replenished by the application of fertilizers.

The benefits of nitrogen include ...

- Increasing shoot growth.
- Improving green colour.
- Accelerating recuperation from injury.
- Improving resistance to weed invasion.

Osborne's BOGUS Organic Lawn Maintenance program PROVIDES NONE OF THESE BENEFITS.

Moreover, consultants like Osborne often recommend these RIDICULOUS products and equipment since they have VESTED INTERESTS WITH THE SUPPLIERS.

Scott Sallee, owner of Scott's Pro Lawn Care, CRITICIZED THE EXPENSES during a presentation for the public at the Community Recreation Center.

According to Scott Sallee —

According to my quick calculations, it just seems the cost of the capital casts and the consultant's fee (36,000 DOLLARS) for the nine parks is going to be approximately FOUR TO FIVE TIMES AS MUCH AS WHAT IT COSTS TO DO ALL THE PARKS FOR A WHOLE SEASON.

WHO CAN AFFORD THIS #@!!% BAN NONSENSE ?!?!

Sallee also criticized Organic Lawn Care Maintenance Products And Practices in other parts of North America as INEFFECTIVE .

To spend the 100,000 DOLLARS , the City Council would have to approve a special appropriation during a regular meeting, but Councillor Christina Rinderle suggested during a study session that the money could be raised privately.

City Manager Ron LeBlanc called it a MOLASSES DRIVE .

Rinderle predicted there would be much popular support because so many Anti-Pesticide Lunatics had packed city meetings in fall 2012, DEMANDING PROHIBITION under the PRETEXT that they wanted to protect their children from the perceived and IMAGINARY dangers of synthetic pest control products.

According to the fund-raisers for the MOLASSES DRIVE —

Organic Parks Durango's purpose is to raise money to help the City of Durango purchase three pieces of equipment needed for managing the parks in Durango organically.

The equipment includes —

- 1) A sprayer truck that will apply a liquid solution of organic nutrients such as kelp, molasses, to feed the micro-organisms [?!?!], and other organic humates instead of using chemical fertilizers [?!?!].*
- 2) An over-seeding machine that will spread grass seeds instead of using herbicides [?!?!].*
- 3) An aerator to loosen compact soils.*

WHO CAN AFFORD THIS #@!!% BAN NONSENSE ?!?!

After the initial investment of equipment, the organic parks program will save the City money in the long run.

[WRONG !]

It will also immediately start providing a healthier environment for the community to live and play in and increase the quality of life for all of its wild and domestic residents including bees, kids, families, pets, worms, water and wild life ! [WRONG !]

Thank you so much for your participation in helping manifest this vision to support our global ecosystem. [?!?!]

To donate with either paypal or a credit card, click the paypal button to go to the next step. You do not have to have a paypal account to donate.

As part of compromise with Municipal Officials, the Anti-Pesticide Lunatics withdrew a ballot initiative to require Organic Lawn Care Maintenance Products And Practices when the council appropriated 36,000 DOLLARS to hire Chip-Charles Osborne to recommend BOGUS Green Alternative Practices.

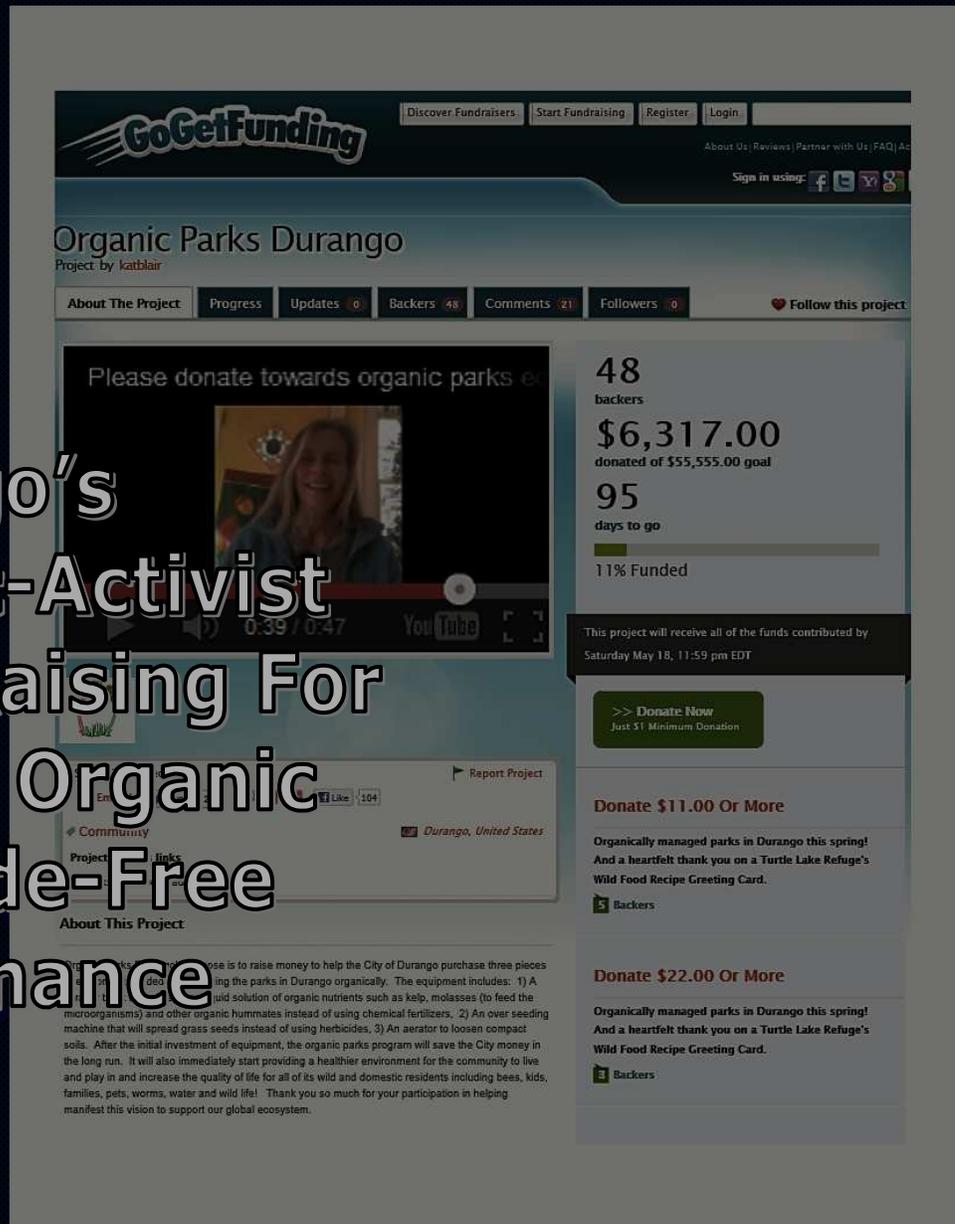

The consultant, Chip-Charles Osborne of Osborne Organics, said Durango would not be the first city to rely on private donations to start an organic program.

A youth sports group in his home city of Marblehead, Massachusetts, raised money for Organic Lawn Care Maintenance Equipment because of Marblehead's tight budget.

Organic Lawn Care Maintenance became a DISMAL FAILURE in Marblehead.

WHO CAN AFFORD THIS #@!!% BAN NONSENSE ?!?!

Durango's Lunatic-Activist Fund-Raising For BOGUS Organic Pesticide-Free Maintenance

The screenshot shows a GoGetFunding page for a project titled "Organic Parks Durango" by user "katblair". The page features a video player with the text "Please donate towards organic parks" and a woman speaking. To the right of the video, the following statistics are displayed: 48 backers, \$6,317.00 donated of a \$55,555.00 goal, 95 days to go, and 11% funded. Below these statistics, there are three donation tiers: "Donate Now" (minimum \$1), "Donate \$11.00 Or More" (with a thank you note from Turtle Lake Refuge), and "Donate \$22.00 Or More" (also with a thank you note from Turtle Lake Refuge). The "About This Project" section at the bottom describes the goal of raising money to help the City of Durango purchase equipment for organic park maintenance, including a liquid solution of organic nutrients, a seeding machine, and an aerator.

Durango's

Organic
FAILURE

Nitrogen's Role In Turfgrass Science

Adequate Nitrogen Fertilization

Nitrogen is the most vital plant nutrient.

In fact, it is known officially as a macro-nutrient, which means it is a nutrient of primary importance.

It is the first to be needed by mature plants, and must be frequently replenished by the application of fertilizers.

Most definitely, a substantial quantity of nitrogen is required in any fertilizer program.

Nitrogen is the plant nutrient that has the reputation of being the most mistreated by turf managers.

Consequently, with Organic Lawn Maintenance, turf is often NOT provided with adequate nitrogen fertilization.

With Organic Lawn Care Maintenance, the benefits of nitrogen are often IGNORED under the MISTAKEN PRETEXT that organic sources of fertilizer, regardless of their composition, is somehow more beneficial for turf.

Unfortunately, Organic Lawn Care Maintenance are promoted with UNVERIFIABLE SUCCESS STORIES !

Sadly, with Organic Lawn Care Maintenance, public and residential green spaces become DANGEROUS AND PEST-INFESTED GARBAGE DUMPS.

Nitrogen's Role In Turfgrass Science

Organic Lawn Care Maintenance

In fact, with Organic Lawn Care Maintenance, turf becomes THIN, WEAK, YELLOW, UNHEALTHY, UNATTRACTIVE, and NOT CAPABLE OF RECOVERING FROM INJURY.

Unfortunately, companies using Organic Lawn Care Maintenance are NOT able to afford the STUNNINGLY EXORBITANT COST OF Organic Fertilizers, but still understand the BENEFITS of nitrogen.

Consequently, Organic Fertilizers are often SPIKED with synthetic sources of nitrogen, and the EXORBITANT COST of Organic Fertilizer is IMPLAUSIBLY JUSTIFIED UNDER THE PRETEXT that organic sources of fertilizer, regardless of their composition, is somehow more beneficial for turf. [WHICH IS FALSE !]

Throughout Canada, the Organic Lawn Care Industry is DISINTEGRATING into BANKRUPTCIES and BUSINESS FAILURES.

Organic companies must resort to synthetic nitrogen fertilizers and even conventional pest control products ... WHEN IT SUITS THEM !

Companies using Organic Lawn Care Maintenance simply CANNOT BE SUCCESSFUL when relying solely upon Green Alternative Pesticides and Organic Fertilizers.

LYING, CHEATING, and FRAUD are the only ways to make Organic Lawn Care Maintenance appear to work effectively.

Nitrogen's Role In Turfgrass Science

The BENEFITS of nitrogen to turfgrass growth will include the following —

Increasing Shoot Growth

The BENEFITS of nitrogen to turfgrass growth ...

This means green, vegetative growth, such as leaves and stems.

With adequate nitrogen fertilization, more vigorous shoot growth will be stimulated.

Turf will become a thick and attractive ground cover.

Additionally, vigorous shoot growth is also important for the recovery of damaged turf.

With Organic Lawn Care Maintenance, turf is often NOT provided with adequate nitrogen fertilization.

Organic Fertilizers traditionally have LOW OR NO NITROGEN.

NO ONE is able to afford the EXORBITANT COST of Organic Fertilizers, and, predictably, application rates are REDUCED AT THE EXPENSE OF TURFGRASS HEALTH AND VIGOUR.

Consequently, with Organic Lawn Care Maintenance, turf is THIN, WEAK, and UNATTRACTIVE.

With Organic Lawn Care Maintenance, turf is NOT CAPABLE OF RECOVERING FROM INJURY.

Nitrogen's Role In Turfgrass Science

Improving Green Colour

The BENEFITS of nitrogen to turfgrass growth ...

Nitrogen, as well as iron, is routinely used for improving the colour of turf.

Whether we like to admit it or not, THE PUBLIC PREFERS GREEN GRASS.

Homeowners want thick, green lawns.

Golfers want short, green golf courses.

Tax-payers want green parks and sports fields.

Let's face it, green turf is in demand.

Additionally, GREEN TURF IS A GOOD INDICATOR OF PLANT HEALTH.

Conversely, YELLOW TURF symbolizes that turf is not performing properly.

Nitrogen is often UNDER-USED in Organic Lawn Maintenance, and turf is often NOT provided with adequate nitrogen fertilization.

Consequently, with Organic Lawn Care Maintenance, turf is YELLOW, UNHEALTHY, and UNATTRACTIVE.

With Organic Lawn Care Maintenance, public and residential green spaces LOOK LIKE GARBAGE DUMPS.

Nitrogen's Role In Turfgrass Science

Accelerating Recuperation From Injury

The BENEFITS of nitrogen to turfgrass growth ...

Kentucky bluegrass, creeping bentgrass, and annual bluegrass benefit from more nitrogen when they are injured.

Turf managers mistakenly assume that normal maintenance levels of nitrogen are sufficient for the recovery of injured turf.

Nitrogen is often under-used in Organic Lawn Maintenance, and turf is often NOT provided with adequate nitrogen fertilization.

Consequently, with Organic Lawn Care Maintenance, turf is NOT CAPABLE OF RECOVERING FROM INJURY.

Improving Resistance To Weed Invasion

The BENEFITS of nitrogen to turfgrass growth ...

Adequate nitrogen fertilization will provide a THICKER turf cover, and a higher turf density will more effectively crowd out invading weeds.

Grass-type and broad-leaved type weeds will have more difficulty establishing themselves in a well-fertilized turf.

Nitrogen is often under-used in Organic Lawn Maintenance, turf is often NOT provided with adequate nitrogen fertilization, and turf is THIN, WEED-INFESTED, and UNATTRACTIVE.

With Organic Lawn Care Maintenance, public and residential green spaces become DANGEROUS AND PEST-INFESTED GARBAGE DUMPS since they are INFESTED WITH UNBEARABLE AND DESTRUCTIVE WEED PROBLEMS.

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from
National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)

N O R A H G

We are living in the 9|11 Era of Anti Pesticide Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is Perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces under the RIDICULOUS PRETEXT of somehow « saving » the environment.

NORAHG is a NATIONAL NON PROFIT NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HUJE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are Hateful Underhanded Jokes as Environmentalists who have been WRONG FOR OVER 50 YEARS.

There is NO RECOURSE but LITIGATION against Anti Pesticide HUJE.

Another RECOURSE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOCATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HUJE should Get OFF Our grASS, and they should Roast In Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti Pesticide Terrorist Acts of Subversion.

The purpose of this ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti-Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION !

NORAHG also produces FORCE OF NATURE, reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports destined for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE, as well as ground breaking original reporting that informs, entertains, and creates real change.

FORCE OF NATURE is TOTALLY INDEPENDENT and provides NO guarantee regarding accuracy or completeness. In no event shall FORCE OF NATURE be liable for any incidental or consequential damages, lost profits, or any indirect damages.

NORAHG also produces A LOOK AT, a series of reports providing TECHNICAL INFORMATION on issues such as Career Management, Golf Course Maintenance, Green Alternatives, Summer Stress, Turfgrass Pests, and Turfgrass Species.

Finally, NORAHG frequently responds to anti pesticide activists in LETTERS TO THE EDITOR in newspapers across Canada and around the world.

All information, excerpts, and pictures contained in FORCE OF NATURE, A LOOK AT, and LETTERS TO THE EDITOR were retrieved from the Internet, and may be considered in the public domain.

FORCE OF NATURE, A LOOK AT, and their various incarnations, was the brainchild of William H. Gathercole and his colleagues in 1991. Mr. Gathercole is now retired, although his name continues to appear as founder.

Here is a brief summary of Mr. Gathercole's career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf maintenance industries

Expertise in — environmental issues and anti pesticide terrorism • turf and ornamental maintenance and troubleshooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing and distribution

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, government negotiations, public affairs, and workplace safety • supervisor, consultant, and programmer for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insect in both the Montreal region and the Vancouver / Fraser Valley region • with Dr. Peter Dernoeden, confirmed the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr. David Shetlar, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South Western Ontario, and later, in the Montreal and Vancouver regions

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to anti pesticide prohibition • creator of the signs that are now used for posting after application • co-founder of annual winter convention for Quebec golf course superintendents • the major influence in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness of the events of anti pesticide prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT reports

Notable award — the very first man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beach-head against anti pesticide activists in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues ... designed and implemented strategies that reined anti pesticide activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against anti pesticide activists in the town of Hudson, Quebec • launched the largest founding professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.
