

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from  
National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)

In the United States, determining regulations for pest control product use is a responsibility SHARED AT THE STATE AND NATIONAL LEVELS.

The U.S. Environmental Protection Agency ( EPA ) regulates pest control products nationally under the authority of the Federal Insecticide, Fungicide and Rodenticide Act ( FIFRA ) and other laws to register pest control products, educate applicators, monitor compliance, and investigate problems.

The MAJORITY of states have legislated PRE-EMPTION LAWS.

In general terms, PRE-EMPTION refers to the ability of one level of government to OVER-RIDE the laws of a lower level.

PRE-EMPTION LAWS have effectively STOPPED the possibility of STATE or MUNICIPAL PROHIBITIONS of pest control products, and even fertilizers, used in the Urban Landscape.

However, with the support of Anti-Pesticide Organizations, several states and municipalities are fighting to overturn PRE-EMPTION LAWS in order to IMPOSE the NEEDLESS, SENSELESS, and MALICIOUS PROHIBITION of products that are, otherwise, EPA-APPROVED, FEDERALLY-LEGAL, SCIENTIFICALLY-SAFE, PRACTICALLY-NON-TOXIC, and CAUSE NO HARM.

Anti-Pesticide PROHIBITIONS in U.S. States are IMPOSED under the PRETEXT of protecting children, when, in fact, CHILDREN ARE NOT AT RISK.

The ultimate goal of Anti-Pesticide Activists is CONTINUING TO IMPOSE NEEDLESS PROHIBITION on grounds surrounding SCHOOLS and DAY-CARE CENTERS, including UNIVERSITIES, and subsequently opening the door to gradual and eventual expansion to TOTAL PROHIBITION.

Children across North America, even in those jurisdictions with NO pesticide bans, are all protected since these products are applied at VERY LOW DOSES and represent NO THREAT TO CHILDREN.

The SAFETY ASSESSMENTS of pest control products by the Environmental Protection Agency and Health Canada take into consideration CHILDREN's physiology, behaviours, and habits WHILE PLAYING ON TREATED GRASS.

There are NO valid reports of problems with children, and there is NOT ONE KNOWN ILLNESS or DEATH from the proper use of pest control products used in the Urban Landscape.

State of Delaware

Selected and Adapted Excerpts

# Environmental Terrorism in **America**

## Subversive Petition

---

In Autumn 2012, small group of SUBVERSIVE ANTI-PESTICIDE STUDENTS enrolled at the University of Delaware orchestrated a PETITION with the cutesy title of « *Green The Green* ».

The SUBVERSIVE PETITION was conducted under the FALSE PRETEXT that the nature of pest control products is SOMEHOW CARCINOGENIC, and CAN SUPPOSEDLY HARM STUDENTS.

You've got a lot of people POISONED AND DYING BECAUSE OF ALCOHOL at the University of Delaware, and NOT because of pesticides. ( See later segments. )

## Pesticides Cause No Harm

---

Grounds Services workers at University of Delaware use Basagran T/O and PowerZone herbicides to treat weeds.

University Officials say both are SAFE when applied are directed, and grounds-keepers are trained in how to use them —

*These chemicals are both registered for use with the EPA [ Environmental Protection Agency ] and are widely used in this type of setting.*

In fact, pest control products are FEDERALLY-REGISTERED, GOVERNMENT-APPROVED, SCIENTIFICALLY-SAFE, PRACTICALLY NON-TOXIC, and CAUSE NO HARM.

# Environmental Terrorism in **America**

## Pesticides Cause No Harm ( continued )

---

Scientific research shows that, as reported through Environmental Protection Agency's VAST TOXICOLOGY DATABASE, NO HARM WILL OCCUR when pest control products are used properly.

The RISK ASSESSMENT of pest control products indicates that they are PRACTICALLY-NON-TOXIC.

Consequently, it is a fact that pest control products CAUSE NO HARM, including chronic effects such as CANCER.

## Subversive Petition As An Instrument Of Coercion

---

Clearly, these Anti-Pesticide students had TOO MUCH TIME TO WASTE ON THIS RIDICULOUS ISSUE, or SIMPLY PREFER BEING ANARCHISTS WITH FAILING GRADES, or DRUNKEN IGNORANT SOTS. ( See later segment. )

The fact that a MERE 1,000 students BLINDLY SIGNED the SUBVERSIVE PETITION is MEANINGLESS.

The organizers of the SUBVERSIVE PETITION intend to COERCE, INTIMIDATE, and TERRORIZE University Officials to STOP USING PEST CONTROL PRODUCTS ON CAMPUS.

# Environmental Terrorism in **America**

## Demands From Anti-Pesticide Students

---

The two ANTI-PESTICIDE STUDENTS who organized the SUBVERSIVE PETITION are Maddi Valinski, sophomore environmental studies major, and Megan Mauger, a junior environmental science major.

Neither have ANY credentials, training, or expertise in matters concerning pest control products.

Mauger DEMANDS that the university PLACES WARNING SIGNS in areas on where herbicides are used.

According to University Officials, there is NO POLICY requiring workers to post signs when they spray an area with herbicides.

Mauger also DEMANDS that the university SWITCHES TO SO-CALLED ORGANIC PESTICIDE-FREE MAINTENANCE PRACTICES.

Mauger has a SENSE OF ENTITLEMENT because she pays tuition.

According to Mauger, WHO KNOWS NOTHING ABOUT THE MAINTENANCE OF TURFGRASS —

*Ultimately, we're paying to go here, we're putting a large amount of money into our tuition [ ... ] And we should have a say on the practices that this university upholds.*

Anti-Pesticide Student Megan Mauger

# Environmental Terrorism in **America**

## Pretext For Subversive Petition

---

Mauger's DEMANDS are based upon the PRETEXT OF SOMEHOW PROTECTING STUDENTS from the chemicals because of their SUPPOSED CARCINOGENIC NATURE, which can also affect plants and animals in surrounding areas. [ WRONG ! ]

The chemicals are also known to cause respiratory problems and skin irritations, Mauger ALLEGES. [ WRONG ! ]

According to Anti-Pesticide Student Megan Mauger —

*It's a human health issue. [ ?!?! ] But then also from an environmental standpoint, the pesticides runoff into our watersheds and cause harm to the wildlife and possible environmental issues. [ WRONG ! ]*

Maddi Valinski said she organized the SUBVERSIVE PETITION under the PRETEXT of alerting people about the SUPPOSED HARMFUL SIDE EFFECTS of lawn care chemicals.

According to Anti-Pesticide Student Valinski, WHO KNOWS NOTHING ABOUT PESTICIDES —

*I think it's really important to be aware of the pesticides that are being spread around us, so that we can really make good choices and know more information about everything that's going on around us.*

# Environmental Terrorism in **America**

## Anti-Pesticide Professor

---

Some of the Anti-Pesticide Students are enrolled in ENGLISH PROFESSOR MCKAY JENKINS' class on Environmental Journalism.

Jenkins has NO recognized credentials, training, or expertise in matters concerning pest control products.

However, Jenkins wrote a book titled « *What's Gotten into Us ?* »

Clearly, Jenkins has a VESTED INTEREST in PROFIT DERIVED FROM BOOK SALES.

Anti-Pesticide Student Megan Mauger said Jenkins taught her about lawn chemicals and pesticides, and encouraged her to organize the SUBVERSIVE PETITION.

According to Anti-Pesticide Student Megan Mauger —

[ Anti-Pesticide Professor Jenkins ] has a whole section on pesticides in the book. And so, we're learning day after day about how awful these chemicals are that we're spraying on [ the University of Delaware ], and we're not doing anything about it.

# Environmental Terrorism in **America**

Paul Tukey

---

The SUBVERSIVE PETITION received a small amount of national attention when Paul Tukey began blogging about it on his SafeLawns web-site.

Tukey said he cares about lawn chemicals being used on college campuses because of the negative effects they can have on students' bodies, which are still growing [?!?!] —

*You've got a lot of people laying around in poison [ ... ] really, the human body isn't fully developed until age 25 or 26. So you've got developing minds, developing bodies, freshman students [ ... ] until your body's fully developed, you are much more susceptible to those products. [?!?!]*

You've also got a lot of people POISONED AND DYING BECAUSE OF ALCOHOL at the University of Delaware, and NOT because of pesticides. ( See later segment. )

Paul Tukey is a DISCREDITED American Journalist, PAID-FOR-PROFIT Environmental-Lunatic-Terrorist, and ILLEGAL Non-Registered Lobbyist.

In 2010, Tukey was named AMERICA'S LUNATIC ENVIRONMENTAL-TERRORIST-OF-THE-YEAR.

Tukey is a PRINCIPAL ARCHITECT in the CONSPIRACY TO PROHIBIT pest control products used in the Urban Landscape.

His ANTI-PESTICIDE TERRORIST ACTS OF SUBVERSION have EXTENSIVELY DAMAGED the Professional Lawn Care Industry.

# Environmental Terrorism in **America**

Paul Tukey ( continued )

---

Tukey **CONSPIRES TO PROHIBIT** pest control products by **SUPPORTING BOGUS Organic Lawn Maintenance Practices**.

Tukey is a **FAILED AND BANKRUPT** lawn care operator who was apprehended by authorities for applying pest control products **WITHOUT THE NECESSARY LEGAL LICENSING**.

Consequently, he has lashed out and defamed former competitors, and has **ATTEMPTED TO ANNIHILATE** the Modern Lawn Care Industry.

In August 2012, in Durango, Colorado, Tukey was **PAID-FOR-PROFIT** for his **ILLEGAL LOBBYING SERVICE** to **COERCE, INTIMIDATE, and TERRORIZE** Government Officials.

Paul Tukey also **RUSHED** to Durango in order to **PROTECT HIS VESTED INTERESTS** in services using Organic Pesticide-Free Maintenance, Green Alternative Pesticides, and Organic Fertilizers.

It is difficult to take **DISCREDITED LUNATICS** like Tukey seriously, since demands have been made to have him **BANNED** from entering Canada for his role in the **SUBVERSION** of the Justice and Legislative Systems, and the **AVOIDANCE** of the payment of taxes.

It is believed that Tukey ought to be **INVESTIGATED** by Taxation Agencies and Criminal Justice Agencies in both the United States and Canada.

In December 2010, **DEMANDS** against Tukey successfully resulted in his being **BANNED** from the **PRESTIGIOUS** Canada Blooms Show for 2011.

# Environmental Terrorism in **America**

## University Of Delaware

---

The University of Delaware is the largest university in Delaware.

It is medium-sized — approximately 16,000 undergraduate and 3,500 graduate students.

The university has spawned several graduates who became **PROMINENT LEFT-WING POLITICAL LEADERS**, like Joe Biden, Vice President of the United States, and David Plouffe, President Obama's campaign strategist.

## Drunken Sots At University Of Delaware ?!?!

---

A 1993 study by the Harvard School of Public Health found that **HIGH-RISK DRINKING** at University of Delaware **EXCEEDED THE NATIONAL NORM**.

On this survey, a majority of students reported **BINGE DRINKING MORE THAN ONCE IN A TWO-WEEK INTERVAL**.

In 2005, on the Newark campus of the university 1140 students were picked up by the campus police for **ALCOHOL-RELATED VIOLATIONS**.

Since fall 2006, incoming freshmen have to complete an **ANTI-DRUNK ON-LINE COURSE**, AlcoholEdu.

# Environmental Terrorism in **America**

## People Poisoned And Dying Because Of Alcohol

---

In 2008, a University of Delaware freshman **DIED OF ALCOHOL POISONING** after attending a party hosted by members of the Sigma Alpha Mu fraternity, where the student was pledging.

Are the Anti-Pesticide Students at University of Delaware just a **BUNCH OF DRUNKEN IGNORANT SOTS** ?!?!?

Are the Anti-Pesticide Students at University of Delaware  
just a **BUNCH OF DRUNKEN IGNORANT SOTS** ?!?!?

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from  
National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)

Petitioning University of Delaware

This petition will be delivered to:

University of Delaware

# Anti-Pesticide Student-Lunatic Petition

## Stop Spraying Toxic Chemicals At The University of Delaware

Petition by Green The Green

Thank you for signing the petition "Stop Spraying Toxic Chemicals At The University of Delaware"

The current pesticides sprayed on the Green are affecting the health of those who come in contact with the grass. The pesticides used contribute to non point source pollution as well as affect wildlife. There is a call for UD to provide information on what exactly is sprayed, the health effects it may have, and how long such chemicals persist. In addition, we encourage the transition from these dangerous toxins to organic landscaping.

Please be honest, but keep all comments professional.
