## Pest Management Industry SLAMS Lunatic Prohibition

February 2<sup>nd</sup>, 2011

Landscape Management

Selected and adapted excerpts

New Jersey is a State in the North-Eastern and Middle Atlantic Regions of the United States, with a population of almost nine million people.

In the State of New Jersey, an Environmental-Lunatic-Conspiracy dubbed The Child Safe Playing Field Act THREATENS TO PROHIBIT the use of pest control products on public and private school playgrounds, recreational fields and day care centers.

Children are being used as Weapons Of Ultimate Environmental-Terror in order to advance the CONSPIRACY of Prohibition-Terrorist-Organizations.

Under the Proposed-Lunatic-Terrorist-Prohibition-Legislation, BOGUS and IN-EFFECTIVE Green Alternatives to conventional pest control products would be allowed.

# Enviro-Terrorism in America

U.S. Senator Shirley Turner operates as  
a mere Enviro-Lunatic-Political-Thug

Enviro-Lunatic-Senator Shirley Turner, D-Mercer, has been the prime sponsor of this needless, senseless, and malicious proposal to prohibit pest control products.

Turner received a mere B.A. from Trenton State College in Education, and an M.A. from Rider College in Guidance and Counseling, and has done post-graduate work in Education at Rutgers University.

Turner has NO recognized expertise, training or background in matters concerning pest control products !

Turner knows NOTHING about pest control products !

Consequently, the opinions expressed by Turner are TOTALLY VALUELESS and UTTERLY WORTHLESS.

Turner IS NOT COMPETENT TO LEGISLATE.

Turner operates as a mere Enviro-Lunatic-Political-Thug.

Enviro-Lunatic  
U.S. Senator

# Enviro-Terrorism in America

According to Leonard Douglan, Executive Director,  
New Jersey Pest Management Association —

*<< There has been a Department of Environmental Protection in New Jersey since 1970, and professionals engaged in the safe use of EPA-registered pesticides have worked closely with it. >>*

The New Jersey Pest Management Association characterized the Safe Playing Fields Act, introduced by Enviro-Lunatic-Senator Shirley Turner, D-Mercer, as ...

*<< A combination of CHEMOPHOBIA and ILL-CONCEIVED LAW-MAKING, and it serves no one's interest except the few people advocating it. >>*

According to Leonard Douglan of New Jersey Pest Management Association —

*<< No school or day care center in New Jersey is treated while children and staff are in the structure. >>*

*<< Lawn care procedures are similar to those of structural pest control because THE SAFETY AND WELL BEING OF OUR CHILDREN COMES FIRST. >>*

# Enviro-Terrorism in America

According to Leonard Douglan —

<< While our members address structural pest problems and do not generally engage in lawn care, the question must be asked WHY LAWMAKERS THINK THEY CAN ADD A LAYER OF ALLEGED SAFETY BY PASSING ONE MORE LAW that would restrict already well-established safe practices. >>

<< The New Jersey Pest Management Association has WORKED CLOSELY with the Department of Environmental Protection over the course of forty years to develop and advocate safe practices for pest control in and around schools. >>

<< Our emphasis is on Integrated Pest Management, which involves the least amount of pesticide required to rid a structure of an existing or potential pest infestation. >>

<< The law appears to be largely based on QUESTIONABLE CLAIMS that pesticide exposure is linked to asthma, cancer, learning disorders, autism, birth defects, and even attention deficit hyperactivity disorder.

<< Senator Turner might as well write a law that protects children from a whole range of other COMMON HOUSEHOLD CHEMICALS such as detergents or toner for computer printers. >>

<< COMMON SENSE is required and the Safe Playing Fields Act DOES NOT MEET EVEN THAT STANDARD. >>

# Enviro-Terrorism in America

In fact, Lunatic-Prohibition in other jurisdictions like Canada has created GARBAGE DUMPS and DANGEROUS PLAYING SURFACES.

Wherever Lunatic-Prohibition was imposed, home lawns, public green spaces and sports fields became WEED-INFESTED and INSECT-INFESTED.

They became OVER-RUN by Dandelions and other weed pests, and were DESTROYED by damaging insect pests like European Chafer.

THE PROHIBITION OF PEST CONTROL PRODUCTS REPRESENTED A HAZARD TO ANYONE USING THESE PLAYING SURFACES, ESPECIALLY CHILDREN.

When it rained, pest-infested playing surfaces were SLIPPERY MUD BOGS.

When dry, pest-infested playing surfaces were AS HARD AS CONCRETE.

Pest-infested playing surfaces not only looked like GARBAGE DUMPS, they were also DANGEROUS — ESPECIALLY TO CHILDREN !
