

ILLEGAL

FORCE OF NATURE

THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from
National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)

Overview from an Independent Perspective

Adequate broad-leaved weed control with Fiesta Herbicide is only achieved with an EXORBITANT 6 TO 8 REPEAT APPLICATIONS PER SEASON, or more.

Even with REPEAT APPLICATIONS, the weeds are NEVER ENTIRELY KILLED, and EXCESSIVE USE of iron will lead to a DETERIORATION IN TURF QUALITY AND DENSITY, which will lead to further problems with weed invasion.

Fiesta Herbicide was registered and approved for use in the Province of Ontario in April 2010, and was quickly incorporated into weed control programs — NOT BECAUSE OF ITS EFFICACY, but because of the 2009 legislation that IMPOSED AN UNECESSARY AND UNREALISTIC ANTI-PESTICIDE PROHIBITION which PREVENTED Professional Lawn Care companies from using conventional herbicides that WERE TRULY EFFECTIVE AS WELL AS SAFE.

The CATASTROPHIC CARNAGE of the Professional Lawn Care Industry in Provinces like Ontario was EXTENSIVE because there were NO valid economical alternatives to replace the prohibited conventional products.

Because of PROHIBITION in Ontario, the Professional Lawn Care Industry LOST OVER 500,000,000 DOLLARS, with UP TO 12,500 UNEMPLOYED, and ONE-COMPANY-PER-WEEK DISAPPEARS INTO TOTAL OBLIVION.

The vast majority of users OVERWHELMINGLY CONDEMN Fiesta, hence, the MAJOR REASON for the DOOMING of the Professional Lawn Care Industry that ENTIRELY DEPENDED upon its success.

In fact, conventional herbicides, such as 2,4-D, are deemed SAFER than Fiesta.

Fiesta, and any of its iron-based derivatives, are considered to be DISMAL FAILURES as weed control products, especially because of the EXORBITANT NUMBER OF REPEAT APPLICATIONS REQUIRED EVERY SEASON.

In fact, ALL so-called Green Alternative Pesticides and Green Alternative Methods are DISMAL FAILURES — they DO NOT WORK !

By the year 2011, in jurisdictions like Ontario, the EXORBITANT REPEAT APPLICATIONS AND STUNNINGLY HIGH COST of Fiesta prompted Professional Lawn Care companies to CONCOCT their own iron-based mixtures through the ILLEGAL USE of LOW-COST AGRICULTURAL FERTILIZER IRON.

Overview from an Independent Perspective (continued)

On March 12th, 2012, the Government of Canada warned the Professional Lawn Care Industry that any person found using/promoting an unregistered iron fertilizer for weed control will be subject to compliance and enforcement measures.

According to a Government Official at Health Canada ...

It has recently come to our attention that a number of LANDSCAPE ONTARIO MEMBERS are promoting the use of UNREGISTERED IRON-BASED FERTILIZERS for the selective control of broadleaf weeds in turf.

At the present time, there are ONLY TWO COMMERCIAL IRON-BASED PRODUCTS REGISTERED under the Pest Control Products Act (PCPA) for the selective control of broadleaf weeds in turf, including Fiesta Lawn Weed Killer Ready To Spray (PCP No. 29534) and Fiesta Lawn Weed Killer (PCP No. 29535).

The use of unregistered pest control products in Canada is prohibited as per Section 6 (1) of the PCPA; « No person shall manufacture, store, transport, import, distribute or use a pest control product that is not registered under this Act ... ».

Accordingly, any person found using/promoting an unregistered iron fertilizer for weed control will be SUBJECT TO COMPLIANCE AND ENFORCEMENT MEASURES, as set forth by the authority of the PCPA and Regulations.

I am sending you this information for your consideration.

I would be most interested in obtaining any ideas or suggestions you may have to help effect compliance with our Federal Legislation.

I look forward to your comments or suggestions and thank you for your attention in this matter.

Overview from an Independent Perspective

Violating federal law also resulted in a VEILED THREAT from the manufacturer of Fiesta Herbicide, Neudorff.

According to the Neudorff Media Release on April 4th, 2012 —

Fiesta is the ONLY registered chelated iron pesticide product trade-marked and registered for legal use.

There's a growing trend towards KNOCK-OFF PRODUCTS, these are not only ILLEGAL but also contain a lower quality chelated iron.

According to the Neudorff video also released on April 4th, 2012 —

KNOCK-OFFS, lower-quality chelated iron added to a number of different mixes are now being seen in the market-place.

Businesses who buy those products and re-sell them to their customers are BREAKING THE LAW ...

... giving customers SUB-STANDARD ILLEGAL PRODUCT, and RISKING THEIR REP if they get caught.

Some businesses are telling their customers they're getting Fiesta, even putting up lawn signs that say Fiesta, but they're substituting the ILLEGAL product in their sprayers, and risking FRAUD CHARGES, and a LETHAL BLOW to their reputation.

If you're going the chelated iron route, DON'T ROLL THE DICE.

Furthermore, since 2010, government officials employed by the University of Guelph have recommended ILLEGAL AND EXORBITANT REPEAT APPLICATIONS of Fiesta Herbicide.

Clearly, recommendations SUBSTANTIALLY EXCEEDING the directions for use of Fiesta Herbicide are designed to improve the performance of a mediocre product, and to preserve the university's vested interest in further obtaining money to research this product.

Violating Federal Law

An update on the Canadian pesticide ban from our friend Pam Charbonneau, the Ontario Ministry of Agriculture and Food, Turfgrass Specialist, from the Guelph Turfgrass Institute –

A note about pesticide alternatives – a lack of access to traditional materials has spurred interest in alternative products, such as high rates of ferrous sulphate for selective weed control, which is found in Fiesta Herbicide, sold by the Scotts Company, corn gluten meal, and nematodes for grubs.

Of these, the Fiesta seems to have achieved a MODERATE level of success.

From research at Guelph, it appears that 2 TO 3 APPLICATIONS during the spring and the summer can provide significant selective control of broad-leaf weeds.

Violating Federal Law

Fiesta applied at THREE-WEEK INTERVALS UP TO FOUR TIMES PER YEAR ensures control of large and hard to kill weeds. Research at Guelph Turfgrass Institute has shown that THREE BLANKET APPLICATIONS of 100 mL/m² three weeks apart results in turf that is 95% weed-free.

NEWS

New Low Rate for Fiesta Lawn Weed Killer Approved for Use in Canada and United States

Category: Canada, USA, Products, Herbicide

Neudorff is pleased to announce the approval of a new low rate for Fiesta Lawn Weed Killer. This new rate, 100 mL/m², or half the current label rate, can be applied as targeted or blanket applications. One litre of Fiesta now treats 2,700 ft². The new rate offers turf managers an effective and affordable treatment option. **Fiesta applied at three week intervals up to four times per year ensures control of large and hard to kill weeds.** Research at the Guelph Turfgrass Institute has shown that three blanket applications of 100 mL/m² three weeks apart results in turf that is 95% weed-free. Fiesta is now labelled for application to newly seeded turf just four weeks old.

The Fiesta Lawn Weed Killer patent covers all complexed iron compounds intended for weed control in turf. Fiesta is the only iron chelate patented and registered for use as an herbicide. With Fiesta lawn weed killer, lawn care operators and landscapers are able to offer their customers the best weed control possible where cosmetic pesticide bans are in place.

Iron Chelates

A new product that utilizes iron is showing some promise as an alternative weed control product. In Ontario, this product is currently available in pre-mixed spray containers as Scotts EcoSense Weed-B-Gon weed control spray. It is effective on a wide range of lawn weed species and causes very quick top death of the weeds. Research conducted at the Guelph Turfgrass Institute indicates that there may be some regrowth from the root of certain weeds but repeated applications as needed may eventually weaken the plant and result in complete eradication of the weed. This product works by selective toxicity meaning the weeds are killed by toxic levels of iron in the product whereas you may see the grass turn a little darker in response to the addition of iron. The material is fairly expensive and should be applied as a spot spray directly to weeds. Read the label for specific use information.

Illegal Recommendation

Violating Federal Law

Weed control products and timing

Dandelions are now flowering in some urban areas near sidewalks and so on.

There isn't wide spread flowering yet.

Some of the slower to emerge weeds are showing up now such as narrow and broadleaved plantain.

There is no need to panic about applying the post-emergence herbicide Fiesta.

It works best on a broad spectrum of weeds if TWO APPLICATIONS ARE MADE IN THE SPRING AND THEN TWO IN THE FALL.

Violating Federal Law

The ONLY legal recommendations for Fiesta are found on its label.

According the Directions For Use on the Fiesta Herbicide label ...

Do not apply more than 2 times per year.

Fiesta Label
April 10th, 2010

DIRECTIONS FOR USE
SHAKE WELL BEFORE USING. One litre of product will treat between 82.5 and 125 m² (872.5 - 1345 ft²). Mix one part FIESTA Lawn Weed Killer with 24 parts (600 ml) of water. Apply the mixed solution at a rate of 200-400 ml/m². Use the lower rate (200 ml spray/m²) on small weeds; use the higher rate (400 ml/m²) on tough perennial weeds, such as clover. Any standard hand-held or backpack sprayer can be used. Use a coarse nozzle setting to reduce drift. Uniform coverage is essential. Repeat treatment once in four or more weeks after the first treatment if necessary. For spot treatment, spray weeds until foliage is thoroughly wetted, just to the point of runoff. Visible signs of control may be seen within several hours after application. Susceptible weeds, moss or algae will turn brown or black. Occasionally a darkening of the grass leaf blades can occur after treatment, however the grass will recover within a few days to weeks. May stain thatch (dead grass under lawn); this does not affect the health of the grass. **Use Precautions:** Do not apply to drought stressed grass; ensure lawn is well watered prior to application. Do not apply when the daytime temperature will exceed 30°C. Do not apply to bentgrass. If unsure of grass sensitivity, test spray a small area of your lawn. Apply to established turf only. Do not apply to newly seeded areas or to turf generated from seed and that is less than one year old. Avoid spraying desirable plants. Any desirable plants or structures accidentally contacted should be rinsed with water. To avoid staining, wait until treated area dries before re-entry. Do not apply if rainfall is expected within 3 hours of application. Do not irrigate within 3 hours of application. **Do not apply more than 2 times per year. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.**

Observers are demanding that Health Canada launch an investigation against University of Guelph, Guelph Turfgrass Institute, Pamela Charbonneau, and Rob Witherspoon, for repeatedly violating federal law.

Clearly, recommendations substantially exceeding the directions for use of Fiesta Herbicide are designed to improve the performance of a mediocre product, and to preserve the university's vested interest in obtaining further money to research this product.

Observers expect that those government officials found abusing their status and authority as university experts will be subject to compliance and enforcement measures, as set forth by the Pest Control Products Act and Regulations.

NORAHG

We are living in the 9|11 Era of Anti Pesticide Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is Perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces under the RIDICULOUS PRETEXT of somehow « saving » the environment.

NORAHG is a NATIONAL NON PROFIT NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HUJE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are Hateful Underhanded Jokes as Environmentalists who have been WRONG FOR OVER 50 YEARS.

There is NO RECOURSE but LITIGATION against Anti Pesticide HUJE.

Another RECOURSE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOCATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HUJE should Get OFF Our grASS, and they should Roast In Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti Pesticide Terrorist Acts of Subversion.

The purpose of this ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti-Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION !

NORAHG also produces FORCE OF NATURE, reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports destined for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE, as well as ground breaking original reporting that informs, entertains, and creates real change.

The Force Of Nature Series of Reports — Agriculture • ALBERTA Conspiracy • Bee Colony Collapse Disorder • Bee Colony Collapse Disorder • Benefits of the Turfgrass Industry • Beyond Pesticides • Books That Screwed Up the World • BRITISH COLUMBIA Conspiracy • Canadian Cancer Society • Canadian Association of Physicians for the Environment • CARNAGE and Consequences of Lunatic Terrorist Prohibition • Controversial Prohibitions • Culprits of the Prohibition Conspiracy • Daffodils, Toxic Pesticide Treated Flowers Soaked Formaldehyde • Dating Services for Enviro Maniacs • David Suzuki Foundation • DDT and Our World of Politidized Science • Death and Illness (Alleged) • Departure Letters • Ecojustice Canada • Energy Sector • Environmental Terrorists UNMASKED • Environmental Terrorist Organizations • Enviro PROFIT • Environmental Defence • FAILURE of IPM, Pesticide Manufacturers, Prohibition, Trade Associations • Famous Quotations About Enviro Lunatics • Fertilizer TERROR • Food and Farming • Get Off Our grASS • Global Warming, The Scam of Our Lifetime • Glyphosate Herbicide • Golf Industry • Green Alternatives • Green Party • Halloween Terror • Happy Holidays • Health Canada • Health Concerns with Pest Control Products • Heroes Speaking Out Against Environmental Terror • History of Environmental Terror in Canada • History of the Turfgrass Industry • Letters to the Editor • LIARS and Lying Sacks of (Enviro Maniac) Cwap • Mock Advertisements • Mock Speeches • Myth BUSTING • NATIONAL Prohibition • NEW BRUNSWICK Conspiracy • NO Prohibition Exception for AGRICULTURE Industry • NO Prohibition Exception for GOLF Industry • NOVA SCOTIA Conspiracy • North America Free Trade Agreement (NAFTA) • ONTARIO Conspiracy, Haven For Environmental Terrorists • Ontario College of Family Physicians • Organic Golf Courses • Organic Maintenance • Organizations of the Prohibition Conspiracy • Pesticide Q & A (Questions and Answers) • Positive Waves (Interesting and Innovative Thinking) • PRINCE EDWARD ISLAND (PEI) Conspiracy • QUEBEC Prohibition • Quotations About Enviro Lunatics

The information presented in FORCE OF NATURE has been developed for the education and entertainment of the reader by providing a sequence of events WITH COMMENTARY, striving for accuracy in history, politics, and science.

FORCE OF NATURE is TOTALLY INDEPENDENT and provides NO guarantee regarding accuracy or completeness. In no event shall FORCE OF NATURE be liable for any incidental or consequential damages, lost profits, or any indirect damages.

NORAHG also produces A LOOK AT, a series of reports providing TECHNICAL INFORMATION on issues such as Career Management, Golf Course Maintenance, Green Alternatives, Summer Stress, Turfgrass Pests, and Turfgrass Species.

Finally, NORAHG frequently responds to anti pesticide activists in LETTERS TO THE EDITOR in newspapers across Canada and around the world.

All information, excerpts, and pictures contained in FORCE OF NATURE, A LOOK AT, and LETTERS TO THE EDITOR were retrieved from the Internet, and may be considered in the public domain.

FORCE OF NATURE, A LOOK AT, and their various incarnations, was the brainchild of William H. Gathercole and his colleagues in 1991. Mr. Gathercole is now retired, although his name continues to appear as founder.

Here is a brief summary of Mr. Gathercole's career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf maintenance industries

Expertise in — environmental issues and anti pesticide terrorism • turf and ornamental maintenance and troubleshooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing and distribution

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, government negotiations, public affairs, and workplace safety • supervisor, consultant, and, programmer for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insect in both the Montreal region and the Vancouver / Fraser Valley region • with Dr. Peter Demoeden, confirmed the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr. David Shetlar, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South Western Ontario, and later, in the Montreal and Vancouver regions

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to anti pesticide prohibition • creator of the signs that are now used for posting after application • co-founder of annual winter convention for Quebec golf course superintendents • the major influence in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness of the events of anti pesticide prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT reports

Notable award — the very first man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beach-head against anti pesticide activists in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues ... designed and implemented strategies that reined anti pesticide activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against anti pesticide activists in the town of Hudson, Quebec • launched the largest founding professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.
