Why take pesticide risks when other options available?

[Comments](#) [Tweet](#) { 0 } [Like](#)

MAY 14, 2012

Re: "Many studies done on the use of pesticides" (letter, May 9).

There are certainly health risks associated with the common lawn pesticide 2,4-D. A study published by doctors in the peer-reviewed journal Paediatrics and Child Health found that "2,4-D can be persuasively linked to cancers, neurological impairment and reproductive problems."

This is why my doctors' organization — along with the Canadian Cancer Society, the Canadian Breast Cancer Foundation, the Lung Association, and the Public Health Association of B.C. — support a ban on lawn and garden pesticides right across the province. Why take the risk of using poisons when homeowners can now have beautiful properties using non-toxic products?

GIDEON FORMAN*Executive Director**Canadian Assoc. of Physicians for the Environment**Toronto*

WILLIAM H GATHERCOLE & NORAH G, WILLIAM H. GATHERCOLE AND NOR...

It is of NO CONSEQUENCE what Gideon Forman Says.

British Columbians DO NOT want their society to continue living in the 9|11 Era of Anti-Pesticide Enviro-Lunatic Profit-Hungry Terrorism !

On May 17th, 2012, British Columbia's Special Committee on Cosmetic Pesticides announced that it WILL NOT RECOMMEND PROHIBITION against the use of pest control products in the Urban Landscape.

This VICTORY signals a possible END OF THE CURRENT SIEGE OF ANTI-PESTICIDE TERRORISM Against the Professional Lawn Care Industry in British Columbia.

☐ Yes
☐ No

Vote

In jurisdictions outside of British Columbia, Anti-Pesticide Activists have already INFLICTED HORRENDOUS and CATASTROPHIC CARNAGE for businesses operating in the Professional Lawn Care Industry, in the form of IMMENSE LOSSES OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, and even HORRIFIC FINES.

Because of Anti-Pesticide Activists, the owners, employees, and families dependent on Professional Lawn Care businesses have faced TERROR, DESPAIR, and DESTITUTION.

Pest control products CAUSE NO HARM and are SCIENTIFICALLY SAFE.

Not surprisingly, the BC Special Committee on Cosmetic Pesticides AGREED — and deserves CONGRATULATION.

It is COMMON KNOWLEDGE that there are NO pest control products that are known or probable carcinogens.

Pest control products are SCIENTIFICALLY SAFE, and NO HARM WILL OCCUR when they are used according to label directions.
