NORAHG RESPONSE

GOVERNMENT OFFICIALS MUST INVESTIGATE BEE-KEEPERS KILLING THEIR OWN BEES

Bee-keepers like Davidson are ABSOLUTELY WRONG about bee mortalities ! Their allegations are so ridiculous that observers are beginning to speculate that bee-keepers deliberately killed their bees in order to lay false blame against neonicotinoid insecticides. In essence, bee-keepers tampered with the samples provided to Health Canada. Why are only a very small number of bee-keepers affected ?!?! Why don't government officials investigate the killing of bees by bee-keepers ?!?! They must test the bee-keepers' residences and clothing for residue. Observers point out to how much money the bee-keepers will make once they launch a class-action lawsuit that is supported by a politically-motivated prohibition. Bee-keepers know almost nothing about pest control products, and know absolutely nothing about neonicotinoid insecticides. If they had not somehow received loans and grants to start up their bee-keeping businesses, they would otherwise be begging for food on street corners. They have no other job skills, and they are rapidly becoming an unnecessary burden to society. The fact that bee deaths are occurring is a testament to the fact that bee-keepers do not know what they are doing. Bee-keepers are harming bees, and not neonicotinoid insecticides.
