

Force *of*
Nature

Overview from an Independent Perspective

Surrey is a Canadian city in the province of British Columbia, Canada, that lies within the Metro Vancouver district, and geographically at the centre of the larger region known as the Lower Mainland of British Columbia. It is the province's second-largest city by population after the city of Vancouver.

In 2009, Mayor Dianne Watts had noted Surrey had much bigger things to deal with — such as crime — in recent years. Environmental-Terrorists were outraged, and began coercing the Mayor.

In 2009, it was estimated that it will cost the city about **one million dollars annually** to manage weeds without the use of conventional pest control products. Additionally, the city's parks committee argued a ban in public green spaces would mean a cost of **eight-hundred-thousand-dollars annually** just to manually remove weeds and control noxious plants.

A 2009 corporate report written by the city's parks, recreation and culture department, said the by-law could potentially affect homeowners and the image of the city. « *Residential properties would likely see an increase in lawn and garden weeds and the proliferation of some common diseases such as powdery mildew and leaf spots,* » the report said. « *There would also be an increase in damage from insects such as aphids, shield bugs, loopers and scale. The image of the city could be negatively affected.* »

The principal Environmental-Terror-Organizations that operate within Surrey include — Contemptible and Radical *Canadian-Cancer-Society*, *Environmental Advisory Committee*, student-operated *Love Our Environment — Eliminate Pesticides*, and *Toxic Free Canada*.

In the event that criminal charges for fraud and conspiracy are laid in British Columbia, legal experts say that the following information will lead to a successful prosecution !

All Enviro–Maniac–Activists as well as Government–Conspirators have been identified on the basis of their statements, activities, affiliations, and whereabouts.

British Columbia Conspiracy to Prohibit Pest Control Products

SURREY JOINS WIDENING COSMETIC PESTICIDE BAN

APRIL 14TH, 2010

CBC NEWS

Advocates calling for province-wide ban on sale of products.

SURREY is expected to become the latest BRITISH COLUMBIA municipality to ban the use of cosmetic pesticides, but some advocates say it is time for a province-wide ban on the sale of the products.

[Enviro-Maniac] **MAYOR DIANNE WATTS** says the new by-law, similar to those already in place in VANCOUVER, RICHMOND and about two dozen other BRITISH COLUMBIA communities, should pass near the end of the month.

According to the [Contemptible and Radical] CANADIAN CANCER SOCIETY, a growing body of evidence is [allegedly] linking the pesticides to several cancers, including adult and childhood leukemia, non-Hodgkin's lymphoma, pancreatic cancer, kidney cancer and some brain cancers. [Wrong !]

British Columbia Conspiracy to Prohibit Pest Control Products

Enviro-Maniacs concoct MYTHS, DECEPTIONS, and FEAR-MONGERING, and use children as Weapons-Of-Mass-Destruction to SCAM and DECEIVE the hapless public into believing there is NON-EXISTENT danger with pest control products

WATTS says that is why the ban is important for the health of everyone in the community. [Wrong !]

According to [Enviro-Maniac] WATTS —

<< You've got **children** walking through the lawns and it affects our **children** and it affects our animals. >> [Wrong !]

But not every community is embracing the idea of banning cosmetic pesticides and herbicides.

COQUITLAM is one of the few Lower Mainland cities that still allow the use cosmetic pesticides. [Enviro-Maniac] CITY COUNCILLOR SELINA ROBINSON says she's pushed for a ban, but it has so far been rejected.

According to [Enviro-Maniac] ROBINSON —

<< I brought forward a motion ... and I couldn't get a majority of council to support that notice of motion. >>

British Columbia Conspiracy to Prohibit Pest Control Products

Cancer-Vixens are calling for a ban

Province-wide ban considered. That kind of opposition to bans on use has advocates pushing for tougher rules banning the sale of the products altogether.

[Enviro-Maniac] ASHLEY DUYKER, a community coordinator with the [Contemptible and Radical] CANADIAN CANCER SOCIETY, notes even if the use of pesticides is banned in one municipality, that does not mean stores cannot sell them.

According to [Cancer-Vixen] DUYKER —

<< There's twenty-nine communities banning the use, the struggle really becomes when products are still for sale. We're calling for a ban. The general public doesn't understand that these products are potentially harmful and potentially illegal to use in their communities. >> [Wrong !]

In its last throne speech, the BRITISH COLUMBIA government said it would consider a ban on the sale of cosmetic pesticides. [Cancer-Vixen] DUYKER expects to hear back from the province in a matter of days on whether that will happen.

[Yeah ! Right ! A mere Cancer-Maniac-Vixen will « hear back from the province » ! The lies NEVER end !]

Why make a change?

Wrong!

Your lawn can be a great place to hang out, but depending on how you care for it, your lawn can also be part of big environmental problems.

Wrong!

Pesticides may not be great for you and your kids either. In a science journal review of 98 health studies related to the use of weed and bug killers, half the studies found an increased cancer risk. And safe disposal of pesticides costs you, the taxpayer, big bucks.

Lawn and garden watering make up more than 30 per cent of our summer water use. That's when supplies are lowest and the demand is highest.

Much of this water is wasted through over-watering—a practice which invites lawn disease. So use water wisely—and help out your lawn, the fish and the environment.

Wrong!

Reduce pesticide use at home or replace it with a natural pesticide. Rainwater can wash bug and weed killers from our lawns into neighbourhood streams. Eventually, they reach our major rivers and oceans. Scientists are worried about the effects of these chemicals on birds and fish. Rain can also wash fertilizers from lawns into local waters.

The fertilizers feed algae that choke out fish and other water dwellers.

Grass clippings can supply at least 25 per cent of your lawn's fertilizer needs.

It's called "grasscycling"—just leave the clippings on the lawn. This saves you time and money and the effort of bagging and bringing grass to the curb. And if you use less fertilizer, there's less chance of it washing off into streams.

Wrong!

Natural lawn care works! Fortunately, the natural lawn care practices outlined in this booklet make it easy to reduce the use of hazardous products while saving time, water and money, and helping to preserve our Lower Mainland environment.

NORAH

Force Of Nature is a series of e-newsletters destined for the Green Space Industry, the Environmental Terror Movement, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY. Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE ! Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. The commentary expressed in Force Of Nature, even though from an INDEPENDENT PERSPECTIVE, may not reflect those of everyone in the Green Space Industry. Force Of Nature may sometimes be very irreverent, and even appear to be Anti Environment, it is, in fact, simply a strong advocate FOR the Modern Green Space Industry. However, this position has not precluded Force Of Nature from criticizing the Green Space Industry itself, when appropriate. The events, characters, companies, and organizations, depicted in this document are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. All document excerpts and pictures contained in Force Of Nature were found somewhere on the Internet. These documents and pictures are in the public domain, serving one of the following purposes : archive, education, promotion, publicity, or press release.

Force Of Nature INSPIRES people to believe that ENVIRONMENTAL TERRORISM can be STOPPED ! **Norah G** is an acronym for the stable of anonymous producers and writers that contribute to this e-newsletter and have now replaced Mr. Gathercole. They consist of people from the following industries : Distribution, Fertilizer, Golf, Lawn Care, Manufacturing, Municipal, Nursery, and Orchard. Many of these people are leaders in their own industries. Anonymity is essential in view of the constant threat of reprisals at every level except perhaps death. Force Of Nature is the instrument of **National Organization Responding Against Huje** that seek to TERRORIZE, HARM, and THREATEN the Green Space Industry (**NORAHG**). Huje is a term used for Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing that families are in some NON-EXISTENT danger with conventional pest control products. Huje also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS prohibition of FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE conventional pest control products.

Force Of Nature is the brainchild of William H. Gathercole and his entourage. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in public affairs, workplace safety, and environmental compliance. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority. Mr. Gathercole is now retired from Force Of Nature, although his name continues to appear as the founder. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status, that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully ! For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of Environmental Terror for the entire Modern Green Space Industry across Canada. Mr. Gathercole's involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec. Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair.

Mr. Gathercole and his entourage have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. Through Force Of Nature, Enviro Maniac Activist Huje are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Maniac Culpit is a misguided adversary, each still deserves our respect. The use of the terms Maniac, Culpit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry. Their pretentious prohibitionist rants have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culpit Terrorist Basterd Huje is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.
