Take Action for a B.C. ban on lawn and garden pesticides

The Ministry of Environment is consulting the public on "new statutory protections to further safeguard our environment from cosmetic chemical pesticides." The B.C. government is expected to announce its decision later this spring.

Let Premier Gordon Campbell and Environment Minister Barry Penner know that you support a comprehensive ban on the use and sale of lawn and garden chemicals.

Subject:*

B.C. requires a ban on the sale

Dear (recipient name),

Thank you for initiating the recent consultation on new regulatory restrictions on lawn and garden pesticides. Please act quickly to implement a province-wide ban on these needless chemicals within the next year. It should be at least as protective of public health and the environment as Ontario's new ban.

I don't use chemical pesticides on my lawn or garden, and I believe that British Columbians are ready to switch to non-toxic gardening techniques.

Sincerely
