

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from  
National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)

## Overview from an Independent Perspective

Newfoundland ( and Labrador ) is a province of Canada on the country's Atlantic coast.

This eastern-most Canadian province is comprised of two main regions — the island of Newfoundland off the country's eastern coast, and Labrador on the mainland to the north-west of the island.

The province is often referred to by the abbreviation « NL ».

The population is greater than 500,000, and the capital city is Saint John's.

In 2011, Newfoundland and Labrador ARBITRARILY IMPOSED the NEEDLESS, SENSELESS, and MALICIOUS PROHIBITION against pest control products used by the Modern Professional Lawn Care Industry.

This Canadian Province operates like Hitler's Nazi Germany, which includes a LUNATIC-INFORMANT-SERVICE and a small army of Anti-Pesticide Lunatics.

If these lunatics wore Swastikas, and lived in the 1930s and 1940s, they would be leading the Third Reich.

Just like the Nazis, Anti-Pesticide Lunatics receive guidance and instruction from the SUBVERSIVE and LUNATIC MASTER RACE, like Canadian-Cancer-Society and Coalition For Alternatives To Pesticides.

Hitler claimed that Jews were enemies of the Aryan race, and ARBITRARILY and FALSELY held them responsible for problems in Europe.

Similarly, these Anti-Pesticide Lunatics ARBITRARILY and FALSELY hold pest control products responsible for IMAGINARY PROBLEMS, despite the fact that they are HEALTH-CANADA-APPROVED and SCIENTIFICALLY-SAFE.

Just like the Nazis, these Anti-Pesticide Lunatics operate with INFORMANTS.

Through a LUNATIC-INFORMANT-SERVICE called THE PESTICIDE SPRAY ADVISORY.

These Anti-Pesticide Lunatics are using SOCIAL ENGINEERING ( i.e. Nazi Eugenics ) to IMPOSE LIFE-STYLE CHOICES, such as the PROHIBITION of pest control products in the Urban Landscape.

These Anti-Pesticide Terrorists CLAIM TO BE PROTECTING the CHILDREN and the ENVIRONMENT, when, in fact, they are not.

These lunatics TERRORIZE Modern Professional Lawn Care Companies.

## Overview from an Independent Perspective

### ANTI-PESTICIDE AND ENVIRONMENTAL-TERRORIST ORGANIZATIONS

---

In the list below, every single organization is infested with Anti-Pesticide Lunatics who have CONSPIRED TO PROHIBIT AGAINST PEST CONTROL PRODUCTS in Newfoundland and Labrador.

Many of the following organizations are mere small local garden or social clubs with cutesy titles.

Many are operated by unemployed or unemployable housewives.

Many have disappeared into obscurity once prohibition was legislated in the local community, or once grant and tax-payer money was no longer available.

Many organizations are operated by greedy and avaricious Anti-Pesticide Lunatics who have CONCOCTED all sorts of IMAGINARY DANGERS regarding pest control products, hoping to PROSPER from cash donations, illicit businesses, unqualified employment, and grants, quite often without paying a single penny in taxes.

If these organizations want to be involved with ANTI-PESTICIDE TERRORISM and PARTISAN POLITICS, then their CHARITY TAX-EXEMPT STATUS SHOULD BE REVOKED.

Directly or indirectly, previously or currently, the following Anti-Pesticide Organizations have participated in the CONSPIRACY to PROHIBIT against conventional pest control products in Newfoundland and Labrador —

### NATIONAL ANTI-PESTICIDE ORGANIZATIONS OPERATING IN NEWFOUNDLAND

---

Canadian Association of Physicians for the Environment ( CAPE )  
Canadian Cancer Society — Newfoundland & Labrador Division  
Sierra Club of Canada — Atlantic Chapter

### LOCAL ANTI-PESTICIDE ORGANIZATIONS AND SMALL CLUBS OPERATING IN NEWFOUNDLAND

---

Coalition for Alternatives to Pesticides ( a.k.a. NL Provincial Coalition on Pesticides, a.k.a. Concerned Citizens Group, and SHIELD for Canadian Cancer Society )  
Food Education Action Saint John's — Saint John's  
Grand Riverkeeper Labrador  
Kelligrews Ecological Enhancement Program  
Mercy Centre for Ecology and Justice  
Newfoundland & Labrador Environment Network ( NLEN ) — Cornerbrook  
Newfoundland & Labrador Lung Association  
Newfoundland & Labrador Provincial Coalition on Pesticides  
Northeast Avalon Atlantic Coastal Action Program  
Saint John's Safer Soil — Saint John's  
Stephenville Sustainability Network  
The Pesticide Spray Advisory ( SHIELD for Coalition for Alternatives to Pesticides, and Newfoundland & Labrador Environment Network )

## Overview from an Independent Perspective

### ORGANIZATION OPERATING AS A SHIELD FOR CANADIAN CANCER SOCIETY

---

Coalition for Alternatives to Pesticides ( a.k.a. NL Provincial Coalition on Pesticides )

### NEWFOUNDLAND MEDICAL INSTITUTION CONSPIRING IN ANTI-PESTICIDE SUBVERSION

---

Newfoundland & Labrador Medical Association

### NEWFOUNDLAND POLITICAL PARTIES OPERATING AS SHIELDS FOR ANTI-PESTICIDE ORGANIZATIONS

---

Green Party  
Liberal Party ( legislated and implemented prohibition )  
New Democratic Party

### NEWFOUNDLAND TRADE ASSOCIATIONS CONSPIRING IN ANTI-PESTICIDE SUBVERSION

---

Municipalities of Newfoundland & Labrador  
Newfoundland & Labrador Medical Association  
Newfoundland & Labrador Association of Registered Nurses

### ORGANIZATION OPERATING AS A SHIELD FOR CANADIAN CANCER SOCIETY

---

Coalition for Alternatives to Pesticides ( a.k.a. NL Provincial Coalition on Pesticides )

### NEWFOUNDLAND 2009 COALITION FOR ALTERNATIVES TO PESTICIDES

---

In 2009, this coalition was created as a PUBLIC POLICY SHIELD ORGANIZATION by Canadian Cancer Society, along with mostly insignificant little clubs of Anti-Pesticide Lunatics, such as —

Canadian Association of Physicians for the Environment  
Concerned Citizens' Group  
Food Education Action Saint John's  
Grand Riverkeeper Labrador  
Kelligrews Ecological Enhancement Program  
Mercy Centre for Ecology and Justice  
Municipalities of NL  
NL Association of Registered Nurses  
NL Environment Network  
NL Lung Association  
NL Medical Association  
Northeast Avalon Atlantic Coastal Action Program  
The Pesticide Spray Advisory  
Saint John's Safer Soil  
Sierra Club of Canada — Atlantic Chapter

Province of Newfoundland

Selected and Adapted Excerpts

# Newfoundland

Landscape Newfoundland and Labrador Trade Association says Hedderson's comments are A SLAP IN THE FACE to industry and government.

The group, representing the provincial landscaping industry, is REACTING STRONGLY to comments made earlier this week by Tom Hedderson, the Anti-Pesticide Transportation and Works Minister, concerning THE REASONS THE PROVINCIAL GOVERNMENT BANNED PROHIBITED AGAINST PEST CONTROL PRODUCTS USED IN THE URBAN LANDSCAPE.

According to Boyd Loveless, Chairman for Lawn-Care Professionals on Landscape Newfoundland and Labrador's Board of Directors —

*It's a SLAP IN THE FACE to people within the industry — the professionals in the industry.*

On August 8<sup>th</sup>, 2012, Hedderson said that PROHIBITION WAS NOT IMPLEMENTED IN 2012 FOR HEALTH REASONS.

Instead, he said it was because SPRAYING WAS OVERUSED IMPROPERLY and that ITS USE WAS GETTING OUT OF HAND. [ ?!?! ]

Loveless, who operates the company Nutri-Lawn out of Torbay, said lawn-care professionals receive training through the Department of Environment and Conservation, and are required to study materials and write an exam.

According to Boyd Loveless —

*They're trained by ( Hedderson's ) colleagues, so basically it's a SLAP IN THE FACE to us and a slap in the face to them, because if the products weren't banned for health reasons, why then was it banned ?*

# Newfoundland

In early August 2012, the issue of pest control products became news over Tordon 101, a herbicide used along provincial highways to control vegetation in areas where brush cutting has taken place to improve visibility and reduce moose-vehicle collisions.

Tordon 101 contains the active ingredient 2,4-D ( 2,4-dichlorophenoxyacetic acid ), one of five pesticides BANNED for cosmetic use in the province.

Exceptions have been made for what government calls non-cosmetic use, including golf courses, agriculture and forestry use, and road and infrastructure maintenance.

Hedderson said he has nothing but the utmost respect for the professionals who have worked with such products in Newfoundland and Labrador, including those who currently apply Tordon 101 along the highways.

According to Minister Hefferson —

*As a minister, I've got a great level of comfort, because these same professionals work for my department in carrying out the spraying program, and I have all the faith in the world ( in ) what they are doing.*

*They know what they're doing, they know how to do it and they're doing it very successfully.*

Hedderson went on to say that while the use of Tordon 101 along provincial highways helps make them safer for motorists, spraying lawns with pesticides such as 2,4-D is not something he considers to be a « *necessary use* » when the intention is to simply have « *a nice looking lawn* ». [ ?!?! ]

# Newfoundland

Clearly, Hedderson IS IMPOSING A LIFESTYLE CHOICE concerning the BEAUTIFICATION of the Urban Landscape.

Hedderson added if such a product is used incorrectly and manages to find its way into sensitive areas, such as bodies of water, that can have a negative impact.

Hedderson CONVENIENTLY FAILED TO ADMIT that the SAME RISKS CAN OCCUR with the use of Tordon 101 when it is applied along roadsides.

Karen Linfield, Manager of Pesticides Control with the Department of Environment and Conservation, said Tordon 101 has always been a commercial product and has never been made available to the public for residential use.

According to Linfield —

*When we allow these programs to be conducted, we only permit people who have WRITTEN AND PASSED AN EXAMINATION.*

*They're CERTIFIED, and companies who have a certain level of responsibility — these companies have to carry a certain amount of INSURANCE, ( and ) they provide quite a number of pieces of information to us before we allow our program to be undertaken.*

They are NO DIFFERENT than Professional Lawn Care companies.

Basically, Newfoundland's GOVERNMENT POLICY FAVOURS COMMERCIAL/INDUSTRIAL APPLICATORS, but DISCRIMINATES AGAINST RESIDENTIAL APPLICATORS WHO USE THE SAME INGREDIENTS.

# Newfoundland

Newfoundland is DESPICABLE IN ITS OBVIOUS OBJECTIVE OF DESTROYING THE PROFESSIONAL LAWN CARE INDUSTRY BECAUSE OF ARBITRARY AND POLITICAL DECISION-MAKING BASED UPON POLICIZED SCIENCE.

According to Boyd Loveless, of Landscape Newfoundland and Labrador Trade Association, the decision to implement PROHIBITION was POLITICAL —

*We've got local politicians, provincial politicians, making decisions based on what — political science or real science ?*

If the government's concern was not health related, Loveless suggests it should have consulted with the industry, and taken an Integrated Pest Management approach whereby products would only be applied when necessary.

*They should have consulted with the professionals that are trained to apply these products and follow the Health Canada regulations.*

While Loveless said it is possible Hedderson may have only meant to target the improper application of pest control products by home-owners, he added if that was the case, the government should have simply removed the product from store shelves instead of issuing an OUTRIGHT BAN.

*They've ATTACKED A SMALL INDUSTRY within Newfoundland and Labrador.*

*They've PUT EMPLOYEES' LIVES IN JEOPARDY.*

*Personally, if I thought I was going to harm any one of my four children, I wouldn't be using it.*

**Transportation Minister  
Says Program Is Necessary**

**Anti-Pesticide Lunatics  
Condemn It As Unsafe**

August 10<sup>th</sup>, 2012

CBC News

Province of Newfoundland

Selected and Adapted Excerpts

# Newfoundland

## TORDON 101 IS SCIENTIFICALLY SAFE

---

Newfoundland and Labrador's Minister of Transportation and Works says a controversial ROADSIDE HERBICIDE SPRAYING PROGRAM is necessary to keep highways safe, with Tordon 101, which is NO MORE DANGEROUS THAN SALT.

Tordon 101 is the most effective industrial vegetation management product that provides long term control of both brush and broad-leaved weeds in one application.

The Government of Newfoundland and Labrador is defending its spray program along roadsides to control vegetation, while sparking a RIDICULOUS DEBATE with Non-Expert Anti-Pesticide Lunatics.

According to Tom Hedderson, Minister of Transportation and Works —

*We do need to use it for our roadside simply because it's the MOST EFFECTIVE right now, it's the SAFEST, and it gives us the BEST RESULTS.*

*The bottom line is that I have people travelling on the highway now that are safer.*

Hedderson said the spraying is vital to help prevent moose-vehicle collisions.

Hedderson has come under fire from lunatics for suggesting that the chemicals used in spraying programs are NO MORE DANGEROUS THAN SALT.

( See later segment for more information about TABLE SALT. )

# Newfoundland

## NEW DEMOCRATIC PARTY

---

But George Murphy, Anti-Pesticide Environment Critic with New Democratic Party, said Hedderson is somehow wrong, and the province should stop using Tordon 101. [ ?!?! ]

New Democratic Party operates as the POLITICAL SHIELD for Anti-Pesticide and Environmental-Terrorist Organizations.

One of the ingredients in Tordon 101 — called 2,4-D — was recently PROHIBITED for SO-CALLED COSMETIC USE in Newfoundland and Labrador.

But the government is still using the product for the control of roadside vegetation.

According to Non-Expert Anti-Pesticide Lunatic Murphy —

*This stuff is toxic. [ ?!?! ]*

*We really don't need it. [ ?!?! ]*

Murphy suggested traditional methods — such as brush cutting along the sides of highways — should be used. [ ?!?! ]

Murphy has NO recognized expertise, training, or background, in matters concerning pest control products.

Consequently, Murphy's opinion concerning pest control products is TOTALLY VALUELESS and UTTERLY WORTHLESS.

# Newfoundland

IAN SIMPSON

---

Another Anti-Pesticide Lunatic, Ian Simpson, expressed MOCK-OUTRAGE —

| *I am horrified. I really am shocked. [?!?!]*

Simpson was also MOCK-PERPLEXED about Hedderson's comments equating Tordon 101 to SALT.

Ian Simpson is merely a retired 75-year-old chronologically-gifted septuagenarian.

Simpson is a Non-Expert Enviro-Lunatic and member of Coalition for Alternatives to Pesticides ( a.k.a. NL Provincial Coalition on Pesticides, a.k.a. Concerned Citizens Group, and SHIELD for Canadian Cancer Society ).

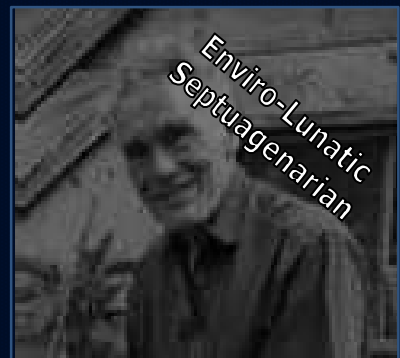

It is a LITTLE club that functions as an Anti-Pesticide Terrorist-Organization.

Under the guise of being some kind of professional concerning pest control products, Simpson has written Letters to the Editor to express his TOTALLY VALUELESS AND UTTERLY WORTHLESS OPINION concerning pest control products.

Simpson has NO recognized expertise, training, or background, in matters concerning pest control products.

In fact, Simpson's practical background is in MENOPAUSE.

He is a mere MENOPAUSE SPECIALIST.

# The Wisdom of Lorne Hepworth

## **Pest Control Products Can Be Safely Used, and Do Not Pose Undue Risks To Humans Or The Environment**

August 7<sup>th</sup>, 2012

Dr. Lorne Hepworth

CropLife Canada

Media Release

Selected and Adapted Excerpts

# The Wisdom of Lorne Hepworth

It's ironic that the Newfoundland and Labrador Ministry of the Environment is quoted as saying —

*The Provincial Government accepts that the federal registration process ENSURES THAT SUCH PRODUCTS CAN BE USED WITHOUT CAUSING UNDUE HARM TO PEOPLE OR THE ENVIRONMENT.*

Yet they IMPLEMENTED A BAN on some of these products in the province.

Health Canada has said for years exactly what the province stated in its media release —

**Pest control products can be safely used.**

In fact, the five lawn pesticides banned by Newfoundland and Labrador have all been recently RE-ASSESSED by Health Canada using the most modern scientific information.

The conclusion was —

**Pest control products DO NOT POSE  
UNDUE RISKS TO HUMANS OR  
THE ENVIRONMENT when used properly.**

In fact, readers should know that pesticides are one of the MOST STRINGENTLY REGULATED PRODUCTS in Canada, and only those products that meet Health Canada's strict health and safety standards are registered for sale and use.

# The Wisdom of Lorne Hepworth

The reality is that it simply ISN'T LOGICAL for the province to ban these products from home-owners who rely on them to control pest infestations on their personal property while at the same time allowing its own staff to use them to control vegetation along roadways.

What would be logical is for the province to recognize Health Canada's safety assessment that has proven these products CAN BE SAFELY USED.

The claims made by Dr. Ian Simpson in the article are yet another attempt to SCARE RESIDENTS INTO THINKING THEY'RE BETTER OFF WITHOUT HAVING ACCESS TO PESTICIDES.

In fact, these are valuable tools whose uses include protecting energy corridors, keeping swimming pools and drinking water safe, and providing us with a safe and abundant food supply.

The evidence is clear — PEST CONTROL PRODUCTS CAN BE SAFELY USED, and Canadians should feel comfortable if they choose to use them.

Sincerely,

Dr. Lorne Hepworth.

President, CropLife Canada — representing the plant science industry.

Dr. Hepworth is the nation's MOST EFFECTIVE and CONSISTENT SPOKESMAN on the subject of public policy and pest control products. In Letters To The Editor across Canada, Dr. Hepworth has effectively and consistently spoken out against activists and anti-pesticide prohibitions on a very frequent basis. Dr. Hepworth speaks the truth — and deserves CONGRATULATION.

# NORAHG

## 2,4-D Toxicity

Three-way herbicide products like Killex Turf Herbicide, that contain 2,4-D, have a LOW TOXICITY, with Oral LD<sub>50</sub> greater than 5000 mg per kg.

This LD<sub>50</sub> value indicates that these products, even in their concentrated pre-diluted form, are safer than household items such as baking soda, caffeine, ethanol, and TABLE SALT.

In toxicology, the Median Lethal Dose, LD<sub>50</sub> ( abbreviation for the « *Lethal Dose, 50 per cent* » ), is a value that represents the dose that is fatal for 50 per cent of an experimental group of laboratory animals, in most cases rats.

THE HIGHER THE LD<sub>50</sub> VALUE, THE LEAST TOXIC THE PRODUCT.

The toxicity of 2,4-D is not very high when compared to TABLE SALT.

TABLE SALT would be lethal at 3000 milligrams per kilogram.

Pest control products than contain 2,4-D are LESS TOXIC THAN TABLE SALT.

# NORAHG

## COMPARATIVE EXAMPLES

---

### Relatively Harmless ( $LD_{50}$ 15000 + )

**29700** — sucrose ( table sugar ), edible food additive

### Practically Non-Toxic ( $LD_{50}$ 5000 - 15000 )

**11900** — ascorbic acid ( vitamin C ), edible nutrient

**7060** — ethyl alcohol ( ethanol ), edible beverage constituent

**5000 +** — Killex Turf Herbicide ( 2,4-D, mecoprop, & dicamba ), conventional herbicide product for selective weed control in turf

### Slightly Toxic ( $LD_{50}$ 500 - 5000 )

**4220** — sodium bicarbonate ( baking, soda ), household product

**3000** — sodium chloride ( table salt ), edible food additive

**2598** — Tordon 101 ( 2,4-D & picloram ), conventional herbicide product for non-selective roadside vegetation control

**1994** — acetaminophen ( Tylenol ), analgesic

### Moderately Toxic ( $LD_{50}$ 50 - 500 )

**200** — acetylsalicylic acid ( Aspirin ), analgesic

**Pesticide Bans Lead To  
Catastrophic  
Carnage**

**For Businesses Operating  
In The Professional  
Lawn Care Industry**

August 10<sup>th</sup>, 2012

National Organization Responding Against HUJE that seek to harm the  
Green space industry

Media Release

# NORAHG

PESTICIDE BANS LEAD TO CATASTROPHIC CARNAGE FOR BUSINESSES OPERATING IN THE PROFESSIONAL LAWN CARE INDUSTRY ...

- Professional Lawn Care businesses DISAPPEAR INTO OBLIVION AT A RATE OF ONE-COMPANY-PER-WEEK.
- TENS OF THOUSANDS OF WORKERS in the Professional Lawn Care Industry are UNEMPLOYED.
- Lawns in entire neighborhoods ARE RUINED BY PESTS.
- DANDELIONS ARE THE DOMINANT GROUND cover that makes provinces like Ontario look like a GARBAGE DUMP.
- Pesticide-free lawn maintenance is STUNNINGLY EXPENSIVE and DOES NOT WORK.

Besides, PESTICIDE BANS ARE A FARCE.

Residents are obtaining products either from other provinces, or mostly from across the border in the United States.

It is NOT illegal to own or possess these products, only to apply them.

The MIS-USE of products remains — thanks to PROHIBITION.

In Eastern Canada, no jurisdiction has EVER enforced PROHIBITION by going after residents.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space industry.

NORAHG is a NATIONAL NON PROFIT NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

# Neutralizing ALL Lunatics

In the event that criminal charges for **FRAUD** and **CONSPIRACY** are laid in Newfoundland, legal experts say that there is sufficient information to lead to a **SUCCESSFUL PROSECUTION !**

All Anti-Pesticide Lunatics, as well as Government-Conspirators, have been identified on the basis of their statements, activities, affiliations, and whereabouts.

Anti-Pesticide Lunatics and their Tax-Free Charity Environmental-Terrorist-Organizations **CONSPIRED** to **IMPOSE NEEDLESS, SENSELESS, and MALICIOUS PROHIBITION** of pest control products.

They deserve **NO LESS** than ...

- Arrests
- Fines
- Imprisonment
- Rescinding of Tax-Exempt Charity Status

**We must defend  
the industry,  
whatever  
the cost may be**

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from  
National Organization Responding Against HUIE that seek to harm the Green Space Industry (NORAHG)

# NORAHG

We are living in the 9|11 Era of Anti Pesticide and Environmental Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is Perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces under the RIDICULOUS PRETEXT of somehow « saving » the environment.

NORAHG is a NATIONAL NON PROFIT NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HUJE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are Hateful Underhanded Jokes as Environmentalists who have been WRONG FOR OVER 50 YEARS.

There is NO RECOURSE but LITIGATION against Anti Pesticide HUJE.

Another RECOURSE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOCATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HUJE should Get OFF Our grASS, and they should Roast In Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti Pesticide Terrorist Acts of Subversion.

The purpose of this ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti-Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION !

NORAHG also produces FORCE OF NATURE, reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports destined for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE, as well as ground breaking original reporting that informs, entertains, and creates real change.

FORCE OF NATURE was launched for CONTINUOUS transmission on the Internet on January 1st, 2009 — however, the VERY FIRST Stand-Alone FORCE OF NATURE Report was issued on September 19th, 2008.

By early 2009, the reports were released no more than five times per week, but by August 25th, 2009, FORCE OF NATURE was produced on a DAILY basis.

On March 15th, 2010, Uncle Adolph independently launched the Blog-Site called The Pesticide Truths, for the posting of information right-off-the-press.

By May 27th, 2010, Uncle Adolph expanded Pesticide Truths to a SECOND Blog-Site, and independently acquired the rights to archive the ENTIRE FORCE OF NATURE Library of Reports.

## The Whole Truth from an Independent Perspective

# NORAHG

By mid-December 2010, ENTIRE FORCE OF NATURE Library of Reports was FULLY SUMMARIZED and CROSS-REFERENCED, and by early 2012, the library was archived on The Pesticide Truths Web-Site, in the form of Web-Pages.

The information presented in FORCE OF NATURE has been developed for the education and entertainment of the reader by providing a sequence of events WITH COMMENTARY, striving for accuracy in history, politics, and science.

FORCE OF NATURE is TOTALLY INDEPENDENT and provides NO guarantee regarding accuracy or completeness. In no event shall FORCE OF NATURE be liable for any incidental or consequential damages, lost profits, or any indirect damages.

NORAHG also produces A LOOK AT, a series of reports providing TECHNICAL INFORMATION on issues such as Career Management, Golf Course Maintenance, Green Alternatives, Summer Stress, Turfgrass Pests, and Turfgrass Species.

Finally, NORAHG frequently responds to anti pesticide activists in LETTERS TO THE EDITOR in newspapers across Canada and around the world.

All information, excerpts, and pictures contained in FORCE OF NATURE, A LOOK AT, and LETTERS TO THE EDITOR were retrieved from the Internet, and may be considered in the public domain.

FORCE OF NATURE, A LOOK AT, and their various incarnations, was the brainchild of William H. Gathercole and his colleagues in 1991. Mr. Gathercole is now retired, although his name continues to appear as founder.

Here is a brief summary of Mr. Gathercole's career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf maintenance industries

Expertise in — environmental issues and anti pesticide terrorism • turf and ornamental maintenance and troubleshooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing and distribution

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, government negotiations, public affairs, and workplace safety • supervisor, consultant, and, programmer for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insect in both the Montreal region and the Vancouver / Fraser Valley region • with Dr. Peter Demoeden, confirmed the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr. David Shetlar, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South Western Ontario, and later, in the Montreal and Vancouver regions

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to anti pesticide prohibition • creator of the signs that are now used for posting after application • co-founder of annual winter convention for Quebec golf course superintendents • the major influence in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness of the events of anti pesticide prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT reports

Notable award — the very first man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beach-head against anti pesticide activists in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues ... designed and implemented strategies that reined anti pesticide activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against anti pesticide activists in the town of Hudson, Quebec • launched the largest founding professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.
