CARNAGE In Sudbury Inflicted By GARBAGE DUMP Green Spaces

Prohibition Inflicted Garbage Dump Green Spaces

The green spaces in the city of Greater Sudbury look like pest-infested garbage dumps.

There is little debate about the fact that Ontario's 2009 provincial prohibition against pest control products converted communities like Sudbury into shabbier and dangerous pest-infested garbage dumps.

Ontario parks, sports fields, and home lawns became wholly infested with dandelions and a variety of other weeds, and there was no practical way to remove them, other than by hand-pulling or by replacing the entire lawn with sod.

The sod grower industry clearly profited from prohibition.

There is also little debate about the fact that the only businesses that profited from Ontario's 2009 provincial prohibition were sod growers.

Because of needless, senseless, and malicious prohibition, Ontario greens spaces became weed-infested and insect-destroyed garbage dumps.

And sod growers became richer.

The sod growers probably represent the only industry that has actually benefited from the garbage dump green spaces that were inflicted by anti-pesticide prohibition.

Sudbury Is A #@!!% Pest-Infested Garbage Dump !

Greater Sudbury And Its Desolation

Greater Sudbury, with a population of almost 160,000, is a city in the province of Ontario.

The city of Greater Sudbury is located in a region that is infamous for being desolate, dismal, filthy, polluted, and ugly.

Furthermore, because of anti-pesticide prohibition, no one wants to live in #@!!% pest-infested garbage dumps in Sudbury.

Ontario's Arbitrary Prohibition

On April 22nd, 2009 — a date which will live in the period of environmental infamy — the full force of the Ontario Cosmetic Pesticides Ban Act was arbitrarily implemented, and destroyed the professional lawn care industry.

Ontario's 2009 provincial prohibition was imposed under the pretext that children somehow needed to be protected from pest control products.

The government of Ontario's prohibition was an attack against businesses operating in the professional lawn care industry, and this attack left a trail of economic destruction with hundreds of small businesses destroyed and thousands of people out of work.

The assessments that validated prohibition were performed by a small group of fund-raisers and health care workers who had no expertise whatsoever in matters relating to pest control products.

Sod Growers Have Profited From Prohibition

Ontario's 2009 provincial prohibition was implemented in defiance of overwhelmingly massive and detailed assessments performed by Health Canada, whose work was discredited by fund-raisers and health care workers (a.k.a. lunatic activists) who decided to set their own agendas by interfering in partisan politics and public policy regarding pest control products.

Sod growers were provided with an exception status, and were not subject to Ontario's 2009 provincial prohibition.

In fact, sod growers profited from prohibition, and nowhere is this more evident than in the city of Greater Sudbury.

Sudbury Is A #@!!% Pest-Infested Garbage Dump !

Sod Growers Profited From Prohibition

Denis Charbonneau is the Manager of Valley Nursery Sod in Chelmsford, a town which was amalgamated into the city of Greater Sudbury.

Charbonneau estimated the demand for turf is up about 20 per cent since arbitrary prohibition was imposed — something he attributes to the number of people tearing out and replacing old lawns overtaken by weeds.

In Sudbury, prohibition led to the stunningly exorbitant costs of sod renovation.

According to Charbonneau —

I believe the main drive is the ban they put on pesticides and herbicides [a.k.a. prohibition], and the home-owners are now struggling to keep anything going.

In Sudbury, prohibition led to garbage dump green spaces.

As a sod grower, Charbonneau is exempt from the 2009 provincial prohibition.

However, there are several facts that Charbonneau and other sod growers are not willing to admit to the public.

What Sod Growers Will Not Admit ...

Sod supplied to home-owners is herbicide-treated, insecticide-treated, and fertilized with synthetic fertilizers that contain phosphorus.

However, across Ontario, herbicides and insecticides are prohibited on home lawns, but sod growers were provided with an exception status.

In Sudbury, the fertilizer use of phosphorus is specifically prohibited on home lawns, but sod growers were provided with an exception status.

Observers reacted by saying ... if it is safe to walk and play on pesticide-treated-sod, then it is safe to walk and play on a pesticide-treated lawn.

Ironically ... both sod growers and the professional lawn care industry use the same conventional ingredients that are needed to control insect and weed pests.

Sod growers use conventional pest control products on a regular and continuous basis, and have done so for decades.

Ironically ... pesticide-treated-sod sold by sod growers is no more toxic than lawns treated by professional lawn care.

Ironically ... conventional pest control products used by sod growers are scientifically safe since they have been scrutinized and approved by the hundreds of expert scientists at Health Canada !

Sudbury's Arbitrary Anti-Fertilizer Prohibition

On July 13th, 2011, the enviro-lunatic city council of Greater Sudbury passed a needless, senseless, and malicious prohibition and restriction against fertilizer use in the urban landscape.

Sudbury was infamously the first municipality in Ontario to enact phosphorus fertilizer prohibition, and it came into effect in April 2012.

Sudbury also restricted all fertilizers used by the professional lawn care industry.

Sod growers were provided with an exception status from Sudbury's 2012 municipal prohibition against phosphorus fertilizer.

Consequently, sod supplied to the home-owners is not only fertilized with otherwise prohibited phosphorus fertilizer, it is also herbicide-treated and insecticide-treated.

Ironically ... both sod growers and the professional lawn care industry use the same type of fertilizers, as well as the same type of pest control products.

This makes the sod grower industry an easy target for anti-pesticide terrorist-organizations.

Sod Growers Will Be Facing Annihilation

Denis Charbonneau's Valley Nursery Sod, and the entire sod grower industry, will be facing annihilation because of subversive conspiracies from Canadian Cancer Society, and other anti-pesticide terrorist-organizations.

The sod grower industry is in a vulnerable position regarding pest control products.

Both the sod grower industry and the modern professional lawn care industry use the same ingredients that are needed to control damaging pests.

In fact, professional lawn care maintenance often requires less pest-control-inputs than the sod grower industry.

The sod grower industry enjoys the benefits from a prohibition exception status despite the fact that it uses the very same ingredients employed in professional lawn care maintenance.

The sod grower industry is now an easy target.

The cancer-lunatics who operate Canadian Cancer Society are planning to annihilate the agriculture industry, which will include the sod grower industry.

The society doesn't have a view on the related issue of whether organically grown foods are a better option, a topic that will also be discussed.

Experts from around the world will lead discussions on the CANCER RISKS OF PESTICIDES USED ON AGRICULTURAL CROPS, at a ground-breaking conference organized and hosted by the Canadian Cancer Society.

The conference mentioned in the above excerpt was organized and held by Canadian Cancer Society on August 13th, 2008, in Toronto.

It was called Exploring The Connection — A State Of The Science Conference On Pesticides And Cancer.

Canadian Cancer Society is planning to ANNIHILATE the Agriculture Industry, which includes the Sod Grower Industry.

Sod Growers Have Supported Prohibition For Mere Profit

Sod growers have never wanted to get too involved with the issue of the prohibition against pest control products used in the urban landscape.

According to observers, prohibition was despicably supported by sod growers because they did nothing to help defend the professional lawn care industry.

The destruction of the professional lawn care industry was extensive because of prohibition since there are no valid economical alternatives to replace the prohibited products.

Because of their silence, prohibition was despicably supported by sod growers, which essentially indicates they conspired to prohibit against pest control products with the sole intention of profiting from the sale of their products.

Sod growers betrayed the professional lawn care industry in order to profit from anti-pesticide prohibition despite using the very same products need for the maintenance of lawns.

Nonetheless, it is expected that the sod grower industry will soon be terrorized and coerced and intimidated into using a certified pesticide-free sod.

Anti-pesticide lunatic-terrorists will concoct the story that home-owner consumers have long demanded certified pesticide-free sod. [?!?!]

Anti-pesticide lunatic-terrorists will also concoct the story that certified pesticide-free sod will allow sod growers to assure consumers that their sod is somehow of the highest quality and safe for their homes and gardens. [?!?!]

What a bunch of lying sacks of anti-pesticide cwap !

Certified pesticide-free sod will do nothing to minimize the exposure to pesticides.

Are customers more likely to buy certified pesticide-free sod ?

The answer is yes, once anti-pesticide lunatic-terrorists have spread enough fear and paranoia, and have enraged the public into believing that pesticide-treated sod poses some kind of imaginary danger to children, pets, adults, and environment.

Let's not forget that the subversive acts of depraved indifference of anti-pesticide lunatic-terrorists destroyed the professional lawn care industry in many jurisdictions across Canada.

The sod grower industry will be destroyed next !

Unfortunately, the issue of certified pesticide-free sod will revolve less around health and environment concerns, and more around the sale of non-prohibited green alternative pesticides that will be sold to sod growers at stunningly exorbitant costs.

In fact, anti-pesticide prohibition is a sales strategy used to prevent sod growers from purchasing conventional products that are not sold and distributed by certain anti-pesticide organizations.

Unfortunately, green alternative pesticides are ineffective, inadequate, high-risk, more toxic, stunningly expensive, and overwhelmingly condemned.

Green alternatives do not work !

It is wrongly assumed that alternatives are somehow safer and work as well as conventional products.

By definition, alternatives are inferior, which is why they did not win the market-place originally.

Sod growers will not be able to afford the stunningly expensive and ineffective green alternative pesticides.

Certified pesticide-free sod will be stunningly expensive and not economically viable.

Sod growers will not be able to afford the high cost of labour needed to manually remove millions of pests.

The sod grower industry will be destroyed next !

Sod Growers Will Be Facing ANNIHILATION

Fertilizer EnviroTerror In Sudbury

Fertilizer EnviroTerror In Sudbury

Who Was Sudbury Trying To Kid ?!?!

The city of Greater Sudbury is located in a region that is infamous for being desolate, dismal, filthy, polluted, and ugly.

Since the 1972 construction of the Inco super-stack, sulfuric acid has been dispersed over wide area in Sudbury, contributing to acid rain.

In parts of the city, vegetation was devastated both by acid rain and by logging to provide fuel for early smelting techniques.

As a result, Sudbury became widely known as a wasteland — it has no lessons to give about protecting the environment.

And yet, the enviro-lunatic city council of Greater Sudbury has approved lunatic-terrorist-prohibition against phosphorus fertilizer under the pretext of protecting the environment.

Greater Sudbury And Its Desolation

Greater Sudbury, with a population of almost 160,000, is a city in the province of Ontario.

Greater Sudbury was created in 2001 by merging the cities and towns of the former regional municipality of Sudbury, along with several previously unincorporated geographic townships.

Fertilizer EnviroTerror In Sudbury

By population, Sudbury is the largest city in the northern Ontario region.

By land area, it is the largest city in Ontario, and the seventh largest municipality by area in Canada.

Sudbury is so desolate that during the Apollo manned lunar exploration program, astronauts trained in Sudbury since its environment resembled the lifeless surface of the moon.

In recent years, the ecology of the Sudbury region has recovered dramatically thanks to re-greening programs, which sadly now include the lunatic-prohibition and restriction of fertilizer that will eventually destroy the professional lawn care industry.

Sudbury's Anti-Fertilizer Prohibition

On July 13th, 2011, the enviro-lunatic city council of Greater Sudbury passed a needless, senseless, and malicious prohibition and restriction on fertilizer use in the urban landscape.

Sudbury was infamously the first municipality in Ontario to enact phosphorus fertilizer prohibition, and it came into effect in April 2012.

Sudbury also restricted all fertilizers used by the professional lawn care industry.

Sudbury legislated based solely on imaginary danger about fertilizer and its alleged effects on cyano-bacteria blue-green algae in water.

There were ridiculous allegations that one-pound of phosphorus can create 700 pounds of blue-green algae. [?!?!]

Fertilizer EnviroTerror In Sudbury

Two anti-pesticide terrorist-organizations coerced and intimidated Greater Sudbury council to prohibit and restrict fertilizers —

- Greater Sudbury Watershed Alliance
- Long Lake Stewardship Committee

There are 371 people on long lake stewardship committee, out of a total of 1,250 residents on long lake, and Greater Sudbury watershed alliance is a coalition of 19 local lake and river stewardship groups.

Details Concerning Sudbury's Anti-Fertilizer Prohibition

The Sudbury prohibition will ...

- ban fertilizer use of phosphorus, but there are EXCEPTIONS
- ban ALL fertilizer use on frozen ground
- ban ALL fertilizer use during rain, or when rain is predicted
- ban ALL fertilizer use within 15 metres of any water body
- ban ALL fertilizer use on impervious surfaces such as driveways and parking lots.

Exceptions To Sudbury's Anti-Fertilizer Prohibition

The Sudbury prohibition will not apply to over 95 per cent of all phosphorus fertilizer use ...

- the use of phosphorus to establish turf from seed or sod
- the use of phosphorus when a soil test indicates a deficiency

Fertilizer EnviroTerror In Sudbury

- the use of phosphorus on agricultural land
- the use of phosphorus on sod farms
- the use of phosphorus on golf courses

Sod supplied to the home-owners is not only fertilized with otherwise prohibited phosphorus fertilizer, it is also herbicide-treated and insecticide-treated.

Sudbury's Anti-Fertilizer Prohibition Unnecessary

In fact, turf fertilizers are not the primary source of phosphorus-loading in area lakes — prohibition will not protect the environment.

Turf Fertilizers No Longer Contain Phosphorus

Moreover, because phosphorus is an expensive raw material, turf fertilizers generally are not composed of the mineral.

95 per cent of all turf fertilizers no longer contain phosphorus, so prohibition is not needed.

Sudbury Merely Copying Failed U.S. Prohibitions

Sudbury is merely following many jurisdictions in the United States, where idiotic restrictions and prohibitions have been imposed on fertilizers containing phosphorus, and even nitrogen.

In America, there have been no tangible results with fertilizer prohibition — U.S. prohibition is a dismal failure.

All Exception Statuses Must Come To An End

In several jurisdictions,
PROHIBITION has been ARBITRARILY
IMPOSED against PEST CONTROL
PRODUCTS used in the Urban Landscape

NEEDLESS PROHIBITION SUBVERSION
has also spread against the use of
FERTILIZERS, especially PHOSPOHORUS

Anti-Pesticide SUBVERSION will next
eliminate pest control products and
fertilizers from the GOLF INDUSTRY

and then ... SOD PRODUCTION

and then ... NURSERY PRODUCTION

and then ... AGRICULTURE

and finally ... PROHIBITION will be
ARBITRARILY IMPOSED by Lunatic-
Terrorists NATIONALLY against ALL
pest control products and fertilizers

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from
National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG)

N O R A H G

We are living in the 9|11 Era of Anti Pesticide Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is Perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces under the RIDICULOUS PRETEXT of somehow « saving » the environment.

NORAHG is a NATIONAL NON PROFIT NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HUJE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are Hateful Underhanded Jokes as Environmentalists who have been WRONG FOR OVER 50 YEARS.

There is NO RECOURSE but LITIGATION against Anti Pesticide HUJE.

Another RECOURSE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOCATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HUJE should Get OFF Our grASS, and they should Roast In Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti Pesticide Terrorist Acts of Subversion.

The purpose of this ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti-Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION !

NORAHG also produces FORCE OF NATURE, reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports destined for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE, as well as ground breaking original reporting that informs, entertains, and creates real change.

FORCE OF NATURE is TOTALLY INDEPENDENT and provides NO guarantee regarding accuracy or completeness. In no event shall FORCE OF NATURE be liable for any incidental or consequential damages, lost profits, or any indirect damages.

NORAHG also produces A LOOK AT, a series of reports providing TECHNICAL INFORMATION on issues such as Career Management, Golf Course Maintenance, Green Alternatives, Summer Stress, Turfgrass Pests, and Turfgrass Species.

Finally, NORAHG frequently responds to anti pesticide activists in LETTERS TO THE EDITOR in newspapers across Canada and around the world.

All information, excerpts, and pictures contained in FORCE OF NATURE, A LOOK AT, and LETTERS TO THE EDITOR were retrieved from the Internet, and may be considered in the public domain.

FORCE OF NATURE, A LOOK AT, and their various incarnations, was the brainchild of William H. Gathercole and his colleagues in 1991. Mr. Gathercole is now retired, although his name continues to appear as founder.

Here is a brief summary of Mr. Gathercole's career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf maintenance industries

Expertise in — environmental issues and anti pesticide terrorism • turf and ornamental maintenance and troubleshooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing and distribution

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, government negotiations, public affairs, and workplace safety • supervisor, consultant, and, programmer for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insect in both the Montreal region and the Vancouver / Fraser Valley region • with Dr. Peter Dernoeden, confirmed the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr. David Shetlar, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South Western Ontario, and later, in the Montreal and Vancouver regions

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to anti pesticide prohibition • creator of the signs that are now used for posting after application • co-founder of annual winter convention for Quebec golf course superintendents • the major influence in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness of the events of anti pesticide prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT reports

Notable award — the very first man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beach-head against anti pesticide activists in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues ... designed and implemented strategies that reined anti pesticide activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against anti pesticide activists in the town of Hudson, Quebec • launched the largest founding professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.
