Despite its good intentions the city of Port Alberni has rescinded its pesticide reduction bylaw.

The city will instead follow an annual pest management plan with an eye to reducing pesticide use in the city where it can.

The bylaw was approved in 2009, and sought to protect the environment by restricting the non-essential use of pesticides.

City staff implemented a series of holistic measures as part of their pest management control regime with limited success, Parks and Recreation manager Scott Kenny said.

Manual cultivation was attempted but was found to be too labour intensive, particularly in times of reduced staffing, Kenny said.

Staff also attempted hard surface area burning at baseball fields in 2010. The method succeeded only in burning the tops of weeds but didn't impact the root area.

Applications of a vinegar solution was tried next but again didn't impact the plants' roots. The method was only effective in controlling small weeds and soft plants.

Bark mulching of shrub beds was used with moderate success. The method chokes down weeds while keeping soil moist and cooling roots.

Kenny pointed out the product Fiesta to illustrate how much a holistic measure costs. The city would have to spend \$32,000 to apply four applications of it on city playing fields per year. In comparison, one application of Killex would cost \$1,600 to apply and would last four years.

The bylaw was also cumbersome and nearly impossible to enforce, Kenny said.

The city is taking its cue from the provincial Report of the Special Committee on Cosmetic Pesticides in rescinding its bylaw.

The committee researched the issue by examining regulatory framework, heard from more than 8,600 participants and looked at bans in other cities.

"...despite the intensity of the arguments in favour of the ban on cosmetic use of pesticides.....there is insufficient scientific evidence to support a province-wide ban on pesticides for cosmetic use," an excerpt from the report notes.

"The majority of the committee supports using science based evidence and will not restrict access to products that are approved for safe use in Canada."

There Are Real Trends AGAINST Pesticide Bans. Across Western Canada, Government Officials are no longer readily jumping in favour of Anti-Pesticide PROHIBITION. The City of Port Alberni is one of many jurisdictions in Western Canada that have STOPPED or RESCINDED or LIMITED or OPPOSED Anti-Pesticide PROHIBITION, or granted Professional Lawn Care businesses with an EXCEPTION STATUS — Alberta (Province), Altona (Manitoba), Beaumont (Alberta), British Columbia (Province), Calgary (Alberta), Campbell River (British Columbia), Edmonton (Alberta), Kamloops (British Columbia), Kelowna (British Columbia), Merritt (British Columbia), Portage La Prairie (Manitoba), Regina (Saskatchewan), Rossland (British Columbia), Salmon Arm (British Columbia), Steinbach (Manitoba), Vernon (British Columbia), Winkler (Manitoba). NO Pesticide Ban Means Beautiful and Safe Communities. WILLIAM H. GATHERCOLE AND NORAH G. <http://wp.me/p1jq40-5vI> <http://wp.me/p1jq40-5w0>
