Ontario

Living In
Environmental
Infamy

In the City of Toronto, Ontario ...

In Ontario, the PESTICIDE BAN, coupled with last winter's relatively warm temperatures, has caused the WHITE GRUB problem to EXPLODE.

Without pesticides, lawns been DESTROYED — eaten alive from below by WHITE GRUBS, and torn to bits from above by the skunks and raccoons that prey on them.

Because of the PESTICIDE BAN, what used to be 250-DOLLAR YEARLY PAY-OUT to MAINTAIN an average-sized lawn can now run as high as 600-dollars., and over 1,000-DOLLARS to RENOVATE a lawn that is already destroyed.

Because of the PESTICIDE BAN, only the RICH ELITE can afford Professional Lawn Care.

Grubs Gone Wild

A Grubby Tale Of Lawns Gone Bad

No One Wants To Live In #@!!% Pest-Infested Garbage Dumps.

Doug Cotton's lawn has been DESTROYED — eaten alive from below by WHITE GRUBS, and torn to bits from above by the skunks and raccoons that prey on them.

Cotton, a 48-year-old fire-fighter, will be FORCED TO SPEND OVER 1,000 DOLLARS to have the front lawn of his Scarborough bungalow DUG UP AND REPLACED.

He's not the only one.

Cotton is just following in the foot-steps of SEVERAL OF HIS NEIGHBOURS who have either done the same, or are planning to.

He LAYS BLAME at the feet of the Government of Ontario and its sweeping PESTICIDE BAN enacted in 2009.

The PESTICIDE BAN leaves home-owners like as Cotton to rely on the MORE TIME-CONSUMING AND MORE EXPENSIVE ORGANIC METHODS of dealing with WHITE GRUBS.

WHITE GRUBS are tiny, worm-like beetle larvae that pupate under the lawn, and FEED ON THE ROOTS OF GRASS.

Cotton tried the GREEN ALTERNATIVE PESTICIDE — sperm-sized, grub-killing worms called NEMATODES — but with LITTLE SUCCESS.

Anti-Pesticide PROHIBITION Destroyed Public and Residential Green Spaces by Turning Them Into GARBAGE DUMPS

Cotton used to have a lush, green front lawn that is now a dry cracked square bed of dirt.

Now, Cotton wakes daily to new pits dug in his by the claws of urban wildlife in search of food.

According to Cotton —

I'm ready to RIP THE WHOLE THING UP — at my cost — thanks to this BAN.

I would just like to enjoy my home and have a nice lawn.

I'm here, a single wage earner, and after my property taxes, there is not much left, and now I have to spend how much more just to maintain a home that looks good ?

The PESTICIDE BAN, which replaced already-existing municipal restrictions, forbids the use of pest control products in the Urban Landscape.

EXCEPTIONS to the PESTICIDE BAN include golf courses, forestry, and specialty turf for activities such as lawn bowling, and sports fields hosting national and international events.

The ban, says landscaper Kyle Tobin, has made it far more time consuming and expensive for homeowners to maintain healthy lawns.

Grubs Gone Wild

A Grubby Tale Of Lawns Gone Bad

Because of the PESTICIDE BAN, what used to be 250-DOLLAR YEARLY PAY-OUT to MAINTAIN an average-sized lawn can now run as high as 600-dollars., and over 1,000-DOLLARS to RENOVATE a lawn that is already destroyed.

Because of the PESTICIDE BAN, only the RICH ELITE can afford Professional Lawn Care.

According to Tobin, the PESTICIDE BAN, coupled with last winter's relatively warm temperatures, has caused the WHITE GRUB problem to EXPLODE.

Weed and grub issues are WORSE THAN WE'VE EVER SEEN ... and a big part of that is the provincial ban and the preceding municipal ban.

A LOT OF PEOPLE HAVE GIVEN UP.

[And] the organic products we have CAN'T BE COMPARED [to conventional pesticides].

It is NOT THE SAME THING, and they DON'T HAVE THE SAME RESULTS.

Tobin added that ingredients in some of the banned pesticides are still being used to treat food and in flea repellent for pets.

prohibition carnage

Toronto has been INFESTED with weed and insect pests.

Because of Anti-Pesticide PROHIBITION, Toronto's Green Spaces have been RUINED by weeds, and DESTROYED by White Grubs called European Chafer.

White Grubs are larvae that attack the roots of turfgrasses, creating damage that first appears as drought stress, eventually causing death in large irregular patches.

They also attract SKUNK AND RACCOONS that dig-up, or shred, turf like roto-tillers.

There are several types of White Grubs that damage RESIDENTIAL and COMMERCIAL LAWNS • Bluegrass Billbug • European Chafer • May-June Beetle • Japanese Beetle.

White Grubs also damage GOLF COURSE FAIRWAYS and ROUGH • Black Turfgrass *Ataenius* • European Chafer • May-June Beetle • Japanese Beetle.

One type of White Grubs damages GOLF COURSE PUTTING GREENS and TEEING GROUNDS • Annual Bluegrass Weevil.

History of the European Chafer

Of all the types of White Grubs, European Chafer has been historically VERY DESTRUCTIVE.

In 1940, in the State of New York, the European Chafer was officially identified as a turfgrass pest.

It was accidentally introduced from the Orient and Europe.

Forty years later, in 1980, it reached the Niagara Peninsula in South-Western Ontario.

Its rampage continued across the Greater Toronto Area throughout the 1980s and 1990s.

In 1997, William H. Gathercole first reported its spread in Montreal, Quebec.

By 2001, this insect had also spread across several states of the North-Eastern U.S.

In 2001, Mr. Gathercole also first identified the insect in the Pacific North-West, in New Westminster, British Columbia, while local experts and entomologists were somehow baffled about an insect pest that had created a well-documented ECOLOGICAL DISASTER in Urban Landscapes throughout Eastern North America.

Additionally, Mr. Gathercole exhaustively investigated the introduction of this pest into British Columbia and Quebec.

In both cases, the European Chafer was imported by contaminated nursery sod products originating from grower locations in the Province of Ontario.

Nematodes Do Not Provide Acceptable Control

Turf Managers, Government Officials, as well as the public at large, may be under the MIS-TAKEN IMPRESSION that there exists a vast array of biological-natural-ecological PRODUCTS and PRACTICES for controlling White Grubs.

Overall, these PRODUCTS and PRACTICES **DO NOT PROVIDE ACCEPTABLE CONTROL** against White Grubs.

Sadly, the promotion of these BOGUS PRODUCTS and PRACTICES was INFLUENTIAL when some jurisdictions IMPOSED PROHIBITION against the use of pest control products in the Urban Landscape.

One example of a BOGUS PRODUCT is Entomo-Pathogenic Nematode Insecticides.

Nematodes Suppress But Do Not Control

Nematode Insecticides are NOT viable, efficacious, or economical GREEN ALTERNATIVES to replace conventional insect control products.

Overall, Nematode Insecticides are DISMAL FAILURES since they merely **SUPPRESS BUT DO NOT CONTROL** insect pests of turf.

Nematode Insecticides CANNOT be consistently considered as true alternatives to conventional insecticides, since the insect pests are often only **SUPPRESSED BUT NOT CONTROLLED**.

Laboratory and field tests indicate that even the most highly-rated Nematode species are only **MARGINALLY EFFECTIVE** in controlling insect infestations.

On the other hand, several conventional pest control products will **FULLY AND EFFECTIVELY CONTROL INSECT PESTS**, such as imidacloprid (Merit) and carbaryl (Sevin).

Art Drysdale — Nematodes Do Not Work

Art Drysdale is the nation's best-known celebrity horticulturist, plant expert, writer, speaker, radio and television broadcaster.

According to Drysdale —

NEMATODES DO NOT WORK, and I DO NOT RECOMMEND THEM.

Currently, Nematodes have NOT BEEN WIDELY-ADOPTED for use by the turf industry because of their HIGH COST and because the environmental conditions necessary to guarantee the success of the Nematode treatments RARELY EXIST.

In addition to all of this, Nematode insecticides are NOT REGISTERED as pest control products in Canada.

Neither the federal nor the provincial governments have officially scheduled or classified Nematode insecticides as a pest control product.

Consequently, there is NO OBLIGATION on the part of the manufacturer to divulge a full range of safety information such as human toxicity and environmental impact, which is the case with conventional pest control products.

This information will eventually be required, not just concerning the Nematodes themselves, but also for the SYMBIOTIC BACTERIA that they carry.

It is inevitable that the failure to regulate Nematode products will eventually create a public relations problem.

It will not be taken for granted for very long that an organism that is defined as INFECTIVE will require the need for more safety information in order to justify its status as reduced-risk.

Additionally, the failure to regulate Nematode products appears to be in direct contravention of the federal definition of a pest control product (or pesticide), as interpreted by the federal Pest Control Products Act.

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from
National Organization Responding Against HUIE that seek to harm the Green Space Industry (NORAHG)

N O R A H G

We are living in the 9|11 Era of Anti Pesticide Terrorism where at least ONE SUBVERSIVE ACT OF TERROR is Perpetrated EVERY SINGLE DAY by enviro lunatics.

We are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOUR — scientific research PROVES that pest control products CAUSE NO HARM and can be USED SAFELY.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space industry.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to Anti Pesticide PROHIBITION and the CLOSURE of green spaces under the RIDICULOUS PRETEXT of somehow « saving » the environment.

NORAHG is a NATIONAL NON PROFIT NON PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting the work of RESPECTED and HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

Anti Pesticide HUJE are enviro lunatics and lawn haters who particularly DESPISE the golf industry — they are Hateful Underhanded Jokes as Environmentalists who have been WRONG FOR OVER 50 YEARS.

There is NO RECOURSE but LITIGATION against Anti Pesticide HUJE.

Another RECOURSE is to SEEK the CANCELLATION of GOVERNMENT GRANTS and REVOCATION of the TAX EXEMPT STATUS of Anti Pesticide Organizations.

HUJE should Get OFF Our grASS, and they should Roast In Hell.

NORAHG manages the Library of Force Of Nature Reports and References, which is a VAST ARCHIVE of REPORTS, MEDIA REFERENCES, AUDIO CLIPS, and VIDEOS on ALL Anti Pesticide Terrorist Acts of Subversion.

The purpose of this ARCHIVE is to provide information that will lead to a SUCCESSFUL LITIGATION AGAINST Anti-Pesticide Organizations.

All names, statements, activities, and affiliations have been ARCHIVED for the intention of eventual CRIMINAL CHARGES.

When CRIMINAL CHARGES for FRAUD and CONSPIRACY are laid, legal experts say that the ARCHIVE is sufficient to lead to a SUCCESSFUL PROSECUTION !

NORAHG also produces FORCE OF NATURE, reports that present THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE about environmental issues, including anti pesticide terrorism.

FORCE OF NATURE is a series of reports destined for the green space industry, the environmental terrorist movement, governments, and the media, nationwide across Canada, the United States, and overseas.

FORCE OF NATURE is committed to SOUND SCIENCE, as well as ground breaking original reporting that informs, entertains, and creates real change.

The Force Of Nature Series of Reports — Agriculture • ALBERTA Conspiracy • Bee Colony Collapse Disorder • Bee Colony Collapse Disorder • Benefits of the Turfgrass Industry • Beyond Pesticides • Books That Screwed Up the World • BRITISH COLUMBIA Conspiracy • Canadian Cancer Society • Canadian Association of Physicians for the Environment • CARNAGE and Consequences of Lunatic Terrorist Prohibition • Controversial Prohibitions • Culprits of the Prohibition Conspiracy • Daffodils, Toxic Pesticide Treated Flowers Soaked Formaldehyde • Dating Services for Enviro Maniacs • David Suzuki Foundation • DDT and Our World of Politicized Science • Death and Illness (Alleged) • Departure Letters • Ecojustice Canada • Energy Sector • Environmental Terrorists UNMASKED • Environmental Terrorist Organizations • Enviro PROFIT • Environmental Defence • FAILURE of IPM, Pesticide Manufacturers, Prohibition, Trade Associations • Famous Quotations About Enviro Lunatics • Fertilizer TERROR • Food and Farming • Get Off Our grASS • Global Warming, The Scam of Our Lifetime • Glyphosate Herbicide • Golf Industry • Green Alternatives • Green Party • Halloween Terror • Happy Holidays • Health Canada • Health Concerns with Pest Control Products • Heroes Speaking Out Against Environmental Terror • History of Environmental Terror in Canada • History of the Turfgrass Industry • Letters to the Editor • LIARS and Lying Sacks of (Enviro Maniac) Cwap • Mock Advertisements • Mock Speeches • Myth BUSTING • NATIONAL Prohibition • NEW BRUNSWICK Conspiracy • NO Prohibition Exception for AGRICULTURE Industry • NO Prohibition Exception for GOLF Industry • NOVA SCOTIA Conspiracy • North America Free Trade Agreement (NAFTA) • ONTARIO Conspiracy, Haven For Environmental Terrorists • Ontario College of Family Physicians • Organic Golf Courses • Organic Maintenance • Organizations of the Prohibition Conspiracy • Pesticide Q & A (Questions and Answers) • Positive Waves (Interesting and Innovative Thinking) • PRINCE EDWARD ISLAND (PEI) Conspiracy • QUEBEC Prohibition • Quotations About Enviro Luna-

The information presented in FORCE OF NATURE has been developed for the education and entertainment of the reader by providing a sequence of events WITH COMMENTARY, striving for accuracy in history, politics, and science.

FORCE OF NATURE is TOTALLY INDEPENDENT and provides NO guarantee regarding accuracy or completeness. In no event shall FORCE OF NATURE be liable for any incidental or consequential damages, lost profits, or any indirect damages.

NORAHG also produces A LOOK AT, a series of reports providing TECHNICAL INFORMATION on issues such as Career Management, Golf Course Maintenance, Green Alternatives, Summer Stress, Turfgrass Pests, and Turfgrass Species.

Finally, NORAHG frequently responds to anti pesticide activists in LETTERS TO THE EDITOR in newspapers across Canada and around the world.

All information, excerpts, and pictures contained in FORCE OF NATURE, A LOOK AT, and LETTERS TO THE EDITOR were retrieved from the Internet, and may be considered in the public domain.

FORCE OF NATURE, A LOOK AT, and their various incarnations, was the brainchild of William H. Gathercole and his colleagues in 1991. Mr. Gathercole is now retired, although his name continues to appear as founder.

Here is a brief summary of Mr. Gathercole's career —

Fields of study — Horticulture/Agriculture, Mathematics, Physics

Alma mater — McGill University • University of Guelph • the first person ever to obtain university degrees and contribute to both the professional lawn care and golf maintenance industries

Expertise in — environmental issues and anti pesticide terrorism • turf and ornamental maintenance and troubleshooting • history of the industry • sales and distribution of seeds, chemicals, fertilizers, and equipment • fertilizer manufacturing and distribution

Notable activities — worked in virtually all aspects of the green space industry, including golf, professional lawn care, distribution, environmental compliance, government negotiations, public affairs, and workplace safety • supervisor, consultant, and, programmer for the successful execution of hundreds of thousands of management operations in the golf and urban landscape, as well as millions of pest control applications • advisor, instructor, and trainer for thousands of turf and ornamental managers and technicians • pesticide certification instructor for thousands of industry workers • founder of the modern professional lawn care industry • prolific writer for industry publications and e-newsletters • first to confirm the invasion of European Chafer insect in both the Montreal region and the Vancouver / Fraser Valley region • with Dr. Peter Dernoeden, confirmed the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr. David Shettlar, confirmed the presence of Kentucky Bluegrass Scale as an insect pest in South Western Ontario, and later, in the Montreal and Vancouver regions

Special contributions — creator of the exception status that has allowed the golf industry to avoid being subjected to anti pesticide prohibition • creator of the signs that are now used for posting after application • co-founder of annual winter convention for Quebec golf course superintendents • the major influence in the decision by Canadian Cancer Society to stop selling for profit pesticide treated daffodils • the only true reliable witness of the events of anti pesticide prohibition in the town of Hudson, Quebec • retired founder of FORCE OF NATURE and A LOOK AT reports

Notable award — the very first man of the year for contributions leading to the successful founding of Quebec professional lawn care industry, which served as a beach-head against anti pesticide activists in the 1980s and 1990s

Legacy — Mr. Gathercole and his colleagues ... designed and implemented strategies that reined anti pesticide activists to provide peace and prosperity for the entire modern green space industry across Canada • orchestrated legal action against anti pesticide activists in the town of Hudson, Quebec • launched the largest founding professional lawn care business in Canada • quadrupled the business revenues of one of the largest suppliers in Canada

Mr. Gathercole is now retired, although his name continues to appear as founder of FORCE OF NATURE and A LOOK AT reports.
