Overview

US EPA Review Panel Report Has Discredited IARC !

GLYPHOSATE WILL NOT CAUSE CANCER according to the Review Panel Report published on-line by the Cancer Assessment Review Committee at the United States Environmental Protection Agency (US EPA) on April 29th, 2016.

The US EPA report DISCREDITED the anti-Glyphosate report by International Agency For Research On Cancer (IARC) which CONVENIENTLY DISREGARDED SEVERAL STUDIES on the effects of exposure to Glyphosate purely on the basis that these studies showed NO positive results.

The US EPA report also noted that the studies IARC chose to include in its report had SIGNIFICANT LIMITATIONS.

Additionally, IARC's anti-Glyphosate report was based on a review of the scientific literature that WAS NOT COMPREHENSIVE.

According to Monsanto, the company that developed Glyphosate, NO PESTICIDE REGULATOR IN THE WORLD CONSIDERS GLYPHOSATE TO BE A CARCINOGEN, and the US EPA report once again reinforces this important fact.

Unfortunately, IARC's INCONSISTENT CLASSIFICATION of Glyphosate has GENERATED UNWARRANTED CONCERN AND CONFUSION about Glyphosate.

There is something HORRIBLY WRONG when IARC officials CONSPIRE with Pesticide-Hating Fanatics and their Environmental-Terrorist Organizations to DICTATE PUBLIC POLICY based upon reports THAT ARE WRONG !

IARC officials are CATEGORICALLY WRONG about Glyphosate, an ingredient that has been assessed to be SCIENTIFICALLY-SAFE.

Seemingly, IARC officials will say ANYTHING in order to validate their ANTI-PESTICIDE AGENDAS, including faking data, designing pointless and inferior research, and prejudicially giving greater weight to research results that only agree with their twisted objectives.

Fanatical and Environmental CONSPIRACIES have NOT just been restricted to pest control products, but also Agent Orange, agriculture, artificial sweeteners, cancer, DDT, global cooling and global warming, lawn care, organic food, and wind power.

Glyphosate Will NOT Cause Cancer

Selected And Adapted Excerpts

Glyphosate Will NOT Cause Cancer

U.S. Environmental Protection Agency's Review Panel Report

GLYPHOSATE WILL NOT CAUSE CANCER ... if you read about it over the weekend.

That was the conclusion of a Review Panel Report published on-line by the Cancer Assessment Review Committee at the United States Environmental Protection Agency [**US EPA**] on Friday, April 29th, 2016, FINALLY SHUTTING DOWN A 30-YEAR DEBATE by giving a DEFINITIVE ANSWER to a hotly contested topic.

But, by Monday, May 2nd, it was gone.

The US EPA Review Panel Report, entitled Evaluation Of The Carcinogenic Potential Of Glyphosate, was published by the Cancer Assessment Review Committee (CARC), the branch of the EPA that determines if a chemical causes cancer in humans.

The cover page of the US EPA Review Panel Report states —

On September 16, 2015, the Cancer Assessment Review Committee (CARC) of the Health Effects Division, of the Office of Pesticide Programs, EVALUATED THE CARCINOGENIC POTENTIAL OF Glyphosate in accordance with the EPA's FINAL Guidelines For Carcinogen Risk Assessment.

Attached please find the FINAL Cancer Assessment Document.

The FINAL document — with the word FINAL found on the top right corner of each of the 87 pages.

So, that sounds pretty FINAL.

Until the US EPA removed the FINAL Review Panel Report from its web-site.

In order to fully appreciate why this matters so much, we need to understand a little about THE LONG AND TUMULTUOUS HISTORY OF THIS DEBATE.

Glyphosate Will NOT Cause Cancer

The History Of Glyphosate

Glyphosate is the most widely-used herbicide (vegetation killer) in the United States.

It was originally developed by Monsanto, and first sold in 1974 under the name Roundup.

Although people may think that Monsanto and Glyphosate go hand in hand, Monsanto ACTUALLY LOST ITS GLYPHOSATE PATENT IN 2000, resulting in the continued use of Glyphosate into hundreds of products sold by multiple companies.

When the use of Glyphosate was exploding in the mid-1980s, the EPA had classified it as a POSSIBLE HUMAN CARCINOGEN. [?!?!]

Since then, US EPA has recommended Glyphosate to be classified as follows ...

- In 1986, EPA Group D — NOT Enough Data To Tell If It Is A Carcinogen Or Not
- In 1991, EPA Group E — Evidence Of Non-Carcinogenicity In Humans

Which brings us to 2015, when the International Agency For Research On Cancer (IARC), [**arbitrarily**] recommended an INCONSISTENT CLASSIFICATION of Group B - Probably Carcinogenic.

The US EPA Review Panel Report, entitled Evaluation Of The Carcinogenic Potential Of Glyphosate, was highly critical of the IARC's anti-Glyphosate report, which was BASED ON A REVIEW OF THE SCIENTIFIC LITERATURE THAT WAS NOT COMPREHENSIVE.

Long overdue is one, FINAL, all-encompassing EPA Review Panel Report that would FINALLY, once and for all, clarify whether or not Glyphosate causes cancer.

And, we had it on April 29th — until we did NOT anymore.

This comprehensive Review Panel Report analyzed multiple different studies, with the conclusion on page 77 entitled CLASSIFICATION OF CARCINOGENIC POTENTIAL.

The US EPA Review Panel Report, entitled Evaluation Of The Carcinogenic Potential Of Glyphosate, stated —

- Glyphosate is classified as NOT LIKELY TO BE CARCINOGENIC TO HUMANS.
- The EPIDEMIOLOGICAL EVIDENCE at this time will NOT support a causal relationship between Glyphosate exposure and solid tumors.
- There is also NO EVIDENCE to support a causal relationship between Glyphosate exposure and the following non-solid tumors — leukemia, multiple myeloma, or Hodgkin's disease.
- The epidemiological evidence at this time is INCONCLUSIVE for a causal or clear associative relationship between Glyphosate and NON-HODGKIN'S LYMPHOMA.
- In experimental animals, there is NO EVIDENCE FOR CARCINOGENICITY — dietary administration of Glyphosate at very high doses for up to two years produced NO EVIDENCE OF CARCINOGENIC RESPONSE in seven separate studies with male or female rats.
- The same held true with mice.

Based on a weight of evidence from a wide range of assays looking at genetic mutation, chromosomal damage, DNA damage and repair, THERE IS NO GENOTOXIC AND NO MUTAGENIC CONCERN FOR GLYPHOSATE.

So, why would such a comprehensive Review Panel Report with a clear conclusion be removed from the web-site !?!?

The EPA told Reuters, in an e-mail, that its assessment was NOT FINAL (a particularly odd word choice for a Review Panel Report presenting their FINAL guidelines) and that the documents were PRELIMINARY.

The EPA also stated that the FINAL (yes, FINAL) Review Panel Report will be published later in 2016.

FINALLY.

Glyphosate Herbicide And The Subversive Conspiracy To Impose Reckless
And Arbitrary Prohibition Against This Safe And Effective Pest Control Product

**IARC's False-Evaluation
Deliberately Overstates
The Risks With Arbitrary
And Selective « *Cherry
Picking* » Of Data**

US EPA Review Panel Report

POKES HOLES IN

IARC's Anti-Glyphosate Agenda

May 3rd, 2016

Daily Environment Report

Bloomberg BNA

Selected And Adapted Excerpts

Glyphosate Will NOT Cause Cancer

U.S. Environmental Protection Agency's Review Panel Report

GLYPHOSATE WILL NOT CAUSE CANCER, according to a Review Panel Report from the United States Environmental Protection Agency (US EPA).

Glyphosate is a weed control ingredient developed by Monsanto that is now the most widely-used herbicide in America.

Glyphosate is the active ingredient in Roundup Herbicide as well as hundreds of other products made by dozens of other companies.

The US EPA's Cancer Assessment Review Committee made the determination after ANALYZING SEVERAL DOZEN PUBLISHED AND UNPUBLISHED SCIENTIFIC STUDIES concerning Glyphosate.

The US EPA's Cancer Assessment Review Committee FINALIZED its Review Panel Report on October 1st, 2015, but did NOT release it to the public until late April 2016, when the agency inadvertently posted the report on-line.

The US EPA Review Panel Report's findings DISAGREE with a 2015 review of Glyphosate by the International Agency For Research On Cancer (IARC), which came to the BOGUS-conclusion that Glyphosate was a PROBABLE CARCINOGEN. [?!?!]

Glyphosate Will NOT Cause Cancer

Inconsistent Classification By IARC

The US EPA Cancer Assessment Review Committee, led by staffers from the Health Effects Division of the agency's Office of Pesticide Programs, POKED A NUMBER OF HOLES in the INCONSISTENT CLASSIFICATION used for IARC's anti-Glyphosate report.

For example, the US EPA Review Panel Report noted that the IARC's anti-Glyphosate report CONVENIENTLY DISREGARDED SEVERAL STUDIES on the effects of exposure to Glyphosate because these studies showed NO positive results.

The US EPA report also said the studies IARC chose to include in its report had SIGNIFICANT LIMITATIONS — in other words, THE IARC GIVES GREATER WEIGHT TO POSITIVE RESULTS THAN TO NEGATIVE RESULTS, EVEN WHEN THE LATTER ARE FROM HIGHER-CALIBER STUDIES.

Seemingly, IARC officials will say ANYTHING in order to validate their ANTI-PESTICIDE AGENDAS, including the CONCOCTION OF HIGHLY PREJUDICIAL REPORTS AGAINST GLYPHOSATE.

IARC has DELIBERATELY OVERSTATED THE RISKS with its arbitrary and selective « *cherry picking* » studies against Glyphosate.

Release of the IARC's anti-Glyphosate report had serious negative consequences for the agricultural chemical industry.

IARC's anti-Glyphosate report was the BOGUS-basis for a decision by the State of California to require all products containing Glyphosate to be listed as carcinogenic [?!?!], a decision that Monsanto is CHALLENGING IN COURT.

The IARC's anti-Glyphosate report also PRECIPITATED NUMEROUS PRODUCT LIABILITY LAWSUITS against Monsanto from people alleging that exposure to the company's ingredient was [somehow] the cause of their BOGUS-illnesses. [?!?!]

Glyphosate Will NOT Cause Cancer

Monsanto Statement Concerning IARC's Inconsistent Classification

According to Monsanto CEO Hugh Grant —

NO PESTICIDE REGULATOR IN THE WORLD CONSIDERS GLYPHOSATE TO BE A CARCINOGEN, and this conclusion by the US EPA once again reinforces this important fact.

Unfortunately, last year's [2015] INCONSISTENT CLASSIFICATION by IARC generated unwarranted concern and confusion about this important agricultural tool.

The findings of the US EPA's Cancer Assessment Review Committee are part of a broader look by the agency at the overall health and environmental

effects of Glyphosate as a part of its registration review program, which conducts risk reviews of every pest control product once every 15 years.

If the US EPA determines that the science shows that THE WAY GLYPHOSATE IS BEING USED NOW EXCEEDS ACCEPTABLE RISKS, it can enact use restrictions on the ingredient, or take it off the market altogether.

Glyphosate Will NOT Cause Cancer

US EPA Review Panel Report Posted On April 29th, 2016

The US EPA posted the Cancer Assessment Review Committee's report April 29th, 2016, along with more than a dozen other Glyphosate-related documents, to Regulations.gov, an on-line document repository for America's federal agencies.

Then, after the EPA Review Panel Report had been widely spread on social media, the report by Cancer Assessment Review Committee, and OTHER DOCUMENTS, were removed from the EPA web-site on the afternoon of May 2nd.

According to Melissa Harrison, EPA spokesman —

Preliminary Glyphosate documents were inadvertently posted to the Agency's docket.

These documents have now been taken down because our assessment is NOT FINAL.

Some of the OTHER DOCUMENTS the EPA briefly made public pertained to two meetings regulators held with Monsanto representatives in the year after the IARC review was published.

A slide presentation made at one of these meetings by Monsanto representatives indicated the company may be willing to make voluntary changes to the labels of its Glyphosate products to address concerns that

they're harming the habitats of certain pollinating insects, including the monarch butterfly.

Glyphosate Herbicide And The Subversive Conspiracy To impose Reckless
And Arbitrary Prohibition Against This Safe And Effective Pest Control Product

**Glyphosate Is NOT
Carcinogenic According To
The Assessments From
Both The 2015 Glyphosate
Expert Panel Of Scientists
And The European Food
Safety Authority (EFSA)**

FORCE OF NATURE | DARING TO DEFY WITH THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against HUIE that seek to harm the Green Space and other industries (NORAH)

Background Information

Expert Panel Of Scientists And European Food Safety Authority Have Also Discredited IARC !

GLYPHOSATE IS NOT LIKELY CARCINOGENIC according to the assessments from both the 2015 Glyphosate Expert Panel Of Scientists and the European Food Safety Authority (EFSA).

Both organizations also DISCREDITED the anti-Glyphosate report by International Agency For Research On Cancer (IARC).

On March 20th, 2015, the IARC's report arbitrarily classified the herbicide Glyphosate, the active ingredient in Roundup, as PROBABLY CARCINOGENIC on the basis of LIMITED EVIDENCE.

IARC's use of the term LIMITED EVIDENCE clearly implied that its report was SEVERELY FLAWED, DISTORTED, and UNBALANCED.

Here is a summary of the findings of the 2015 Glyphosate Expert Panel Of Scientists —

- Glyphosate will NOT cause cancer in lab rats
- Glyphosate is NOT genotoxic
- studies DO NOT show a link between Glyphosate exposure and cancer.

The European Food Safety Authority (EFSA) functions as an advisor to policy-makers in the European Union (EU).

The EFSA's assessment on Glyphosate is expected to lead the European Union to RENEW APPROVAL FOR GLYPHOSATE.

The whole truth about the PANEL and EFSA can be found on The Pesticide Truths Web-Site ...

<http://pesticidetruths.com/2016/01/08/glyphosate-herbicide-will-not-cause-cancer-the-2015-glyphosate-expert-panel-of-scientists-european-food-safety-authority-efsa-2015-12-08-2/>

Background Information

Glyphosate Will NOT Cause Cancer

IARC's Anti-Glyphosate Report Has Been Discredited !

IARC HAS NOT PROVEN that Glyphosate causes cancer.

IARC has NOT classified Glyphosate as Group 1 - Carcinogenic To Humans.

Additionally, IARC arbitrarily classified the Glyphosate as Group 1 on the basis of « *limited evidence* » of cancer.

Unfortunately, pesticide-hating fanatics have implied that IARC's « *limited evidence* » has somehow been withheld from EVERY science-based national regulatory agency in the world.

Nonetheless, IARC has NOT classified Glyphosate as Group 1 - Carcinogenic To Humans.

In other words, ACCORDING TO IARC, GLYPHOSATE WILL NOT CAUSE CANCER !

And we repeat, IARC has NOT classified Glyphosate as Group 1 - Carcinogenic To Humans.

Glyphosate WILL NOT cause cancer !

According to U.S. Environmental Protection Agency (US EPA), German Federal Institute For Risk Assessment, Health Canada, and EVERY other science-based national regulatory agency in the world, the weight of evidence is AGAINST carcinogenicity.

In other words, according to these agencies, Glyphosate WILL NOT cause cancer.

The IARC's anti-Glyphosate report of hazard did NOT indicate the risk of getting cancer.

On the other hand, national regulatory agencies, like US EPA and Health Canada, DO evaluate risks.

The IARC's anti-Glyphosate report merely looked at what is called hazard, and NOT risk.

IARC DID NOT take into consideration how much of, or how commonly, a risk Glyphosate poses in the real world.

IARC failed to provide any new research concerning Glyphosate.

If the IARC's anti-Glyphosate report was truly valid, then why hasn't WHO itself demand more government regulation !?!?

Why should national regulatory agencies listen to IARC when it continues to be ignored by WHO !?!?

Why !?!? Because, Glyphosate WILL NOT cause harm and WILL NOT cause cancer !

For the whole truth about IARC, go to the next segment.

FORCE OF NATURE | DARING TO SPEAK WITH THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against AGRO-CORPORATE that seek to harm the Green space and other industries (NORAHG)

To fight the war against Anti-Pesticide Terrorism, you need facts !

Read ... PESTICIDE TRUTHS

Watch ... UNCLE ADOLPH

Listen To ... NORAHG

Learn From ... FORCE OF NATURE

Discover What Anti-Pesticide & Enviro-Lunatic Terrorists Are Doing And Saying About Subversively Imposing Their Life-Style Choices Against Our Society.

Read ... Reports, Blogs, & Videos, From Force Of Nature, NORAHG, Pesticide Truths, & Uncle Adolph — The Whole Truth From An Independent Perspective.

Communities and businesses are being HARMED and DESTROYED and RAPED by LUNATIC-TERRORISTS who ARBITRARILY AND RECKLESSLY IMPOSE PROHIBITIONS against pest control products used in the Urban Landscape and by the Agriculture Industry, and who PERPETRATE OTHER ACTS OF ENVIRONMENTAL TERRORISM.

We are living in the 9|11 Era of Anti Pesticide & Environmental Terrorism where at least ONE SUBVERSIVE ACT OF TERRORISM is perpetrated EVERY SINGLE DAY by LUNATIC-TERRORISTS.

A LUNATIC is a person whose actions and manner are marked by extreme recklessness.

The RECKLESS ACTS OF SUBVERSION by these LUNATIC-TERRORISTS has led to the ARBITRARY IMPOSITION of Anti-Pesticide PROHIBITION in several jurisdictions throughout North America.

The result was CATASTROPHIC CARNAGE !

Because of LUNATIC-TERRORISTS, provinces like Ontario now have a TRAIL OF ECONOMIC DESTRUCTION WITH HUNDREDS OF SMALL BUSINESSES DESTROYED and THOUSANDS OF PEOPLE OUT OF WORK, a MORE DANGEROUS OUTDOOR ENVIRONMENT, and a BLACK MARKET IN PESTICIDES.

Only TRUE LUNATICS would wish to create a TRAIL OF ECONOMIC DESTRUCTION WITH HUNDREDS OF SMALL BUSINESSES DESTROYED and THOUSANDS OF PEOPLE OUT OF WORK.

Because of LUNATIC-TERRORISTS, we are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOR — scientific research PROVES that pest control products will CAUSE NO HARM and can be USED SAFELY.

An informed public is better able to protect itself and its communities and businesses from LUNATIC-TERRORISTS who are THE LEAST QUALIFIED TO PROVIDE ANY ADVICE about pest control products or the environment.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space and other industries, and the well-being of our communities.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to LUNATIC-TERRORISTS and their Anti Pesticide PROHIBITIONS, resulting in the CLOSURE or ABANDONMENT of green spaces under the RIDICULOUS PRETEXT CONCOCTED BY LUNATICS of somehow « *saving* » the environment.

NORAHG is a NATIONAL NON-PROFIT NON-PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting PESTICIDE FREE FAILURES, as well as the work of RESPECTED & HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

NORAHG strikes back against the MYTHS concerning the need for prohibition against pest control products.

NORAHG RESPONDS on behalf of the VAST SILENT MAJORITY of THE PUBLIC THAT DOES NOT WANT PESTICIDE BANS, and SUPPORTS those who work in the Professional Lawn Care Industry, the Golf Industry, and the Agriculture Industry.

RESPECTED & HIGHLY RATED EXPERTS
