The End Of The Golf Industry's Pesticide Ban Exception Status

Proposal By Health Canada To Impose National Prohibition Against IPRODIONE

IPRODIONE is the active ingredient found in fungicides (disease control products) used by the Golf Course Industry.

Fungicide products, such as Rovral (IPRODIONE), have been used on all areas of golf courses, like greens, tees, and fairways.

Rovral (IPRODIONE) controls the following disease pests that damage turfgrasses ...

- Brown Patch
- Dollar Spot
- Fusarium Patch
- Leaf Spot
- Melting Out
- Snow Molds

In Canada, Rovral Fungicide Wettable Powder (IPRODIONE) was registered for the first time on July 1st, 1979.

On March 27th, 1996, an improved version was registered for the first time, known as Rovral Green Flowable Fungicide.

On June 24th, 2010, Health Canada announced its proposal to ALMOST ENTIRELY PROHIBIT, NATIONALLY, the use of IPRODIONE fungicide from the Golf Industry.

According to Health Canada, products containing IPRODIONE used on turfgrasses DID pose an unacceptable risk to human health.

Health Canada also proposed an EXCEPTION STATUS for IPRODIONE, for the control of Snow Mold Diseases, with ONE SINGLE APPLICATION allowed per year.

Otherwise, ALL uses of IPRODIONE, which would include turfgrasses, are to be NATIONALLY PROHIBITED due to the health concerns.

Within the Government of Canada, Health Canada's Pest Management Regulatory Agency (PMRA) is responsible for administering the Pest Control Products Act on behalf of the Minister of Health.

The Proposed National Prohibition Against Iprodione In 2016 Signaled The End Of The Golf Industry's Pesticide Ban Exception Status !

The Decision By Health Canada To Impose National Prohibition Against Iprodione Is Being Perpetrated By The Pesticide-Hating Liberal Party Of Canada ?!?! (See later segment.)

Background Information

The End Of The Golf Industry's Pesticide Ban Exception Status

For the Golf Industry, the National Prohibition against IPRODIONE will further illustrate THE END of its coveted PESTICIDE BAN EXCEPTION STATUSES.

Since 1991, the Golf Industry throughout the nation had been provided with a Pesticide Ban Exception Status — thankfully, Mr William H Gathercole crafted the original Golf Industry Exception Status in the Town of Hudson, Quebec, which has endured to this day for virtually all jurisdictions in North America.

Now, the Golf Industry is being JEAPORDIZED by ...

- Proposal by Health Canada to impose National Prohibition against IPRODIONE (see segment above)
- Proposal by Health Canada to impose National Prohibition against CHLOROTHALONIL *
- Decision by City of Kirkland to impose Municipal Prohibition against NEONICOTINOID INSECTICIDES *
- Decision by City of Montreal to impose Municipal Prohibition against NEONICOTINOID INSECTICIDES *
- Imminent decision by Province of Quebec to impose Provincial Prohibition against NEONICOTINOID INSECTICIDES *
- Decision by Health Canada to impose National Prohibition against CARBARYL *
- Decision by Health Canada to impose National Prohibition against QUINTOZENE *

* See segments below.

With these decisions against the Golf Industry, pest problems will become INCREASINGLY UNMANAGEABLE without conventional pest control products.

For almost a decade, observers have WARNED THE GOLF INDUSTRY that it should not feel too smug about its PROVINCIAL AND MUNICIPAL PESTICIDE BAN EXCEPTION STATUSES. (See link below.)

And now, with the IMPOSITION OF A NEAR TOTAL PROHIBITION AGAINST CHLOROTHALONIL, observers are forced to continue to repeat their WARNING — ANTI-PESTICIDE TERRORISM WILL NEVER END until the Golf Industry has LOST all of its conventional pest control products.

The Golf Industry is now SUFFERING from the spread of the very same type of PROHIBITIONS that began DESTROYING the Professional Lawn Care Industry since the 1990s.

These CURRENT ATTACKS against the Golf Industry were predictable, but, sadly, the WARNINGS were NAIVELY IGNORED by the POMPOUS AND IDIOTIC leadership and administrators.

In fact, Canadian Golf Superintendents Association (CGSA) Trade Association has IGNORED the supreme, historic, and crucial opportunity to join forces with the Professional Lawn Care Industry, and LITIGATE AGAINST ANTI-PESTICIDE TERRORISM.

Seemingly, the elected leadership and administrative staff of trade associations like Canadian Golf Superintendents Association (CGSA) PREFERS TO WALLOW in an ATTITUDE DENIAL AND PROTECTIONISM, in EXPRESSIONS OF MOCK-DISMAY AT ANY FORM OF CRITICISM, and PETTY IN-FIGHTING AND BLOOD FEUDS.

A VINTAGE EXAMPLE of CGSA's PETTY IN-FIGHTING AND BLOOD FEUDS involved its decision to unceremoniously and disgracefully dump the beloved founding father of CGSA and its official publication, GreenMaster magazine — Gordon Witteveen. (See links below.)

CGSA INVITES DESPICABLE AND POINTLESS EFFORTS TO DISTRACT ITS MEMBERSHIP from the REAL issues facing the Golf Industry.

CGSA has yet to make amends to Witteveen's memory and to offer restitution to his family.

Another VINTAGE EXAMPLE of CGSA's ABILITY TO DISTRACT ITS MEMBERSHIP involved its decision to SUPPORT THE ANNIHILATION of the Professional Lawn Care Industry rather than join forces to fight fanatical PROHIBITION. (See links below.)

More precisely, Canadian Golf Superintendents Association (CGSA) has INCOMPREHENSIBLY IMPLEMENTED ACTIONS that are indicative of its INABILITY TO MAKE ANY SOUND DECISIONS because of its WEAK leadership and administrators.

For example, CGSA has INCOMPREHENSIBLY SUPPORTED THE PROHIBITION of pest control products used in the Urban Landscape in jurisdictions like Ontario.

Despite its FALSE-HOPES that « *the entire industry must work together* », CGSA TORPEDOED and HELPED DESTROY the Professional Lawn Care Industry, which suffered CATASTROPHIC CARNAGE because of PROHIBITION.

According to CGSA in April 2008 — « [...] associations like the CGSA and Royal Canadian Golf Association [...] applauded [Ontario Premier] McGuinty and the governing Liberals for making this announcement [regarding the Ontario prohibition] . [A] reason for the golf industry's support of this provincial initiative stems from the fact we will be exempted ».

Is Canadian Golf Superintendents Association (CGSA) the only trade association with POMPOUS AND IDIOTIC leadership and administrators who INCOMPREHENSIBLY SUPPORT PROHIBITION !?!?

No.

Here is a list of those trade associations that CONTRIBUTED to the END of the Golf Industry's Pesticide Ban Exception Status —

- Canadian Golf Superintendents Association
- Golf Canada (Royal Canadian Golf Association)
- United States Golf Association
- Western Canada Turfgrass Association

The BLACK DEATH was, or will be, THEIR fault !

Future generations will ask the question — WHY DID YOU NOT ACT AGAINST PROHIBITION ?!?!

The Demise Of The Golf Industry Is Imminent !

The End Of The Golf Industry's Pesticide Ban Exception Status

**Proposal By Health Canada To Impose National Prohibition Against
CHLOROTHALONIL**

CHLOROTHALONIL is the active ingredient found in fungicides (disease control products) used by the Golf Course Industry.

Fungicide products, such as Daconil 2787 Flowable (chlorothalonil), have been used on all areas of golf courses, like greens, tees, and fairways.

It is a broad-spectrum eradicant fungicide for the control of most foliar diseases in turf.

Daconil 2787 Flowable controls the following disease pests that damage turfgrasses ...

- Anthracnose
- Brown Patch
- Dollar Spot
- Gray Snow Mold (*Typhula incarnata*)
- Leaf Spot (*Helminthosporium* spp)
- Pink Snow Mold (*Microdochium nivale*)

In both Canada and the United States, Daconil 2787 W-75 Turf Care (CHLOROTHALONIL) was registered for the first time on July 1st, 1967.

Thirteen years later, on December 24th, 1980, an improved version was registered, known as Daconil 2787 Flowable.

In 2002, Daconil 2787 W-75 Turf Care was allowed to expire in Canada, although flowable formulations have continued until 2016.

On July 19th, 2006, Daconil Ultrex was registered for the first time.

On February 9th, 2016, Health Canada PROPOSED TO ALMOST ENTIRELY PROHIBIT THE USE OF CHLOROTHALONIL ON TURF, except for a single time per year, and JUST FOR SNOW MOLD CONTROL.

Health Canada based its CHLOROTHALONIL PROHIBITION on its human health risk assessment.

Within the Government of Canada, Health Canada's Pest Management Regulatory Agency (PMRA) is responsible for administering the Pest Control Products Act on behalf of the Minister of Health.

The End Of The Golf Industry's
Pesticide Ban Exception Status

**Goodbye
Neonicotinoid
Insecticides !**

FORCE OF NATURE | DARING TO DEFY WITH THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against HUE that seek to harm the Green space and other industries (NORAHQ)

Background Information

Description Of **NEONICOTINOID INSECTICIDES**

IMIDACLOPRID and CLOTHIANIDIN are the active ingredients found in Neonicotinoid Insecticides (insect control products) used by the Golf Course Industry and the Professional Lawn Care Industry.

Neonicotinoids, such as Merit Solupak Insecticide (IMIDACLOPRID) and Arena 50 WDG (CLOTHIANIDIN), have been used on all areas of golf course turfgrass and sod farms; and used in professional lawn care on residential home lawns; municipal and recreational parks, playgrounds, and sports fields; and industrial shopping complexes, airports, and cemeteries.

Arena 50 WDG (CLOTHIANIDIN) controls the following insect pests that damage turfgrasses ...

- Annual Bluegrass Weevil
- Asiatic Garden Beetle
- Bluegrass Billbug
- European Chafer
- European Crane Fly (Leather Jacket)
- Hairy Chinch Bug
- Japanese Beetle
- Masked Chafers
- Oriental Beetle

Merit Solupak Insecticide (IMIDACLOPRID) controls the following insect pests that damage turfgrasses ...

- Black Turfgrass Ataenius
- European Chafer
- European Crane Fly
- Japanese Beetle

In Canada, Merit Solupak Insecticide 75 Per Cent Wettable Powder WSP (IMIDACLOPRID) was registered for the first time on July 9th, 1999.

In 2000, Nu-Gro Corporation was appointed by Bayer as the exclusive supplier of Merit insecticide.

In Canada, Arena 50 WDG (CLOTHIANIDIN) was registered for the first time on October 13th, 2009.

The Province of Quebec became the FIRST PROVINCIAL JURISDICTION to IMPOSE PROHIBITION against pest control products used in the Urban Landscape, in the period 2003 to 2006.

The PROHIBITION was implemented under the Pesticide Management Code, over a three-year period, in force since April 3rd, 2003, and implemented on April 3rd, 2006.

Although the Province of Quebec PROHIBITED products like 2,4-D, it is a little-known fact that Quebec DID NOT PROHIBIT ALL PEST CONTROL PRODUCTS, and continues to PERMIT several conventional products.

PERMITTED products included Acclaim Herbicide, Betasan Herbicide, Deltagard Insecticide, Dicamba Herbicide, Dimension Herbicide, **Imidacloprid Insecticide**, and Spinosad Insecticide.

In the Province of Quebec, the Agriculture and Golf Industries were provided with a Pesticide Ban Exception Status — thankfully, Mr William H Gathercole crafted the original Golf Industry Exception Status, which has endured to this day for virtually all jurisdictions in North America.

The End Of The Golf Industry's Pesticide Ban Exception Status

Decision By Montreal To Impose Municipal Prohibition Against NEONICOTINOID INSECTICIDES

Montreal is the largest city in the Province of Quebec, and the second largest city in Canada, with a population of over 1,600,000.

On December 10th, 2015, the City of Montreal IMPOSED A TOTAL MUNICIPAL PROHIBITION against ALL NEONICOTINOID INSECTICIDES – WITHOUT EXCEPTION.

In the past, NEONICOTINOID INSECTICIDES were been RESTRICTED in Montreal, where citizens and businesses could obtain a TEMPORARY PERMIT to use them to control vermin or ants.

Montreal's MUNICIPAL PROHIBITION includes ALL GOLF FACILITIES located within its jurisdiction, including –

- Club De Golf De L'Ile De Montreal
- Club De Golf Le Village
- Club De Golf Meadowbrook
- Club De Golf Metropolitain Anjou
- Golf Ile Des Soeurs

Montreal's FANATICAL PROHIBITION is in-line with a larger strategy by the Province of Quebec to IMPOSE ITS OWN PROHIBITION.

Overall, NEONICOTINOID INSECTICIDES will NOT harm bees when used properly.

THE RECKLESS PESTICIDE-HATING CITY OF MONTREAL IS WRONG !

FANATICAL PROHIBITION IN MONTREAL WILL NOT SAVE BEES !

If Montreal's elected officials were not so scientifically illiterate, they would know that scientific research shows that, as reported through EPA's and Health Canada's vast toxicology database, NO HARMWILL OCCUR to bees when NEONICOTINOID INSECTICIDES are used properly.

On January 5th, 2016, Health Canada's Pest Management Regulatory Agency (PMRA) and the U.S. Environmental Protection Agency (EPA) released their preliminary assessments, both of which show A LIMITED NUMBER of situations where some NEONICOTINOID INSECTICIDES pose risk to pollinators. (See links below.)

FANATICAL PROHIBITION IN MONTREAL WILL NOT SAVE BEES !

Montreal's Municipal Prohibition Against Neonicotinoid Insecticides In 2015 Will Signal The End Of The Golf Industry's Pesticide Ban Exception Status !

The Decision By Montreal To Impose Municipal Prohibition Against Neonicotinoid Insecticides Is Being Instigated And Urged By The Pesticide-Hating Liberal Party Of Canada !?! (See later segment.)

FORCE OF NATURE | DARING TO DEFY WITH THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against HUUJ that seek to harm the Green space and other industries (NORAHG)

The End Of The Golf Industry's Pesticide Ban Exception Status

The Imminent Decision By Quebec To Impose Provincial Prohibition Against **NEONICOTINOID INSECTICIDES**

Quebec is the second-most populous province in Canada, with a population of almost 8,000,000.

On November 22nd, 2015, the Government of Quebec, which is INFESTED with Bee-Conspiracy Fanatics, announced that it will impose RESTRICTIONS (i.e. PROVINCIAL PROHIBITION) against the use of NEONICOTINOID INSECTICIDES.

Asked whether his government would plan to impose PROHIBITION against the use on the popular seed treatment, as Ontario has done, Premier Philippe Couillard, a medical doctor, simply said YES.

According to the province's strategy document entitled Quebec Pesticide Strategy 2015-2018 —

In order to achieve its vision, Québec will implement a framework for encouraging best practices when using pesticides.

This will involve tightening pesticide use conditions and the implementation of action aimed at increasing user accountability.

Both are part and parcel of the Québec Pesticide Strategy 2015-2018, which seeks to protect :

- *Public health, by increasing RESTRICTIONS [i.e. **PROVINCIAL PROHIBITIONS**] on the use of pesticides on LAWNS, trees and shrubs in urban environments such as public parks, and the health of farmers, by tightening the supervision of HIGHEST-RISK PESTICIDES [?!?!] used in AGRICULTURE*
- *Pollinators, by reducing their exposure to NEONICOTINOIDS*
- *The environment, by limiting the risk of contamination*

*The use of all NEONICOTINOIDS on lawns and flower beds for esthetic purposes will be BANNED [i.e. **PROHIBITED PROVINCIALY**].*

*This proposal will allow Québec to join Ontario's approach, which since 2009 has BANNED [**PROHIBITED PROVINCIALY**] the use of pesticides (*

including NEONICOTINOIDS) for esthetic purposes on lawns and in individual gardens.

Québec will make it mandatory for NEONICOTINOID-COATED SEED use to be JUSTIFIED IN ADVANCE by a professional agronomist, as is the case in Ontario.

But Québec will go even farther in this direction, because in addition to covering seeds coated with NEONICOTINOIDS, its approach will also add the requirement of justification by an agronomist before HIGHEST-RISK PESTICIDES [?!?!] (such as those that include NEONICOTINOIDS, atrazine and chlorpyrifos) are used.

As well, the application of these pesticides will be subject to more stringent regulations, in particular in regard to mandatory minimum distance near inhabited areas.

Québec's approach also differs from Ontario's in that Ontario seeks to reduce the area planted with coated soya and corn seed, while Québec looks to reducing the risk to public health, pollinators and the environment by reducing the use of the MOST DANGEROUS PESTICIDES [?!?!] on all crops.

In 2013, Bee-Conspiracy Fanatics (under the guise of a Committee For Protecting Pollinators From Pesticides) within the Government of Quebec produced a SLIDE PRESENTATION to validate FANATICAL PROHIBITION against NEONICOTINOID INSECTICIDES. (See link below.)

As seen in the SLIDE PRESENTATION, it is surprising to see that NO ONE from Quebec's Golf and Professional Lawn Care Industries took the time to advocate the VALUE and DESPERATE NEED for NEONICOTINOID INSECTICIDES used in the Green Space Industry.

These industries SHOULD have been present on the Committee For Protecting Pollinators From Pesticides, which has been active since at least 2013.

Recent media reports have now indicated the provincial and municipal officials in Quebec are proposing TOTAL FANATICAL PROHIBITIONS against NEONICOTINOID INSECTICIDES.

If Quebec's government officials were not so scientifically illiterate, they would know that scientific research shows that, as reported through EPA's

and Health Canada's vast toxicology database, NO HARM WILL OCCUR to bees when NEONICOTINOID INSECTICIDES are used properly.

On January 5th, 2016, Health Canada's Pest Management Regulatory Agency (PMRA) and the U.S. Environmental Protection Agency (EPA) released their preliminary assessments, both of which show A LIMITED NUMBER of situations where some NEONICOTINOID INSECTICIDES pose risk to pollinators. (See links below.)

The End Of The Golf Industry's Pesticide Ban Exception Status

**Decision By Health Canada To Impose National Prohibition Against
CARBARYL**

CARBARYL is the active ingredient found in insecticides (insect control products) used by the Golf Course Industry and the Professional Lawn Care Industry.

CARBARYL products control the following insect pests that damage turfgrasses ...

- Ants
- Chinch Bugs
- Cutworms
- Earwigs
- European Chafer
- Fall Armyworm
- Fleas
- Japanese Beetle
- Leafhoppers
- Leather Jackets
- Millipedes
- Mosquitoes
- Sod Webworms

In the United States, CARBARYL was registered for the first time as an insecticide in 1956 — it was the first successful chemical in the carbamate group of insecticides.

In Canada, Sevin Brand 50W Carbaryl Insecticide Wettable Powder was registered for the first time on July 1st, 1958.

Other CARBARYL products have been first registered until the 1980s, such as ... Sevin SL Liquid Suspension (July 1st, 1977), Chipco Sevin T&O (June 9th, 1981), and Sevin Brand XLR (July 10th, 1981).

On March 31st 2016, Health Canada announced that the following uses of CARBARYL products WILL BE CANCELLED (i.e. NATIONALLY PROHIBITED)

—

- **ALL TURF APPLICATIONS** IN COMMERCIAL AND RESIDENTIAL AREAS, including lawns, sod farms and **GOLF COURSES**.
- All domestic class products.

- Commercial application of CARBARYL in residential settings including ornamentals, vegetable gardens, and fruit trees in residential areas.
- Various crops (alfalfa, apples (insecticide use), apricot, barley, broccoli, Brussels sprouts, cabbage, cauliflower, cherries, clover, corn (sweet & field), grapes, kale, oats, peach, pears, peppers, plums, prunes, rye, snapbeans (hand harvest only), strawberries, sweet white lupin, wheat).
- Balsam fir, spruce, farm woodlots, municipal parks and rights-of-way for control of spruce budworm.

According to Health Canada, certain CARBARYL products or uses POSE RISKS OF CONCERN TO HUMAN HEALTH and DO NOT MEET HEALTH CANADA'S CURRENT STANDARDS FOR HUMAN HEALTH PROTECTION.

RESIDENTIAL USES OF CARBARYL ON TURF, ORNAMENTALS, FRUIT TREES AND VEGETABLE GARDENS ARE OF CONCERN.

RESIDENTIAL USES are performed in AREAS where by-standers, including children, could be exposed to CARBARYL during or after application.

This includes homes, schools, public buildings or any other areas where the general public including children could be exposed.

Health Canada has decided that THESE USES OF CARBARYL WILL BE CANCELLED (i.e. NATIONALLY PROHIBITED).

Estimates of exposure using turf transferable residue data and dislodgeable foliar data, as well as CARBARYL specific bio-monitoring data did NOT achieve the target margin of exposure (MOE) and/or aggregate risk index for adults and children for all post-application exposure scenarios and some application scenarios, and are therefore OF CONCERN.

RISKS OF CONCERN remained even after consideration of all feasible mitigation measures.

According to Health Canada, CANCER RISKS ARE NOT OF CONCERN to any residential population for the remaining uses of CARBARYL.

**The National Prohibition Against Carbaryl
Signaled The End Of The Golf Industry's**

Pesticide Ban Exception Status !

The End Of The Golf Industry's
Pesticide Ban Exception Status

**Goodbye
Quintozene !**

FORCE OF NATURE | DARING TO DEFY WITH THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against HWE that seek to harm the Green space and other industries (NORAHG)

The End Of The Golf Industry's Pesticide Ban Exception Status

Decision By Health Canada To Impose National Prohibition Against **QUINTOZENE**

QUINTOZENE is the active ingredient found in (disease control products) that was used by the Golf Course Industry.

The active ingredient QUINTOZENE is also referred to as PCNB.

QUINTOZENE products were used on all areas of golf courses, like greens, tees, and fairways.

QUINTOZENE products control the following disease pests that damage turfgrasses ...

- Brown Patch (on some labels)
- Snow Molds

In Canada, Quintozene 75 Per Cent Wettable Powder Fungicide (QUINTOZENE) was registered for the first time in 1959.

Plant Products registered QUINTOZENE again in 1972.

In 2004, Crompton Co. registered an improved version of QUINTOZENE, called Terraclor Flowable Fungicide.

On June 24th, 2010, Health Canada announced that it was PHASING-OUT (i.e. NATIONALLY PROHIBITING) QUINTOZENE fungicide from the Golf Industry.

According to Health Canada, products containing QUINTOZENE used on turfgrasses DID pose an unacceptable risk to human health and the environment, and, consequently, DID NOT have value since many other products could be used as alternatives to replace it for the control of Snow Mold Diseases.

After its re-evaluation of QUINTOZENE, Health Canada DID grant EXCEPTION STATUSES for the continued registration of certain uses other than turfgrasses.

According to Health Canada, products containing QUINTOZENE used on cole crops and for ornamental bulb dip treatments DID NOT pose unacceptable

risk to human health or the environment, and DID have an agricultural value when used according to the label directions.

ALL other uses of QUINTOZENE, which included turfgrasses, were to be PHASED-OUT (i.e. NATIONALLY PROHIBITED) due to the health and environmental concerns.

Within the Government of Canada, Health Canada's Pest Management Regulatory Agency (PMRA) is responsible for administering the Pest Control Products Act on behalf of the Minister of Health.

National Prohibition Against Quintozene In 2010 Signaled The Beginning Of The End Of The Golf Industry's Pesticide Ban Exception Status !

LIBERAL CARNAGE

Liberal Party Of Canada (LPC), With Justin Trudeau As Leader, Is A Post-Modern Hating Left-Wing
Enviro-Lunatic Regime, And It Subversively Conspires To Impose Prohibitive Arbitrary Prohibition
Against Pest Control Products Used In The Urban Landscape And By The Agriculture Industry.

NATIONAL Prohibition

Will Be
Imposed By
The Trudeau
Government

FORCE OF NATURE | THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from NORMAN
National Organization Responding Against HUE that seek to harm the Green space and other ecosystems.

Background Information

Decisions By Health Canada To Impose National Prohibitions Are Being Perpetrated By The Pesticide-Hating Liberal Party Of Canada ?!?!

The NATIONAL PROHIBITIONS against IPRODIONE, CHLOROTHALONIL, and CARBARYL come as NO SURPRISE since the decisions by Health Canada are being implemented within mere months after the Pesticide-Hating Liberal Party won in the Canadian General Election on October 19th, 2015.

The Liberal Party of Canada is the oldest federal political party in Canada.

On April 14th, 2013, Justin Trudeau, son of former Prime Minister Pierre Trudeau, was elected leader of the Liberal Party.

The party espouses the principles of liberalism, and generally sits at the center of the Canadian political spectrum, although many of its fanatical operatives conspire to impose NATIONAL PROHIBITION against conventional pest control products.

Recently, Liberal Party of Canada has DESPICABLY OPERATED AS THE POLITICAL SHIELD for Anti-Pesticide & Environmental-Terrorist Organizations, like World Wildlife Federation Canada (WWF).

As expected, after winning the Canadian General Election on October 19th, 2015, Liberal-Fanatics quickly CONSPIRED TO IMPOSE NATIONAL PROHIBITION against pest control products.

Do Canadians want to be governed by fanatical Liberal Party operatives who are the LAP-DOGS of RADICAL ORGANIZATIONS like World Wildlife Federation Canada and others ?!?!

**The Election Of The Liberal Party Of Canada
In 2015 Signaled The End Of The Golf Industry's
Pesticide Ban Exception Status !**

Background Information

Liberal Party of Canada Demands For Prohibition

BE IT RESOLVED that the LIBERAL PARTY OF CANADA urge the federal government to introduce an IMMEDIATE MORATORIUM [i.e. PROHIBITION] ON THE COSMETIC USE OF CHEMICAL PESTICIDES until such a time as their use has been scientifically proven to be safe and the long-term consequences of their application are known.

[Excerpt from Liberal Party of Canada Policy Resolution on Cosmetic Use of Pesticides, March 16-19, 2000.]

BE IT RESOLVED that the Liberal Party of Canada call for the Pest Management Regulatory Agency (PMRA) to SUSPEND [i.e. PROHIBIT] IMMEDIATELY ITS REGISTRATION OF ALL NEONICOTINOID-BASED COMPOUNDS, RESULTING IN AN IMMEDIATE MORATORIUM [i.e. PROHIBITION] ON THE SALE AND USE OF THIS CLASS OF TECHNOLOGY IN CANADA.

[Excerpt from Liberal Party of Canada Policy Resolution on Neonicotinoid Insecticides, 2014.]

In March 2000, Liberal Party of Canada issued its « *Policy On Cosmetic Use of Pesticide* » which urged the federal government to introduce an IMMEDIATE MORATORIUM [i.e. PROHIBITION] against pest control products used in the Urban Landscape.

According to Pesticide-Hating Liberal-Fanatics, the MORATORIUM, or PROHIBITION, needs to be invoked until these products have been scientifically proven to be safe.

In fact, pest control products are SCIENTIFICALLY-SAFE, and will NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT.

<http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha>
<http://wp.me/p1jq40-5ni>

Background Information

Liberal Party of Canada Policy Resolution on Cosmetic Use of Pesticides, March 16-19, 2000 — Full Text With Background Information

WHEREAS chemical pesticides are inherently TOXIC [?!?!] products designed to KILL [?!?!] various life forms; [Wrong !]

[COMMENTARY — **PEST CONTROL PRODUCTS ARE COMPLETELY SAFE !** — Pest control products used in the urban landscape selectively and effectively control disease, insect, and weed pests, but are completely safe for other non-target organisms — they do not injure turfgrasses, and have NO persistence beyond season of use. These products can be used safely because the amount required to affect human health is significantly higher than any potential level of exposure.]

[MORE COMMENTARY — **PEST CONTROL PRODUCTS ARE SCIENTIFICALLY-SAFE !** — EPA, Health Canada, and other science-based national regulatory agencies have clearly demonstrated that pest control products used in the Urban Landscape are LESS TOXIC THAN Aspirin, baking soda, caffeine, cannabis, nicotine, table salt, and Tylenol. Additionally, these products are NO MORE TOXIC THAN ethanol (an edible beverage constituent in beer, wine, and other intoxicating beverages), mouthwash (Listerine), and Vitamin C. These pest control products are scientifically-safe, practically non-toxic, will cause NO harm, will NOT cause cancer, and will NOT cause irreversible damage if consumed orally. The probable lethal dose for a person ingesting the concentrated form of many of these products is ONE LITRE, the volume of an entire milk carton. By comparison, drinking SIX LITRES of water, a fluid that is seemingly harmless, can lead to water poisoning or dilutional hyponatremia, which is a potentially fatal disturbance in brain functions. In essence, water is only FIVE TIMES SAFER than many of these products. Pest control products are SCIENTIFICALLY-SAFE, and will NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT. <http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha> <http://wp.me/p1jq40-5ni>]

WHEREAS reliable ECOLOGICAL, NON-TOXIC METHODS [?!?!] of pest control exist; [Wrong !]

[COMMENTARY — **GREEN ALTERNATIVES ARE BOGUS AND DISMAL FAILURES !** — There are NO methods or alternatives that work. Prohibition is somehow validated by anti-pesticide activists who merely concoct myths against conventional products. <http://wp.me/p1jq40-3jm> When it comes to controlling pests, the use of safe and effective conventional pest control products should be a no-brainer. Anti-pesticide prohibition leads to the catastrophic problems of weed invasion and insect infestation. It is impossible for professionals, and even home-owners, to protect their properties by using so-called green alternative pesticides and practices. <http://wp.me/p1jq40-24g> There are no viable, efficacious, economical, or low-risk alternatives to replace conventional pest control products. Green alternative pesticides are bogus and dismal failures — they do not work and they are not innovative products. <http://wp.me/p1jq40-24g> By definition, alternatives are inferior, which is why they did NOT win the market-place originally. <http://wp.me/p1jq40-5r8> Overall, green alternative pesticides are ineffective, inadequate, inferior, high-risk, more toxic, and stunningly expensive ! In many cases, green alternative pesticides are questionably higher in toxicity, and pose higher environmental risks. Green alternative pesticides and even organic fertilizers often contain living pathogenic organisms, fermented materials, or metals that may be deemed unsafe for children, adults, and the environment. Conventional pest control products are absolutely necessary. Fortunately, conventional pest control products are safe, effective, economical, and low-risk.]

WHEREAS reports published in scientific journals point to strong associations between chemical pesticides and SERIOUS HEALTH CONSEQUENCES [?!?!] including: birth defects, brain cancer, breast cancer, childhood leukemia, stomach cancer, learning disabilities and non-Hodgkin's lymphoma; [Wrong !]

[COMMENTARY — **PESTICIDES CAUSING CANCER IS A MYTH !** — Scientific research shows that, as reported through EPA's and Health Canada's vast toxicology database, NO harm will occur when pest control products are applied properly. All of these products have been evaluated for their carcinogenic potential. <http://wp.me/p1jq40-6yf> Even Canadian Cancer Society's own web-sites state, repeatedly, that scientific research does NOT provide a conclusive link between pest control products and cancer. <http://wp.me/p1jq40-4gc> In fact, scientific research proves that pest control products will cause NO harm and do NOT cause cancer. **PESTICIDES CAUSING CANCER IS A MYTH !** <http://wp.me/p1jq40-2nl> The safety and effectiveness of pest control products is NOT a debatable issue. Overwhelming scientific research has clearly demonstrated that that have NOT been linked to ANY issues related to health and environment. There are thousands of known deaths per year from known cancer-causing factors such as unhealthy diet, physical inactivity, excess body weight, alcohol consumption, and over-exposure to the sun. There are NONE related to pest control products, which are SCIENTIFICALLY-SAFE, and will NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT. <http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha> <http://wp.me/p1jq40-5ni>]

WHEREAS the U.S. National Cancer Institute published a report highlighting the role of pesticides in CANCER CAUSATION; [Wrong !]

[COMMENTARY — **EPIDEMIOLOGY STUDIES ARE OFTEN WRONG !** — According to Dr Richard Doll, The Greatest Epidemiologist Of The 20th Century, there is NO SCIENTIFIC BASIS FOR PESTICIDE BANS. Epidemiological studies that establish so-called links between pest control products and cancer are SO OFTEN WRONG that they are coming close to being WORTHLESS. If a modern « *cosmetic* » pesticide actually caused cancer, it is fairly certain that this would be ascertained through the extensive testing procedures required before it is registered for use by Health Canada. Dr Stan Young is a Statistician at National Institute Of Statistical Sciences In Research, Triangle Park, North Carolina. According to Dr Young — « ... *EPIDEMIOLOGY studies are SO OFTEN WRONG that they are coming close to being WORTHLESS. We spend a lot of money and we could make claims just as valid as a random number generator.* »]

[MORE COMMENTARY — **PEST CONTROL PRODUCTS WILL CAUSE NO HARM !** — There are thousands of known deaths per year from known cancer-causing factors such as unhealthy diet, physical inactivity, excess body weight, alcohol consumption, and over-exposure to the sun. There are NONE related to pest control products, which are SCIENTIFICALLY-SAFE, and will NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT. <http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha> <http://wp.me/p1jq40-5ni>]

WHEREAS approximately 80 percent of all Canadians live and work in (sub) urban areas which allow cosmetic use of pesticides; [So what ?]

[COMMENTARY — **THERE ARE GROWING AND SIGNIFICANT TRENDS AGAINST ANTI-PESTICIDE PROHIBITION !** — There are REAL CONTINENTAL TRENDS against pesticide bans. The following jurisdictions stopped or rescinded or limited or opposed anti-pesticide prohibition, or granted professional lawn care businesses with an exception status ... Alberta (Province), Altona (Manitoba), Ashland (Oregon), Beaumont (Alberta), Belleville (Ontario), British Columbia (Province), Calgary (Alberta), Campbell River (British Columbia), Chicago (Illinois), Durango (Colorado), Edmonton (Alberta), Everett (Washington), Guelph (Ontario), Guelph-Eramosa (Ontario), Kamloops (British Columbia), Kelowna (British Columbia), Merritt (British Columbia), New Brunswick (Province), Newfoundland & Labrador (Province), Ogunquit (Maine), Ontario (Beginning Of Repeal Of Ontario Anti-Pesticide Prohibition & Stopping Of Provincial

Prohibition Against Neonicotinoid Insecticides), Port Alberni (British Columbia), Portage La Prairie (Manitoba), Prince Edward Island (Province), Quebec (Imposed Provincial Prohibition Limited With Permitted Active Ingredients, And Also Invalidated Because Ban Defeated By Lawsuit), Regina (Saskatchewan), Rossland (British Columbia), Salmon Arm (British Columbia), Scarborough (Maine), Saint John's (Newfoundland & Labrador), Saint Josephine (Oregon), Steinbach (Manitoba), Stratford (Prince Edward Island), Stuartburn (Manitoba), USA (A Vast Majority Of States Have Legislated Pre-Emption Laws, Virtually All Proposed Prohibitions Stopped), Vernon (British Columbia), Winkler (Manitoba).
<http://wp.me/P1jq40-1JO> <http://wp.me/p1jq40-6h1> THERE ARE GROWING AND SIGNIFICANT TRENDS AGAINST ANTI-PESTICIDE PROHIBITION. <http://wp.me/P1jq40-1JO> <http://wp.me/p1jq40-6h1> <http://wp.me/P1jq40-85B>
<http://wp.me/p1jq40-81t> <http://wp.me/p1jq40-5ni>]

WHEREAS homeowners and the chemical lawn care industry use products that have NEVER BEEN ADEQUATELY TESTED OR MONITORED [?!?!] for their chronic, synergistic (in-combination) and other effects on human and animal health in residential areas where YOUNG CHILDREN, PREGNANT WOMEN, ELDERLY AND OTHER SUSCEPTIBLE CANADIANS [?!?!] are exposed to pesticides; [Wrong !]

[COMMENTARY — **CHILDREN ARE NOT AT RISK FROM PEST CONTROL PRODUCTS !** — The issues that affect our health have been SUCCESSFULLY RESOLVED ! Canadians have NO NEED TO WORRY ! For every conventional pest control product, manufacturers spend 250 MILLION DOLLARS in order to satisfy federal scientific assessments. TWO-HUNDRED SEPARATE ASSESSMENTS are performed by 350 professional experts at Health Canada to ensure that these products federally legal, scientifically safe, and will cause NO harm. Consequently, there is NOT ONE KNOWN INCIDENT OF HARM from the proper use of conventional pest control products used in the urban landscape. Pest control products are scientifically-safe, and will NOT cause harm to people, animals, or the environment. <http://wp.me/p1jq40-7HR>
<http://wp.me/P1jq40-2ha> <http://wp.me/p1jq40-5ni> CHILDREN ARE NOT AT RISK FROM PEST CONTROL PRODUCTS ! Health Canada DOES consider children's physiology, behaviours, and habits while playing on treated grass, and has concluded that pest control products CAUSE NO HARM and are NO THREAT TO CHILDREN. In fact, there are NO VALID REPORTS of pest control product problems with children. For more information about CHILDREN ARE NOT AT RISK FROM PEST CONTROL PRODUCTS, go to the following links ... <http://wp.me/P1jq40-2ha> <http://wp.me/p1jq40-5ni>]

WHEREAS many of the « safety tests » used to test these products are fundamentally INADEQUATE [?!?!] ; [Wrong !]

[COMMENTARY — **THERE ARE NO UNACCEPTABLE RISK TO HEALTH AND THE ENVIRONMENT !** — Pest control products used in the Urban Landscape SELECTIVELY AND EFFECTIVELY CONTROL disease, insect, and weed pests, but are COMPLETELY SAFE for other non-target organisms — they DO NOT INJURE TURFGRASSES, and have NO persistence beyond season of use. These products can be USED SAFELY because the amount required to affect human health is SIGNIFICANTLY HIGHER than any potential level of exposure. There is NOT ONE KNOWN INCIDENT OF HARM from the proper use of pest control products used in the Urban Landscape. Good Laboratory Practice adopted by national regulatory agencies, like U.S. Environmental Protection Agency (US EPA), German Federal Institute For Risk Assessment, and Health Canada, ensures that pest control products are scientifically-safe, and will not cause harm to people, animals, or the environment. <http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha> <http://wp.me/p1jq40-5ni> Good Laboratory Practice allows national regulatory agencies to be impartial and rigorous. The assessments of all pest control products within the OECD must be conducted under the principles of the internationally-accredited Good Laboratory Practice. The accuracy of laboratory assessments of pest control products is ensured by a set of guidelines and principles developed by the Organization For Economic Co-Operation And Development (OECD), which is called Good Laboratory Practice. The 30 OECD member countries include Canada, the United States, the United Kingdom, Sweden, and Japan have adopted Good Laboratory Practice. All assessments used for the approval of pest control products must be completed by laboratories sanctioned by Good Laboratory Practice (GLP), and using only GLP practices. Ultimately, the cost to manufacturers to get a pest control product assessed for safety and brought to market is about 250 million dollars. That is 250 million dollars MORE than any assessment performed by pesticide-hating fanatics, such as yourself. Only those pest control products that pose NO unacceptable risk to health and environment become government-approved and federally-legal.]

WHEREAS Canada's Minister of Health is charged with « the promotion or preservation of the health of the people of Canada »; [?!?!]

[COMMENTARY — **HEALTH CANADA ASSESSMENTS ENSURE THE SAFETY OF PEST CONTROL PRODUCTS !** — Pest control products are one of the most stringently regulated products in Canada. Pest control products are Health-Canada-approved, federally-legal, scientifically-safe, practically-non-toxic, and will cause NO harm Health Canada requires thorough scientific reviews and safety assessments to ensure that pest control products meet strict health and environmental standards and are shown to have value. All assessments used for the approval of pest control products must be completed by laboratories sanctioned by Good Laboratory Practice (GLP), and using only GLP practices. Health Canada follows the internationally-accredited Good Laboratory Practice for assessing the safety of pest control products. Health Canada has THE ESSENTIAL EXPERTISE on pest control products because it adheres to the OECD Principles of Good Laboratory Practice (GLP). Ultimately, the cost to manufacturers to get a pest control product assessed for safety and brought to market is about 250 million dollars. Health Canada employs over 350 doctorate-level experts and leading scientific experts on pest control products.]

WHEREAS the health risks of chemical pesticide use are of GROWING CONCERN [?!?!] to the Canadian public;

[COMMENTARY — **WE KNOW THE MAJORITY DO NOT WANT PROHIBITION BECAUSE OF LEGITIMATE POLLS !** — No one wants this #@!!% ban nonsense. These polls clearly demonstrate that the public does not want this #@!!% ban nonsense. In 2011, a BC poll conducted by Canadian Consumer Specialty Products Association (CCSPA) showed that the vast majority of residents are opposed to a proposed prohibition against the use conventional pest control products, and they actually favour the continued use of these products around their homes and in public green spaces. <http://wp.me/P1jq40-2bo> In 2011, an Ontario poll showed that the public rejects pesticide bans, and more than half of Ontario residents believed that the provincial government did not do the right thing by imposing an arbitrary pesticide ban. Ontario residents would rather have the ban scrapped or modified. <http://wp.me/P1jq40-3kB> In February 2013, Canadian Association Of Agri-Retailers (CAAR) said there is questionable public support for prohibition against the use of pest control products. <http://wp.me/p1jq40-6iI> In February 2013, a poll conducted by Winnipeg Free Press showed that 60 per cent of the public were opposed to prohibition. <http://wp.me/p1jq40-6ii> In fall 2012, professional lawn care businesses and clients sent to Manitoba government officials the results of a petition with 2,500 post-cards opposing a proposed prohibition, which was overwhelming opposition to anti-pesticide activists who had a mere 1,000 signatures supporting prohibition, with most signatures originating from outside Manitoba. <http://wp.me/p1jq40-5fL>]

[MORE COMMENTARY — **CANADIANS ARE PESTICIDE HOSTAGES !** — There is a SMALL MINORITY of prominent fanatics who subversively conspire to prohibit against the use of pest control products ... holding the public as PESTICIDE-HOSTAGES. These fanatics have vested interests in concocting imaginary danger against these products. They are recklessly and arbitrarily undermining the expert assessments performed by Health Canada.]

*BE IT RESOLVED that the Liberal Party of Canada urge the federal government to introduce an IMMEDIATE MORATORIUM [i.e. PROHIBITION] ON THE COSMETIC USE OF CHEMICAL PESTICIDES until such a time as their use has been **SCIENTIFICALLY PROVEN TO BE SAFE [?!?!]** and **THE LONG-TERM CONSEQUENCES OF THEIR APPLICATION ARE KNOWN [?!?!]***

[COMMENTARY — **PEST CONTROL PRODUCTS ARE SCIENTIFICALLY-SAFE AND WILL CAUSE NO HARM !** — The Liberal Party of Canada is fanatically alarming the public my flailing away with alarmist statements against pest control products. The Liberal Party of Canada is WRONG ! In fact, pest control products are SCIENTIFICALLY-SAFE, and WILL NOT CAUSE HARM. The Liberal-fanatics who demand more restrictions against pest control products are WRONG ! There is NO

need for non-expert Liberal-fanatics to recklessly conspire to impose arbitrary prohibition against pest control products used in the urban landscape. With pest control products, playing surfaces such as sports fields and golf courses are managed by using SAFE AND EFFECTIVE pest control products. Well-maintained pest-free playing surfaces allow players to remain healthy and fit. Overwhelmingly indisputable and conclusive scientific research shows that, as reported through EPA's and Health Canada's vast toxicology database, no harm will occur when pest control products are used according to label directions. The risk assessment of pest control products indicates that they are practically-non-toxic. There is not one known cancer death from the proper use of pest control products used in the urban landscape. There are thousands of known deaths per year from known cancer-causing substances such as unhealthy diet, physical inactivity, excess body weight, alcohol consumption, and over-exposure to the sun. Allegations by Liberal-fanatics about the imaginary danger to the public are TOTALLY FALSE, and are untrue mis-representations designed to alarm and enrage the public for mere electoral votes. Pest control products are SCIENTIFICALLY-SAFE, and WILL NOT CAUSE HARM TO CHILDREN, ADULTS, ANIMALS, OR THE ENVIRONMENT. <http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha> <http://wp.me/p1jq40-5ni>]

The Election Of The Liberal Party Of Canada In 2015 Signaled The End Of The Golf Industry's Pesticide Ban Exception Status !

Background Information

Liberal Party of Canada Policy Resolution on Neonicotinoid Insecticides, 2014 — Full Text With Background Information

POLICY RESOLUTION 2

2. The « *Bees and Farming* » Resolution : Moratorium on Neonicotinoids in Canada

WHEREAS managed hives, wild bees and native pollinators are integral and irreplaceable as pollinators in agriculture and in the natural environment; [So what ?]

[COMMENTARY — **ONLY A VERY LIMITED NUMBER OF BEE-KEEPERS REPORT LOSSES, LESS THAN 1 PER CENT !** — There is NO bee crisis in Canada. Only A VERY LIMITED NUMBER of Bee-Keepers report losses, LESS THAN 1 PER CENT. In 2012, a mere 43 Bee-Keepers alleged losses. In 2013, only 82 Bee-Keepers alleged losses. There are 7,000 Bee-Keepers keeping 600,000 colonies of honeybees across Canada. Essentially, a mere 1.0 per cent of all Bee-Keepers are reporting losses. These represent the Anti-Pesticide Fanatical-Bee-Keepers of Canada. Over 99 per cent of all Bee-Keepers are reporting NO losses. 1 per cent of Bee-Keepers appear to HAVE NO IDEA WHAT THEY ARE DOING, leading some observers to conclude that Bee-Keepers may NOT BE COMPETENT TO RAISE BEES. Bee-Keepers KNOW ALMOST NOTHING ABOUT PEST CONTROL PRODUCTS. Bee-Keepers know full well that VARROA MITES are the primary problem associated

with bee losses, and NOT Neonicotinoid Insecticides. Science and statistics DO NOT SUPPORT demands to PROHIBIT against Neonicotinoid Insecticides in agriculture. If we had less conventional neonicotinoid use in the environment, WE WOULD STILL HAVE Bee Colony Collapse Disorder, because MANY BEE-KEEPERS ARE NOT COMPETENT TO MANAGE THEIR HIVES. PROHIBITION WILL NOT SAVE BEES. <http://tinyurl.com/pxqzh6m> For the whole truth regarding BEES, go to The Pesticide Truths Web-Site ... <http://wp.me/p1jq40-6WJ> <http://wp.me/P1jq40-2BA> <http://wp.me/p1jq40-6H8> <http://wp.me/p1jq40-7ty>]

WHEREAS the economic health of crop and livestock agriculture — which contributes 8 per cent of Canada's total GDP — ultimately relies upon a healthy population of pollinators; [!?!]

[COMMENTARY — **THE HONEYBEE INDUSTRY IS ACTUALLY THRIVING, SO WHO CARES ABOUT GDP !?!** — The Bee-Keeper Industry DOES NOT contribute to 8 per cent of GDP, as IMPLIED by the statement from Liberal Party of Canada. Agriculture continues to play an important role in federal and provincial economies, where it makes a significant contribution to Gross Domestic Product (GDP) and employment, directly providing one in eight jobs, employing 2.1 million people and accounting for 8.0 per cent of total GDP. The Honeybee Industry is actually THRIVING around the world. Here are some examples. THE ONTARIO HONEYBEE INDUSTRY IS THRIVING. <http://wp.me/p1jq40-7Dn> <http://wp.me/p1jq40-8AW> THE CANADIAN HONEYBEE INDUSTRY IS THRIVING — Canada's honey yield is twice the world's average. <http://wp.me/s1jq40-28297> <http://pesticidetruths.com/wp-content/uploads/2012/01/Force-Of-Nature-Myth-BUSTING-Bee-Colony-Collapse-Disorder-2013-09-16-Canada's-Honey-Yield-Is-TWICE-The-World's-Average-pdf-300-dpi1.pdf> THE NORTH AMERICAN HONEYBEE INDUSTRY IS THRIVING. <http://wp.me/p1jq40-8de> THE EUROPEAN HONEYBEE INDUSTRY IS THRIVING — Neonicotinoid Insecticides were still being used in 2013, and yet, 2013 was the lowest European bee loss recorded since 2007. <http://wp.me/p1jq40-8hO> <http://www.scribd.com/doc/217858259/April-2014-EU-Bee-Health-Q-and-a-Bees-Thriving-MEMO-14-260-EN-1>]

WHEREAS Neonicotinoid-Based Insecticides have been subject to MORATORIUMS [i.e. PROHIBITIONS] in other jurisdictions due to the CONCLUSIVE LINKS TO BEE DEATHS [!?!] ; [Wrong !]

[COMMENTARY — **INSECTICIDES CAUSE NO HARM AND DO NOT HURT BEES !** — There is NO EVIDENCE TO SUGGEST A LINK between Neonicotinoid Insecticides and Bee Colony Collapse Disorder. Neonicotinoid Insecticides DO NOT HARM BEES. Bee-Keepers are HARMING BEES, and NOT Neonicotinoid Insecticides. Neonicotinoid Insecticides, like Imidacloprid, are widely used for the control of insect pests in lawns, gardens, ornamental plants, and agriculture. Since 2006, Anti-Pesticide Activists and Bee-Keepers have FALSELY ALLEGED that there are so-called links and causes between the Neonicotinoid Insecticides like Imidacloprid and Bee Colony Collapse Disorder. However, researchers have NOT been able to identify a single cause of Bee Colony Collapse Disorder. The weight of the scientific evidence clearly shows that Neonicotinoid Insecticides DO NOT AFFECT BEES. The exposure of bees to Neonicotinoid Insecticides is at very low levels, far too low to cause harmful effects. Neonicotinoid Insecticides WILL CAUSE NO HARM TO BEES since treated plant tissues contain only tiny amounts of ingredient, bees are not feeding on the plants, and pollen contains barely detectable levels. If some Anti-Pesticide Activists and Bee-Keepers were not so SCIENTIFICALLY ILLITERATE, they would know that scientific research shows that, as reported through EPA's and Health Canada's VAST TOXICOLOGY DATABASE, NO HARM WILL OCCUR TO BEES. Bee Colony Collapse Disorder is THE FAULT OF BEE-KEEPERS and their mismanagement practices. Bee-Keepers are responsible, and NOT Neonicotinoid Insecticides. In their usual method of arriving at SCIENTIFICALLY ILLITERATE CONCLUSIONS, the Anti-Pesticide Activists and Bee-Keepers have somehow CONCOCTED THE IMAGINARY DANGER that Neonicotinoid Insecticides was the reason for Bee Colony Collapse Disorder EVERYWHERE. Of course, this is a MYTH ! Anti-Pesticide Activists and Bee-Keepers are THE LEAST QUALIFIED TO PROVIDE ANY ADVICE concerning Neonicotinoid Insecticides. Anti-Pesticide Activists and Bee-Keepers ALLEGE, with NO SCIENTIFIC PROOF, that Neonicotinoid Insecticides somehow cause Bee Colony Collapse Disorder EVERYWHERE. This is a MYTH ! When used properly, Neonicotinoid Insecticides CAUSE NO HARM, and DO NOT HURT BEES. If we had less conventional neonicotinoid use in the environment, WE WOULD STILL HAVE Bee Colony Collapse Disorder, because MANY BEE-KEEPERS ARE NOT COMPETENT TO MANAGE THEIR HIVES. PROHIBITION WILL NOT SAVE BEES. <http://tinyurl.com/pxqzh6m> For more information regarding BEES, go to The Pesticide Truths Web-Site ... <http://wp.me/P1jq40-2BA> <http://wp.me/p1jq40-6WJ> <http://wp.me/p1jq40-6H8>]

WHEREAS the SYSTEMIC MODE OF ACTION of neonicotinoids means that conventional risk mitigation measures — including causing farmers to modify seeding machinery and planting practices — may impose additional costs on farmers while NOT PROTECTING POLLINATORS FROM HARM; [Wrong !]

[COMMENTARY — **THE SYSTEMIC MODE OF ACTION OF NEONICOTINOID INSECTICIDE ENSURES THAT THERE IS NO HARM TO BEES !** — There is NO bee crisis because of Neonicotinoid Insecticides. The Liberal Party of Canada's reckless and arbitrary demands to prohibit against Neonicotinoid Insecticides will NOT resolve so-called bee colony collapse disorder, and will NOT help bee-keepers with their pest problems. Clearly, the principal mandate of Liberal Party of Canada has been to attract more votes and more donations by scamming the public with the concoction of fraudulent lies and imaginary danger against Neonicotinoid Insecticides. Bees DO NOT consume plant tissues, and, therefore, are NOT harmed by systemic insecticides that penetrate into the plant tissues. Neonicotinoid Insecticides will cause NO harm to bees since treated plant tissues contain only tiny amounts of ingredient, since bees are not feeding on the plants, and since pollen contains barely detectable levels. Responsible bee-keepers readily admit that poor hive management (i.e. starvation, weak colonies, fungal infections, and mite infestations) and weather are most likely to blame for bee losses. Irresponsible & incompetent bee-keepers falsely blame their bee losses on Neonicotinoid Insecticides.]

BE IT RESOLVED that the Liberal Party of Canada call for the Pest Management Regulatory Agency (PMRA) to SUSPEND [i.e. PROHIBIT] IMMEDIATELY ITS REGISTRATION OF ALL NEONICOTINOID-BASED COMPOUNDS, RESULTING IN AN IMMEDIATE MORATORIUM [i.e. PROHIBITION] ON THE SALE AND USE OF THIS CLASS OF TECHNOLOGY IN CANADA;

[COMMENTARY — **SOME BEE-KEEPERS ARE DELIBERATELY ALLOWING THEIR OWN BEES TO DIE IN ORDER TO OBTAIN UNJUSTIFIABLE COMPENSATION !** — The Liberal Party of Canada is ABSOLUTELY WRONG about bee mortalities ! The alleged losses of bees are, in fact, the FAULT of the Bee-Keepers and their MIS-MANAGEMENT PRACTICES. THEY are responsible, and NOT Neonicotinoid Insecticides. Some Bee-Keepers HAVE NO IDEA WHAT THEY ARE DOING, leading some observers to conclude that Bee-Keepers may NOT BE COMPETENT TO RAISE BEES. Why are only a VERY LIMITED NUMBER of Bee-Keepers affected !?! All you have to do is BE INCOMPETENT at bee-keeping, and the government will shower you with vast sums of liquid money. Bee-Keepers seek UNJUSTIFIABLE GOVERNMENT COMPENSATION ! <http://tinyurl.com/l8odbpc> <http://wp.me/p1jq40-77N> <http://wp.me/p1jq40-7VI> In fact, the Canadian Honeybee Industry is actually THRIVING, with the total number of Bee-Keepers in Canada actually RISING DRAMATICALLY since 2008. <http://wp.me/p1jq40-8de> CANADA'S HONEY YIELD IS TWICE THE WORLD'S AVERAGE. <http://wp.me/s1jq40-28297> If Bee Conspiracy Fanatics were not so SCIENTIFICALLY ILLITERATE, they would know that scientific research shows that, as reported through EPA's and Health Canada's vast toxicology database, NO HARM WILL OCCUR TO BEES. Prohibition will not save bees. <http://tinyurl.com/pxqzh6m>]

BE IT FURTHER RESOLVED that pollinator health — including test methodologies to more accurately assess the impact of systemic insecticides — become a more prominent criterion of subsequent REGISTRATION REVIEWS for new agricultural pesticides; [Wrong !]

[COMMENTARY — **THE GOVERNMENT MUST ASSESS IF BEE-KEEPERS ARE DELIBERATELY KILLING THEIR OWN BEES !** — Observers are beginning to speculate that bee-keepers have deliberately killed their bees in order to lay false blame against Neonicotinoid Insecticides. In essence, bee-keepers tampered with the samples provided to Health

Canada. In 2012 and 2013, when Health Canada visited bee-keepers to evaluate their dead bees, there was no legitimate chain of custody for the samples of dead bees that were allegedly poisoned by insecticide. Bee-keepers deliberately killed their bees with the malicious intent of coercing and intimidating government officials into prohibiting insecticides. Health Canada must consider this scenario during its investigation. Health Canada should further investigate as to why only a very limited number of bee-keepers were affected. Between April and June 2012, Health Canada received only a VERY LIMITED NUMBER of reports of bee losses from across southern Ontario, involving a mere 40 bee-keepers, as well as 1 report from Quebec. At present, there are 2,900 bee-keepers in Ontario, therefore, the affected bee-keepers represent less than 1.0 per cent of all bee-keepers in Ontario. In 2013, Health Canada said it continued to receive a VERY LIMITED NUMBER of reports about bee losses. Why are only a VERY LIMITED NUMBER of bee-keepers affected?!?! Why are mere unscientific reports from bee-keepers considered as sufficient evidence to support a radical decision from Health Canada?!?! Why hasn't Health Canada investigated the tampering of samples by bee-keepers?!?! Health Canada must test the bee-keepers' residences and clothing for residue. Observers point out to how much money the bee-keepers will make once they launch a class-action lawsuit that is supported by the politically-motivated decision of Health Canada. Anti-pesticide fanatical-bee-keepers will say anything and do anything in order to increase the profit of their vested interests. Additionally, bee-keepers will say anything and do anything in order to coerce and intimidate government officials into prohibiting insecticides. Anti-pesticide bee-keepers lie about the losses of their bees. Even the most prominent bee-keepers, like Randy Oliver, disagree with them. See link below. Bee-keepers also lie about the fact that bee losses are actually the fault of their mis-management practices. Overall, throughout the rest of the world, there is no legitimate scientific evidence that suggests a link between Neonicotinoid Insecticides and bee losses, or bee colony collapse disorder. If we had less conventional neonicotinoid use in the environment, we would still have bee colony collapse disorder, because many bee-keepers are not competent to manage their hives. PROHIBITION WILL NOT SAVE BEES. <http://tinyurl.com/pxqzh6m> For more information regarding BEE-KEEPERS DELIBERATELY KILLING THEIR OWN BEES and RANDY OLIVER, go to The Pesticide Truths Web-Site ... <http://wp.me/p1jq40-7fX> For more information regarding BEES, go to ... <http://wp.me/P1jq40-2BA> <http://wp.me/p1jq40-6WJ> <http://wp.me/p1jq40-6H8>]

BE IT FURTHER RESOLVED that a Liberal Government contribute scientific leadership in securing the future global vitality of pollinators in collaboration with other countries and the UN-Agricultural Development and Food Security Organization to support the research and monitoring that are needed to improve information on the status of pollinators and establish a framework for CONSERVATION AND RESTORATION OF POLLINATOR SPECIES [?!?!] within two years.

[COMMENTARY — **THE GOVERNMENT MUST RESEARCH AND MONITOR THE BEE-KEEPER INSANITY !** — According to Albert Einstein, the definition of INSANITY is doing the same thing over and over again and expecting different results. What is the definition of BEE-KEEPER INSANITY?!?! Buying new bees, losing more than 40 per cent the following spring, and 30 per cent the next year. Bee-keepers are killing their own bees over and over again. Why is this happening?!?! Observers have concluded that many bee-keepers have NO idea what they are doing, and are NOT competent to raise bees. The alleged losses of bees are, in fact, the fault of these bee-keepers and their mis-management practices. They are responsible since they appear to be unable or unwilling to mitigate issues that harm bees. Why are only a very limited number of bee-keepers affected?!?! Because they are the incompetent bee-keepers with the INSANE management practices. Bee-keepers kill bees, and NOT Neonicotinoid Insecticides. Responsible bee-keepers readily admit that poor hive management (i.e. starvation, weak colonies, fungal infections, and mite infestations) and weather are most likely to blame for bee losses. Irresponsible & incompetent bee-keepers falsely blame their bee losses on Neonicotinoid Insecticide. When will this BEE-KEEPER INSANITY end?!?! Why don't government inspectors and specialists investigate the killing of bees by bee-keepers?!?! For more information about bee-keepers, go to The Pesticide Truths Web-Site ... <http://wp.me/p1jq40-7zT> <http://wp.me/p1jq40-6WJ> <http://wp.me/P1jq40-2BA> <http://wp.me/p1jq40-6H8> <http://wp.me/p1jq40-7ty>]

LIBERALS

Liberal Party Of Canada (LPC), With Justin Trudeau As Leader, Is A Worldwide-Hating Left-Wing Enviro-Lunatic Regime, And It Subversively Conspires To Enforce Censorship And Arbitrary Prohibition Against Pest Control Products Used In The Urban Landscapes And In The Agriculture Industry

**What Will
YOU Do To
Lawfully**

STOP

**The Trudeau
Government
?!?!?!**

FORCE OF NATURE IS THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from NORAHG
National Organization Responding Against HUJE that seek to harm the Green space and other industries

Background Information

Critical Issues For The Golf Industry

TO AVOID ITS IMMINENT DEMISE, and the TOTAL LOSS of ALL of its conventional pest control products, the Golf Industry must immediately address several CRITICAL ISSUES.

The Golf Industry must recognize that it is on a COLLISION COURSE with the LOOMING SHIPWRECK of Anti-Golf and Anti-Pesticide Terrorism !

Regardless of its Provincial Pesticide Ban Exception Statuses, the Golf Industry faces some huge challenges because of its high degree of vulnerability concerning several public affairs issues.

In order to successfully deter the malicious efforts of all Fanatical Golf-Hating Anti-Pesticide Terrorists, the Golf Industry must immediately address the following CRITICAL ISSUES ...

1. **PEST CONTROL PRODUCTS** — The Golf Industry must **STRONGLY ADOPT THE POSITION** that conventional pest control products are scientifically-safe and will cause **NO** harm. The Golf Industry must also **ADOPT** the policy that the **ONLY** course of action against prohibition is through litigation.
2. **PESTICIDE EXCEPTION STATUS** — The Golf Industry must **PLAN** for the inevitable and total revocation of its exception status in most jurisdictions across Canada.
3. **TRADE ASSOCIATIONS** — The Golf Industry's trade associations must **CEASE** publicly supporting the prohibition against conventional pest control products used in the urban landscape. These trade associations must **STOP** torpedoing the Professional Lawn Care Industry.
4. **FERTILIZERS** — The Golf Industry must also **ADOPT** the position that its use of any fertilizers does **NOT** harm the environment.
5. **ANTI-PESTICIDE GOVERNMENT OFFICIALS & ACTIVISTS** — The Golf Industry must **CEASE** its pointless and wasteful attempts to educate and to convince pesticide-hating government officials and activists. These fanatics will **NEVER** reverse their attitudes against conventional pest control products.

6. ANTI-GOLF/ANTI-PESTICIDE ORGANIZATIONS — The Golf Industry must TERMINATE all relationships with all pesticide-hating & environmental organizations that conspire to prohibit against conventional pest control products, like Canadian Cancer Society, World Wildlife Fund, and others.
7. RIGHT-TO-KNOW DATA-BASE — The Golf Industry must CREATE a fully transparent data-base for right-to-know concerning its conventional pest control products.
8. INTEGRATED PEST MANAGEMENT (IPM) — The Golf Industry must CEASE focusing on the ineffective practices of Integrated Pest Management (IPM) as the solution to its public affairs problems. Trade associations allege that the best way to minimize inputs is through the use of integrated pest management (IPM), despite the fact that, overall, IPM cultural practices DO NOT control pests of established turf and ornamentals.
9. ORGANIC PESTICIDE-FREE GOLF FACILITIES — The Golf Industry must ESTABLISH policies for expelling golf facilities using this inaccurate and misleading term from its trade associations. Organic pesticide-free maintenance CANNOT be successful with green alternative pesticides and practices. Additionally, the Golf Industry must VIGOROUSLY EMBARK on a massive public relations campaign to discredit organic pesticide-free maintenance, declaring it as a dismal failure.
10. GREEN ALTERNATIVE PESTICIDES — The Golf Industry must DENOUNCE the so-called green alternatives to conventional pest control products as bogus. Green alternatives like hydrogen peroxide and compost tea do NOT work, and may even be ILLEGAL.
11. ANTI-PESTICIDE TEACHING & RESEARCH INSTITUTIONS — The Golf Industry must also DENOUNCE cultural practices as a so-called « *legitimate alternative* » to the use of conventional pest control products. Cultural practices do NOT work in controlling pests.
12. MAINTENANCE PROTOCOLS — The Golf Industry must DEVELOP and publish golf maintenance protocols and the performance standards expected by its playing customers. These protocols and standards MUST include the regular use of conventional pest control products.
13. GO BROWN — BROWN IS BEAUTIFUL ?!?! — The Golf Industry must OPPOSE go brown anti-cosmetic golf course maintenance. Golfers DO NOT want to play on brown depressing unplayable courses.

14. POLITICAL ACTION — The Golf Industry Must openly and financially SUPPORT all political candidates who oppose any prohibition of pest control products and fertilizers.

15. ANTI-PESTICIDE TEACHING & RESEARCH INSTITUTIONS — The Golf Industry must TERMINATE all relationships with all teaching and research institutions, such as University of Guelph, that VALIDATE and SUPPORT the PROHIBITION against pest control products. ALL joint activities and educational seminars MUST BE ENDED for an indefinite period of time.

exception status has come to an end**

FORCE OF NATURE | DARING TO SPEAK WITH THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against PESTICIDE that seek to harm the Green space and other industries (NORAHG)

To fight the war against Anti-Pesticide Terrorism, you need facts !

Read ... PESTICIDE TRUTHS

Watch ... UNCLE ADOLPH

Listen To ... NORAHG

Learn From ... FORCE OF NATURE

Discover What Anti-Pesticide & Enviro-Lunatic Terrorists Are Doing And Saying About Subversively Imposing Their Life-Style Choices Against Our Society.

Read ... Reports, Blogs, & Videos, From Force Of Nature, NORAHG, Pesticide Truths, & Uncle Adolph — The Whole Truth From An Independent Perspective.

Communities and businesses are being HARMED and DESTROYED and RAPED by LUNATIC-TERRORISTS who ARBITRARILY AND RECKLESSLY IMPOSE PROHIBITIONS against pest control products used in the Urban Landscape and by the Agriculture Industry, and who PERPETRATE OTHER ACTS OF ENVIRONMENTAL TERRORISM.

We are living in the 9|11 Era of Anti Pesticide & Environmental Terrorism where at least ONE SUBVERSIVE ACT OF TERRORISM is perpetrated EVERY SINGLE DAY by LUNATIC-TERRORISTS.

A LUNATIC is a person whose actions and manner are marked by extreme recklessness.

The RECKLESS ACTS OF SUBVERSION by these LUNATIC-TERRORISTS has led to the ARBITRARY IMPOSITION of Anti-Pesticide PROHIBITION in several jurisdictions throughout North America.

The result was CATASTROPHIC CARNAGE !

Because of LUNATIC-TERRORISTS, provinces like Ontario now have a TRAIL OF ECONOMIC DESTRUCTION WITH HUNDREDS OF SMALL BUSINESSES DESTROYED and THOUSANDS OF PEOPLE OUT OF WORK, a MORE DANGEROUS OUTDOOR ENVIRONMENT, and a BLACK MARKET IN PESTICIDES.

Only TRUE LUNATICS would wish to create a TRAIL OF ECONOMIC DESTRUCTION WITH HUNDREDS OF SMALL BUSINESSES DESTROYED and THOUSANDS OF PEOPLE OUT OF WORK.

Because of LUNATIC-TERRORISTS, we are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and

UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOR — scientific research PROVES that pest control products will CAUSE NO HARM and can be USED SAFELY.

An informed public is better able to protect itself and its communities and businesses from LUNATIC-TERRORISTS who are THE LEAST QUALIFIED TO PROVIDE ANY ADVICE about pest control products or the environment.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space and other industries, and the well-being of our communities.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to LUNATIC-TERRORISTS and their Anti Pesticide PROHIBITIONS, resulting in the CLOSURE or ABANDONMENT of green spaces under the RIDICULOUS PRETEXT CONCOCTED BY LUNATICS of somehow « *saving* » the environment.

NORAHG is a NATIONAL NON-PROFIT NON-PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting PESTICIDE FREE FAILURES, as well as the work of RESPECTED & HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

NORAHG strikes back against the MYTHS concerning the need for prohibition against pest control products.

NORAHG RESPONDS on behalf of the VAST SILENT MAJORITY of THE PUBLIC THAT DOES NOT WANT PESTICIDE BANS, and SUPPORTS those who work in the Professional Lawn Care Industry, the Golf Industry, and the Agriculture Industry.

RESPECTED & HIGHLY RATED EXPERTS

<http://pesticidetruths.com/2014/11/14/the-wisdom-of-real-experts-who-speak-out-against-the-conspiracy-to-impose-reckless-and-arbitrary-prohibition-against-conventional-pest-control-products-2014-11-14/>

THE MYTHS ABOUT BANNING PESTICIDES

<http://pesticidetruths.com/2012/11/15/the-myths-about-banning-pesticides-part-2-white-paper-report-on-pesticide-bans-2012-11-15-reports/>

VAST SILENT MAJORITY

<http://pesticidetruths.com/toc/the-wisdom-of-canadian-consumer-specialty-products-association/>

NORAHG is opposed to PESTICIDE FREE jurisdictions where LUNATIC-TERRORISTS have DOOMED CHILDREN to SUFFER INJURIES since Anti-Pesticide PROHIBITION inevitably leads to public and residential green spaces that become DANGEROUS AND PEST-INFESTED GARBAGE DUMPS.

Go to the following links ...

ANTI-PESTICIDE PROHIBITION DESTROYED GREEN SPACES

<http://pesticidetruths.com/toc/carnage-leading-to-garbage-dumps/>

PESTICIDE BANS MADE OUR GREEN SPACES LOOK #@!!% UGLY – PHOTO GALLERY

<http://pesticidetruths.com/toc/carnage-leading-to-garbage-dump-green-spaces-photo-gallery/>

EMERALD ASH BORER – SAFE & EFFECTIVE INSECTICIDES VERSUS CHAIN SAWS

<http://pesticidetruths.com/2014/01/19/emerald-ash-borer-wisconsin-municipalities-safe-effective-insecticide-treatments-versus-chain-saws-2014-01-05/>

NORAHG is concerned that, because of PESTICIDE FREE MAINTENANCE of parks and sports fields, CHILDREN ARE AT HIGHER RISK OF SUFFERING INJURIES with DANGEROUS PLAYING SURFACES CREATED BY #@!!% PESTICIDE BANS.

CHILDREN ARE NOT AT RISK

<http://pesticidetruths.com/toc/children-are-not-at-risk/>

NORAHG pledges to deliver comprehensive reports that are worthy of peoples' time and of peoples' concern, reports that might ordinarily never have breached the parapet.

NORAHG was the brainchild of William H Gathercole and his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder.

Force Of Nature Reports & Blogs were launched by NORAHG for CONTINUOUS transmission on the Internet on January 1st, 2009 — however, the VERY FIRST Stand-Alone Force Of Nature Report was issued on September 19th, 2008.

On March 15th, 2010, Uncle Adolph independently launched The Pesticide Truths, an easy-to-use Web-Site that collects relevant reports of information right-off-the-press.

Primus inter pares, first among equals, describes Pesticide Truths, Uncle Adolph, and Force Of Nature — they are formally equal to each other and are all accorded equal respect.

The Reports & Blogs from Pesticide Truths, Uncle Adolph, and Force Of Nature, in some ways, are like Google for everything concerning the SUBVERSIVE ACTIVITIES of Anti-Pesticide and Enviro-Lunatic Terrorists.

Many of these Reports & Blogs provide a sequence of historical events WITH COMMENTARY, the neutrality of which might be disputed.

This is what we do. Don't thank us. It's a public service. And we are glad to do it.
