# Cosmetic Pesticide & Integrated Pest Management

## Non-Domestic Pesticide Applications

For 2017, The City of Summerside will be enacting a newly adopted **Cosmetic Pesticide and Integrated Pest Management Bylaw (SS-30)**. The intention of this bylaw, is to regulate and monitor the application of allowable non domestic pesticides within the Municipality of Summerside. Under the conditions and regulations of this bylaw, Commercial Companies applying allowable non domestic restricted pesticide products will be required to:

1. Obtain IPM Applicators Certification from Plant Health Atlantic Council of at least person within the Company
2. The Company must be in the process of obtaining **IPM Accreditation from Plant Health Atlantic**
3. Companies applying a non-domestic restricted pesticide must first;
  - a) Meet Infestation Thresholds
  - b) Follow Provincial Guidelines in regards to notifications
4. Companies conducting applications of allowable restricted non domestic restricted pesticides must **obtain a permit from The City**:
  - i. Any permit submitted to The City of Summerside will be subject to criteria Under the City of Summerside Cosmetic Pesticide and Integrated Pest Management Bylaw and Regulations
  - ii. There will be a \$50 Permit fee which will be required before any application under the Cosmetic Pesticide and Integrated Pest Management Bylaw
  - iii. In the event of infestation counts being inconclusive, the City may approve a permit, based on evidence of an infestation.
  - iv. The City of Summerside will process permits as promptly as possible.
  - v. Permits may be submitted by email as well as in person
  - vi. Companies may set up an account for monthly application permit billing
5. IPM Certified Companies applying allowable non domestic pesticides are subject to onsite spot audits from Plant Health Atlantic to ensure regulations are being maintained.
