Welcome to *Vote For Health*
 an initiative of the Canadian Cancer Society, Alberta/NWT Division

On Monday, October 18, Albertans will head to the polls to elect new city and town council members. The Canadian Cancer Society urges you, the voters, to consider health when casting your vote on election day.

The Canadian Cancer Society acknowledges the important role governments play in the prevention of disease. As such, we have educated candidates in municipalities throughout the province on important issues of health and surveyed them for their stance on each. The goal is to identify candidates that support healthy public policies and thereby empower you to *Vote For Health* in your communities.

ELECTION ISSUES

cosmetic pesticides

There is serious concern about the use of non-essential or cosmetic pesticides on private and public spaces. [Read more...](#)

smoke-free parks

Smoking in select outdoor spaces, such as parks and playgrounds, can be detrimental to both our health and the health of the environment. [Read more...](#)

smoke-free vehicles

Prohibiting smoking in vehicles carrying children under the age of 18 will help protect children and youth from the harmful effects of second-hand tobacco smoke. [Read more...](#)
