David Suzuki Is A Lying Sack Of Golf-Hating Crxjp – Responses To LIES Concocted By The #@!!% Suzuki-Documentary – Part 1 – 2017 03 19

March 19, 2017 WILLIAM H GATHERCOLE AND NORAH G

Cancer-Patient Nisker DID NOT Die Because Of Exposure To Pesticides

The #@!!% Suzuki- Documentary Is Filled With LIES & LIES & LIES & LIES

March 19th, 2017

**Background Information & Public Commentary Posted On The Web-
Site Of The Canadian Broadcasting Corporation (CBC)**

Selected And Adapted Excerpts

Re : The Nature Of Things With David Suzuki

Documentary « *Dad and the Dandelions* »

Hosted By David Suzuki

First Aired On March 2nd, 2017

Financed And Released By Canadian Broadcasting Corporation (CBC)

Overview

David Suzuki & His Fanatical-Operatives Conspire To Destroy The Hated Golf Industry With Their Cancer Campaign

For decades, Suzuki, and his fanatical-operatives, have conspired to impose reckless and arbitrary prohibition against pest control products used in the urban landscape.

Suzuki is now attacking the hated golf industry.

Suzuki, with his fanatical-operatives, are attacking the golf industry in every manner possible.

The #@!!% Suzuki-Documentary, « *Dad and the Dandelions* », which first aired on March 2nd, 2017, represents the boldest anti-pesticide attack against the golf industry.

And this was just the beginning.

These attacks will never, NEVER, end !

Why is Suzuki doing this ?!?!

Because David Suzuki hates golfers and despises the game of golf — this is a fact that has been documented for over a decade.

What is Suzuki's objective ?!?!

To attack and destroy the golf industry with LIES about cancer.

Suzuki and his operatives are science-deniers, golf-haters, and pesticide-phobic !

Through their LIES, David Suzuki and his fanatical-operatives have self-designated themselves as the opposition to Health Canada and to every other science-based national government regulator in the world.

The #@!!% Suzuki-Documentary, « *Dad and the Dandelions* », LIES about golf courses and LIES about cancer.

These LIES are concocted despite overwhelming scientific evidence from Health Canada clearly demonstrating that pest control products are scientifically-safe, and DO NOT CAUSE CANCER.

Unfortunately, Suzuki and his operatives have shown that they are unwilling to process, or incapable of understanding, any scientific evidence whatsoever.

They could not care less about ANY facts.

It is far easier to LIE and LIE and LIE and LIE.

They LIE about cancer-patients.

They LIE about health issues.

They LIE about golf course maintenance.

They LIE about golf courses harming golfers.

Do golf courses cause cancer ?!?!

NO ! That is a LIE !

Is golf making people sick ?!?!

NO ! That is a LIE !

Is David Suzuki and his operatives a bunch of lying sacks of golf-hating cr@p ?!?!

NO DOUBT !

Through their LIES, David Suzuki and his fanatical-operatives are leaving a legacy of alarmed & enraged golfers, terrorized & destroyed golf facilities, lost jobs and hardship for golf employees, and weakened communities.

PEOPLE ARE NOT HARMED BECAUSE OF PESTICIDES USED ON THE GOLF COURSE !

Suzuki LIES About Cancer-Patient Nisker

The #@!!% Suzuki-Documentary

Suzuki LIES About Cancer-Patient Nisker

In the #@!!% Suzuki-documentary, it is falsely and strongly implied that golf courses cause cancer, and kill people.

It tells the story of a cancer-patient named Nisker, a golfer who played six days a week, who died from non-Hodgkin's lymphoma, and who, seemingly, never had a health problem.

According to background information posted on the web-site of the Canadian Broadcasting Corporation (CBC) ...

Supposedly, cancer-patient Nisker had a passion for health and fitness. [Where is the proof ?!?!]

Cancer-patient Nisker loved to eat right, he took pride in sharing his knowledge about his healthy discoveries. [Where is the proof ?!?!]

To him, playing golf was a natural, healthy hobby.

Walking the course with his bag on his back, taking in the sun, and breathing fresh air amongst the trees, was his happy place. [So what ?!?!]

But cancer-patient Nisker rarely made the connection between environmental issues and personal health. [?!?!]

CANCER-PATIENT NISKER WAS NOT HARMED BECAUSE OF PESTICIDES USED ON HIS GOLF COURSE !

Suzuki LIES About Cancer-Patient Nisker

NORAHG Responding Against The LIES Concocted By The #@!!% Suzuki-Documentary

Suzuki Is Exploiting Death As A Weapon Of Coercion & Terror

**Cancer-Patient Nisker
Did Not Die Because Of
Exposure To Pesticides**

The #@!!% Suzuki-documentary's exploitation of death is truly a cheap shot, merely designed to alarm and infuriate the public against the golf industry.

Sadly, rather than honor the death of cancer-patient Nisker, who was the father of one of Suzuki's operatives, it was decided to exploit disrespectfully exploit the death with LIES about the cause in order to alarm and enrage the public about pest control products.

The #@!!% Suzuki-documentary exploits death as a weapon of coercion and environmental terror against products that have been clearly shown to be LESS TOXIC THAN Aspirin, baking soda, caffeine, cannabis, nicotine, table salt, and Tylenol.

Curiously, photos of cancer-patient Nisker clearly demonstrate that he WAS NOT healthy while he was playing golf — he looked bloated, fat, pale, stressed, and totally out-of-shape — the perfect candidate for succumbing

to cancer. Perhaps Suzuki should release ALL medical records concerning cancer-patient Nisker, in the spirit of full disclosure.

Regardless, Suzuki and his fanatical-operatives want golfers to think about is they are playing on pesticide-soaked golf courses at their own risk.

They also want golfers to think about is their unrealistic view of what courses should look like — rich, green, and unblemished carpets.

This is none of Suzuki's business !

Suzuki's so-called advice is nothing more than a veiled attack against the golf industry.

Even Canadian Cancer Society has STATED REPEATEDLY that scientific research DOES NOT provide a conclusive link between pest control products and cancer.

DAVID SUZUKI IS A LYING SACK OF ANTI-PESTICIDE & GOLF-HATING CRÛP !

The #@!!% Suzuki-Documentary

Suzuki LIES About Health Issues

The #@!!% Suzuki-Documentary

Suzuki LIES About Health Issues

In the #@!!% Suzuki-documentary, it is falsely and strongly implied that golf courses cause cancer, and kill people.

It tells the story of a cancer-patient named Nisker, a long-time golfer who played six days a week, and who died from non-Hodgkin's lymphoma.

Clearly, cancer-patient Nisker died due to his personal life-style choices.

According to background information posted on the web-site of the Canadian Broadcasting Corporation (CBC) —

Suzuki and his operatives, nevertheless, started hunting for the most unlikely causes about this particular form of cancer.

They arbitrarily decided to investigate the manicured WORLD OF GOLF. [That was a real leap ?!?!]

In this world of pearl white bunkers, and putting greens that look and feel like velvet, Suzuki and his operatives falsely-alleged that these «*green spaces* » are anything but. [?!?!]

There was a lot more than nature at work creating these perfect carpets. [?!?!]

Their investigation led to the ARRAY OF CHEMICALS [i.e. pest control products] being offered to achieve that championship perfection.

Suzuki and his operatives ask ... can golfers themselves learn to kick the chemical habit ?!?!]

In other words, is an organic pesticide-free golf course possible ?!?! [NO !]

Nonetheless, Suzuki and his operatives attempt to coerce, intimidate, and terrorizing golfers into accepting Greening Golf Courses, Suzuki-Style.

They attempt to alarm and enrage golfers by convincing them that if they knew what goes into maintaining the artificial beauty they play on, they'd learn to love dandelions a little more. [?!?!]

In other words, they KNOW NOTHING about pest control products and they KNOW NOTHING golf course maintenance.

SUZUKI & HIS OPERATIVES ARE LYING SACKS OF GOLF-HATING & ANTI-PESTICIDE CRЖP !

Suzuki LIES About Health Issues

NORAHG Responding Against The LIES Concocted By The #@!!% Suzuki-Documentary

Suzuki Is Exploiting Safety Issues That Are Not Debatable

**Cancer-Patient Nisker
Most Likely Succumbed
To His Cancer-Causing
Life-Style Choices, And
Not To Pesticides**

To fight the LIES concocted by David Suzuki, film-maker Nisker, and other fanatical-operatives at Canadian Broadcasting Corporation (CBC), you need facts !

If they were not so scientifically illiterate, they would know that scientific research shows that, as reported through EPA's and Health Canada's vast toxicology database, NO harm will occur when pest control products are applied properly on golf courses.

Of all pest control products, 2,4-D herbicide is the one that they LIE about the most.

They LIE and LIE and LIE and LIE. They NEVER stop !

Overall, pest control products like 2,4-D DO NOT cause cancer.

2,4-D is not only among the most stringently-tested pest control products, it is among the most thoroughly reviewed and re-evaluated.

Even Canadian Cancer Society contradicts David Suzuki since its web-sites state repeatedly that scientific research DOES NOT provide a conclusive link between pest control products and cancer.

David Suzuki and his fanatical-operatives conveniently ignore the fact that here are thousands of known deaths every year from known cancer-causing life-styles such as unhealthy diet, physical inactivity, excess body weight, alcohol consumption, and over-exposure to the sun.

Cancer-patient Nisker most likely succumbed to one these cancer-causing life-styles.

CANCER-PATIENT NISKER DID NOT DIE BECAUSE OF EXPOSURE TO PESTICIDES !

=====

Responding Against Suzuki LIES About Health Issues

Leading Experts Speak Out !

**The Statements From
Leading Experts Prove
That Cancer-Patient Nisker
Did Not Die Because Of
Exposure To Pesticides**

The following LEADING EXPERTS have recognized expertise, training and background in matters concerning pest control products.

Mr Donald L Page and The Industry Task Force II On 2,4-D Research Data

Dr Katharine T von Stackelberg

Dr Leonard Ritter

These REAL experts have spoken out against fanatics like David Suzuki and his operatives, and have publicly stated, in one form or another, that pest control products are scientifically-safe —

Responding Against Suzuki LIES About Health Issues

**Mr Donald L Page & The Industry Task Force II On 2,4-D
Research Data**

**No Association Between
Cancer And 2,4-D Herbicide**

THE 2,4-D TASK FORCE — STATEMENT

Mr Donald L Page of The Industry Task Force II On 2,4-D Research Data issued the following statements that were published in the National Post —

[...] NOT ONE REGULATORY AGENCY IN THE WORLD CLASSIFIES 2,4-D AS A HUMAN CARCINOGEN.

The U.S. National Cancer Institute [NCI] has spent 20 years and millions of dollars testing for any link between 2,4-D and non-Hodgkin's lymphoma.

Its analysis concluded that there is NO ASSOCIATION BETWEEN NON-HODGKIN'S LYMPHOMA AND EVER HAVING USED 2,4-D.

More importantly, NCI researchers concluded —

... while some pesticides may present a CANCER RISK to humans, many, maybe even most, PESTICIDES DO NOT.

CANCER-PATIENT NISKER DID NOT DIE BECAUSE OF EXPOSURE TO PESTICIDES LIKE 2,4-D !

THE 2,4-D TASK FORCE — REFERENCE — NATIONAL POST

THE 2,4-D TASK FORCE — PROFILE

This organization was established to address the regulatory data requirements of the United States Environmental Protection Agency (EPA) and Health Canada's Pest Management Regulatory Agency (PMRA).

The Industry Task Force II On 2,4-D Research Data was formed to work closely with the United States Environmental Protection Agency (EPA) and Health Canada's Pest Management Regulatory Agency (PMRA).

Its role is to fund new research and provide information to each agency as required by their respective pesticide re-registration and re-evaluation programs.

The 2,4-D Task Force is made up of those companies owning the technical registrations on the active ingredient in 2,4-D herbicides.

They are Dow AgroSciences (USA), Nufarm, Ltd. (Australia) and Agro-Gor Corporation (USA & Argentina).

The Industry Task Force II On 2,4-D Research Data has the ESSENTIAL expertise on pest control products.

Responding Against Suzuki LIES About Health Issues

Dr Katherine von Stackelberg & Study On 2,4-D Herbicide

**Health Issues With 2,4-D
Are Highly Implausible**

DR VON STACKELBERG — STATEMENT

Dr Katherine von Stackelberg, of E Risk Sciences and Harvard Center for Risk Analysis, released a report of a study that determined whether there was any validity to the suggestion from some epidemiologic studies that both 2,4-D and MCPA may be associated with an increased risk of Non-Hodgkin's Lymphoma (NHL), Hodgkin's Disease, Leukemia, and Soft Tissue Sarcoma.

The Dr von Stackelberg Study on 2,4-D herbicide concluded —

The combined evidence indicates it is HIGHLY IMPLAUSIBLE that exposure to 2,4-D and/or MCPA are associated with a risk of developing NHL or other lymphohematopoietic cancers.

The Dr von Stackelberg study on 2,4-D herbicide was published in a peer-reviewed scientific publication, the Journal of Toxicology.

According to Dr Katherine von Stackelberg —

I wouldn't hesitate to let my CHILDREN and dogs play on a lawn where lawn care products have been used as long as the products were applied according to their respective labels.

CANCER-PATIENT NISKER DID NOT DIE BECAUSE OF EXPOSURE TO PESTICIDES LIKE 2,4-D !

Responding Against Suzuki LIES About Health Issues

Dr Leonard Ritter & Study On Non-Hodgkin's Lymphoma Rates

No Evidence That Pest Control Products Cause Cancer

DR RITTER — STATEMENT

Dr Leonard Ritter issued the following statements concerning the use of pest control products on Prince Edward Island ...

There is NO EVIDENCE that the safe application of agricultural pest control products causes cancer.

Pest control products are NOT the leading cause of cancer.

Non-Hodgkin's Lymphoma rates, the cancer most often associated with pest control products, are lower than anywhere else in Canada.

Roundup is considered to be among the safest herbicides in the world, and that continues to be the prevailing opinion.

CANCER-PATIENT NISKER DID NOT DIE BECAUSE OF EXPOSURE TO PESTICIDES LIKE ROUNDUP !

The #@!!% Suzuki-Documentary

Suzuki LIES About Golf Course Maintenance

The #@!!% Suzuki-Documentary

Suzuki LIES About Golf Course Maintenance

In the #@!!% Suzuki-documentary, it is falsely and strongly implied that golf courses cause cancer, and kill people.

It tells the story of a cancer-patient named Nisker, a golfer who played six days a week, who died from non-Hodgkin's lymphoma, and who, seemingly, never had a health problem.

According to background information posted on the web-site of the Canadian Broadcasting Corporation (CBC) —

Suzuki's operatives visited Saint Andrew's, Scotland, the birthplace of golf, where the game started out as something very rough and tumble.

And they liked what they saw.

Saint Andrew's golf course was kept in shape by rabbits and grazing cattle, and NOT chemicals (i.e. pest control products).

Is an organic pesticide-free golf course possible ?!?! [NO !]

There are approximately 34,000 golf courses around the world and very, very few DO NOT use pesticides. [Is this some kind of accusation ?!?!]

Suzuki's operatives also visited Martha's Vineyard, USA, to find a so-called « *organic golf course* » (i.e. pesticide-free).

The Vineyard Golf Club became « *organic* » because the community insisted on it.

Their chosen weed killer ?!?!]

White vinegar. [?!?!]

Suzuki and his fanatical operatives attempt to alarm and enrage golfers by convincing them that, if they want to avoid succumbing to cancer, their golf courses must be maintained pesticide-free. [?!?!]

They LIE and LIE and LIE and LIE !

Clearly, they KNOW NOTHING about pest control products and golf course maintenance.

SUZUKI & HIS OPERATIVES ARE LYING SACKS OF GOLF-HATING & ANTI-PESTICIDE CRΞP !

Responding Against The LIES Concocted By The #@!!% Suzuki-Documentary

Suzuki LIES About Golf Course Maintenance

NORAHG Responding Against The LIES Concocted By The #@!!% Suzuki-Documentary

Suzuki Is Exploiting Death As A Weapon To Promote Organic Golf Course Maintenance

**Cancer-Patient Nisker
Would Have Died Anyhow
Even If His Golf Course
Had Been Maintained**

Suzuki-Style

SUZUKI-STYLE IS BOGUS !

The #@!!% Suzuki-documentary's exploitation of death is truly a cheap shot, merely designed to alarm and infuriate the public against the golf industry.

Suzuki and his fanatical-operatives attempt to coerce, intimidate, and terrorize golfers into thinking about cancer if their golf courses have not been maintained Suzuki-style (i.e. organic and pesticide-free).

This is absolute nonsense ! Suzuki is wrong !

Do golf courses cause cancer ?!?! NO !

Is golf making people sick ?!?! NO !

Is there a cancer connection with golf's so-called manicured perfection ?!?! NO !

Those golf courses that adopt Suzuki-style maintenance practices will become garbage dumps green spaces and low-end playing.

Suzuki-style maintenance will provide playing conditions that are unacceptable and will drive golfers away.

Playing surfaces will become thin and yellow, will be over-run with weeds, and will be infested with insects and diseases that destroy the playing surfaces.

Without conventional pest control products, golf courses become pest-infested and unplayable garbage dumps.

It is impossible for golf courses to keep their facilities playable and beautiful by using so-called green alternative pesticides and practices.

Alternative methods of pest control (i.e. green alternatives, organic pesticide-free maintenance, or IPM-cultural-practices) are INEFFECTIVE, and CANNOT BE RELIED UPON to properly maintain a golf course.

Suzuki-style maintenance golf maintenance is impossible, and can only lead to catastrophic playing conditions and business failures.

There will be a lot of unhappy golfers, and bankrupt golf businesses, if the golf industry goes Suzuki-style.

VINEYARD IS BOGUS !

The maintenance practices used at the Vineyard Golf Club, in Martha's Vineyard, are seen as a possible template for so-called chem-junkie or chemical-dependent golf courses.

This is WRONG !

Vineyard is somehow seen as some kind of environmental pioneer, with many in the golf industry needlessly attempting to learn its (failed) maintenance methods.

This is FALSE !

Vineyard serves as a template for inflicting catastrophic golf employee misery by changing their job description to mere cotton-pickers !

At Vineyard, there is no longer a need to employ golf course technicians with professional training.

All they need to know how to do is bend over and pull.

Vineyard has other state-of-the-art pest control practices, such as killing weeds with boiling water or vinegar, and removing moss with kitchen dish detergent.

When compared to the use of safe & effective conventional herbicides, NONE of these practices are effective for the control of invasive weeds.

Additionally, controlling destructive insect and disease pests is impossible.

VINEYARD NEIGHBOURS ARE EXTORTIONISTS !

In fact, Vineyard serves as a template for feeding profit to coercive and golf-hating residents who own homes adjacent to this golf facility.

In case you're wondering ... what is the cost of membership at the Vineyard Golf Club ?!?!

There is a membership cost for ordinary golfers, and a special cost for coercive pesticide-hating residents who own homes adjacent to Vineyard.

For ordinary golfers, the initiation fee is 350 thousand dollars with annual dues of 12 thousand dollars.

Coercive anti-pesticide residents who own homes near Vineyard have been given, yes GIVEN, millions of dollars in membership benefits, FOR ALMOST FREE.

This is the price that Vineyard actually paid to stop pesticide-hating residents from inflicting litigation, coercion, intimidation, and terrorism.

As a condition of its original construction, 125 pesticide-hating residents used environmental issues as a pretext to get stunningly cheaper initiation fees and annual dues.

Profiteering coercive anti-pesticide residents must be accepted by Vineyard as members with NO initiation fee and annual dues of only 725 dollars.

Who says being an pesticide-hating fanatic is not profitable ?!?!

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Jason Pick

To responsibly and accurately evaluate the safety of any product, due diligence requires a toxicologist (s) perspective prior to questioning the validity of approved products by the many teams of scientists at Health Canada. If we are truly committed to curing this terrible disease, our efforts to mitigate the risks should be based upon empirical data and scientific evidence, which simply do not exist. Making a connection to cancer and golf course pesticides, is no more accurate than suggesting a connection to morning coffee, an occasional aspirin, or pinch of salt at dinner time. If we are going to cure it, we need to take a very calculated approach to understanding it's root cause (s). Realizing there are also inherent risks in everything we do, in my view we must weigh these risks to their benefits as a point of personal choice. Personally, I am willing to accept the risk of watching that cold, crowded hockey game, eating the questionable hot dog, even risking the toxicity of a cold beer between periods. But basking in the fumes of traffic on my way home, know that the risks I took were not unreasonable. The benefits of turfgrass in parks, athletic centers, and golf courses also provide many environmental and social benefits which far exceed the risks — hoping the CBC will show both sides in its documentary.

NORAHG Response

Vineyard Is Pesticide-Free Because The Community Insisted On It ... In Return For Millions Of Dollars In Profits !

Vineyard serves as a template for feeding profit to coercive & golf-hating residents who own homes adjacent to this golf facility. In case you're

wondering, what is the cost of membership at the Vineyard Golf Club ?!?! There is a membership cost for ordinary golfers, and a special cost for coercive pesticide-hating residents who own homes adjacent to Vineyard. For ordinary golfers, the initiation fee is 350 thousand dollars with annual dues of 12 thousand dollars. Coercive anti-pesticide residents who own homes near Vineyard were given, yes GIVEN, millions of dollars in membership benefits, FOR ALMOST FREE. This is the price that Vineyard actually paid to stop pesticide-hating residents from inflicting coercion, intimidation, and terrorism. As a condition of its original construction, 125 pesticide-hating residents used environmental issues as a pretext to get stunningly cheaper initiation fees and annual dues. Profiteering coercive anti-pesticide residents must be accepted as members with NO initiation fee and annual dues of only 725 dollars. Who says being an pesticide-hating fanatic is not profitable ?!?!

The maintenance practices used at the Vineyard Golf Club are seen as a possible template for so-called chem-junkie or chemical-dependent golf courses. This is WRONG ! Vineyard is somehow seen as some kind of environmental pioneer, with many in the golf industry needlessly attempting to learn its (failed) maintenance methods. This is FALSE !

Vineyard serves as a template for inflicting catastrophic employee carnage by converting its professional labour force into a group of mere cotton-pickers ! At Vineyard, there is no longer a need to employ golf course technicians with professional training. All they need to know how to do is bend over and pull. Vineyard has other state-of-the-art pest control practices, such as killing weeds with boiling water and removing moss with kitchen dish detergent. When compared to the use of safe & effective conventional herbicides, NONE of these practices are effective for the control of invasive weeds. Additionally, controlling destructive insect pests, such as white grubs, is virtually impossible.

WILLIAM H GATHERCOLE AND NORAHG

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

John Steed

Yet another half-baked CBC attack at business. Par for the course. Last time I looked, professional golfers who spend every day on extremely well maintained courses are no more likely to get cancer as anyone else. Arnold

Palmer died of heart failure at 87, having grown up around golfing and spent practically every day on one.

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Jerry Richard

Let science and research play a part in this discussion rather than emotional guesswork. Don't allow ultimate causes of cancer be passed over by a narrow focus. Be honest.

NORAHG Response

Response To Richard —

All is well since all conventional pest control products used by the golf industry have been evaluated for their carcinogenic potential.

<http://wp.me/p1jq40-6yf> Scientific research proves that pest control products cause NO harm and DO NOT cause cancer. Pest control products causing cancer IS A MYTH. <http://wp.me/P1jq40-2nl> Even Canadian Cancer Society's own web-sites state repeatedly that scientific research DOES NOT provide a conclusive link between pest control products and cancer. <http://wp.me/P1jq40-4qC> YOUR own personal demise is far more likely to be caused by disease, accidents, or suicide (the most likely cause of conspiracy theorists' deaths). The following is a list of the causes of human deaths world-wide, arranged by their associated mortality rates ... • heart disease 30% • cancer 25% • chronic lower respiratory diseases 5% • accidents (unintentional injuries) 5% • stroke (cerebrovascular diseases) 5% • Alzheimer's disease • diabetes • influenza & pneumonia • nephritis, nephrotic syndrome, & nephrosis • intentional self-harm (suicide). There are thousands of known deaths per year from known cancer-causing factors such as unhealthy diet, physical inactivity, excess body weight, alcohol consumption, and over-exposure to the sun. There are NONE related to pest control products, which are SCIENTIFICALLY-SAFE, and will NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT.

<http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha>
<http://wp.me/p1jq40-5ni>

WILLIAM H GATHERCOLE AND NORAHG

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Paul Schofield

In Canada the pesticide laws and restrictions are extremely more severe than those in the US. Canadian golf superintendents and researchers are diligent in the reduction of pesticide use, working with a wide variety of bio products. Only 1% of all pesticides sold in Canada are used on golf courses. The majority of pesticides in Canada are used in agriculture. Golf courses look good from the air, get down on the ground, you will see a lot of weeds. How does all the beautiful nature that is seen on golf courses, birds, deer, ground hogs, fox, fish, species of all kind, survive if there is, as falsely claimed, that pesticides are applied *en masse*. Golf courses, as compared to barren land, act as a tampon which filter the run-off before it gets to the air and water. Golf courses also act as a huge buffer for noise pollution. As Andrew admits how little we know about the complex causes of cancer, yet he is ready to single out golf courses as a contributor. I am very sorry for the loss of Andrew's father, there are many factors which contribute to a person getting cancer.

NORAHG Response

Response To Schofield —

Golf Facilities may be using up to SIX PER CENT OF ALL PESTICIDES.

<http://pesticidetruths.com/wp-content/uploads/2012/08/Force-Of-Nature-Manitoba-Conspiracy-2012-05-23-Looming-Shipwreck-Golf-Uses-Six-Per-Cent-Of-All-Pesticides-Used-pdf.pdf>

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Mike Creed

Utter horse bleep, weed killer also kills Bentgrass, which is 60% of my golf course that's in play. As it is, I only spot spray once per season in rough areas. #fearmongering!

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Paul Brown

A study says that only 3% of fungicides are applied to turf , 97% are applied to fruits, vegetables and other crops, and you were golf shoes while golfing, we don't eat turf. Cohen.S.Z, 1995 GCM.

NORAHG Response

Response To Brown —

Golf facilities may be using up to six per cent of all pest control products.

<http://pesticidetruths.com/wp-content/uploads/2012/08/Force-Of-Nature-Manitoba-Conspiracy-2012-05-23-Looming-Shipwreck-Golf-Uses-Six-Per-Cent-Of-All-Pesticides-Used-pdf.pdf>

WILLIAM H GATHERCOLE AND NORAHG

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Garth Sjolie

Natural landscapes and green spaces within an urban community contain thousands of wildlife species that would not normally be found within a concrete and asphalt jungle. If these spaces were truly this TOXIC, do you think Mother Nature herself would co-habitat and thrive so closely with the avid golfer ? Trout growing in the ponds and bees pollinating the wildflowers, two species highly susceptible to any type of foreign toxins which has been proven by SCIENTIFIC fact, cohabitate within these green spaces. Perhaps Mr Nisker and Mr Suzuki should take a REAL look at the facts concerning Golf Courses and Urban Green Spaces within our communities.

NORAHG Response

We Need A Better David Suzuki Who Will Not Victimize Decent & Hard-Working People !

David Suzuki hates and victimizes people. Is this true ?!?! YES ! Suzuki hates and victimizes people in the professional lawn care industry, and has destroyed its businesses and had put its employees out of work. Suzuki also hates golfers and despises the game of golf. He intends to destroy golf businesses NEXT ! Suzuki, and his fanatical-operatives, have called on all provinces to expand their anti-pesticide prohibitions against ALL golf courses. They have also stated that they DO NOT want any exception statuses for the golf industry. Suzuki intends to leave a legacy of terrorized & destroyed golf facilities, lost jobs and hardship for golf employees, and weakened communities. Suzuki will never stop demanding more arbitrary prohibitions against conventional pest control products. Suzuki's victims have pleaded with him to stop imposing prohibitions, and yet, he never stops abusing, despoiling, plundering, violating, and violently attacking them. It's time to STOP Suzuki, forever. It's time to STOP making donations to David Suzuki. It's also time to for David Suzuki to step down as host of television programs by Canadian Broadcasting Corporation, including the Nature of Things, because of his illegal interference in partisan politics and public policy, and violations of taxation laws. We need a BETTER David Suzuki ! <http://pesticidetruths.com/>

WILLIAM H GATHERCOLE AND NORAHG

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Les Salkeld

As a Lawn Care operator for 30 years, I work with these products almost daily in the spring and fall. All my applications are done by hand. I am not the only one that works in this proximity to the products daily. Why are applicators, like myself, not dying at alarming rates of cancer ? This is another emotion based story, not based of the facts. Typical viewer bait for CBC and David Suzuki.

NORAHG Response

Response To Salkeld —

There is NO health risk associated with the proper application of pest control products on the golf course. Scientific research shows that, as reported through EPA's and Health Canada's vast toxicology database, NO harm will occur when pest control products are applied properly. The risk assessment of pest control products indicates that they are practically-non-toxic. Consequently, it is a fact that pest control products will cause NO harm, including chronic effects such as cancer. <http://wp.me/P1jq40-2nl> There are NO pest control products that are known or probable carcinogens. All pesticides have been evaluated for their carcinogenic potential. <http://wp.me/p1jq40-6yf> Canadian Cancer Society's own web-sites state repeatedly, over and over again, that scientific research does NOT provide a conclusive link between pest control products and cancer. <http://wp.me/P1jq40-4qC> There is NOT ONE known cancer death from the proper use of pest control products used in the urban landscape. And yet, there are thousands of known deaths per year from known cancer-causing substances such as unhealthy diet, physical inactivity, excess body weight, alcohol consumption, and over-exposure to the sun. Pest control products are SCIENTIFICALLY-SAFE, and will NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT. <http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha>

WILLIAM H GATHERCOLE AND NORAHG

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Greg Austin

This emotional appeal is sure to hit home with many people that have suffered through and lost a loved one to cancer. I am among those that have felt the torment.

My father was diagnosed with Non-Hodgkin's Lymphoma and given less than 100 days to live. He was also told he'd likely never walk again. Today, over two years later he's walking and is 100% Cancer free ! I'm wondering

though, as he hadn't golfed in decades, how did he get this disease ? The good news is that we were able to enjoy a day of sunshine and nature together in the beautiful setting of the certified Audubon Cooperative Sanctuary golf course where I work.

I'm sorry for the loss that others have experienced and realize that not everyone is as fortunate as my family is. I'm disappointed that Dr David Suzuki chooses to focus on sensationalized and emotion driven TV programming over science and the true nature of things.

NORAHG Response

To Austin —

Your dad DID NOT get cancer by playing golf. That is absurd ! Scientific research shows that, as reported through EPA's and Health Canada's vast toxicology database, NO harm will occur when pest control products are applied properly. All of these products have been evaluated for their carcinogenic potential. <http://wp.me/p1jq40-6yf> Even Canadian Cancer Society's own web-sites state, repeatedly, that scientific research does NOT provide a conclusive link between pest control products and cancer.

<http://wp.me/p1jq40-4qc> In fact, scientific research proves that pest control products will cause NO harm and do NOT cause cancer. PESTICIDES CAUSING CANCER IS A MYTH ! <http://wp.me/p1jq40-2nl> The safety and effectiveness of pest control products is NOT a debatable issue.

Overwhelming scientific research has clearly demonstrated that that have NOT been linked to ANY issues related to health and environment. There are thousands of known deaths per year from known cancer-causing factors such as unhealthy diet, physical inactivity, excess body weight, alcohol consumption, and over-exposure to the sun. There are NONE related to pest control products, which are SCIENTIFICALLY-SAFE, and will NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT.

<http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha>
<http://wp.me/p1jq40-5ni>

WILLIAM H GATHERCOLE AND NORAHG

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Josh Olson

You state how very little is known about the complexities of various cancers and their causes, yet give very little reasoning behind why you target golf courses specifically. In a world where it seems anything can be toxic, this seems like a stretch. Unless he was walking behind a sprayer and being chronically exposed on a daily basis, I don't see how walking on treated turf could be more harmful than eating food sprayed directly with pesticides? Why not attack non-organic agriculture?

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Jim Moore

@Josh Olson Yes I agree. The world starve if we relied on organic farming. Let's look at the potato famine in Ireland many years before pesticides.

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Rob Wilke

Funny, when I contacted David Suzuki about a natural spray that I designed to decrease our pesticide application totals by 90% they said they weren't interested. Apparently this story has more appeal.

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

John Faber

I certainly hope Mr Nisker took the time to interview Golf Course Superintendents for this documentary. As a professional in this industry with a Bachelor of Science degree, it is my job to provide the best possible conditions, within a budget, while acting as an environmental steward.

The reality is that all golf courses look to limit inputs (water, fertilizer, pesticides) as these are all very expensive line items and the potential revenue stream on a golf course is not large to begin ...

Also, any pesticides that are applied on a golf course have been tested and approved by the PMRA in Canada and the EPA in the USA along with numerous other independent agencies. They are also being applied under strict guidelines by licensed applicators.

In my opinion, if Mr Nisker did not reach out to Golf Course Superintendents for the facts, it completely discredits the biased story he is telling.

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Sherel Purcell

As an avid golfer and travel writer who focuses on golf courses and golf resorts, I love and appreciate this story. Question : Are "Audubon " sanctioned/certified golf courses truly organic ?

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

John Faber

@Sherel Purcell Audubon Certified does not mean " *organic* ". This is an international standard recognizing facilities that have made or are making efforts to be more environmentally friendly. They do not stipulate what can and cannot be done, but it is more about documenting progressions that have been made. Most golf courses could achieve this standard but the paperwork is very extensive and time consuming and there is a monetary cost involved with being recognized.

NORAHG Response

Response To Purcell —

If you enjoy golf so much, why on earth would even remotely like this story ?!?! And who cares about a golf course being organic ?!?! The big issue for you should be adequate playing conditions, and NOT organic nonsense.

WILLIAM H GATHERCOLE AND NORAHG

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Jason Pick

@Sherel Purcell Audubon certification is a voluntary program which covers 6 areas of environmental stewardship. While organic products are encouraged in the program, truly " *organic* " is not an accurate or all-encompassing definition for sustainability. Water conservation, responsible chemical use, outreach and education, wildlife protection and water quality management goals are also among the definition of a sustainable greenspace/golf courses. JPick

On-Line Commentary Concerning The #@!!% Suzuki-Documentary

Simon Taylor

As irrational, biased, dishonest, corrupt and evil Suzuki and his cronies are, the golf industry has it coming. They threw the lawn care industry under the bus thinking it would save them in spite of warnings that this was exactly what would happen.

NORAHG Response

Response To Taylor —

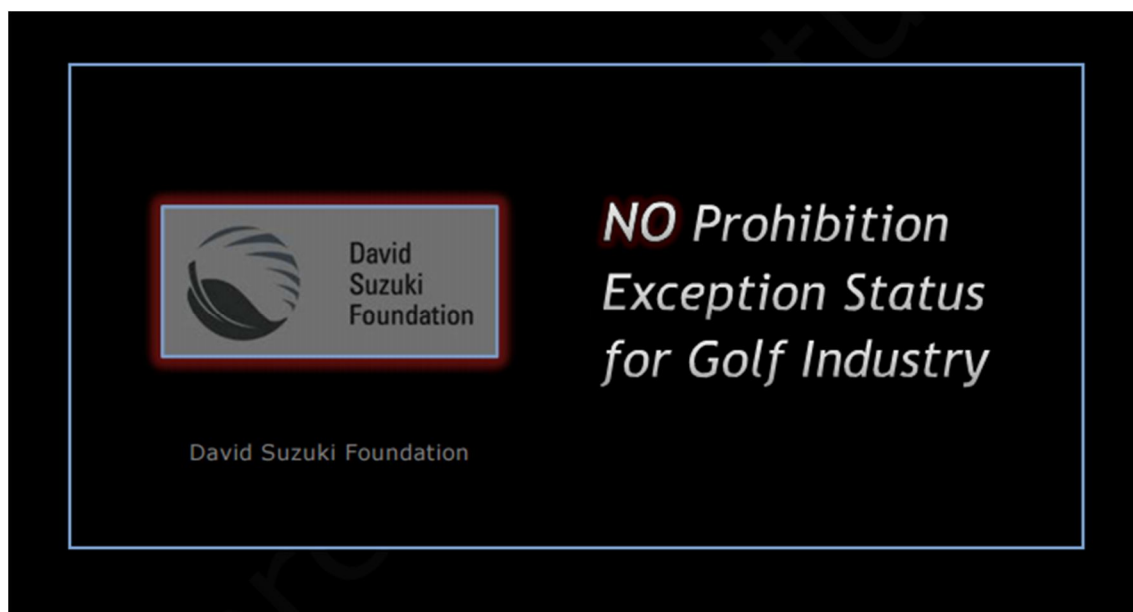

Since 2008, in a despicable effort to distract activists, government officials, and the public, several golf industry trade associations like Western Canada Turfgrass Association (WCTA) and Canadian Golf Superintendents Association (CGSA) supported the prohibition and maliciously torpedoed the professional lawn care industry. Are these trade associations operated

by idiots ?!?! The golf industry's trade associations must cease publicly supporting the prohibition against conventional pest control products used in the urban landscape. They must stop torpedoing the professional lawn care industry. Furthermore, everyone in the industry must not lose sight of the fact that golf facilities use up to six per cent of all pest control products. To avoid its imminent demise, and the total loss of all of its conventional pest control products, the golf industry must immediately address the critical issues addressed by David Suzuki and his fanatical-operatives. The golf industry is on a collision course with the looming shipwreck of anti-golf and anti-pesticide terrorism ! The predictions by Mr William H Gathercole and NORAHG about the golf industry's looming shipwreck were true !

<http://pesticidetruths.com/2015/12/21/golf-industrys-looming-shipwreck-predictions-concerning-the-loss-of-its-pesticide-exception-status-2009-encore-report/>

Norah GFON

All bad Suzuki-terrorism must come to an end

FORCE OF NATURE | DARING TO DEFEY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Besspeering Against Lies that conspire to destroy the Green space and other industries (NORAHG)

WE SPEAK THE WHOLE TRUTH ABOUT DAVID SUZUKI, FROM AN INDEPENDENT PERSPECTIVE !

We are the National Organization Responding Against HUIE that conspire to destroy the Green space and other industries (NORAHG). As a non-profit and independent organization, we are environmentalists who are dedicated to reporting about Truth-Challenged Pesticide-Hating Fanatics who conspire to destroy businesses that are dependent on their use of conventional pest control products. We also report on the work of Respected and Highly-Rated Experts who promote Environmental Realism and Pesticide Truths.

<http://wp.me/p1jq40-8DV>

NORAHG is the sworn enemy of lying, pompous, smug, uneducated, & pesticide-hating enviro-fanatics. Overwhelming scientific evidence clearly demonstrates that pest control products are scientifically-safe, and will not cause harm to children, adults, animals, or the environment.

<http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha>

<http://wp.me/p1jq40-6Q6> <http://wp.me/p1jq40-5ni>

Enviro-fanatics have shown that they are incapable of processing overwhelming scientific evidence. Do you want to trust these fanatics, who conveniently ignore scientific evidence, and attempt to impose their twisted life-style choices against our society ?!?!

NORAHG was the brainchild of Mr William H Gathercole and his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder. We Dare To Defy The Pesticide-Hating Fanatics By Exploring The Whole Truth From An Independent Perspective On The Pesticide Truths Web-Site ... <http://pesticidetruths.com/>

If you wish to receive free reports on issues that concern you, please contact us at ... force.of.de.nature@gmail.com
