

The Enviro-Detector !

Now available from Force of Nature.

The Fast and Efficient Way to Identify Enviro-Maniac Vermin !
Specially designed for the Green Space Industry !

This detector of maniac-members of Environmental Terror Groups is considered to be one of the most sophisticated vermin detectors on the market today. Its dual antennae with microwave receiver warn you of Enviro-Maniacs from over 10 kilometres away. Each unit costs only \$500.

Testimonial from the Green Space Industry :

<< This detector is great ! It's effective at keeping enviro-maniacs away from my employees. We used to be able to only identify them because of their low-class spandex clothing or fake white laboratory coats. If they got close enough, the smell would also give them away ! Now, we can avoid them totally ! >>
