## Nematodes

100% Organic NemaGlobe Grub Busters control lawn grubs the natural way.

NemaGlobe Grub Busters "Chemical free" Grub Control

Designed by nature... proven by science!

What are nematodes? Nematodes are naturally occurring, earth friendly microscopic worms. Grub Busters Nematodes are an efficient strain of *Steinernema glaseri* for control of major turf and garden pests such as white grubs.

- White grubs
- Citrus root weevil
- Japanese beetles
- May/June beetles
- European/Masked chafer
- Black vine weevil
- Sod webworm

The NemaGlobe Grub Busters Advantage...

- Easy to mix and use
- Exempt under most pesticide by-laws
- Backed by scientific research around the world
- Soil effectiveness from 12-30 degrees
- Works against 3rd instar chaefer

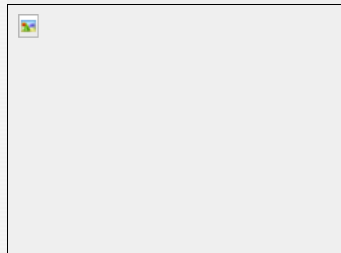

Available from leading garden centres.
