On November 25th, 2014, Ontario's Liberal government officials proposed a RECKLESS PROVINCE-WIDE PROHIBITION against Neonicotinoid Insecticides used by the Agriculture Industry. <http://tinyurl.com/o3tf4sv>

Ontario's Liberals are falsely alleging that these insecticides, desperately needed by the Agriculture Industry, are the cause of so-called bee colony collapse disorder — in fact, bee losses occur because some bee-keepers may be wholly unsuited to be raising bees.

The Progressive Conservative Party of Ontario, the Official Opposition in the current Legislative Assembly of Ontario, has long advocated for a science-based approach to Neonicotinoid Insecticides —

*Instead, the [ Liberal ] government has TAKEN A HEAVY-HANDED APPROACH with the Agriculture Industry by implementing its RECKLESS PROVINCE-WIDE PROHIBITION against Neonicotinoid Insecticides by 80 per cent, DESPITE the findings of Health Canada's report.*

Overall, there is NO bee crisis in Ontario because of insecticides, and ANY PROHIBITION is NOT necessary !

Government officials under the Liberal Party, and bee conspiracy fanatics, are NOT credible sources of real scientific information upon which this political decision about prohibition can be made.

It is inescapable that the allegations by Ontario's Liberal government officials against Neonicotinoid Insecticides are FALSE !

If we had less conventional neonicotinoid use in Ontario, we would still have bee colony collapse disorder, because many bee-keepers are NOT competent to manage their hives.

Nonetheless, the Liberal Minister of the Environment, Glen Murray, has resorted to CHERRY PICKING SCIENCE to support the Ontario's RECKLESS NEONICOTINOID PROHIBITION.

Glen Murray is among many Liberal government officials who are NEONICOTINOID-HATING FANATICS !

Ontario's Liberal Government will NOT acknowledge the findings of a joint report released on January 6th, 2015 by Health Canada's Pest Management Regulatory Agency, the U.S. Environmental Protection Agency, and the State of California.

The report found that imidacloprid, a Neonicotinoid Insecticide, POSES NO POTENTIAL RISKS TO BEES.

According to Ms Lisa Thompson, Member of Provincial Parliament ( MPP ) for Huron-Bruce, Glen Murray is IGNORING THE FINDINGS released by environmental experts and regulators in both Canada and the United States, which show THE USE OF NEONICOTINOID INSECTICIDES FOR SEED TREATMENT POSE NO POTENTIAL RISKS TO BEES.

MPP Thompson is also a member of the Progressive Conservative Party of Ontario.

**BACKGROUND INFORMATION — THE USE OF NEONICOTINOID INSECTICIDES FOR SEED TREATMENT POSES NO POTENTIAL RISKS TO BEES !** — Neonicotinoid insecticides used on the VAST MAJORITY of agricultural crops WILL NOT harm pollinators. On January 6th, 2015, Health Canada's Pest Management Regulatory Agency ( PMRA ) and the U.S. Environmental Protection Agency ( EPA ) released their preliminary assessments, both of which show A LIMITED NUMBER of situations where some Neonicotinoid Insecticides pose risk to pollinators. <http://wp.me/p1jq40-99I> <http://wp.me/p1jq40-9eb> According to this risk assessment of a Neonicotinoid Insecticide, imidacloprid, label directions and rules for foliar and seed treatments of imidacloprid should either PREVENT or LIMIT the risks to honeybees and other pollinators. The EPA data also showed that citrus and cotton may have residues of the insecticide in pollen and nectar above the threshold level of 25 parts per billion, above which effects on pollinator hives were likely to be seen. In North America, citrus fruits for consumption as fresh fruit are mainly grown in California, Arizona, and Texas. Cotton is grown in the southern United States. Citrus and cotton are NOT grown as crops in most of North America. Overall, Neonicotinoid Insecticides are used in a way that MINIMIZES any direct exposure to bees, such as seed treatment. Seed treatment insecticides have been used for a decade with almost NO incidences of negative impacts on bees by minimizing potential exposures of non-target insects such as bees. Under normal field use of Neonicotinoid Insecticides, the exposure to bees is at very low levels, far too low to cause harmful effects. Why are a small number of bee-keepers alleging the loss of bees, even OUTSIDE of situations where some Neonicotinoid Insecticides pose risk to pollinators ?!?! THE REAL CULPRITS WHO HARM BEES ARE ACTUALLY THE BEE-KEEPERS THEMSELVES ! Seemingly, bee-keepers are losing their bees over and over again. Why is this madness happening ?!?! Observers have concluded that many bee-keepers have no idea what they are doing, and are simply not skilled to raise bees. Bee-keepers are killing their own bees over and over again. The alleged losses of bees are, in fact, the fault of these bee-keepers and their mis-management practices. The bee-keepers themselves are clearly responsible since they appear to be unable or unwilling or not skilled enough to mitigate the real issues that harm bees, such as starvation, weak colonies, fungal infections, and mite infestations. They prefer to remain unproficient at bee-keeping, and expect the government to shower them with vast sums of unjustifiable compensation. <http://tinyurl.com/l8odbpc> <http://wp.me/p1jq40-77N> <http://wp.me/p1jq40-7VI>

In question period, MPP Thompson asked Neonicotinoid-Hating Fanatical  
Minister Murray —

*Will the Minister — who is NOT a scientist — please explain why he thinks he knows better than a team of scientific experts at Health Canada and the U.S. Environmental Protection Agency ?!?!*

The answer is simple.

Ontario's fanatical government officials, like Murray, are conducting a conspiracy to recklessly and arbitrarily impose PROHIBITION against Neonicotinoid Insecticides !

**BACKGROUND INFORMATION** — Question Period, known officially as Oral Questions at the Legislative Assembly of Ontario, occurs each sitting day in the House of Commons of Canada. The primary purpose of Question Period is to seek information from the Government and to call it to account for its actions.

**BACKGROUND INFORMATION — THE GOVERNMENT OF ONTARIO IS INFESTED WITH NEONICOTINOID-HATING FANATICS !** — Glen Murray, the government official who runs the Ministry of the Environment, has expressed a PREPOSTEROUS AND UNSCIENTIFIC STATEMENT — « *It is an issue that has caused me great concern — it is much more toxic than DDT.* [ ?!?! ] » Murray is NOT PROVIDING ANY INFORMATION THAT IS FACTUAL. In fact, Murray has ABSOLUTELY NO EXPERTISE in matters concerning Neonicotinoid Insecticides. With this kind of statement, observers have confirmed that Ontario's government officials, like Murray, are conducting a conspiracy to RECKLESSLY IMPOSE PROHIBITION against Neonicotinoid Insecticides used by the Agriculture Industry ! They seek to IMPOSE PROHIBITION under the FALSE PRETEXT that BEE LOSSES occur because of the ingredients in these products. Murray GULLIBLY VALIDATES a LIMITED NUMBER of bee-keepers ( less than 1.0 per cent ) who use THE FALSE PRETEXT that their LOSSES have occurred because of neonicotinoid insecticides.

### Background Information

**There Is NO Bee Crisis, And Prohibition Is Not Necessary !**

For a few years now, the idea that bees are being lost at an alarming rate, and that somehow agricultural insecticides have something to do with it. THIS IS FALSE ! Some media reports have actually defined this idea as an « *ECO-SCAM* ». Of course, David Suzuki has been fund-raising to « fight » the situation — except bee losses ARE NOT REALLY HAPPENING, any more than global warming. <http://wp.me/p1jq40-92p>

Overall, there is NO bee crisis in Ontario because of Neonicotinoid Insecticides, and hence, their prohibition in agriculture is NOT necessary ! This #@!!% bee-keeper madness must be challenged and stopped ! In Ontario, there is now NO other recourse but litigation against government officials and pesticide-blaming bee-keepers in order to STOP THEM from destroying the Agriculture Industry. CropLife Canada, Grain Farmers of Ontario, and all agricultural businesses, MUST SUE the neonicotinoid-hating fanatics' brains' out ! <http://wp.me/p1jq40-7Ub>

In its usual method of arriving at scientifically illiterate conclusions, the Ontario Liberal government has agreed with some pesticide-blaming bee-keepers that the use Neonicotinoid Insecticides has somehow been responsible for the loss of their bees. Since 2009, Ontario's reckless attitude against any and all pest control products has already destroyed the Professional Lawn Care Industry ! <http://wp.me/P1jq40-43B> The destruction of the Professional Lawn Care Industry was extensive because there were/are NO valid economical alternatives to replace the prohibited products that were desperately need to control damaging pests of turf and ornamental plants. <http://wp.me/P1jq40-24g> Similarly, Ontario's Agriculture Industry WILL BE facing imminent destruction since Neonicotinoid Insecticides are desperately needed to effectively and safely control damaging pests of crops. Ontario's reckless anti-pesticide prohibition will destroy the Agriculture Industry !

The province's prohibition is being imposed after bee-keepers started reporting an increasing number of bee deaths ?!?! Really ?!?! The media is reporting this situation as if ALL bee-keepers are affected. THIS IS FALSE !

Only A VERY LIMITED NUMBER of bee-keepers report losses due to so-called bee colony collapse disorder, LESS THAN 1 PER CENT. In 2012, a mere 43 bee-keepers alleged losses. In 2013, only 82 bee-keepers alleged losses. There are 7,000 bee-keepers keeping 600,000 colonies of honeybees across Canada. Essentially, a mere 1.0 per cent of all bee-keepers are reporting losses. These represent the insecticide-blaming bee-keepers who are merely striving to profit from government hand-outs. Over 99 per cent of all bee-keepers are reporting NO losses. 1 per cent of bee-keepers appear to

have NO idea what they are doing, leading some observers to conclude that these bee-keepers may NOT be competent to raise bees, and certainly know almost nothing about agricultural insecticides. Bee-keepers know full well that varroa mites are the primary problem associated with losses, and NOT Neonicotinoid Insecticides. Science and statistics DO NOT support demands to prohibit against Neonicotinoid Insecticides in agriculture. If we had less conventional neonicotinoid use in the environment, we would still have bee colony collapse disorder, because many bee-keepers are not competent to manage their hives. Prohibition will not save bees.

<http://tinyurl.com/pxqzh6m>

Neonicotinoid Insecticides used on the VAST MAJORITY of agricultural crops WILL NOT harm pollinators. On January 5th, 2016, Health Canada's Pest Management Regulatory Agency ( PMRA ) and the U.S. Environmental Protection Agency ( EPA ) released their preliminary assessments, both of which show A LIMITED NUMBER of situations where some Neonicotinoid Insecticides pose risk to pollinators. <http://wp.me/p1jq40-99l>  
<http://wp.me/p1jq40-9eb> According to this risk assessment of a Neonicotinoid Insecticides, imidacloprid, label directions and rules for foliar and seed treatments of imidacloprid should either PREVENT or LIMIT the risks to honeybees and other pollinators. The EPA data also showed that citrus and cotton may have residues of the insecticide in pollen and nectar above the threshold level of 25 parts per billion, above which effects on pollinator hives were likely to be seen. In North America, citrus fruits for consumption as fresh fruit are mainly grown in California, Arizona, and Texas. Cotton is grown in the southern United States. Citrus and cotton are NOT grown as crops in most of North America. Overall, Neonicotinoid Insecticides are used in a way that MINIMIZES any direct exposure to bees, such as seed treatment. Under normal field use of Neonicotinoid Insecticides, the exposure to bees is at very low levels, far too low to cause harmful effects.

Why are a small number of bee-keepers alleging the loss of bees, even OUTSIDE of situations where some Neonicotinoid Insecticides pose risk to pollinators ?!?! The real culprits who harm bees are actually the bee-keepers themselves ! Bee losses are, in fact, the fault of the bee-keepers and their mis-management practices. THEY are responsible, and NOT Neonicotinoid Insecticides. Why are only a very limited number of bee-keepers affected ?!?! Because they represent the unproficient bee-keepers with their senseless management practices. These bee-keepers kill their own bees, and not Neonicotinoid Insecticides. It is inescapable that the allegations against Neonicotinoid Insecticides are FALSE ! Even Ontario

Premier Kathleen Wynne has stated that there is NO bee crisis, since the vast majority of bee-keeping operations have NOT been affected and have been able to maintain strong and healthy bee colonies, as evidenced by hive strength and honey production. <http://tinyurl.com/ndavhaa> Skilled bee-keepers readily admit that poor hive management ( i.e. starvation, weak colonies, fungal infections, and mite infestations ) and weather are most likely to blame for bee losses. Starvation is biggest single cause of bee losses ! <http://wp.me/p1jq40-97E> Unproficient bee-keepers falsely blame their bee losses on Neonicotinoid Insecticides, and believe that they are entitled to unjustifiable government compensation. When will this bee-keeper madness end !?! Why don't government inspectors and specialists investigate the killing of bees by bee-keepers !?! Ontario bee-keepers who lose their bees over and over again without changing their management practices can only be described as senseless and unproficient.

So, what is REALLY happening !?! The main factor that contributes to so-called bee colony collapse disorder is bee-keeper madness. According to Albert Einstein, the definition of madness is doing the same thing over and over again and expecting different results. What is the definition of bee-keeper madness !?! Here is an example. In the province of Ontario, bee-keepers allege having lost nearly 38 per cent of their bees winter 2014-2015, a rate that was more than three times the national average of other provinces. Seemingly, Ontario bee-keepers are losing their bees over and over again. Why is this madness happening !?! Observers have concluded that many Ontario bee-keepers have no idea what they are doing, and are simply not skilled to raise bees. Ontario bee-keepers are killing their own bees over and over again. The alleged losses of bees are, in fact, the fault of these bee-keepers and their mis-management practices. They are responsible since they appear to be unable or unwilling or not skilled enough to mitigate the real issues that harm bees. They prefer to remain unproficient at bee-keeping, and expect the government to shower them with vast sums of unjustifiable compensation. <http://tinyurl.com/l8odbpc>  
<http://wp.me/p1jq40-77N> <http://wp.me/p1jq40-7VI>

There is NO bee crisis ! The Honeybee Industry is actually thriving in Ontario and around the world. The Ontario Honeybee Industry is thriving. The Canadian Honeybee Industry is thriving — Canada's honey yield is twice the world's average. The North American Honeybee Industry is thriving. The European Honeybee Industry is thriving — Neonicotinoid Insecticides were still being used in 2013, and yet, 2013 was the lowest European bee loss recorded since 2007. There is NO bee crisis, and prohibition is NOT necessary ! ( See links below. )

✓ **FACT** — If Bee-Keepers are CAPABLE OF LYING AND CHEATING AND STEALING AS BEE RUSTLERS, then they are also capable of LYING AND CHEATING with their public statements against insecticides.

✓ **FACT** — Neonicotinoid Insecticides are NOT killing bees, but the Bee-Keepers themselves ARE KILLING THEIR OWN BEES with the so-called Bee-Keeper Pitchfork Rebellion.

Discover What Anti-Pesticide & Enviro-Lunatic Terrorists Are Doing And Saying About Subversively Imposing Their Life-Style Choices Against Our Society.

Read ... Reports, Blogs, & Videos, From Force Of Nature, NORAHG, Pesticide Truths, & Uncle Adolph — The Whole Truth From An Independent Perspective.

Communities and businesses are being HARMED and DESTROYED and RAPED by LUNATIC-TERRORISTS who ARBITRARILY AND RECKLESSLY IMPOSE PROHIBITIONS against pest control products used in the Urban Landscape and by the Agriculture Industry, and who PERPETRATE OTHER ACTS OF ENVIRONMENTAL TERRORISM.

We are living in the 9|11 Era of Anti Pesticide & Environmental Terrorism where at least ONE SUBVERSIVE ACT OF TERRORISM is perpetrated EVERY SINGLE DAY by LUNATIC-TERRORISTS.

A LUNATIC is a person whose actions and manner are marked by extreme recklessness.

The RECKLESS ACTS OF SUBVERSION by these LUNATIC-TERRORISTS has led to the ARBITRARY IMPOSITION of Anti-Pesticide PROHIBITION in several jurisdictions throughout North America.

The result was CATASTROPHIC CARNAGE !

Because of LUNATIC-TERRORISTS, provinces like Ontario now have a TRAIL OF ECONOMIC DESTRUCTION WITH HUNDREDS OF SMALL BUSINESSES DESTROYED and THOUSANDS OF PEOPLE OUT OF WORK, a MORE DANGEROUS OUTDOOR ENVIRONMENT, and a BLACK MARKET IN PESTICIDES.

Only TRUE LUNATICS would wish to create a TRAIL OF ECONOMIC DESTRUCTION WITH HUNDREDS OF SMALL BUSINESSES DESTROYED and THOUSANDS OF PEOPLE OUT OF WORK.

Because of LUNATIC-TERRORISTS, we are living in the DARK AGE OF ANTI PESTICIDE TERRORISM where sound science is trumped by FAKE SCIENTISTS, JUNK SCIENCE and UNVERIFIABLE SECRET EVIDENCE through FABRICATION, INNUENDO, and INTERNET RUMOR — scientific research PROVES that pest control products will CAUSE NO HARM and can be USED SAFELY.

An informed public is better able to protect itself and its communities and businesses from LUNATIC-TERRORISTS who are THE LEAST QUALIFIED TO PROVIDE ANY ADVICE about pest control products or the environment.

NORAHG is the National Organization Responding Against HUJE that seek to harm the Green space and other industries, and the well-being of our communities.

NORAHG morally represents the VAST SILENT MAJORITY of people associated with turf and ornamental plant maintenance who are OPPOSED to LUNATIC-TERRORISTS and their Anti Pesticide PROHIBITIONS, resulting in the CLOSURE or ABANDONMENT of green spaces under the RIDICULOUS PRETEXT CONCOCTED BY LUNATICS of somehow « *saving* » the environment.

NORAHG is a NATIONAL NON-PROFIT NON-PARTISAN organization that does not accept money from corporations or governments or trade associations, and represents NO VESTED INTERESTS WHATSOEVER.

NORAHG is dedicated to reporting PESTICIDE FREE FAILURES, as well as the work of RESPECTED & HIGHLY RATED EXPERTS who promote ENVIRONMENTAL REALISM and PESTICIDE TRUTHS.

NORAHG strikes back against the MYTHS concerning the need for prohibition against pest control products.

NORAHG RESPONDS on behalf of the VAST SILENT MAJORITY of THE PUBLIC THAT DOES NOT WANT PESTICIDE BANS, and SUPPORTS those who work in the Professional Lawn Care Industry, the Golf Industry, and the Agriculture Industry.

NORAHG is opposed to PESTICIDE FREE jurisdictions where LUNATIC-TERRORISTS have DOOMED CHILDREN to SUFFER INJURIES since Anti-Pesticide PROHIBITION inevitably leads to public and residential green spaces that become DANGEROUS AND PEST-INFESTED GARBAGE DUMPS.

NORAHG is concerned that, because of PESTICIDE FREE MAINTENANCE of parks and sports fields, CHILDREN ARE AT HIGHER RISK OF SUFFERING INJURIES with DANGEROUS PLAYING SURFACES CREATED BY #@!!% PESTICIDE BANS.

### CHILDREN ARE NOT AT RISK

<http://pesticidetruths.com/toc/children-are-not-at-risk/>

NORAHG pledges to deliver comprehensive reports that are worthy of peoples' time and of peoples' concern, reports that might ordinarily never have breached the parapet.

NORAHG was the brainchild of William H Gathercole and his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder.

Force Of Nature was launched by NORAHG for CONTINUOUS transmission on the Internet on January 1st, 2009 — however, the VERY FIRST Stand-Alone Force Of Nature Report was issued on September 19th, 2008.

On March 15th, 2010, Uncle Adolph independently launched The Pesticide Truths, an easy-to-use Web-Site that collects relevant reports of information right-off-the-press.

*Primus inter pares*, first among equals, describes Pesticide Truths, Uncle Adolph, and Force Of Nature — they are formally equal to each other and are all accorded equal respect.

The reports and blogs from Pesticide Truths, Uncle Adolph, and Force Of Nature, in some ways, are like Google for everything concerning the SUBVERSIVE ACTIVITIES of Anti-Pesticide and Enviro-Lunatic Terrorists.

Many of these reports and blogs provide a sequence of historical events WITH COMMENTARY, the neutrality of which might be disputed.

This is what we do. Don't thank us. It's a public service. And we are glad to do it.
