**The Wisdom Of Petelle**

## Concerns About Neonicotinoids Are NOT Warranted

According to Mr Pierre Petelle, President of CropLife Canada ...

Worry about pollinator health and pesticides is NOT warranted, despite what the American Honey Producers Association may say.

Bee health is impacted by a number of factors, including nutrition, weather conditions, and beekeeping practices.

In fact, the MAIN CAUSES of colony losses during the 2015-16 winter were poor queens, *Varroa* Mites, weak colonies, and weather conditions, according to Canadian bee-keepers.

Canadian bee-keepers, like Canadian farmers, produce some of the best products in the world.

People should be confident consuming honey and other food produced by our hard-working farmers.

Before any pest control product can be sold in Canada, it must be approved by Health Canada.

Canada's regulatory process is stringent, world-renowned, and ensures all pest control products that are used in Canada ARE SAFE FOR BOTH PEOPLE AND THE ENVIRONMENT.

Farmers choose to use neonicotinoid-treated seed because it is A SAFE AND EFFECTIVE WAY TO PROTECT THEIR CROPS WHILE ALSO MINIMIZING EXPOSURES TO BENEFICIAL INSECTS LIKE BEES.

Just as we need bees, farmers need tools like pest control products to provide us with safe, high-quality foods while ensuring our environment is protected for future generations.

#### Background Information

# Bees Are THRIVING

---

### **Background Information**

## **Honeybee Colonies & Production Are Growing & Thriving In America & Canada**

According to Mr Pierre Petelle, President of CropLife Canada, concerns about bee health and neonicotinoid insecticides is NOT warranted.

In fact, bees are NOT dying off in the wake of neonicotinoid insecticide use, they are actually GROWING AND THRIVING.

Why are a few bee-keepers losing their bees !?!?

The most likely cause of losses are the bee-keepers themselves.

INCOMPETENT bee-keepers are killing their own hives.

Observers have concluded that many bee-keepers have no idea what they are doing, and are simply not skilled to raise bees.

Bee-keepers are killing their own bees over and over again.

Otherwise, bees are GROWING AND THRIVING.

---

### **Background Information**

## **There Is NO Bee-Pocalypse Because Of Neonicotinoid Insecticide Use**

There are NO plummeting of bee numbers.

However, SOME bee-keepers are losing their bees over and over again simply because they are INCOMPETENT !

Bees are NOT being lost because of the agricultural use of insecticides.

### **Background Information**

## **Neonicotinoid-Treated Seeds DO NOT Harm Bees**

In the agriculture industry, neonicotinoid-treated seeds are safe and effective way to protect their crops while also minimizing exposures to beneficial insects like bees.

Overall, so-called links and causes between bee colony collapse disorder and neonicotinoid insecticides are mere MYTHS !

When used properly, neonicotinoid insecticides will selectively and effectively control insect pests, but are completely safe for other non-target organisms — they DO NOT harm bees, and have NO persistence beyond the season of use.

Although some neonicotinoid insecticides can be toxic to bees upon direct contact ( as are many so-called green alternatives ), for decades, they have been used in a way that minimizes any potential direct exposure to bees, such as coated-seed treatment.

This Best Management Practice ensures that the potential exposure to bees is at very low levels, far too low to cause harmful effects.

Consequently, neonicotinoid insecticides will cause NO harm to bees because coated-seeds are buried in the soil, rendering the insecticides inaccessible to bees and other non-target organisms.

Moreover, these insecticides systemically penetrate into the plant tissues where they remain inaccessible to bees.

Bees do NOT consume plant tissues, and, therefore, are NOT harmed by neonicotinoid insecticides.

---

### Background Information

## There Is NO Neonicotinoid Crisis In Canada

Officially, the MAIN CAUSES of colony losses during the 2015-16 winter were poor queens, Varroa Mites, weak colonies, and weather conditions.

Bee-keepers know full well that these are the PRIMARY PROBLEMS associated with bee losses, and NOT insecticides.

In fact, some bee-keepers appear to be unable or unwilling to get their major pest problems under control, leading observers to conclude that bee-keepers who are losing their bees over and over again may NOT BE COMPETENT to handle their businesses, and may be WHOLY UNSUITED to be raising bees.

The MYTH of disappearing bees is a political disease that can only be eradicated with the truth.

---

### Background Information

## Mr Pierre Petelle's Biography

Mr Pierre Petelle is among several LEADING EXPERTS who have recognized expertise, training, and background in matters concerning pest control products.

<http://wp.me/p1jq40-8DV>

Mr Petelle is President of CropLife Canada.

CropLife Canada is the trade association representing manufacturers, developers and distributors of pest control products, including those designed specifically for agricultural and urban use.

Mr Petelle is responsible for helping to secure legislation, regulation and policy that encourage science and industry innovation, forging alliances with stake-holder groups to advance common positions and continuing to ensure lifecycle stewardship of pest control products.

Mr Petelle's work in representing Canada's plant science industry also includes increasing the awareness, understanding and acceptance of the benefits, safety and sustainability of plant science innovations.

Prior to joining CropLife Canada, Mr Petelle held the position of Section Head of Policy ( Senior Policy Analyst ) at Health Canada's Pest Management Regulatory Agency where he worked with a broad group of stake-holders on a wide range of issues important to Canada's plant science industry.

Mr Petelle holds an environmental biology degree from the University of Guelph, and a biology degree from Carleton University.

The Wisdom Of Mr Pierre Petelle

Norah  
GFON

All good experts must never come to an end

FORCE OF NATURE - CAPABLE TO DEFY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE  
National Organization Resisting Against what they perceive to destroy the green space and other industries (NORAH)

---

## **WE LISTEN TO THE WHOLE TRUTH FROM MR PIERRE PETELLE FROM AN INDEPENDENT PERSPECTIVE !**

We are the National Organization Responding Against HUE that conspire to destroy the Green space and other industries ( NORAHG). As a non-profit and independent organization, we are environmentalists who are dedicated to reporting about truth-challenged pesticide-hating fanatxcs ( HUE ) who conspire to destroy businesses that are dependent on the use of safe and effective conventional pest control products. We also report on the work of several highly-rated leading experts who have recognized expertise, training, and background in matters concerning pest control products, and who promote environmental realism and pesticide truths.

Not surprisingly, enviro-fanatxcs have demonstrated that they are incapable of processing overwhelming scientific evidence. Should we trust these fanatxcs, who conveniently ignore scientific evidence, and attempt to impose their politicized-doctrines and twisted life-style choices against our society ?!?!

NORAHG was the brainchild of Mr William H Gathercole and his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder. We dare to defy the pesticide-hating fanatxcs by exploring the whole truth from an independent perspective on The Pesticide Truths Web-Site ... <http://pesticidetruths.com/> If you wish to receive free reports on issues that concern you, please contact us at ... [force.of.de.nature@gmail.com](mailto:force.of.de.nature@gmail.com) WILLIAM H GATHERCOLE AND NORA H G
