Selected And Adapted Excerpts

The Ontario Conspiracy To Impose Prohibition Against Neonicotinoid Insecticides

**Unmotivated & Lazy Pest Advisors Have Betrayed The
Agriculture Industry**

**Ontario's Liberal Government Intends To
Reduce The Use Of Neonicotinoid Insecticides
On Corn & Soybean Seeds Only When There Is
A Demonstrated Pest Problem, As Assessed By
Unmotivated & Lazy Pest Advisors Who Have**

No Intention To Approve ANY Uses

Good luck trying to find a Pest Advisor who will do a Neonicotinoid Pest Assessment for farms that want to use neonicotinoid-treated corn or soybean seeds.

Seemingly, they are unmotivated & lazy, and likely part of the conspiracy to impose PROHIBITION against Neonicotinoid Insecticides used by the Agriculture Industry.

MOTIVATED & CO-OPERATIVE PEST ADVISORS ARE VERY HARD TO FIND.

With the Ontario's PHASED-IN FANATICAL PROHIBITION against Neonicotinoid Insecticides, growers desperately-needing to use these insecticides now need a Pest Advisor to do the Neonicotinoid Pest Assessments.

Farmers Forum made more than 20 phone calls and found a LONE Pest Advisor willing to do the Neonicotinoid Pest Assessments.

Only Lancaster's Munro Agromart, in South Glengarry, was willing to do Assessments.

Most Pest Advisors are UNMOTIVATED & LAZY, and are unwilling to do Pest Assessments that would circumvent prohibition, and help the Agriculture Industry.

The Ontario Certified Crop Advisor Association is financed by CropLife Canada.

Why !?!

This trade association represents those Pest Advisors who have betrayed the Agriculture Industry.

THESE UNMOTIVATED & LAZY BASTARDS SHOULD RECEIVE NO FREE MONEY FROM CROPLIFE !

**Ontario Certified Crop Advisor Association
Has Become A Propaganda Shield In The
Conspiracy To Prohibit Against Neonicotinoid
Insecticides Used By The Agriculture Industry**

The Ontario Conspiracy To Impose Prohibition Against Neonicotinoid Insecticides

Unmotivated Pest Advisors Are Unwilling To Do Neonicotinoid Pest Assessments

Could It Be That Unmotivated Pest Advisors Are Conspiring To Impose Neonicotinoid Prohibition ?!?!

Alex Romon, an Unmotivated Pest Advisor with Munro Agromart, has not received any calls asking for an Assessment, but says most farmers are SWITCHING TO OTHER INSECTICIDE OPTIONS for corn.

[Growers are switching to INFERIOR alternatives because Unmotivated & Lazy Pest Advisors are unwilling to do Pest Assessments that would circumvent prohibition, and help the Agriculture Industry.]

According to Unmotivated Pest Advisor Romon —

We're all against what the government is doing [with its reckless & arbitrary prohibitions] but there won't be too many guys who will putting on Neonicotinoid Insecticides anyway.

But now with [INFERIOR] Lumivia [a DuPont Pioneer conventional alternative], we'll be okay.

[See link in later segment.]

I don't see a big, big worry, to be honest.

[In other words, Unmotivated & Lazy Pest Advisors recommend that growers use INFERIOR alternatives, like Lumivia, instead of Neonicotinoid Insecticides.]

Many Unmotivated Pest Advisors say they won't do the Neonicotinoid Pest Assessments because it's TOO TIME-CONSUMING.

[Consequently, they are not only UNMOTIVATED, they are also LAZY.]

It could take four hours spread over a number of days to conduct a Neonicotinoid Pest Assessment of 100 acres.

[So what ?!?! They can charge an hourly rate. They are not only UNMOTIVATED, they are also LAZY.]

The Ontario Conspiracy To Impose Prohibition Against Neonicotinoid Insecticides

Deliberate Sabotage Of Lunatxc Government Regulations & Their Bogus Thresholds

**Are Pest Advisors Simply Prevented From Doing
Neonicotinoid Pest Assessments Because Of
Deliberate Sabotage With Lunatxc Government
Regulations That Impose Bogus Thresholds ?!?!**

According to Unmotivated Pest Advisor Bryan Cook of Cropland Consulting, in Prescott —

I'm not doing it [Neonicotinoid Pest Assessment].

Farmers basically want to pay you to get to the THRESHOLD so they can buy the Class 12.

The THRESHOLD is so BOGUS and so ELUSIVE that I may not get to that THRESHOLD.

If I do all the work and don't get the THRESHOLD, that doesn't mean that farmers are not at risk, it just means I can't give them [the neonicotinod-treated seed].

Ontario's FANATXCAL ANTI-NEONICOTINOID PROHIBITION demands that growers must get an Assessment before being allowed to use these insecticides-treated corn and soybean seeds.

The Ontario Conspiracy To Impose Prohibition Against Neonicotinoid Insecticides

Prohibition Was Imposed Under The Bogus Pretext Of Protecting Bees

Ontario's 2015 Prohibition Was Imposed Under The Bogus Pretext Of Protecting Bees

In Fact, Honeybee Colonies & Production Are Actually Growing & Thriving In Canada, In America, & Around The World

PROHIBITION was brought in as a result of [supposedly] high number of bee deaths over the 2015-16 winter even though studies have been far from conclusive on whether Neonicotinoid Insecticides cause bee deaths, argues the Grain Farmers of Ontario [GFO], saying the decision was political to appease environmentalists.

Almost all of the corn seeds in Ontario and 60 per cent of soybean seeds are treated with Neonicotinoid Insecticides.

The Grain Farmers of Ontario says there are at least six other bee stressors.

Many Bee-Keepers Appear To Be Unable Or Unwilling To Get Their Major Problems Under Control, Such As Varroa Mites — They May Not Be Competent To Handle Their Businesses, & May Be Wholly Unsited To Be Raising Bees

Overall, The Major Problems Leading To Honeybee Losses Are Varroa Mites, Poor Queens, Weak Colonies, Weather Conditions, As Well As Bee-Keeper Incompetency — Bee-Keepers Know Full Well That These Are The Primary Problems Associated With Bee Losses, & Not Insecticides

In 2014, According To Ontario's Premier Wynne, There Was No Bee Crisis In Ontario

**& No Need For Neonicotinoid Prohibition —
& Suddenly, In 2015, There Was A Crisis ?!?!**

The Ontario Conspiracy To Impose Prohibition Against Neonicotinoid Insecticides

The Government Of Ontario Is Deliberately Sabotaging The Agriculture Industry

**Fanatical Liberal Government Officials Do
Not Want Pest Advisors To Approve Any
Uses Of Neonicotinoids In Ontario**

**The Government Of Ontario Is Truly Infested With
Neonicotinoid-Hating Bastards Whose Regulations
Are Deliberately Sabotaging The Agriculture Industry**

Maizex director of business management, Mr Steve Denys, says problems getting Unmotivated Pest Advisors to do Neonicotinoid Pest Assessments was by GOVERNMENT DESIGN [i.e. DELIBERATE REGULATORY SABOTAGE].

A certified Pest Advisor has to be present when the samples are taken, which is a lot of extra work for already-busy Pest Advisors.

[Poor lil' Pest Advisors !]

According to Mr Steve Denys, who farms in Chatham, Ontario —

The regulations were written to make it problematic to approve ANY use of Neonicotinoid Insecticides.

That's why most people [i.e. Pest Advisors] are refusing to do it.

The government wrote the law in such a way that it [job of getting Neonicotinoid Approval] is NOT MEANT TO WORK.

The Ontario Conspiracy To Impose Prohibition Against Neonicotinoid Insecticides

The Conventional Alternatives To Neonicotinoids Are Inferior

**Unmotivated & Lazy Pest Advisors Recommend
That Growers Use INFERIOR Alternatives *Lumivia*
& *Fortenza* Instead Of Making The Effort To
Provide Approvals For Neonicotinoid Insecticides**

For corn growers, DuPont Pioneer's *Lumivia* and Syngenta's *Fortenza* [see [links below](#)] would probably be cheaper than getting Assessments.

These INFERIOR conventional alternatives are NOT AS EFFECTIVE as Neonicotinoid Insecticides when it comes to controlling aphids and bean leaf beetle, says Mr Denys.

There are no other options for soybean growers, but Syngenta and DuPont could have registrations for alternatives in time for the 2018 spring planting, although it is more likely they will not be available until 2019.

**Since The Imposition Of Ontario's 2015
Prohibition, Pest Advisors Have Become
The Instruments Of Anti-Neonicotinoid
Propaganda For The Government Of Ontario**

✓ **FACT** — Nonetheless, Unmotivated & Lazy Pest Advisors Recommend That Growers Use INFERIOR Alternatives *Lumivia* & *Fortenza* Instead Of Making The Effort To Provide Approvals For Neonicotinoid Insecticides

✓ **FACT** — Ontario Intends To Become The First Province To Prohibit Against Neonicotinoid Insecticides — Prediction : Ontario Goes Bankrupt ... But Ontarions Will Feel Healthier & Gayer

SUMMARY

On April 22nd, 2009 — a date which will live in the period of environmental infamy — the full force of the Ontario Cosmetic Pesticides Ban Act was imposed by Ontario's Liberal government, which DESTROYED the Professional Lawn Care Industry.

Because of the 2009 prohibition, the Professional Lawn Care Industry lost over 500,000,000 dollars, with over 12,500 unemployed.

Moreover, because of its reckless and arbitrary prohibition, Ontario's public and private greens spaces have become weed-infested and insect-destroyed GARBAGE DUMPS that are dangerous for children to play on.

Ontario's parks, sports fields, and home lawns, have become wholly INFESTED with dandelions and a variety of other weeds, and there is no practical way to remove them, other than by hand-pulling or by replacing the entire lawn with sod.

On November 25th, 2014, Ontario's Liberal government officials proposed a reckless province-wide prohibition against Neonicotinoid Insecticides desperately-needed by the Agriculture Industry.

Ontario's Liberals have/are validated the proposed prohibition by falsely-alleging that Neonicotinoid Insecticides are the cause of so-called bee colony collapse disorder — in fact, bee losses occur because some bee-keepers are incompetent and may be wholly unsuited to be raising bees.

In 2014, nearly 100 per cent of corn seed and 60 per cent of soybean seed sold in Ontario was treated with Neonicotinoid Insecticides.

However, in early 2014, Ontario's prohibition conspiracy was contradicted by Premier Kathleen Wynne — there is NO bee crisis according to Premier Wynne, who had stated that many bee-keeping operations had NOT been affected and had been able to maintain strong and healthy bee colonies, as evidenced by hive strength and honey production. <http://wp.me/p1jq40-7Mw>

Nonetheless, on July 1st, 2015 — another date which will live in the period of environmental infamy — prohibition against the sale and use of neonicotinoid-treated seeds in Ontario was imposed and would be phased over time.

WE SPEAK THE WHOLE TRUTH ABOUT ONTARIO FROM AN INDEPENDENT PERSPECTIVE !

We are the National Organization Responding Against HUJE that conspire to destroy the Green space and other industries (NORAHG). As a non-profit and independent organization, we are environmentalists who are dedicated to reporting about truth-challenged pesticide-hating fanatics (HUJE), like Ontario's Liberal government officials, who conspire to destroy businesses that are dependent on the use of safe and effective conventional pest control products. We also report on the work of several highly-rated leading experts who have recognized expertise, training, and background in matters

concerning pest control products, and who promote environmental realism and pesticide truths.

Not surprisingly, enviro-fanatics have demonstrated that they are incapable of processing overwhelming scientific evidence. Should we trust these fanatics, who conveniently ignore scientific evidence, and attempt to impose their politicized-doctrines and twisted life-style choices against our society ?!?!

NORAHG was the brainchild of Mr William H Gathercole and his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder. We dare to defy the pesticide-hating fanatics, like Ontario's Liberal government officials, by exploring the whole truth from an independent perspective on The Pesticide Truths Web-Site ...
