

# Ontario Golf Course Pesticide Reporting

Thank you for volunteering to help us learn how Ontario golf courses are improving pesticide management.

If you have not yet registered to work on this project, or have questions or concerns, please email Corrine Giorgetti <[cgior013@uottawa.ca](mailto:cgior013@uottawa.ca)> and Meg Sears <[megsears@ncf.ca](mailto:megsears@ncf.ca)>.

Almost a decade ago, Ontario golf courses committed to using less toxic, and lower quantities of pesticides. Under Ontario's law, they report annually to the IPM Council of Canada. [www.ipmcanada.ca](http://www.ipmcanada.ca) We want to see how this is working - are less toxic options being used? Are quantities going down? Unfortunately, the reports are in PDF and other formats, so we need help to make the data usable.

This is a citizen science project of Prevent Cancer Now ([www.PreventCancerNow.ca](http://www.PreventCancerNow.ca)).
