## Fiesta Herbicide Is Fake-News

Fiesta Herbicide ( a.k.a. Scotts EcoSense and Weed-B-Gon ) is a primary reason for the repeated failures of provincial and municipal prohibitions imposed against conventional pest control products used in the urban landscape.

With the adoption of these prohibitions, professionals and residents are being forced to rely on this inferior green alternative herbicide.

In fact, Fiesta is ALMOST TOTALLY INEFFECTIVE as a weed control product.

The vast majority of Fiesta users overwhelmingly condemn it.

In order to validate anti-pesticide prohibition, government officials have been perpetuating the fake-news that Fiesta Herbicide, an inferior green alternative pesticide, can successfully replace conventional products such as Killex and Par III.

This is WRONG !

In fact, Fiesta CANNOT be used to validate ANY prohibition.

Fiesta is INFERIOR !

In addition, these government officials have gone so far as to operate as salesmen for Fiesta Herbicide with covert and insincere advertising.

Are they government shills ?!?!

Are they salesmen working for the manufacturer of Fiesta ?!?!

Are they being remunerated by the manufacturer of Fiesta ?!?!

Do they realize that Fiesta Herbicide is inferior and a dismal failure ?!?!

Sadly, Fiesta DOES NOT WORK when compared to conventional products like Killex, Par III, and other so-called three-way herbicides.

In fact, quite often, it would be better to do NOTHING rather than use Fiesta Herbicide.

Unfortunately, government officials have failed to admit that Fiesta is higher-risk, ineffective, inadequate, more toxic, overwhelmingly condemned, and stunningly expensive.

Instead of admitting that #@!!% Fiesta sucks, they prefer living in the world of fake-news.

---

### Manitoba's Fiesta Corruption

## The Covert Advertising Of Fiesta Herbicide By Government Officials Who Operate As Shills

Government officials who operate as shills may be attempting to spread buzz by personally endorsing Fiesta Herbicide in public forums under the pretense of sincerity, when in fact they are being paid as salesmen.

Who has authorized government officials to be shills for Fiesta Herbicide ?!?!

Examples of Fiesta shilling have been found at the provincial and municipal levels of government.

Why are provincial and municipal officials providing unauthorized free advertising for this commercial product ?!?!

Why are they misappropriating tax-payer's money promoting this product ?!?!

Who is paying government officials to covertly operate as shills for Fiesta Herbicide ?!?!

Fiesta Herbicide is supported by wealthy and prominent environmental-terrorist organizations.

Is there corruption of government officials by these organizations ?!?!

Do we want to live in a society where we are exposed to covert advertising by government officials who operate as shills ?!?!

**Why Are Provincial Officials Acting  
As Salesmen For Fiesta Herbicide ?!?!**

## Fiesta Corruption In The Government Of Manitoba ?!?!

### Provincial Officials Give Fake-News Reassurance About Failed Fiesta Herbicide

On December 17th, 2014, Manitoba's corrupt lunatic NDP government legislated arbitrary prohibition against conventional pest control products used in the urban landscape.

This anti-pesticide prohibition was imposed on May 1st, 2015.

Until April 19th, 2016, the province of Manitoba was governed by the New Democratic Party ( NDP ), the political shield for anti-pesticide and environmental-terrorist organizations.

Manitoba's 2015 Provincial Prohibition was arbitrarily imposed in defiance of municipalities that publicly opposed prohibition, such as Altona, Portage La Prairie, Steinbach, Stuartburn, and Winkler.

It was also imposed in defiance of Health Canada assessments that have demonstrated that pest control products are scientifically-safe and will cause NO harm.

Manitoba's pesticide-hating elected officials, like cabinet minister Gord Mackintosh, attempted to falsely reassure the public that so-called safe and effective green alternative pesticides were/are already available to replace conventional pest control products. [ Fake-News ] <http://wp.me/p1jq40-6TY>

When forced to rely on green alternatives like Fiesta ( a.k.a. Weed-B-Gon ), Manitobans lose their green spaces since these products are inferior and do not work.

In fact, the vast majority of users overwhelmingly condemn Fiesta, hence, the major reason for the dooming of the professional lawn care industry that entirely depended upon its success. <http://wp.me/p1jq40-6ej>

Sadly, Mackintosh operated as a mere sales representative for Fiesta Herbicide. <http://wp.me/P1jq40-1JQ>

Mackintosh covertly advertised a bottle of Fiesta on the table in front of him during a press conference announcing the imposition of Manitoba's 2015 Provincial Prohibition.

See image and video in the next segments.

Fortuitously, on April 19th, 2016, the corrupt lunatic NDP was defeated by the Progressive Conservative Party of Manitoba, led by Brian Pallister, ending the 17-year NDP reign of anti-pesticide terrorism !

Observers expect that the Pallister Government will rescind prohibition in Manitoba ! <http://wp.me/p1jq40-9zz> <http://wp.me/p1jq40-9Ff>

## Fiesta Corruption In The Government Of Manitoba ?!?!

### Gord Mackintosh, Salesman For Failed Fiesta

Mackintosh was an elected official and Manitoba cabinet minister with New Democratic Party ( NDP ).

Mackintosh conspired to prohibit against pest control products that are federally legal, scientifically safe, practically non-toxic, and cause no harm.

He has covertly operated as a sales representative for Fiesta Herbicide.

NDP operates as the political shield for anti-pesticide & environmental-terrorist-organizations like Canadian Cancer Society and Canadian Association of Physicians for the Environment ( CAPE ).

How much money was donated to NDP for the covert advertisement of Fiesta ?!?!

Is this an example of corruption with a government official being allegedly remunerated by the manufacturer of Fiesta ?!?!

**Why Does  
Morden's Parks  
Manager Provide  
Unauthorized  
Covert Advertising  
For This  
Commercial  
Product ?!?!**

FORCE OF NATURE | DARING TO DEFY BY STELLAR  
National Organization Responding Against Herbicide  
PERSPECTIVE  
Natural Industries (NORAHG)

Morden is a city located in southern Manitoba, Canada near the United States border.

The city is located south of the Winnipeg Capital Region.

The city had a population of almost 9000.

Spring is just around the corner and communities are busy preparing their pest control programs for the 2018 season.

Shawn Dias is the Parks and Urban Forestry Manager for the city of Morden.

Dias said the city plans to, once again, use the product Fiesta Herbicide to [ suppress ] broad-leaved weeds throughout the community.

The use of Fiesta is part of Morden's commitment to apply environmentally friendly products [ !?! ] in public areas in keeping with the Manitoba's 2013 Provincial Prohibition.

Dias explained this will be the THIRD YEAR that Morden has used Fiesta, and said they are STARTING TO SEE SOME RESULTS, particularly with regards to dandelion control.

#### Background Information

### HOW LONG WILL IT TAKE FOR OFFICIALS IN MORDEN TO WAKE UP !?!!

Three years !?!! THREE YEARS !?!! It took THREE YEARS before Morden officials STARTED to see results with Fiesta Herbicide. In other words, Fiesta is almost TOTALLY INEFFECTIVE on many weed species. Why aren't officials waking up in Morden. Is this an example of corruption with a government official being allegedly remunerated by the manufacturer of Fiesta !?!!

Parks Manager Dias has fake-news about the failed Fiesta —

*It's a contact herbicide so it takes A LITTLE BIT LONGER [ THREE YEARS AND MORE !?!! ] to deplete the top plant growth and reduce the vigour in the root system, and those products are typically more expensive.*

#### Background Information

### FIESTA HERBICIDE IS INFERIOR & A DISMAL FAILURE !

Because of the imposition of reckless prohibition against conventional pest control products used in the urban landscape, home-owners and professionals are being arbitrarily

forced to rely on inferior green alternative pesticides like Fiesta. Unfortunately, prohibitions are often imposed under the pretext that Fiesta is somehow economical, efficacious, effective, lauded, less toxic, and low-risk when compared to conventional and prohibited products like Killex and Par III which contain the active ingredient 2,4-D — THIS IS FALSE ! In fact, observers have determined Fiesta is high-risk, ineffective, inadequate, more toxic, overwhelmingly condemned, and stunningly expensive ! Nonetheless, anti-pesticide activists and government officials, as well as the manufacturer of Fiesta, persist in perpetuating the lie that prohibitions are a success because Fiesta can somehow successfully replace conventional products such as Killex and Par III. Fiesta DOES NOT WORK when compared to conventional products like Killex and Par III. It is wrongly assumed that Fiesta somehow works as well as conventional pest control products like Killex and Par III — THIS IS FALSE ! Fiesta DOES NOT work since weeds are NOT controlled or destroyed ! Conversely, Killex and Par III DO control weeds and DOES destroy weeds. Fiesta does NOT work since it does NOT control weeds, it merely suppresses them. All rates of Fiesta have shown some re-growth of dandelions regardless of which of the rates were used. With Fiesta, there is considerable re-growth, back to similar levels before treatment. And, by the following spring, weed re-growth is back up to the same level regardless of the rates used. Fiesta DOES NOT WORK AT ALL unless excessive repeat applications are performed ! This is the reason why Fiesta is INFERIOR ! Moreover, tests have revealed that there is actually an eventual increase in weed cover, with all Fiesta rates, for species like dandelion and black medick. This is another reason why Fiesta is INFERIOR ! Not surprisingly, the vast majority of Fiesta users overwhelmingly condemn it. Furthermore, when compared to Killex and Par III, Fiesta requires more personal protection for the applicator, especially the eyes. Fiesta requires protective eye-wear, as well as waterproof gloves. By comparison, Killex and Par III require coveralls over a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes, but NO eye-wear. Fiesta cannot be considered safer when compared to conventional products like Killex and Par III.

Please Give Us A Product That Works

# Inferior Fiesta May Be Almost Totally Ineffective On Many Weed Species

FORCE OF NATURE | DARING TO DEFY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE  
National Organization Responding Against HUIE that conspire to destroy the Green space & other industries (NORAHG)

---

Parks Manager Dias has more fake-news about the failed Fiesta —

*It's REALLY DIFFICULT TO ERADICATE DANDELIONS but defiantly we've noticed some reduction in population's numbers with the longer-term use of that Fiesta product. [ ?!?! ]*

*We've been applying it twice per season for the LAST THREE SEASONS. [ ?!?! ]*

#### Background Information

### **HOW LONG WILL IT TAKE FOR OFFICIALS IN MORDEN TO STOP THE INSANITY ?!?!**

Three years ?!?! THREE YEARS ?!?! It took THREE YEARS before Morden officials STARTED to see results with Fiesta Herbicide. In other words, there were NO results. Everyone should remember the famous definition of insanity — doing the same thing over and over again and expecting different results. Are officials in Morden either insane or corrupt ?!?! Is this an example of corruption with a government official being allegedly remunerated by the manufacturer of Fiesta ?!?!

Dias added, however, the downside to using this particular contact herbicide is a HIGHER PRICE TAG.

He noted the COST of the City's weed and pest control program has jumped about TEN-FOLD.

#### Background Information

### **WHO CAN AFFORD THE #@!!% STUNNINGLY EXORBITANT COSTS OF INFERIOR FIESTA ?!?!**

Fiesta-dependent programs are stunningly expensive and are NOT ECONOMICALLY VIABLE. In essence, the use Fiesta has created catastrophic weed problems that have invaded city-owned & residential properties, and have inflicted garbage dump green spaces. These problems have come as no surprise to observers who have repeatedly warned that it is impossible to keep pesticide-free green spaces from becoming pest-infested & dangerous garbage dumps unless conventional pest control products are allowed. Who can afford this #@!!% ban nonsense ?!?! <http://wp.me/P1jq40-43V>

Dias has admitted that Fiesta Herbicide has FAILED after three years of use. What will Dias do next ?!?! Will he attempt a fourth year with the failed Fiesta ?!?! Clearly, this is Fiesta insanity — doing the same thing over and over again and expecting different results. Is this Fiesta insanity or Fiesta corruption ?!?! Is this an example of corruption with a government official being allegedly remunerated by the manufacturer of Fiesta ?!?!

---

[ Morden has nothing but failed attempts to reduce weeds ! ]

Dias said the City of Morden will also be relying on its Integrated Pest Management Plan [ IPM ] to control [ ?!?! ] weeds and other pests in public areas this spring and summer.

According to the City's web-site, the [ failed ] IPM will include preventative, mechanical, and biological controls over the use of chemicals for pest prevention, treatment, and management. [ See later segment. ]

Dias explained an example of where this plan would be used would be at the local baseball diamonds.

According to Parks Manager Dias —

*We would have irrigation, aeration, over-seeding, spring and fall fertilization, and mowing.*

*So those are definitely things that we've put in place to keep the turf healthy with helps to REDUCE the broadleaf weed species there. [ ?!?! ]*

He said if crews can apply these measures early, the chemical controls [ including the use of failed Fiesta ] become the LAST RESORT.

#### Background Information

#### **IPM WILL NOT WORK IN MORDEN !**

Unfortunately, IPM is #@!!% NONSENSE ! IPM is a DISMAL FAILURE, and WILL NOT WORK to control invasive weeds and destructive insects ! It will be impossible for Morden to keep its properties playable, pest-free, safe, and attractive by using IPM. In fact, failed IPM practices will necessitate stunningly exorbitant costs, possibly in the tens of thousands of dollars ! Is there hope in Morden ?!?! NO ! IPM is a DISMAL FAILURE, and DOES NOT, and WILL NEVER, control invasive weeds and destructive insects ! <http://wp.me/P1jq40-2bJ>

Dias has admitted that Fiesta Herbicide has failed after three years of use. And clearly, practices like irrigation, aeration, over-seeding, spring and fall fertilization, and mowing has also failed in reducing broad-leaved weeds. Fiesta is a failure ! IPM is a failure ! What will Dias do next ?!?! Will he attempt a fourth year with the failed Fiesta ?!?! Will he continue the failed IPM practices ?!?! Do Morden's officials realize that their baseball diamonds are inevitably doomed with failed Fiesta and failed IPM ! Clearly, this is Fiesta insanity and IPM insanity — doing the same thing over and over again and expecting different results.

### City Of Morden's Plan For Using Failed IPM Over & Over Again & Expecting Different Results

Retrieved From Morden Web-Site

March 2018

Selected And Adapted Excerpts

---

The Community Services Department is responsible for weed control on public property.

The City of Morden Policy CS-001 covers all the aspects of Weed Control.

The City is committed to ensuring that, when required, environmentally-friendly products [ ?!?! ] only will be applied in areas frequented by the public, such as parks, pathways, boulevards, and sports fields.

#### Background Information

#### **WHO DECIDES WHICH PRODUCTS ARE ENVIRONMENTALLY-FRIENDLY ?!?!**

The leading scientific experts confirm that conventional pest control products used in the urban landscape are scientifically-safe and will cause NO harm. Dr Keith R Solomon, Ph.D., is a Professor in the Department of Environmental Biology at the University of Guelph. Dr Solomon is also Director of the Centre for Toxicology. According to Dr Solomon, pest control products used in the urban landscape degrade rapidly, and DO NOT build up residues during the length of the season. There is NO accumulation of pest

control products in the environment. In fact, pests come back fairly quickly, within a few short weeks. For example, 2,4-D Herbicide must be applied at least twice per season, otherwise the weeds come back. The half-life of 2,4-D in soils is a matter of weeks. Another herbicide, glyphosate ( a.k.a. Roundup ) is no longer biologically active within hours of being sprayed on soil. Pest control products are known to dissipate extremely rapidly. Overall, there is NO accumulation over time of pest control products, and NO residues to be concerned about. When pest control products are used properly, there are NO harmful irreversible effects to health and the environment — they are SCIENTIFICALLY SAFE and will NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT. <http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha>

Ongoing research of improved products continues by the City of Morden Parks Manager [ ?!?! ] , and introduction of environmentally-friendly products will be incorporated whenever possible.

### Background Information

#### **IS PARKS MANAGER DIAS COMPETENT AS A RESEARCHER ?!?!**

Parks Manager Shawn Dias is a mere woodlot forester, with skills that include planting, pruning, wood boring insects, and skating rinks. He is the one that will decide which products are environmentally-friendly ?!?! Really ?!?! He has NO academic background, NO expertise, and NO training, concerning pest control products and turfgrass management. Relying upon Dias as a researcher on the selection of products is dubious at best. Moreover, Dias has admitted that Fiesta Herbicide has FAILED after three years of use. What will Dias do next ?!?! Will he attempt a fourth year with the failed Fiesta ?!?! Perhaps Dias should find ways to educate himself on issues concerning pest control products and turfgrass management.

<http://pesticidetruths.com/wp-content/uploads/2018/03/Reference-Manitoba-Morden-2013-08-26-Appointment-Of-Shawn-Dias-As-Parks-Manager.pdf>

All aspects of the weed control program are carried out within the annual operating budget.

Public notice is hereby given that the City of Morden may conduct the following Pesticide Control Programs during 2018.

The failed Integrated Pest Management Plan ( IPM ) has been developed for the City and will act as a guide for pest prevention, treatment, and management. [ ?!?! ]

One of the goals of the IPM is to reduce the use of chemical controls by means of using preventative, mechanical, and biological controls.

Shawn Dias is the Parks and Urban Forestry Manager for the city of Morden.

The City will adhere to provincial legislation and regulations pertaining to the use and implementation of a pesticide program.

**1.** For the control of noxious weeds within the City of Morden and in accordance to the Noxious Weed Act, Environment Act, and the Non-Essential Pesticide Use Regulations between May 1st and October 31st the following herbicides may be used —

## Background Information

### COVERT ADVERTISEMENT OF FIESTA HERBICIDE !

Why has Morden included an information sheet and video about Fiesta on its website, and yet, provides absolutely NO additional information regarding any of the other products listed. How much money has been donated to Morden for this covert advertisement of Fiesta ?!?!

- Par III ( mecoprop, 2,4-D, dicamba )

<http://pesticidetruths.com/wp-content/uploads/2018/03/Label-Par-III-Turf-Herbicide-Solution-24-D-mecoprop-dicamba-2016-02-12.pdf>

- Roundup ( glyphosate )

<http://pesticidetruths.com/wp-content/uploads/2013/04/Label-Roundup-Original-Liquid-Herbicide-2007-11-16.pdf>

**2.** To control Larval Mosquitoes in stagnant/standing water, within the City of Morden and 1 mile beyond the city boundary on public property, rights-of-way, and ditches between May 1st to October 1st the following biological larvicides may be used include —

- Aquabac ( *Bacillus thuringiensis var israelensis* — *Bti* )

<http://pesticidetruths.com/wp-content/uploads/2018/03/Label-Aquabac-Biological-Larvicide-Bti-2015-03-24.pdf>

**3.** To control adult *Culex tarsalis* Mosquitoes carrying West Nile Virus along streets and lanes, city parks, golf courses, cemeteries, and rights-of-ways within the City boundaries between May 1st and October 31st by way of ultra-low volume mist sprayers the following insecticide may be used —

- DeltaGuard 20EW

<http://pesticidetruths.com/wp-content/uploads/2018/03/Label-DeltaGard-20EW-Insecticide-deltamethrin-for-mosquitoes-2017-05-17.pdf>

**4.** To control Elm Bark Beetles, the carrier of Dutch Elm Disease, by spraying Pyrate ( chlorpyrifos ) onto the lower 50 cm of elm trees on both public and private property from approximately June 1st until October 15.

Additional Public Notice will be provided prior to basal spraying program.

<http://pesticidetruths.com/wp-content/uploads/2013/04/Label-Pyrate-480EC-Insecticide-2015-02-10.pdf>

5. To control other insect pests between May 1st and October 31st the following may be used —

- Safer's Trounce Insecticidal Soap ( potassium salts )

<http://pesticidetruths.com/wp-content/uploads/2018/03/Label-Safer%E2%80%99s-Trounce-Insecticide-Concentrate-fatty-acids-2014-04-07.pdf>

- Dipel 2X DF ( *Btk* )

<http://pesticidetruths.com/wp-content/uploads/2018/03/Label-DiPel-2X-DF-Dry-Flowable-Wettable-Granules-Biological-Insecticide-Btk-2017-03-29.pdf>

6. To prevent Dutch Elm Disease the following fungicide will be injected into the root flare of American Elm trees —

- Arbotect 20-S

<http://pesticidetruths.com/wp-content/uploads/2018/03/Label-Arbotect-20-S-Fungicide-Suspension-thiabendazole-2012-01-30.pdf>

7. To control Emerald Ash Borer, a system insecticide containing TreeAzin ( azadirachtin ) will be injected into the basal area of ash trees.

<http://pesticidetruths.com/wp-content/uploads/2018/03/Label-TreeAzin-Systemic-Insecticide-azadirachtin-2018-02-19.pdf>

## **We Speak The Whole Truth About Manitoba From An Independent Perspective**

We are the National Organization Responding Against HUJE that conspire to destroy the Green space and other industries ( NORAHG). As a non-profit and independent organization, we are environmentalists who are dedicated to reporting about truth-challenged pesticide-hating fanatics ( HUJE ) who conspire to destroy businesses that are dependent on the use of safe and effective conventional pest control products. We also report on the work of several highly-rated leading experts who have recognized expertise,

training, and background in matters concerning pest control products, and who promote environmental realism and pesticide truths.

Not surprisingly, enviro-fanatics have demonstrated that they are incapable of processing overwhelming scientific evidence. Should we trust these fanatics, who conveniently ignore scientific evidence, and attempt to impose their politicized-doctrines and twisted life-style choices against our society ?!?!

NORAHG was the brain-child of Mr William H Gathercole and his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder. We dare to defy the pesticide-hating fanatics by exploring the whole truth from an independent perspective on The Pesticide Truths Web-Site ... <http://pesticidetruths.com/> If you wish to receive free reports on issues that concern you, please contact us at ...
